PRATAPA CHANDRA GHOSHA,
Registrar of Companies.

The 26th April 1893.

RESOLUTION ON THE INLAND EMIGRATION REPORT FOR THE YEAR 1892.

GENERAL DEPARTMENT, EMIGRATION No. 343T.—G.

Darjeeling, the 30th June 1893.

RESOLUTION.

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1892.

1. Dr. Macleod's Report on Inland Emigration, which has been submitted with punctuality, gives an account of the recruitment of contractors' and sardari coolies to the labour districts on the lines usually followed in these reports. A special feature of the present report is the introduction of a section dealing with free emigration, which brings together a considerable amount of useful information collected by District Officers on a subject ordinarily beyond the reach of official statistics.

Recruitment.

2. Under the licensed contractors' system of recruitment, there were 7 licensed contractors in 1892, against 6 in the previous year. In 1892, 31 recruiters licensed on behalf of these contractors, registered 4,712 immigrants as compared with 8,754 immigrants registered in the previous year by 47 recruiters. Under the certificated garden sardars' system, 3,609 sardars and 163 sardarnis registered 13,408 immigrants, the corresponding numbers in 1891 being 10,859 immigrants registered by 1,733 sardars and 61 sardarnis. In last year's Resolution, the Lieutenant-Governor observed the tendency towards an expansion of the contract system, accompanied by a falling off in the number of garden sardars. The figures given above seem to indicate a tendency to revert to the sardari form of recruitment as a means of obtaining labour for the labour districts. The reasons which have induced garden managers to double the number of sardars employed are not very apparent, and the Lieutenant-Governor will be glad to receive any further information which the Superintendent may be able to supply on this subject. The system of free emigration, authorized by section 7 of the Inland Emigration Act I of 1882 is reported to have been extensively resorted to, and is said to have been liable to many abuses. This subject has largely engaged the attention of Government during the past year, and the adoption of executive measures for the prevention of malpractices in the recruitment of free emigrants has been recognized as a necessity. Revised rules under Act I (B.C.) of 1889 dealing with the question have been drafted, and are now under the consideration of the Government of India.

Statistics.

3. The following statements show in a concise form the chief statistics of the despatch to Assam, Sylhet, and Cachar of emigrants under the contract, sardari, and free systems:—

Emigrants embarked.

Class.	At Goalundo for—								At Dhubri for Assam.		Grand Total.	
	Assam.		Sylhet.		Cachar.		Total.					
	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.
Contractors'	6,121	3,329	193	170	1,067	663	7,381	4,162	Nil	Nil	7,381	4,162
Sardari	5,655	8,067	600	1,258	2,525	3,313	8,780	12,638	1,668	1,485	10,448	14,123
Free	11,532	15,822	5,387	7,377	1,478	2,705	18,397	25,904	17,740	23,062*	36,137	34,400†

* This number includes 14,566 emigrants embarked at Goalundo for Assam, landed at Dhubri *en route*, and re-embarked at Dhubri.

† From the total, 48,966, has been deducted; 14,566 re-embarked at Dhubri.

Emigrants Disembarked.

Class.	*Viâ* Goalundo at final landing stations in—								*Viâ* Dhubri at final landing station in Assam.		Grand Total.	
	Assam.		Sylhet.		Cachar.		Total.					
	1891	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.
Contractors'	6,111	3,324	193	170	1,012	656	7,316	4,150	Nil.	Nil	7,316	4,150

Free	......	15,804	11,456	7,377	3,119	2,703	14,577	25,884	17,740	23,007*	32,317	34,325†

* This number includes the emigrants from Goalundo who were embarked at Dhubri.
† From the total, 48,891, has been deducted the number re-embarked at Dhubri.

Comparing these figures with the figures for recruitment given in the preceding paragraph, the following statement traces the history of coolies recruited under the contractors' and sardari systems from the time of their recruitment until their disembarkation:—

Class.	Emigrants recruited.		Emigrants embarked.		Emigrants disembarked.	
	1891.	1892.	1891.	1892.	1891.	1892.
Contractors' ...	8,754	4,712	7,381	4,162	7,316	4,150
Sardari ...	10,859	13,408	10,448	14,123	10,386	14,031
Total ...	19,613	18,120	17,829	18,285	17,702	18,181

The total number of emigrants registered in 1892, under the emigration Act I of 1882 was 18,120 against 19,613 in 1891. The total number embarked, including those registered in the previous year, but not embarked until the year under review, was 18,285 as compared with 17,829 in 1891, while the number disembarked was 18,181 against 17,702 in 1891. Between registration and embarkation the total number of casualties was 836 or 4·6 per cent., against 1,352 or 6·8 per cent. of the previous year. During the passage the casualties among contractors' coolies were 12 and among sardari coolies (making allowance for 3 births which occurred) 95, the percentage being 0·2 and 0·6 respectively, against 0·8 and 0·5 in 1891. Among the 34,400 free emigrants shown in the statements above to have been embarked, 81 casualties occurred. The figures for free emigrants are, however, known to be inaccurate, and the Superintendent has no doubt that a much larger number of free emigrants was imported than has been ascertained.

Health.

4. The Lieutenant-Governor observes with satisfaction that the Medical Inspector of Emigrants again reports favourably on the licensed contractors' depôts in Calcutta. Dr. McConnell states that the depôt buildings were kept in good and serviceable condition by the contractors, and that great attention has been paid to conservancy and general sanitation. No complaint was made to the Inspector as regards either the quantity or the quality of the food supplied to the emigrants, and the water-supply is said to be excellent. The percentages of sickness and mortality to total population were 2·3 per cent. and 5·7 per mille respectively, as compared with 2·7 per cent. and 2·1 per mille in the preceding year. Thus, although the percentage of sickness was slightly less, the mortality was considerably higher than in 1891. Of the 27 deaths, 9 were due to cholera, and 13 were of infants or young children.

5. The Embarkation Agent and Medical Inspector at Goalundo has given a satisfactory account of the depôts for the accommodation of emigrants at that place. As regards the arrangements at Dhubri, information is furnished to the Assam Administration and is not available for the present report.

6. Of the 3,329 contractors' coolies embarked for Assam, 4 died between Goalundo and Assam, while 5 deaths occurred among the 833 embarked for Sylhet and Cachar. These figures compare favourably with those of the previous year.

7. On the other hand the figures of mortality among sardari emigrants who travelled *viâ* Goalundo do not compare so favourably with those of 1891. Of these, 12,815 left the districts of recruitment in charge of certificated garden sardars. During the journey to Goalundo 11 died, the total number of casualties, including desertions and those left behind, being 113. Prior to embarkation 30 more casualties and 2 births occurred, leaving 12,677 emigrants to embark, of whom 12,668 actually embarked before the close of the year. Among the 8,067 who embarked for Assam, 58 casualties occurred, the percentage being 0·71 against 0·56 in the previous year; 43 emigrants died from cholera and 8 from other causes, making a death-rate of 0·63 against 0·53 in 1891. Of the 4,601 sardari emigrants embarked for Sylhet and Cachar, 6 deserted and 24 died, the total casualties being 30. Of the 24 deaths 19 were due to cholera. The percentage of mortality was 0·52 compared with 0·88 in 1891.

8. It is stated that 25,904 free emigrants embarked at Goalundo against 18,397 in 1891. Of these, 20 are reported to have died between Goalundo and Assam, none between Goalundo and Sylhet, and only 2 between Goalundo and Cachar. These returns, however, are of doubtful accuracy and can scarcely be accepted as representing the real facts.

9. All sardari emigrants and free emigrants, who do not avail themselves of the Goalundo route, proceed direct to Dhubri for embarkation for the labour districts in Assam. The number of sardari emigrants who adopted the Dhubri route was 1,457. Of these 9 died on the journey to Dhurbi, and at Dhubri 3 more deaths occurred. Other casualties occurred, and a number of emigrants remained undisposed of at the close of the previous year, so that altogether 1,455 actually embarked. During the voyage 7 deaths, all due to cholera, occurred, giving a death-rate of 0·48. The percentage of mortality among the 23,062 free emigrants who embarked at Dhubri is said to have been 0·23 only.

Administrative.

10. The Superintendent alludes in his report to three administrative measures which were carried out during the year. The first two of these related to the amendment of the rules with a view to ensuring the supply of warm clothing to emigrants while travelling to the labour districts, and to facilitating the vaccination of unprotected emigrants. The third measure referred to was the issue of an important notification by the Government of Madras, extending, with the previous sanction of the Governor-General in Council, the provisions of the Inland Emigration Act I of 1882 to the district of Ganjam with effect from the 1st of April 1892.

Departmental.

11. Dr. R. Macleod, who was confirmed in the appointment of Superintendent of Emigration on 29th March 1892, held charge of the duties of that office throughout the year. The thanks of the Lieutenant-Governor are due to him for the present report, and for the efficient manner in which he has looked after the interests of emigrants during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1892.

MUNICIPAL DEPARTMENT—SANITATION.

Dated Darjeeling, the 1st July 1893.

RESOLUTION No. 2223S.

READ—

The Report of the Sanitary Commissioner, Bengal, for the year 1892.

Read also—

The Report for the year 1891, and the Resolution recorded upon it.

Vital statistics.

1. The Sanitary Commissioner of Bengal may be compared to a skilled workman labouring with indifferent tools which break in the using. Few of his deductions have hitherto been accepted without the reservation that the figures on which they are based were unreliable. It cannot be said that the figures with which the Sanitary Commissioner deals in the report under review are free from error, but a decided improvement is visible in the registration of vital statistics during the year, due chiefly to the change of system introduced from 1st January 1892, by which the work of registration was conducted entirely by the agency of the Police, and births were registered for the first time, not only in urban, but also in rural areas. The appendices to the report contain therefore, for the first time, figures for births and deaths in each registration circle, and the Lieutenant-Governor desires to call the attention of all local bodies to these interesting and valuable statements in which, however, the shortcomings of many circles are clearly demonstrated.

Registration of births. Towns.

2. The number of towns in which births were registered in 1892 was 145, with a population of 2,768,381, as compared with 141 towns having a population of 2,716,424 in the previous year. The number of births recorded was 70,088, giving a ratio of 25·31 per mille of the population, against 58,317, or a ratio of 21·46 per mille, in the previous year. After making every allowance for the fact that towns (though many of these areas hardly deserve the title) always show a smaller birth-rate than rural areas, on account of the larger proportion of males which they contain, it is impossible to doubt that these figures are far below the mark. The highest results were returned by the towns of Siwan, Jamui, and Sasaram, in all of which the recorded birth-rate exceeded 40 per mille, and 19 other town areas, of which 9 are in the Patna Division and only 4 in Bengal, give a rate of 35 per mille or more: in 1891 only 10 towns exceeded this rate. The good results obtained in Siwan (47·71) show clearly how great an improvement can be effected by the exercise of care and attention on the part of the local authorities, and the Lieutenant-Governor expects that this care and attention shall be accorded: no municipality will be considered to be working satisfactorily in which so important a branch of the administration is neglected. In 5 towns, viz., Nasirabad, Darjeeling, Jessore, Nalchiti, and Jhalokati, the rate recorded was below 10 per mille, and in 36 towns it ranged between 10 and 20 per mille. In the towns of Baruipur, Birnagar, Jessore, Mohespur, Chanduria, Sherpur, Kurseong, Muktagacha, and Malda, the number of births recorded during the year was below 100, while in Nalchiti only 14 births were recorded and in Jhalokati only 11. This means that registration in these towns was practically neglected.

Ditto. Rural areas.

3. The total number of births recorded in rural areas was 1,911,872, giving a birth-rate of 28·27 per thousand, which, though naturally better than the result in town areas, is still doubtless inaccurate. Out of the 558 rural circles which profess to register births, only 27 have returned birth-rates exceeding 40 per mille. In the rural circles of Serampore, Barrackpore, and Patna, the number of births registered during the year was below 100, while in that of Nawabganj only 22

infants are said to have been born. The absurdity of such figures is patent on the face of them, and it is aggravated by the fact that they occur in places which, though within reach of intelligent supervision, can never have received it.

Births according to sex.

4. In both town and rural areas together, the male births numbered 1,032,902, and the female births 949,058, being 108 male births to every 100 female births, against a ratio of 110 in the previous year. These figures confirm the indication afforded by the previous paragraph, viz., that the deficiency is greatest in the registration of the births of female infants. The census figures for 1891 show that in that year the proportion of female children living to every 1,000 male infants under five years of age was 1,086. Assuming, for the sake of argument, that the mortality among infants of both sexes is equal up to that age, and that the registration of male births in 1892 was correct, these figures lead to the inference that there was a deficiency in the registration of female births of 17 per cent., and that the true number was not 949,058, but 1,115,534. This correction, if accurate, raises the birth-rate for both sexes to 30·5 per mille—a figure still low, but nearer the truth than 28·15.

5. Compared with the statistics elsewhere, the birth-rate in Bengal was lower than in any Province in India, with the exception of Madras and Burma, as the following figures will show:—

Bengal ...	... 28·15	Punjab ...	... 38·16
Madras ...	... 25·1	Central Provinces	... 38·39
Bombay ...	... 34·57	Assam ...	... 31·05
North-West Provinces...	36·17	Burma ...	... 23·07

True birth-rate.

These ratios show how deficient birth registration is in Bengal relatively to other Provinces, and of its absolute deficiency there can be as little doubt. The Bengal Census Report of 1881 showed, with much apparent probability, that the birth-rate of the Province was "not less than 45 per mille," and this conclusion was confirmed by the conclusions of an English statistician, Mr. Hardy, to whom the census figures and the vital statistics of the Province were submitted in London. After introducing the necessary corrections deduced from a careful examination of a small body of reliable figures, Mr. Hardy evolved a birth-rate of 47·9 per mille. If this conclusion is accepted, the birth registration of 1892 was nearly 20 per mille below the truth.

Registration of deaths.

6. In 1892 the total number of deaths registered throughout the Lower Provinces, in town and rural areas together, was 2,247,275 as compared with 1,896,261 in 1891, giving an annual death-rate of 31·92 and 26·94 respectively. From the statistics given in paragraph 4 of the Sanitary Commissioner's report, it appears that the highest death-rate recorded is 49·48 per mille in the Punjab, and the rates in the other Provinces were as follow:—Assam 34·21, the Central Provinces 34·14, the North-West Provinces 34·11, and Bombay 32·50, while Madras and Burma show only 22 3 and 18·83. The true rate for Bengal, estimated by Mr. Bourdillon in 1881, was "about 34 per mille," and by Mr. Hardy 39·9, being 41·7 for males and 38·0 for females. The sex ratios recorded in Bengal in 1892 were 34·15 and 29·72 per mille respectively. The figures in paragraph 4 go to show that in Bengal the number of female births exceeds that of males, and in consequence the number of deaths should be in excess also, especially as a considerable proportion of the males born in Bengal die outside the Province. The proved longevity of females is a factor to be counted with on the other side of the argument; but, even after giving full weight to this consideration, it is clear that the deaths of females are badly reported.

Deaths in towns.

7. The recorded death-rate in urban circles increased from 27·28 to 33·57; and that in rural circles from 26·93 to 31·85. In towns the figures recorded ranged between 59·31 at Muzaffarpur and 14·52 in Tangail. In no less than 41 out of the 145 towns there was a falling off in the number of deaths reported. In 60 towns, as against 34 in 1891, the rate was above 35, while in the towns of Madaripur,

Dinapore, South Subarban, Serajganj, Muktagacha, Vishunpur, Darjeeling, Cossipore-Chitpur, Nalchiti, Kishorganj, and Tangail the recorded death-rate was below 20 per thousand, which shows unmistakeably that the work of registration in those towns was very much neglected.

Deaths in rural areas.

8. The districts whose rural areas show the highest mortality are Backergunge (43·88), Balasore (43·78), Jessore (42·30), Darjeeling (41·73), Rajshahi (40·99). Nine others, viz., Champaran, Palamau, Cuttack, Puri, Muzaffarpur, Lohardaga, Monghyr, Pabna, and Nadia, have rates above 35 per mille, and in 16 more they exceed 30 per mille. In most of these districts the higher death-rates denote increased mortality, but in some it is doubtless due to better registration. Balasore, Cuttack, and Puri suffered severely from cholera, as did Muzaffarpur, Backergunge, and Nadia to a less extent. Fever was very fatal in Rajshahi, Jalpaiguri, and Jessore, while the position on the list of Darjeeling is due to a combination of fever and dysentery. Turning to smaller units than the district, some rural areas have reported a mortality which should have been noticed by the Sanitary Commissioner. In 90 instances the rates reported are between 40 and 50 per mille, and in 21 others they exceeded 50 per thousand. The worst cases are those mentioned in the margin, and the figures represent so heavy a mortality that the Lieutenant-Governor must ask for a further report showing to what the high death-rate was due in each case, and what steps were taken to abate the ravages of diseases both at the time or since.

Rural area.	District.	Rate.
Darjeeling	Darjeeling	72·23
Khetlal	Bogra ...	66·34
Kalupol	Nadia	65·37
Matbari	Backergunge ...	65·26
Semaria	Hazaribagh	61·33
Satkopa	Jessore	59·10
Golachipa	Backergunge	56·03
Ranka	Palamau ...	55·66
Kotchandpur	Jessore	55·53
Manullabazar	Murshidabad	55·48
Barhanuddin Havildar ...	Backergunge . . .	54·95
Chandbali	Balasore	54·08
Dumaria	Khulna	54·04
Hardi or Lawria	Champaran	53·24
Gorabazar	Murshidabad	52·93
Basudebpur	Balasore	52·12
Hattia	Noakhali	51·87
Tundwa	Hazaribagh .	51·83
Singur	Hooghly.	51·68
Aul	Cuttack	50·50
Lalpur	Rajshahi	50·06

Infant mortality.

9. The insanitary conditions, according to Western ideas, under which native children are brought into the world, and the constitutional weakness of infants born of parents frequently immature, cause year by year a lamentable mortality among infants under one year old. In 1892 the death-rate was higher than usual, being 168·29 per mille, against 132·95 in 1891, and 113·52, the average of the quinquennium 1887—91: part of the increase is doubtless due to better registration.

Death-rate from various causes.

10. The following statement shows separately the death-rate from the principal diseases during the year, compared with that of the previous year and the quinquennium 1887—91:—

Causes of death.	In 1892, per mille.			In 1891, per mille.			In 1887—91, per mille.		
	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.
Cholera	5·05	3·62	·68	4·54	3·20	3·26	3·33	2·30	2·34
Small-pox	·48	·31	·31	·48	·22	·23	·32	·12	·13
Fever	18·57	23·01	22·84	12·55	19·21	18·94	10·45	16·61	16·37
Dysentery and diarrhœa	2·87	·59	·68	2·67	·52	·61	2·51	·62	·69
Injury	·44	·39	·39	·47	·41	·41	·44	·40	·40
Other causes ...	6·13	3·91	4·00	6·54	3·35	3·47	5·62	3·10	3·20
All causes	33·57	31·85	31·92	27·28	26·93	26·94	22·69	23·18	23·16

The most noticeable aspect of these figures is the increased mortality due to cholera and fever. The causes assigned are the excessively insanitary condition of the towns, and in rural areas defective drainage and bad drinking water, and, no doubt, these are the true causes. They are susceptible of remedy with money and systematic effort. How the money is to be provided, and what the sanitary organization should be for rural areas, are points to which reference will presently be made; here the Officiating Lieutenant-Governor would say that as sanitary improvements are expensive and not always acceptable to the people, it behoves all local authorities to concentrate their efforts on that improvement which is never unacceptable, never misunderstood, and never ineffectual in preventing disease. That improvement is the provision of good drinking water: other expensive sanitary measures can wait.

Cholera.

11. During the year 259,398 deaths from cholera were recorded, against 229,575 in 1891, which again was the worst year since 1876: the average of the five years 1887—91 was 165,172. It is probable that the excess is largely due to improved registration, but at the same time there is no doubt that there was a real increase of the disease in 1892, due in many districts to the deficient rainfall in the earlier months of the year, which caused wells and tanks everywhere to run dry and drove the people to drink impure water. The disease visited every district and attacked altogether, with more or less severity, 24,553 villages. The prevalence of cholera during every month of the year, its seasonal incidence, and its comparative prevalence in each district in Bengal in 1892, have been illustrated by the Sanitary Commissioner in a series of carefully prepared and interesting diagrams. The most remarkable feature in the cholera history of the year is the excessive mortality in the Orissa Division, which was comparatively free from the disease in 1891, and the immunity of Purnea, Rangpur, and Jalpaiguri, which suffered severely in that year. The ratio of deaths from cholera in the Balasore district, where it was very clearly attributable not to pilgrim infection, but to the deficiency of water, was no less than 15·0 per thousand; in Puri it was 11·30, and in Cuttack it was 10·98. The districts which suffered least were Purnea, Dinajpur, Bogra, Rangpur, Malda, Darjeeling, and Jalpaiguri, where the registered mortality was 282, 293, 160, 593, 336, 132, and 408 respectively. The extracts from the Civil Surgeons' reports given by the Sanitary Commissioner throw no new light on the etiology of the disease, though, in the graphic report of Dr. Kelly, the Civil Medical Officer of the Sonthal Parganas, the genesis of the disease in several striking cases is clearly demonstrated. The localities affected were invariably found to be in an insanitary condition, the water-supply impure and insufficient, and the inhabitants frequently predisposed to disease, being enfeebled by exposure and scanty and unwholesome food.

Small-pox.

12. The mortality from small-pox during 1892 is the highest on record since 1882. The total number of deaths reported to have occurred from this disorder was 22,359 or ·31 per mille, against 16,193 or ·23 per mille in 1891, and an average ratio of ·14 per mille for the nine years 1882 to 1890. As in 1891, the disease was most prevalent in Puri, Cuttack, Lohardaga, and Midnapore, where vaccination is said to have not made much progress owing to the strong prejudices of the people. The largest number of deaths occurred among children under six years of age. The floating population of Calcutta continued to enjoy great immunity from the disease. A great development of vaccination is anticipated by the Sanitary Commissioner from the new arrangements sanctioned during the year, by which the Civil Surgeon has now full control over these operations in each district: it is obviously too soon yet for the scheme to have had any great effect.

Fever.

13. Fevers prevailed to a very large extent during the year under review, and proved more fatal than in any year within the past decade. The recorded mortality from this cause was 1,607,716, or a ratio of 22·84 per mille of the population under registration, against 1,333,395, or a ratio of 18·94 per mille in 1891, and the Sanitary Commissioner points out that the death-rate is steadily increasing, for

it was 15·17 per thousand for the last ten years and 16·37 for the last five. The high death-rate of 1892, which is nearly three-fourths of the entire death-rate of the province is again attributed chiefly to [illegible]

([illegible]), Malda ([illegible]), Palamau ([illegible]), Monghyr ([illegible]), Purnea (28·[illegible] Champaran (27·93), Bhagalpur (27·49), Darjeeling (27·02), Hazaribagh (26·[illegible] Backergunge (26·36), Muzaffarpur (26·29), and Nadia (25·84). The first six of these districts and Nadia were the seven most fever-striken districts in 1891 also. In Cuttack (14·84), Saran (14·01), Balasore (14·21), Singhbhum (13·21), Howrah (12·98), and Puri (6·71), the mortality was lowest. The comparative freedom of Orissa from fever is most providential, since, as has already been pointed out, this Division suffers severely from cholera and small-pox. The lowest mortality from fever, in the past as in previous years, occurred in the month of June, from which time it gradually rose till it reached its maximum during the drying up of the rains in November.

Fever mortality in the Terai.

14. The high rate of fever mortality in the Jalpaiguri and Darjeeling Terai has been brought out prominently in the present report, as desired in the Resolution for 1891, and the statistics furnished, especially those for the Darjeeling Terai, which have been carefully prepared and for which the thanks of Government are due to Surgeon-Lieutenant-Colonel E. G. Russell, the Civil Surgeon of Darjeeling, afford an interesting study of the comparative unhealthiness of the Terai and non-Terai regions. In the case of Jalpaiguri the statistics, owing to defective registration, are unreliable, and the Lieutenant-Governor hesitates to accept the conclusion drawn by the Civil Medical Officer, Dr. Ashe, that "the Duars enjoyed a greater immunity from fever." That fever is terribly prevalent in the Terai, the region of malaria, is indisputable, and the following figures furnished by Dr. Russell for the Darjeeling district show this conclusively:—

Name of subdivision.	Deaths per 1,000 from fever in 1892.
Darjeeling—non-Terai	20·8
Kurseong—Midway	26·1
Siliguri—Terai	41·7

Not the least important of the statistics submitted by Dr. Russell are those which show the mortality from fever as compared with that from other causes in the various tea-gardens in the Terai. The extraordinarily high death-rates from fever in certain gardens seem to point to the necessity for closer supervision in regard to the wants of the labourers employed on them, and the attention of the Deputy Commissioners of Jalpaiguri and Darjeeling will be specially drawn to the facts and figures in paragraph 38 of the Sanitary Commissioner's Report. The matter attracted the notice of the Lieutenant-Governor some time since, and orders have already issued prescribing the regular submission of death reports from all tea estates as well as other registering circles: the Lieutenant-Governor hopes that a careful discharge of this important duty will justify the concessions which Sir Charles Elliott allowed the tea-planters of the Western Duars in respect of the appointment of chaukidars.

Mortality from other causes.

15. The mortality from dysentery and diarrhœa, injury, and other causes was 48,491, 27,704, and 281,607 respectively, against 43,183, 29,283, and 244,692 in 1891. As usual, Darjeeling suffered most from dysentery and diarrhœa, Balasore, Puri, Howrah, and Lohardaga coming next.

Expenditure on urban sanitation.

16. The total amount expended by municipalities on sanitation during 1892, exclusive of the amount spent on the maintenance of roads, whose connection with sanitation

is sometimes very slender, was Rs. 14,78,714, against Rs. 13,37,569 in 1891, showing a total advance of Rs. 1,41,145. The figures are given below:—

Head of Expenditure.	Total expenditure.		Difference.	
	1892.	1891.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
On conservancy, including latrine	3,82,229	3,46,410	35,819	...
Ditto establishment ...	3,76,588	3,54,051	22,537	...
„ Drainage	98,600	94,732	3,868	...
„ Water-supply	1,50,641	1,12,027	38,614	...
„ Disposal of the dead ...	6,774	6,923	......	149
„ Markets and slaughter-houses	16,734	13,190	3,544	...
„ Vaccination	18,200	17,510	690	...
„ Treatment of the sick ...	2,56,752	2,41,032	15,720	...
Other sanitary works ...	,72,196	1,51,694	20,502	...
Total ...	14,78,714	13,37,569	1,41,145	...
On construction, maintenance and repair of roads	5,03,115	4,52,322	50,793	...
Total, including roads ...	19,81,829	17,89,891	1,91,938	...

Out of nearly 15 lakhs of rupees spent on sanitation, only a lakh and a half are shown against water-supply. That does not seem to Sir Antony MacDonnell to be an adequate or satisfactory allotment; and he trusts that Municipal Commissioners will take this matter into their serious consideration. In his opinion, by far the most important object of municipal administration is the provision of a good water-supply for the people of the town.

17. The town in which the largest proportion of municipal income was devoted to original sanitary works was Faridpur (48·64), while, on the other hand, in 44 municipalities nothing at all was spent under this head. The town in which the largest portion of municipal income was devoted to sanitary works of an annually recurring nature was Nasirabad (67·05) and the lowest place is taken by Joynagar (4·41).

Rural sanitation.

18. In Appendix IV is given a list of sanitary works executed in towns and rural areas by District Boards and Municipalities, and by private individuals. The total cost of the works undertaken and completed by the several local bodies is said to be Rs. 3,34,658, while that of those in progress is estimated at Rs. 62,874. The total amount spent by private individuals on sanitary works was Rs. 3,19,469, the most important work undertaken being the construction of water-works at Nasirabad in the Mymensingh district by Raja Surja Kanta Acharjya, Bahadur, at a cost of Rs. 1,42,764. On the subject of rural sanitation Dr. Gregg remarks as follows:—

"Rural sanitation is unknown in these provinces. No attention whatever is paid to conservancy or water-supply, and stagnant ponds are allowed to exhale miasma everywhere. The people are cleanly enough as regards their persons and the interior of their houses, but the surroundings of their villages are often appallingly filthy. This has been and continues to be pointed out to them as the cause of their unhealthiness, but it seems to be of no use talking, and of still less use writing pamphlets for their guidance; they are perfectly happy, though unhealthy, in the midst of their insanitary surroundings, and will not voluntarily exert themselves in the slightest to attend to the most simple sanitary precautions. Wells are dug for them and tanks are excavated, but they will not set them apart for special purposes, and obstinately use the water of the same tank for washing their persons and bathing their bodies, and washing their clothes and bathing and watering their cattle, and cleaning their utensils, and for drinking and culinary purposes. So long as this utter disregard continues, there must be a large amount of sickness, disease and death in our villages. Doubtless an improvement in this as in other respects will take place with the spread and advancement of education, but until then no real reform can, I am afraid, be effected unless the panchayat or village headmen are vested with authority to prosecute residents for non-compliance with sanitary regulations. It is manifestly beyond the powers of District or Local Boards to carry such measures into execution."

If this be a true description of the sanitary condition of Bengal villages, as it undoubtedly is, and if the District and Local Boards are impotent to deal with the situation, as they confessedly are, then the time has come to strengthen the hands of these bodies and provide that village organisation without which rural sanitation is beyond our reach. The sanitary question in Bengal, in its various phases of silting-up deltaic rivers, obstructed drainage, uncleanly towns and unhealthy villages, is the pressing question of the day, and the solution will not grow easier by being postponed.

19. To the great subject of drainage the Officiating Lieutenant-Governor will make no further reference here, though he will not overlook it; but in regard to village sanitation he wishes to say that the time has surely come to call into existence those village Unions which were specially devised in the Local Self-Government Act to deal with such simple matters as the provision of pure drinking-water for the villagers and the maintenance of the village site in a cleanly state. In every other Province of the Empire action has been taken in this direction; in Bengal alone no adequate effort has yet been made to promote rural sanitation.

20. It is true that the funds at the disposal of District Committees and Local Boards are, at present, not always adequate to meet existing requirements. The case of primary education may be specially instanced as illustrating the deficiency of existing funds. And it would be wrong to expect these funds to supply the money necessary for more than the experimental beginnings of a scheme of village sanitation. It seems also hopeless to expect that adequate assistance can be given from Provincial Funds, which are strained to meet Provincial responsibilities, as will appear from the budget estimates laid before the Bengal Legislative Council last March. If anything real and effectual, then, is to be done for the sanitation of Bengal villages, it will not do merely to call Village Unions into existence, indispensable a measure though this may be; we must also devise means to provide these Unions with the wherewithal to work.

The Officiating Lieutenant-Governor does not on this occasion offer to the public any scheme for providing the necessary funds for an efficient system of village sanitation for Bengal, Bihar and Orissa, though he hopes to take an early opportunity of putting forth certain considerations by which public opinion may be directed into channels likely to lead to some tangible and practical results. His object is to place before the public the urgent necessity which exists for action, and to invite criticism as to the direction in which action can best be taken both in regard to the provision of funds and to the general character of the sanitary improvements to be effected. On both points he has indeed formed some provisional views; but these are liable to alteration with reference to the opinions with which he expects to be favoured on this important question.

The Sanitary Board.

22. Owing to the frequent absence of some of the members on tour, the Sanitary Board was not able to hold more than one formal meeting during the year. Much business was, however, done in an informal way. The most important subjects which came under their consideration were the drainage and water-supply of the town of Pabna, and the drainage of the towns of Dinajpur and Jamalpur. Rough estimates were also prepared of schemes for draining the towns of Meherpur and Bettiah. A survey for the drainage of the town of Serampore has been completed, and similar schemes for the towns of Burdwan and Monghyr are being worked out. A survey of the town of Howrah for the same purpose is still in progress. Besides these projects, the Sanitary Board helped in the preparation of drainage schemes for Bally and Uttarpara, and gave their advice to municipalities on various projects, notably on the large scheme for the supply of filtered water to the town of Arrah. In fact the number of projects for water-supply and drainage proposed by Municipal Commissioners and District Boards became so numerous during the year that the Lieutenant-Governor found it necessary to define the duties of the Sanitary Board with regard to the preparation of such projects, and precise instructions on the subject have been issued. If any large plan of rural sanitation is to be undertaken, as has been now

suggested, Sir Antony MacDonnell thinks that it will be desirable to broaden the constitution of the Sanitary Board, and bring it more into touch with local bodies.

Inspections.

23. The Sanitary Commissioner inspected 35 municipalities during the year against 48 in the previous year, and on 10 out of these 35 Municipalities he wrote inspection reports. A statement has been furnished by him showing the amount of inspection done by the Deputy Sanitary Commissioners and the Deputy Superintendents of Vaccination. Some of these officers failed to reach the standard of inspection prescribed by the Government of India in reviewing the report for 1889, but the omission is justified in each case.

Conclusion.

24. The Officiating Lieutenant-Governor has perused with satisfaction the remarks recorded by the Sanitary Commissioner on the work performed by Mr. G. C. Stawell, the Engineer to the Sanitary Board, and by his Personal Assistant, Mr. A. A. Price, and other subordinates. The thanks of Government are due to Dr. Gregg for the punctuality with which his report has been submitted, and for the good work he has accomplished in spite of the ill-health from which he suffered for nearly five months of the year.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

No. 4109R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 29th June 1893.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 198L.F., dated the 10th June 1893, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1893.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the fourth quarter of the year 1892-93 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also, that a copy of this Resolution and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Bhágalpur, Chittagong, and Chota Nagpur Divisions; to the Superintending Engineers of the Northern and Western Circles; to the Inspector of Works, Eastern Circle; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

O. T. BARROW,

Accountant-General, Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 1st *July* 1893.

BENGAL.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BURDWAN DIVN.	1	Burdwan July 1, '93 Kalna .. Katwa ... Raniganj ...	3 62 11 66 3·97 6 63	Weather—cloudy and showery. Cultivation going on Fodder and water sufficient. Prices of common rice — Srs. Burdwan ... ... 10 to 13 per rupee. Kalna .. .. 10 to 13 per rupee. Katwa ... ... 12½ per rupee. Raniganj . ... .. 12 per rupee.
	2	Bankura „ 1, '93 Vishnupur ..	7 40 6·28	Weather—seasonable Sowing and transplanting of *aman* going on Prospects good. Prices of common rice .— Srs. Sadar ... . 11½ per rupee. Vishnupur . ... 11 per rupee.
	3	Birbhum „ 1, '93 Rampur Hât ...	5 31 2 46	Weather—cloudy with occasional sunshine. Sowing of paddy still going on, and fields are being prepared for transplanting paddy seedlings. Price of common rice 12 to 14 seers per rupee.
	4	Midnapore „ 1, '93	6·88	Exceedingly heavy rainfall at the beginning of the week, but fair weather towards the close The seedlings have been destroyed in many places, but the damage is not permanent, and transplanting is now going on vigorously Prices of common rice — Srs. Sadar ... . 10 per rupee. Contai ... . 13 per rupee. Tamluk ... ... 11 per rupee. Ghatal ... 8½ per rupee.
	5	Hooghly „ 1, '93 Serampore ... Jahanabad	5·49 12 71 10 6	Heavy rain in early part of week; since then ordinary monsoon weather with light rain. *Aman* cultivation in full swing In very low lands it has been retarded by excess of water, and the seedlings have been swamped and in some cases jeopardised A few more dry days will, however, bring them through. Jute and *aus* doing well. Prices of common rice — Srs. Sadar .. .. 10 to 11 per rupee. Serampore ... ... 10 to 11½ per rupee. Jahanabad .. .. 10 to 12½ per rupee.
	6	Howrah „ 1, '93 Ulubaria ...	7·96 11 96	Weather—wet, drier towards the end of the week. The seedling paddy has been considerably damaged by the late excessive rain All lands in the south of the district are under water, and a spell of dry weather is greatly desired. Sugarcane and jute doing well. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 9½ to 11 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 1, '93	7 30	Weather—cloudy and rainy. *Aus* and jute seedlings on low lands have been destroyed in consequence of the recent unusually heavy fall of rain It has also retarded sowing and transplantation of *aman*. Prospects not favourable Condition of cattle good. No want of fodder and water. Prices of common rice·— Srs. Ch. Sadar .. ... 10 to 11½ 0 per rupee. Barasat .. 10 0 per rupee. Basirhat .. 11 0 per rupee. Diamond Harbour ... ... 10 10 per rupee.
	8	Nadia „ 1, '93 Kushtia Meherpur .. Chuadanga	4 87 13 04 5·52 2·48	Weather—wet and cool More damage done to paddy on low lands by the rain of the week. On the other hand, the crops on ordinary lands have benefited by it. Prospects on the whole excellent except in Kushtia, where the rain has been heaviest. Prices slightly risen owing to difficulty of transit.
	9	Khulna „ 1, '93 Bagerhat . . Satkhira .	4·46 14 42 10 32	Weather—cloudy and rainy. The rainfall has been excessive in many parts of the district, and has caused damage to *aus* and *aman* paddy on low lands. It has also retarded ploughing, sowing and weeding. Coarse rice is selling at 9 to 12 seers per rupee. Fodder sufficient.
	10	Jessore „ 1, '93 Jhenida Magura .. Narail Bangaon	3 64 5 29 4 73 6·25 7·72	Weather—cloudy and rainy. *Aman* and *aus* on high lands doing well, but those on low lands submerged under rain-water. Prospects of indigo and jute fair. Supply of fodder and water for cattle sufficient. Prices of rice have risen a little.
	11	Murshidabad „ 1, '93	5·57	Weather— cloudy and rainy. Sowing of *aman* paddy nearly finished. Harvesting of indigo continues. The recent rain is said to have done some injury to the paddy crops and has greatly damaged indigo. Fodder available for cattle. Common rice sells at 10½ seers per rupee.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	July 1, '93	10 04	Heavy and incessant rain during the first part of the week, and fitful rain during the latter part. *Aus* sowing is still going on, but the excessive rain has damaged the plants. Condition of cattle generally good and supply of fodder sufficient.
	13	Noakhali	„ 1, '93	9 21	Weather—rainy. Heavy rain has considerably damaged the paddy plants and has retarded the sowing and transplanting operations. The fields being under water, scarcity of fodder is felt. Common rice is selling at 10½ seers per rupee.
	14	Tippera	„ 1, '93	5 89	Weather—seasonable Crops doing well Prospects favourable Prices stationary.
	15	Chittagong Hill Tracts	June, 30 '93	9 78	Weather—rainy and cloudy throughout the week. *Jum* paddy progressing. Ploughing in low lands for winter rice continues. The *bhadoi* crop has suffered considerably owing to continual heavy fall of rain and flood No cattle disease reported. Common rice being sold at 8 seers per rupee.
DACCA DIVN.	16	Dacca	July, 1, '93	3 32	Weather—rainy throughout the week. Rain abundant in all the subdivisions. Harvesting of early rice commenced. Prospects of standing crops generally favourable. Recent rain has damaged the crops on low land to some extent. Fodder available. No cattle-disease. Common rice selling at from 9 to 12 seers per rupee.
	17	Faridpur	„ 1, '93	3 79	Weather—unsettled. All standing crops that are strong and high enough to withstand the continuous rain are doing well, but great damage has been done to crops on low lands. Common rice sells at from10 to 12 seers per rupee. Cattle are doing well except in two thanas, and get fodder.
		Goalundo	..	7 61	
		Madaripur	...	8 75	
	18	Backergunge			Report not received
	19	Mymensingh	„ 1, '93	2 06	Weather—cloudy and rainy. State and the prospects of *aus* and jute good Common rice sells at 13 seers per rupee. Condition of cattle good, and supply of fodder and water sufficient.
RAJSHAHI DIVN.	20	Dinajpur	„ 1 '93	3 62	Weather—cloudy and rainy with occasional breaks. Standing crops doing very well Transplantation of *haimanti* continues. Price of rice at Sadar 13 seers per rupee, that at Thakurgaon has a tendency to rise. Condition of cattle good. Fodder and drinking water plentiful.
		Thakurgaon		3 42	
	21	Rajshahi	.. 1, '93	6 76	Weather—very wet; the rain is incessant and heavy beyond all precedent. The crops on the very low lands are said to be destroyed, being submerged by the heavy falls of rain, which seem to be increasing instead of abating. Uninterrupted sunshine for many days is wanted very badly. Crops on high lands are flourishing. Water and fodder ample. There is no cattle-disease. Rice selling at from 10 to 14 seers per rupee
		Nator		8 11	
		Naugaon	.	3·99	
	22	Rangpur	„ 1, '93	3 33	Weather—seasonable. *Aus* and jute are being cut; *aman* is being transplanted Prospects of all crops favourable. Price of rice unchanged.
		Kurigaon		2 59	
		Gaibandha		5 73	
		Nilphamari	...	1·35	
	23	Bogra	„ 1, '93	4·18	Weather—rainy Preparation of lands for *aman* goes on. The heavy rain has in some parts caused inconvenience. Prospects of standing crops fair Common rice sells at 12 seers per rupee. Fodder and water sufficient.
		Sherpur	.	2·13	
		Nonkhila		3·85	
	24	Pabna	, 1, '93	4 79	Weather—cloudy and rainy. Prospects of jute and sugarcane and of *aus* on high land continue good. Cutting of jute and *aus* has commenced. Price of rice at Sirajganj and Pabna stationary. Fodder and water-supply sufficient.
	25	Darjeeling	„ 1, '93	15 51	Weather—unusually rainy. *In the hills*.—Indian-corn, *phaphur* and potatoes being harvested. *Sama, kangni, chota marua* and *bhadoi dhan* coming to perfection. *Bara marua* and *aghani dhan* being transplanted. *In the Terai*.—Lands being ploughed for *haimanti dhan*. Standing crops in good condition. Prices of coarse rice.— Srs. Hills ... . 9 } per rupee. Terai ... ... 11 } per rupee.
		Siliguri	...	3·45	
	26	Jalpaiguri	„ 1, '93	5·57	Weather—hot and rainy. Transplantation of *haimanti* paddy commenced. Rain during the week has done good to *bhadoi* and jute; prospects of the latter crop good. Common rice sells at 11½ seers per rupee at headquarters and 7 to 8 seers at Alipur. No want of fodder and water.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr July 1, '93 Begusarai ... Jamui ...	2·00 2·60 2·75	Weather—hot and cloudy with intervals of rain. *Bhadoi* sowings almost finished. *Cheena*, indigo and sugarcane doing well. No cattle-disease save stray cases of small-pox at Kharakpur. Sufficient fodder and water. Prices of common rice:— Srs. Sadar ... ... 13 to 15 } Begusarai ... ... 15 } per rupee. Jamui ... ... 13¼ }
	28	Bhagalpur " 1, '93 Banka ... Madhipura ... Supaul ...	1·27 2·89 2·55 0·34	Weather—hot and cloudy. Transplanting winter rice in progress, and prospects favourable everywhere except in the Supaul subdivision, where rice seedlings are said to be dying for want of rain. Price of common rice 13 seers 11 chitaks per rupee.
	29	Purnea " 1, '93 Kishanganj Araria	2·11 8·98 2·71	Weather—very cloudy, wet and cool. Prospects of *bhadoi* and *aghani* excellent. Weeding and transplanting going on. Indigo manufacture going on satisfactorily. Fodder and water plentiful. Prices stationary.
	30	Malda " 1, '93 Chanchal ... Shibganj .. Gajol ...	2·82 2·04 3·81 2·20	Weather—generally cloudy with constant rain. The rainfall has benefited *bhadoi* crops on high lands, but continued rain may injuriously affect the low land paddy where weeding operations have been much retarded. Lands are being prepared for winter rice. Price of coarse rice varies from 11 to 15 seers per rupee. Fodder and water-supply ample.
	31	Sonthal Parganas " 1, '93 Deoghur . Godda . Pakur ... Rajmahal ...	4·50 3·12 2·80 4·76 1·95	Another week of rain. Planting of paddy and weeding of Indian-corn going on. Fair weather now needed. Some damage has been done by excessive rain. Sugarcane doing well. Price of rice rather lower.
Patna Division.	32	Patna " 1, '93 Barh ... Bihar ... Dinapur ...	1·85 2·32 1·02 1·22	Weather—cloudy and hot. Transplantation of *marua* nearly completed. *Makai* being weeded in some places. Transplantation of paddy seedlings in progress. Prices of common rice:— Srs. Sadar ... . 15¼ } Barh .. .. 13 } Bihar ... ... 16½ } per rupee. Dinapore ... ... 13 }
	33	Gaya " 1, '93 Jahanabad ... Aurangabad ... Nawada ...	1·18 1·77 1·60 2·96	Weather—seasonable; very little rain in latter part of week. Agricultural operations in full swing and prospects favourable. Price of rice somewhat high in Aurangabad, but from 14 to 15 seers per rupee elsewhere. Supply of fodder and water ample.
	34	Shahabad " 1, '93 Buxar ... Bhabhua ... Sasaram ...	2·89 1·72 3·33 1·77	Weather—seasonable. Prospects of all crops good. Fodder and water abundant. Prices stationary.
	35	Darbhanga " 1, '93 Madhubani ... Samastipur ...	5·09 2·13 2·22	Weather—cloudy and frequent heavy showers towards latter part of the week. Rainfall uneven but sufficient in places for purposes of cultivation. Transplanting of *marua* now commenced. Paddy and indigo greatly benefited by the rain. *Makai* doing well. Fodder for cattle sufficient. Prices remain stationary.
	36	Muzaffarpur " 1, '93 Hajipur ... Sitamarhi ...	3·52 1·34 3·63	Weather—hot and cloudy. Sowing of *bhadoi* crop going on. The recent rainfall has done much good to standing crops. Sowing of paddy has commenced. Supply of fodder and water sufficient. Prices stationary. No disease among cattle.

Division	No.	District and date of return.		Rainfall at Sudar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*					
PATNA DIVISION—*concld.*	37	Saran Siwan Gopalganj	July, 1, '93	0·93 1·28 5·91	Weather—seasonable. Prospects good. *Bhadoi* crops coming up well, and rice being transplanted. Fodder and water plentiful. Prices of common rice :— Srs. Chapra ... ... 13 } per rupee. Siwan ... ... 12 } Gopalganj ... ... 13 }
	38	Champaran	" 1, '93	5·09	Weather—cloudy with occasional sunshine. Paddy is being sown and transplanted. Sowing of *makai* nearly at an end. Prices stationary. Fodder and water sufficient.
ORISSA.					
ORISSA DIVN.	39	Cuttack	" 1, '93	2·50	Weather—cloudy with occasional light showers. Sowing of *sarad* in progress. *Beali* crop doing well. Supply of fodder and water is ample. Prices of common rice :— Srs. c. Srs. c. Sara ... ... 10 8 to 13 2 } per rupee. Jajpur ... ... 15 12 to 18 6 } Kendrapara ... ... 15 12 to 18 6 } Banki ... .. 15 8 }
	40	Puri Khurda	June 29, '93 ...	0·57 1·19	Weather—cloudy. Sowing going on. *Beali* being weeded. State of miscellaneous crops good. Rice sells from 11 seers 13 chitaks to 14 seers 7 chitaks per rupee.
	41	Balasore	July 1, '93	3·76	Weather—finer than it has been. There have been extensive floods in the north of the district the effects of which are not yet known. Some 14 annas of the *beali* rice crop has been sown, but some portion of this has been damaged by the heavy rain.
CHOTA NAGPUR.					
South-West Frontier Agency.					
CHOTA NAGPUR DIVN.	42	Hazaribagh Giridi	July, 1, '93 ...	6·59 5·06	Weather—seasonable. Sowings still in progress. Transplanting of *marua* commenced in places. All crops promise well. Fodder and water abundant. Prices of common rice :— Srs. Head-quarters .. .. 9 to 14 } per rupee. Giridi ... ... 9 to 12½ }
	43	Lohardaga	" 1, '93	4·99	Weather—seasonable. Ploughing and sowing of winter rice continue. Prospect of *bhadoi* continues favourable. Common rice selling at 13 seers per rupee. Fodder and water sufficient.
	44	Palamau	...	...	Report not received.
	45	Singhbhum	" 1, '93	8·47	The rains have set in regularly now. Condition of all crops good. Price of common rice ranges from 10 to 12 seers per rupee. Cattle-disease reported from some villages in the Kolhan.
	46	Manbhum Gobindpur	" 1, '93 ...	6·63 6·32	Heavy rain in early part of week. A few days' bright sunshine much wanted. Seedlings suffering from excessive moisture. Prices stationary. Fodder ample. Water-supply more than sufficient.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 4th July* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M. SATURDAY, THE 1ST OF JULY 1893.

THE weather during the week in Bengal, as well as over the north of the Bay, has been influenced by the depression which, at the end of the previous week, had developed in South-West Bengal and moved into East Bengal. It remained stationary in East Bengal from the 24th to the 25th, the first day of the present week, and then, after a slight increase of intensity, began to move to the west. On the 26th the centre was between Jessore and Faridpur; on the 27th between Ranchi and Hazaribagh; and on the 28th, owing to its westward motion and the rapid recovery of pressure, all trace of it had disappeared. During these days the weather in Lower Bengal and the north of the Bay was necessarily unsettled, as the depth of the depression was considerable, defect being about ·3 inch in the area of lowest pressure. But though the depression was practically in one position for about four days, and gradients were steep over the Bay, the increase of wind velocity was inconsiderable.

The quantity of rain, however, was unusually large in places, and except during the latter half of the week, when only very partial showers fell in Orissa and South-West Bengal, the rainfall was general in all districts. The heaviest rainfall occurred in East and South-West Bengal and Chota Nagpur during the formation and passage of the depression. In Singhbhum and Manbhum especially the falls were very heavy, and the average for the whole of Chota Nagpur is two and a half times the normal.

During the westward motion of the depression pressure changes were unusually large, and by the 28th the distribution of pressure was slightly above the normal except in part of Chota Nagpur and Bihar. The rise of pressure continued almost till the end of the week. During the latter half there was excess of between ·1 inch and ·15 inch in Lower Bengal and the north of the Bay, so that gradients were not so steep as usual, and a period of calm weather commenced, especially in the south and east of the Bay.

During these last three days ordinary monsoon weather prevailed in Bengal. The usual wind circulation obtained, general though not heavy rain was falling except in the south-western districts and also in the extreme north-east. In the former rain had almost stopped, while in the latter it was at times excessive. On Saturday, the 1st of July, Buxa reported 15·1 inches, and earlier in the week Kalimpong received 9·5 inches in the course of one day. The total fall for the week in Buxa is 27·42, in Kalimpong 18·19, and in Darjeeling 15·92 inches.

Pressure was below the normal everywhere in the early part of the week by amounts varying up to ·3 inch. The rise commenced on the 26th in the extreme east, continued very rapidly in the eastern half of the province on the 27th, and over the whole province, but especially in Chota Nagpur, on the 28th. The rise went on slowly almost till the end of of the week. Owing to the large defect in the early part of the week, mean pressure for the week is below the normal by about ·02 inch.

Temperature was fairly high in Assam, North Bengal and part of North Bihar in the early part of the week, but in the other districts it remained steadily below the normal. The means for the week in the large divisions are all below the normal. Defect is small in Assam, and between 1° and 2° in North Bengal and North Bihar. In the other districts it varies from 3° in Orissa to nearly 5° in Chota Nagpur.

Rainfall has been general and at times heavy in all districts except Orissa and part of South-West Bengal. East Bengal and Chota Nagpur on an average have received more than 6 inches, South-West Bengal and North Bengal more than 4 inches, North Bihar 3·38 inches, and Orissa and South Bihar between 2 and 3 inches. The fall in Orissa is deficient by 0·5 inch, and in the other districts there is excess of variable amounts up to nearly 4 inches in Chota Nagpur and South-West Bengal.

As in the last week, a large proportion of the rain has fallen during thunder-storms, and amounts are in consequence more variable than is usual soon after the beginning of the monsoon. The very heavy falls, besides those mentioned above, are Kishanganj 15·93, Kaliaganj 11·2, Kushtia 11·34, Onda 10·42, Kurseong 10·77, Pedong 11·57, Cox's Bazar 11·17, Pirojpur 10·32, and Kalikapur 12·5 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 1st of July 1893:—

Meteorological Divisions.	Temperature. Highest observed during week.	Temperature. Lowest observed during week.	Temperature. Averages for week. Of highest of each day.	Temperature. Averages for week. Of lowest of each day.	Temperature. Averages for week. Of mean for each day.	Temperature. Average mean of week above or below normal mean of week.	Rainfall. Of week. Average.	Rainfall. Of week. Normal average.	Rainfall. Of week. Variation.	Rainfall. Rainy days. Average number in week.	Rainfall. Rainy days. Normal average number in week.	Rainfall. Rainy days. Variation.	Rainfall. Since 1st of month. Average.	Rainfall. Since 1st of month. Normal average.	Rainfall. Since 16th May 1893. Average.	Rainfall. Since 16th May 1893. Normal average.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·76
The total fall from 1st January to 1st July 1893	49·78
The average fall of the corresponding period for 24 years, Surveyor-General's Office	21·96

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; p, passing temporary showers.

N. B.—In the weekly report from 28th May to 3rd June, read 7·8 for 7· as number of hours of bright sunshine on the 31st May 1893.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, JULY 5, 1893.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 159.

[First Publication.]

CHINA—PE CHILI STRAIT—MIAU TAU ISLANDS.

Dangerous sunken rock eastward of Toki Tau.

THE British Admiralty has given notice (No. 262 of 1893) of the existence of a dangerous sunken rock, named *Tsen leang shu*, about 30 yards in extent, with about 12 feet on it at low water, lying in the fairway among Miau tau islands, with the centre of Sha mo tau in line with Siau chu shan summit, bearing S. 11° E., and Toki tau peak (613 feet) N. 63° W., distant 3 miles.

Close around Tsen leang shu there are depths of 8 fathoms, rocky ground, and beyond, 12 to 14 fathoms over hard mud; the state of the sea and a breaking tide rip prevented the least water on it being obtained. The fisherman on Toki tau state that it is a small pinnacle rock, with not more than 12 feet on it at low water, and from appearances this statement is considered trustworthy.

Approximate position, lat. 38° 9′ N., long. 120° 50′ E.

(*Variation* 4° *Westerly in* 1893.)

[First Publication.]

NEW ZEALAND, SOUTH ISLAND—CHETWADE ISLANDS.

Sunken rocks westward of Kakaho islands.

THE British Admiralty has given notice (No. 273 of 1893) of the existence of a cluster of sunken rocks (*Hincmoa rocks*), extending about 130 yards in a north and south direction, with a breadth of 33 yards, lying with the north-west extreme of Kakaho island, bearing N.E. ¾ E., distant 8¼ cables, and the east extreme of Jag rocks N. by W. ½ W. On the north end of the cluster there is a depth of 9 feet (with 17 fathoms close northward), and on the south end 2 feet at low water.

Approximate position, lat. 40° 54′ S., long. 174° 4′ 50″ E.

(*Variation* 15° *Easterly in* 1893.)

[First Publication.]

EASTERN ARCHIPELAGO—SUMATRA, NORTH COAST.

Sunken reefs, W.-N. Westward of "Diamant Punt."

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth: India, No. 14, dated 1st June 1893, is republished for general information:—

The Commander of H. N. M. *Batavia* reports the existence of the following two coral reefs W.-N.-W. of "*Diamant Punt*"—

1. A coral patch (*Karang Minja*), about 55 yards long in a N.-N.-W. and S.-S.-E. direction, with 6 to 9 fathoms on in at low-water spring tides and 20 fathoms close around, lies with "*Diamant Punt*," bearing S. 70° E.; and the trees of *Pidada* S. 5° W.

Approximate position, lat. 5° 18′ 2″ N., long. 97° 23′ 5″ E.

2. A coral patch (*Karang Tenga*) with a least depth of 8 fathoms at low water spring-tides, lies with *Diamant Punt*, bearing S. 77° E. and the trees of *Pidada* S. 15° W.

Approximate position lat. 5° 17′ 2″ N., long. 97° 24′ 4″ E.

Under favourable circumstances the position of these reefs is indicated by ripples and a discoloration of the water.

Bearings true.

Note.—The fishermen of the locality say that there are still three sunken reefs close to *Karang Tenga*. The examination is therefore continued.

This notice affects the charts: Nederlandsch-Oost-Indie, blad 1, 1867; Noordelijk gedeelte Sumatra, 1881: Noordkust Sumatra, Batoe Poetih tot Diamant Punt, 1889, and Noordoostkust Sumatra, Diamant Punt tot hoek Tamiang, 1889.

CHINA SEA.

Singapore old strait—Sarangong harbour—Spit southward of Pulo Ubin.

THE British Admiralty has given notice (No. 253) that a mud spit, with less than 2 fathoms water on it, extends in a south-east direction from the south extreme of Pulo Ubin, north side of Sarangong harbour. From the outer end of the spit the largest (south-west) of the Batu Puteh rocks bears S. E. by E. ½ E., distant about 6 cables.

Approximate position, lat. 1° 24′ N., long. 103° 57′ 55″ E.

NOTE.—It is also stated that Sarangong harbour and approaches have shoaled considerably.

AUSTRALIA—BRISBANE RIVER.

Tide signals at Pile light-house.

THE Portmaster, Brisbane, has given notice (No. 19 of 1893) that on and after Wednesday, 17th May, the original Code of Tide Signals at the Pile Light-house, as contained in the Local Harbour Regulations, will be restored, replacing the one now in use there.

The depth shown by the original code is the tidal rise added to 14 feet, and that depth now exists between the Bay and the Powder Magazine. From the latter point upwards the available depth is 5 feet 6 inches less than the above.

It is anticipated that by the end of June navigation will be completely restored, and that there will be a depth of 14 feet of water available, in addition to the tidal rise, as far as the Town Reach.

PROSPECTUS.

IT has been decided to hold an International Exhibition in Hobart during the summer of 1894-95, and the Government of Tasmania has been pleased to grant their official patronage to the undertaking.

The proposal has been taken up by the people of Tasmania and the adjacent Colonies with such general approval that the necessary capital has been most readily subscribed.

The City of Hobart is most favourably situated. The Colony of Tasmania has a population of 150,000, and with the neighbouring Colonies the total population numbers about 4,000,000 inhabitants. Launceston and other centres are within a few hours by rail. The Australian Colonies are easy of access by steam, and the tourists' routes to all places of interest radiate from Hobart.

The objects of the Exhibition are to promote and foster industry, science, and art by inciting the inventive genius of our people to a further improvement in arts and manufactures, as well as to stimulate commercial enterprise by inviting all nations to exhibit their products both in the raw and finished state. Samples of the products, for which this and the other Australasian Colonies have become famous, will be exhibited with a view to increase the development of their natural resources.

Similar and more varied exhibits may be expected from Great Britain, the Continent of Europe, America, India, Canada, the Cape, and other Colonies, to which the Government of Tasmania have forwarded an official invitation to grant their substantial support to the undertaking.

A Fine Art Section will form an important and attractive department of the Exhibition. For the accommodation of the art treasures and historical objects a special block of the building will be reserved, and the most ample precautions will be taken for the security of valuable property lent for the purposes of the Exhibition.

Two sections, *viz.*, the Women's Industrial and the Artisan Section, will be particular features. Special arrangements will be made for the management of these.

The site which has been granted by the Government for the Exhibition buildings covers about eleven acres. It is one of exceptional beauty and convenience, being that portion of the Queen's Domain adjoining the Battery and the Central Railway Station.

The buildings which it is proposed to erect will be constructed according to plans prepared by competent architects. The ornamental flower plots, shrubberies, fountains, etc., will be enclosed in the Exhibition grounds, where musical promenades and other entertainments will be provided for the enjoyment of visitors.

The situation of the Exhibition buildings is specially convenient of access for Exhibitors by means of the lines of rail which can be made use of day or night for the passage of railway trucks. Heavy goods can be delivered at a minimum cost and with the least possible amount of risk. In addition to this, the port of Hobart offers a cheap and ready means for the receiving and delivery of all sea-borne goods.

It is intended to afford full postal, telephonic, telegraphic, and banking facilities within the Exhibition buildings, so that all necessary business may be conducted by Exhibitors and others without leaving the premises.

The whole arrangements are in the hands of a powerful Directorate, and everything will be done to facilitate the work of Exhibitors, and minimise their outlay.

REGULATIONS FOR EXHIBITORS.

1. An International Exhibition of Industry, Science, and Art, under the immediate patronage of the Government of Tasmania, will be held in Hobart in 1894-95.

2. The Exhibition will be opened on the 15th day of November 1894, and will continue open during the day and evening for a period of about six months.

3. The principal objects to be exhibited are comprised in the accompanying classification, which must not be considered to be exhaustive.

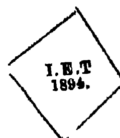
4. Certificates of merit will be awarded by competent juries in every section, special certificates being given for exhibits showing superlative merit.

5. Charge will be made for space, except in special cases, to be determined by the Directors. The charge for space inside the building will be 2*s.* per square foot, with a minimum charge of £2 10*s.* Space in main avenues will be charged extra according to position; and wall space, which must be mentioned when making application, will be charged according to location. In all cases the amount of space money must accompany the Application Form, and no exhibits can be admitted unless all payments for space have been made. Spaces not occupied within fourteen days previous to the opening of the Exhibition will be otherwise allotted, and all payments made in respect thereof absolutely forfeited. Exhibitors will have to pay all expenses of conveying, delivering, arranging, fixing, and removing their exhibits, and also the cost of the erection of all fixtures, screens, and counters when required; and they must personally, or by a representative, superintend the transmission, reception, unpacking, installation, and (at the close of the Exhibition) the removal of their goods. The Executive Committee reserve to themselves the right of doing whatever may be considered necessary at the expense of the Exhibitor, unless this regulation is strictly complied with. Should any goods be deposited in the Exhibition premises during the absence of the Exhibitor or his representative, the Directors will not be responsible for any loss or damage from whatsoever cause arising.

6. Motive power, steam, gas, or water, will be supplied by the Directors at cost price and subject to certain regulations. Exhibitors requiring such motive power must fill up the Special Application Form which has been prepared for that section, and which will be supplied on application. Exhibitors requiring counters, shafting, pulleys, and belting must supply them at their own expense.

7. Schedules and Applications for Space may be had from the Secretary or any of the Official Agents. These must be filled up and returned on or before the 1st of September 1894 to ensure the exhibits being entered in the Official Catalogue.

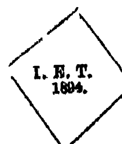
8. The nature of the articles which it is proposed to exhibit must be fully specified in the Form of Application for Space, and no article which is not clearly described in the Application Form will be allowed in the Exhibition without the special permission of the Directors.



9. The Directors reserve the right to refuse any exhibit without stating any reason for so doing.

10. Foreign and Colonial Commissioners or Official Agents are invited to communicate with the Secretary. The Directors will place at their disposal all information, plans, or documents that may be useful to them.

11. Applicants for space from countries in which no Commissioner or Official Agents have been appointed will correspond direct with the Secretary.



12. The Directors will endeavour to obtain from the various railways, carriers, and steamship companies special terms for the conveyance of Exhibitors' goods to and from the Exhibition, and these arrangements will be communicated to intending Exhibitors.

13. All packages containing goods for the Exhibition must have painted on two sides the distinctive mark

with the name and address of the Exhibitor. Labels for this purpose will be supplied to each Exhibitor applying for same.

14. Packages from foreign countries must likewise have painted on two sides the distinctive mark

They must also be marked in such a way as to show distinctly the name of the Exhibitor and the country from whence they came.

15. No case, counter, platform, screen, or partition, must (without special permission) exceed the following dimensions:—

Show cases and partitions	10ft. above the floor.
Counters	2ft. 6in. " "
Platforms	1ft. " "

16. Exhibitors may erect railings around their stands, and provide canopies, subject to approval; in every instance these railings and canopies must be within the area of the space allotted. In the case of machinery in motion, it is imperative that it be sufficiently railed.

17. The flooring must not be cut, altered, removed, or strengthened, except by sanction of the Executive Committee, and at the expense of the Exhibitor.

18. No Exhibitor will be permitted to display exhibits in such a manner as to obstruct the light, or project beyond the space allotted, or impede the view along the open spaces, or occasion injury or inconvenience to other Exhibitors.

19. In order to ensure uniformity of decoration, no Exhibitor will be allowed to put up flags, banners, or other kind of decoration without permission; and for covering counters, screens, or partitions a uniform material will be selected, which may be bought by Exhibitors at the building.

20. All signs or name boards, which must be new and clean and of approved size, must be placed to the satisfaction of the Executive Committee, and must in no case interfere with the lighting. They must be black or maroon with gold letters.

21. All hand-bills, circulars, etc., connected with exhibits, and intended for gratuitous distribution in the Exhibition, must be printed at the Exhibition by the party to whom that special privilege has been granted by the Directors.

22. Cases must be unpacked immediately on arrival, under the supervision of the officers of Her Majesty's Customs, and all empty cases removed by the Exhibitors or their Agents. The Directors cannot accept any responsibility with reference to empty cases, which must be at once removed from the buildings at the expense of the Exhibitors.

23. Exhibitors will be required to provide all necessary attendance, and to keep their stands and exhibits properly cleaned and in good order during the whole period of the Exhibition. The Directors reserve the right to impose a penalty for a breach of this regulation, and to order the removal of any attendant whose behaviour they consider unseemly.

24. No Exhibitor will be allowed to transfer any portion of the space allotted to him, or to allow any other than his own duly admitted exhibits to be placed thereon, except by permission of the Directors.

25. All goods must be exhibited in the name of the individual or firm signing the Application form.

26. Exhibitors are requested to mark the selling price of all articles exhibited for the information of visitors, to whom they may explain their exhibits; but they will in all cases be forbidden, unless special permission in writing has been obtained from the Directors, to invite or to allow visitors to purchase goods for removal at the time of purchase, the Exhibition being intended for the purpose of display. Orders can be taken within the Exhibition, but goods must be delivered from establishments outside. Special regulations will be made for perishable articles or goods manufactured in the Exhibition.

27. No exhibit, or part thereof, can be removed before the close of the Exhibition without the special permission of the Executive Committee. Exhibits not removed within fifteen days after the close of the Exhibition will be warehoused at the cost and risk of the owners, and whatever may remain after three months will be sold by auction, and the proceeds applied to defray expenses.

28. No goods will be received prior to the 1st of September 1894 without the special permission of the Directors, nor after the 1st of November, but arrangements may be made for motors, heavy machinery, boilers, or any exhibit requiring under-building.

29. Special care will be required in cases where fire or gas is used by Exhibitors, and a responsible officer will be appointed to carry out the injunctions of the management in this respect. Exhibitors will require to effect their own insurance on their exhibits.

30. No explosives, or any substance which, in the judgment of the Directors are dangerous, will be admitted, but they may be represented by models.

31. Spirits, oils, corrosive substances, and generally all substances which might spoil other articles or inconvenience the public, can only be exhibited in solid and suitable vessels.

32. The Directors reserve to themselves the right of examining or testing any of the exhibits. If any damage or injury shall be occasioned during the Exhibition by any exhibited machine, implement, or article to any visitor or other person, then the Exhibitor to whom such machine, implement, or article may belong shall be responsible for in the first instance, and shall besides indemnify and hold harmless the said Directors from or against all actions, suits, expenses, and claims on account or in respect of any such damage or injury which may be so caused.

33. No article exhibited may be copied, photographed, drawn, or reproduced in any manner without the special permission of the Exhibitor and of the Directors.

34. Photo. passes will be issued to Exhibitors whose exhibits will need daily persons attention, and to a reasonable number of attendants. If these passes be used by any but those to whom they are issued, they will be immediately cancelled.

35. The Directors reserve to themselves the sole right of compiling and printing a Catalogue of Exhibits under regulations which will be duly notified.

36. The Directors do not undertake any responsibility for damage or loss, however caused.

37. The right to alter, amend, add to, or cancel any of these rules is reserved by the Directors.

38. All who become Exhibitors shall be held by so doing to signify their compliance with the whole of these regulations, together with such other regulations as the Directors may issue from time to time.

39. The Directors reserve the right to remove the exhibits and cancel the admission ticket of any one who does not conform with the regulations.

40. The Directors reserve the power to remove any exhibit from one part of the building to another should it in their judgment be incongruous or out of place.

CLASSIFICATION OF EXHIBITS.

The following are the headings of the Classification :—

GROUP I.—Fine Arts (including Photography, Engravings, etc.).
,, II.—Music and Musical Instruments.
,, III.—Education and Apparatus for Physical Training.
,, IV.—Furniture, Decoration, Fancy Goods.
,, V.—Pottery and Glass.
,, VI.—Jewellery, Clocks, Watches, and other Time-keepers.
,, VII.—Paper, Printing, Bookbinding, and Stationery.
,, VIII.—Textile Fabrics, Leather, India-rubber Goods, Clothing.
,, IX.—Food, including Drinks.
,, X.—Chemistry, Apparatus and Processes, Philosophical Instruments.
,, XI.—Electricity.
,, XII.—Gas and Lighting other than Electricity.
,, XIII.—Heating and Cooking Apparatus.
,, XIV.—Cutlery, Ironmongery, Firearms, Military Weapons.
,, XV.—Road Carriages, Bicycles, Tricycles, Ambulance.
,, XVI.—Machinery, Machine Tools, Hydraulic Machines, and Machines for raising Heavy Weights; Elements of Machines; Furnaces.
,, XVII.—Prime Movers, and means of distributing their Power; Railway Plant.
,, XVIII.—Naval Architecture and Engineering.
,, XIX.—Civil Engineering, Construction, and Architecture, Sanitary Appliances, Aeronautics, etc.
,, XX.—Mining and Metallurgy, Minerals, Quarrying and Fuel.
,, XXI.—Agriculture, Horticulture, Arboriculture.
,, XXII.—Fisheries.
,, XXIII.—Women's Industries.
,, XXIV.—Artisan Section.

N. B.—In Groups I, XXIII, and XXIV the space will be free. In all other groups the charge will be at the minimum rate of 2*s*. per foot.

GROUP I.

Fine Arts.

Class 1.—Sculpture.
Class 2.—Oil paintings.
Class 3.—Water-colour drawings.
Class 4.—Etchings and engravings.
Class 5.—Works in black and white.
Class 6.—Architectural drawings.
Class 7.—Photographs.
Class 8.—Archæology.
Class 8½.—Philatology.

GROUP II.

Music and Musical Instruments.

Class 9.—Organs, harmoniums.
Class 10.—Pianofortes.
Class 11.—Harps.
Class 12.—Ancient, rare, and valuable instruments.
Class 13.—Solo, orchestral, and military instruments.
Class 14.—Musical apparatus and instrument
Class 15.—Books on methods of teaching music.
Class 16.—Music, engraving, and printing.

GROUP III.

EDUCATION AND APPARATUS FOR PHYSICAL TRAINING.

Class 17.—*Creches and Infant Schools.*—Apparatus and fittings; games, toys, Kindergarten amusements; models and appliances for teaching; examples of school work.

Class 18.—*Primary and Secondary Schools.*—Apparatus and fittings; models and appliances for teaching; text-books, diagrams, and examples; specimens of school work.

Class 19.—*Science and Technical School Appliances.*—Apparatus and fittings for elementary trade; teaching in schools-apparatus and models for science instruction in schools; diagrams, copies, text-books, apparatus, and examples used in schools for teaching handicrafts; models, plans, and designs for the fitting up of workshops and technical schools; specimens of work done in schools.

Class 20.—*Art, teaching.*—Apparatus, models, and fittings for art instruction; diagrams, copies, text-books; specimens of drawing, painting, modelling, designing.

Class 21.—*Schools for the Blind, Deaf and Dumb.*—Books, apparatus, and examples of teaching; specimens of work.

Class 22.—*Physical Training and Sports.*—Gymnastic apparatus for exercise, drill, etc.; apparatus for cricket, football, tennis, golf, curling, etc.

GROUP IV.

FURNITURE, DECORATION, FANCY GOODS.

Class 23.—*Furniture and Upholstery.*—Household furniture; office and library furniture; church furniture; inlaid and carved furniture; upholstery; the nursery and accessories.

Class 24.—*House Decoration applied to Rooms.*—Decorated and furnished rooms; japanned-ware; cornices, brackets, screens, picture-frames, mirrors, parquet flooring, and wood-panelling; wooden overmantels.

Class 25.—*Wall Coverings.*—Wall papers; leather and canvas embossed wall coverings; wall tapestry.

Class 26.—*Artistic and Ornamental Metal Work.*—Artistic and ornamental metal work for house decorations and furnishings; ornamental overmantels.

Class 27.—*Marble Furniture.*—Marble furniture, staircases, overmantels; marble wall decoration.

Class 28.—*Basket Work and Basket Furniture.*—Basket chairs, tables, and sofas; baskets for travelling purposes; baskets for house use; clothes baskets; and all other basket-ware.

Class 29.—*Umbrellas, Parasols and Walking-sticks.*

Class 30.—*Stained Glass for Window Decoration*—Stained and enamelled, cut and engraved, window glass.

Class 31.—*Fancy Articles for House Decoration.*

Class 32.—*Brushes and Combs.*—Toilet brushes; combs of all kinds; toilet cases and bags; brushes for household use; stable and horse brushes; brooms; boot-brushing machines.

Class 33.—*Trunks and Portmanteaux*—Trunks and portmanteaux of all kinds; bags for travelling, outdoor, and household use; patent fastenings for trunks and bags.

GROUP V.

POTTERY AND GLASS.

Class 34.—*Bricks, Tiles, Earthenware, Terra Cotta and Stoneware Architectural Pottery.*—Fire-clay goods, crucibles, pots, furnaces, chemical stoneware, plain and enamelled encaustic tiles, stoneware.

Class 35.—*Porcelain Majolica Artistic Pottery.*—Pottery, porcelain, China earthenware for table or toilet use and for decorations; Majolica, Wedgwood, and Palissy ware; artistic pottery of all kinds.

Class 36.—*Crown, Sheet, and Plate Glass.*—Glass used in construction and for mirrors; window glass; plate glass.

Class 37.—*Bottle and Table Glass.*—Bottles and bottle Glass; patent stoppers and patent bottles for aërated waters; chemical and pharmaceutical glassware, vials, and bottles; table glass of all kinds; cut and engraved glass.

Class 38.—*Artistic Glass for House Decoration, Plaques, etc.*—Decorative glass of all kinds; painted glass; cameo and intaglio in glass.

GROUP VI.

JEWELLERY, CLOCKS, WATCHES, ETC.

Class 39.—*Jewellery and Personal Ornaments.*—Gold and silver jewellery and ornaments, inlaid, filigree; diamond jewellery; gems and precious stones; rings and chains.

Class 40.—*Gold and Silver Work.*—Goldsmiths' and silversmiths' work, both ancient and modern; shields, trophies, flasks, and cups, and other samples of work; medals, dies, gold leaf.

Class 41.—*Clocks.*—Chronometers, astronomical clocks, church and turret clocks, clocks of ancient design, clocks for household and general use; hour glasses, sun dials, metronomes, watchmen's clocks.

Class 42.—*Time Signals.*—Methods of controlling clocks; apparatus for the distribution and signalling of time.

Class 43.—*Watches and Chronometers.*—Machine and hand-made watches; examples illustrative of the stages of manufacture of watches and chronometers; keyless chronographs; repeating, calendar, and other forms of watches.

GROUP VII.

Paper, Printing, and Stationery.

Class 44.—*Paper, and Materials for Manufacture of Paper.*—Paper of all kinds, wrapping, writing, drawing, printing, mounting boards, millboards, papier maché, imitation of leather and wood, etc.; tracing paper, tracing cloth.

Class 45.—*Letter-press and other Printing.*—Specimens of printed and illustrated books; samples of type-printing by hand and machine; lithographic printing, colour printing, copper-plate printing; specimens of ruling; specimens of commercial book printing and billheads; posters and printing of same.

Class 46.—*Book-binding.*—Book-binding in every form; samples of special designs for bindings; bound books, account books, etc.

Class 47.—*Artist's Materials and Instruments.*—Easels, stools, palettes, palette knives, drawing boards, drawing instruments, pencils, brushes, colours and varnishes, water-bottles; new inventions in connection with the same.

Class 48.—*Writing Materials and Stationery.*—Stationery for the desk; stationers' articles, pens, pencils, inkstands; playing cards; typewriters, manifold writers, copying presses, sealing-wax.

GROUP VIII.

Textile Fabrics, Leather, India-rubber Goods, Clothing.

Class 49.—*Raw Materials.*—Cotton, flax, jute, hemp, wool, silk.

Class 50.—*Textile Materials.*—Woven fabrics, wire cloth, sieve cloth, asbestos fibre (spun and woven), mats and matting, cotton yarns, sheetings and shirtings, cotton fabrics, dyed and printed cottons and muslins, linen yarns and threads, linen fabrics manufactured from jute, yarns, bagging, carpetting, rugs.

Floorcloth, oilcloth, linoleum, yarns and worsteds, wool fabrics, broad-cloth, coatings, flannel, blankets, rugs and shawls, merinoes, cashmere, serges, dress goods of wool and cotton mixture, tweeds and other woollen materials.

Carpets of all kinds; felted goods; printed and embossed woollen cloths; silk and silk fabrics of all kinds.

Class 51.—*Gutta percha, India-rubber.*—Gutta-percha and India-rubber goods and manufactures; waterproof clothing.

Class 52.—*Leather and Shoe-making.*—Leather of all kinds (except driving bands for engines); boots and shoes; trunks and bags; fancy leather work.

Class 53.—*Dyeing and Tanning Materials.*

Class 54.—*Felt-making and Hat-making.*—Materials used in manufacture of straw, felt, and silk hat-making; process of hat-making shown in operation; manufactured hats or caps of all kinds.

Class 55.—*Lace-making.*—Laces of all kinds; manufactures of lace by machinery or hand.

Class 56.—*Costumes for all Ages and Climates.*—Costumes of all kinds; clothing, ladies' mantles, caps, gloves, millinery furs, and skins; men's and youths' clothing of all kinds.

Class 57.—*Sewing Machines, Knitting Machines, Weaving Machines not requiring power.*

GROUP IX.

Food, including Drinks.

Class 58.—*Grain and Raw Materials.*—Samples of grain of all kinds; casts of vegetables, grass seeds, and other seeds; flour, oatflour, oatmeal, and all other meals; pearl barley, etc.

Class 59.—*Manufactured Articles of Food.*—Bread, biscuits, cakes, and confectionery; mustard, gelatine, isinglass, starch, arrowroot, sugar, syrups.

Class 60.—*Preserved Food, including Fish Products.*—Tinned meat; smoked, salted, compressed animal food; honey; tinned, dried, and compressed fruits and vegetables; food for infants; food for invalids; concentrated foods of all kinds.

Class 61.—*Beer, Wines, and Spirits.*—Beer, ale, and porter in casks or bottled; colonial, foreign, and English wines, whisky, brandy, liqueurs, gin, rum, cordials, bitters, cider, perry; other fruit wines; apparatus for manufacture of same in coopers' works, stills, etc.

Class 62.—*Aërated Waters, Mineral Waters.*—Soda and aërated waters; natural mineral water; manufactured mineral waters.

Class 63.—*Coffee, Chocolate, Tea, Apparatus used in the Process of Infusion.*

Class 64.—*Tobacco, Cigars, Cigarettes, Machinery and Appliances for Manufacture of same.*

GROUP X.

CHEMISTRY AND APPARATUS; PROCESSES AND APPLIANCES CONNECTED WITH APPLIED CHEMISTRY AND PHYSICS; PHILOSOPHICAL INSTRUMENTS AND APPARATUS.

Class 65.—*Inorganic Products, Acids and Alkalies.*—Mineral, sulphuric, nitric, hydrochloric acids; ammonia and other alkalies, potassium, sodium, magnesium; printing and writing inks; bleaching agents, salts, white lead; paints and pigments, phosphorus, sulphur, selenium, bromine, iodine, kelp, charcoal; disinfectants; yeast and baking powders.

Class 66.—*Organic Products, Coal and Wood, Tar Products, Oils, Soaps, Varnishes.*—Creosote, wood spirit, pyroligneous acids, oils from mineral, animal, and vegetable sources; refined oils; lubricating oils; candles, soaps, and detergents; varnishes, resins, dyes and colours, yellow, red prussiate of potash, Prussian blue, cyanide of potassium.

Class 67.—*Chemical Apparatus.*—Chemical apparatus of all kinds; balances, scales, and graduated beams; laboratory fittings and instruments and apparatus.

Class 68.—*Pharmaceutical Products*, including perfumes of all kinds.

Class 69.—*Optical Apparatus.*—Optical and thermotic instruments and apparatus; lenses and prisms; spectacles and eye glasses; field and opera glasses.

Class 70.—*Instruments (except Naval).*—Astronomical instruments and accessories, transits, equatorials, etc.; instruments for surveying; levelling instruments and apparatus; meteorological instruments; thermometers, barometers, hygrometers; rain-gauges, maps, weather bulletins; mathematical machines, calculating machines, viameters, pedometers; weights, measures, and weighing machines; biological instruments; spectroscopes and accessories for spectrum analysis.

Class 71.—*Photographic Apparatus.*—Processes, gelatine, bromide, plate-making; printing processes, silver, carbon, woodbury-type, platinotype, etc.; cameras, shutters, changing boxes, slides, tents, lamps, etc.

GROUP XI.

ELECTRICITY.

Class 72.—*Generators.*—Dynamos, primary and secondary batteries; thermo-electric battery.

Class 73.—*Conductors.*—Submarine cables and apparatus for laying them; aërial wires and underground cables, insulators, and poles; insulating and coating materials; joints and connections, pipes, tubes, troughs, electric light leads.

Class 74.—*Testing and Measuring Apparatus.*—Galvanometers, magnetometers, dynamometers, voltmeters, current meters.

Class 75.—*Telegraphic and Telephonic Apparatus.*—Needle instruments, A. B. C. instruments, sound instruments, Morse instruments, type printers, relays, duplex and quadruplex apparatus, keys, recording instruments, automatic transmitters, electric bells, indicators, telephones and fittings, microphones, lightning-conductors and protectors.

Class 76.—*Electric-lighting Apparatus.*—Lamps, resistance coils, cutouts, safety catches, switches, fittings for lamps.

Class 77.—*Distribution or Utilisation of Power.*—Electric railways, electric motors, boats, tricycles, and other conveyances driven by electricity; systems of distribution; domestic electric lighting applied to apartments.

Class 78.—*Electric Signalling.*—Fire and burglar alarm; railway, ship, and time tables; water level and wind indicators; tell tales, electric clocks, and chronoscopes.

Class 79.—*Electro-Thermic Apparatus.*

GROUP XII.

GAS AND LIGHTING (OTHER THAN ELECTRICITY).

Class 80.—*Coal and other Gas.*—Manufacture, purification, storage, and distillation of coal gas; treatment of residue; water gas, oil gas, carburetted air.

Class 81.—*Tests and Photometrical Apparatus.*—Chemical tests, standards of light, measurement of light.

Class 82.—*Burners and Fittings.*—Gas fittings; burners for illuminating gas, globes and brackets, reflectors, and other methods of imparting greater light; gas meters, regulators, governors; methods of lighting gas.

Class 83.—*Candle Holders* and fittings of all kinds.

Class 84.—*Lamps for Oil and Spirits.*—Lamps for burning oil; safety lamps, firemen's lamps, railway lamps.

GROUP XIII.

HEATING AND COOKING APPARATUS.

Class 85.—*Stoves for Coal, Gas, or Oil; Grates, Ranges, Heating Apparatus, etc.*

Class 86.—*Cooking and Pantry Utensils.*—Tinware and enamel-ware used in cooking and storing food.

GROUP XIV.

CUTLERY AND IRONMONGERY, FIREARMS, MILITARY WEAPONS.

Class 87.—*Cutlery and Hand-tools.*—Hand-tools and instruments of every description used by artificers; cutlery for table use; knives, penknives, scissors, razors and implements sold by cutlers.

Class 88.—*Surgical Instruments and Appliances.*

Class 89.—*Hardware and Hollow-ware.*—Metal hollow-ware, screws, nails, spikes, bolts, locks, and latches; hinges; pulleys for house fittings; window and door furniture, pumbers and gasfitters' hardware; ship's hardware; saddler's hardware; harness fittings.

Class 90.—*Galvanised Ironwork and Wirework.*

Class 91.—*Pewter and Britannia Metal, German Silver, Nickel wares, Bronze, Solder.*

Class 92.—*Ordnance, Small Arms and Weapons; also Sporting Guns.*—Heavy guns and means of working them; gun carriages and accessories; siege, field, and mountain guns; machine and automatic guns; shell and shot, fuses and detonators; guns, rifles, and pistols; swords, bayonets, gunpowder, and ammunition.

GROUP XV.

ROAD CARRIAGES, BICYCLES, TRICYCLES, AMBULANCE.

Class 93.—*Road Carriages and Accessories.*—Pleasure and travelling carriages; cabs, omnibuses, hearses, trucks, and carts; carriage lamps; carriage fittings; methods and means of propulsion; perambulators.

Class 94.—*Bicycles, Tricycles and Accessories.*—Cycles of every description, and fittings for same.

Class 95.—*Saddlery and Harness.*—Horse clothing, whips, spurs; means and methods of breaking in horses; disengaging appliances for run-away horses; horse-shoes; methods of roughing horses; horse clippers; grooming apparatus.

Class 96.—*Ambulance.*—Ambulance carriages, stretchers; aid to sick and wounded in war; aid to sick and wounded in peace; furniture and fittings for sick-room; bath chairs.

GROUP XVI.

MACHINERY, MACHINE TOOLS, HYDRAULIC MACHINES, AND MACHINES FOR RAISING WEIGHTS; ELEMENTS OF MACHINES; FURNACES.

Class 97.—*Metal-working Machines.*—Machinery for the manufacture of rivets, nails, bolts screws, tacks, pins, and needles; machines for planing, drilling, slotting' turning, shaping, boring, punching, stamping, and cutting-metal; wheel cutting and dividing machines; emery wheels, drills, gauges, and dies.

Class 98.—*Steam Hammers.*—Steam, trip, and other hammers; anvils, forges, bellows.

Class 99.—*Wood-working Machines.*—Machines for planing, sawing, turning, veneering, and grooving; machines for tonguing, cutting, moulding, stamping, carving, cask-making, cask-cutting.

Class 100.—*Stone-working Machines.*—Machines for sawing, planing, dressing, shaping, and polishing stones; sand blast, grindstones.

Class 101.—*Watch-making Machinery.*—Lathes and mandrils; wheel-cutting engines; machine tools used in the manufacture of watches and watch cases; also hand-tools and gauges.

Class 102.—*Machines for Coining Metals.*—Drop-die and stamping machines.

Class 103.—*Textile Machinery.*—Machines for the manufacture of silk goods, cotton goods, woollen goods, carpets, tapestry, jute, linen goods; lace machines; embroidery, hair, and ribbon machines; leather, boot, and shoe-making machines; machines for making buttons, rope, twine, and miscellaneous fibrous materials; floor-cloth, kemptulicon, wire cloth, and netting machines; India-rubber and asbestos machines.

Class 104.—*Washing Machines.*—Machines for washing, scouring, ironing, drying cleaning, and dyeing.

Class 105.—*Paper-making Machinery.*—Washing, beating and bleaching machines; agitators, strainers, moulds.

Class 106.—*Printing Machinery.*—Type-casting machines and apparatus for stereotyping and electrotyping; type-setting, printing, stamping, embossing, and lithographic machines; book-binding machines; paper-folding machines; paper and card-cutting machines; paper-box machines; envelope machines; wall-paper printing machines; steel pen and pencil machines.

Class 107.—*Machinery used in the Manufacture of Glass and Pottery.*—Bricks, pottery, drain-pipes, tiles, and artificial stone machines; furnaces, moulds, and blow-pipes for making glass and glassware; machines for grinding, cutting, and polishing glass.

Class 108.—*Cranes and Other Lifting Apparatus, Hydraulic Machines and Presses.*—Pumps and apparatus for lifting and moving liquids (air or gas); blowers and ventilators; hydraulic engines, accumulators, cranes, jacks, presses, elevators, lifts; pile-driving machines.

Class 109.—*Sugar and Sweetmeat Machinery.*—Sugar-refining machinery; sweetmeat-making machines.

Class 110.—*Baking and Machinery.*—Bread and biscuit or pie machinery of all kinds.

Class 111.—*Machines for the Manufacture of Aërated Waters.*—Machinery of all kinds for the manufacture of soda and aërated waters; bottling and corking apparatus; ice-making machines.

Class 112.—*Fire-engines and Fire-apparatus.*—Steam fire-engines; hand, chemical, compressed air fire-engines; hose, ladders, fire-escapes.

Class 113.—*Weighing Machines for Commercial Purposes.*—Beam and scale machines; machines for weighing trucks and carts; weighing machines of all kinds (other than chemical and other scientific balances).

Class 114.—*Furnaces for Manufacturing Purposes.*—Furnaces and moulding machines; bloom-squeezers; blowing fans; apparatus for casting metal, Bessimer, Siemens, Martin, and other processes.

Class 115.—*Machine, Tools, and Apparatus for Mining and Extractive Arts.*—Rock drills; well and shaft boring machines; machines and apparatus for working and hauling coal; coal-washing machines; machines used for crushing, grinding, sorting, and dressing; breakers, stamps, mills, pans, screens, sieves, gigs, amalgamators, and concentrators.

Class 116.—*Machines and Apparatus for Chemical Manufactures.*—Electroplating; paint and powder mills; soap and candle-making machinery; plant for manufacturing sulphuric and other acids.

GROUP XVII.

PRIME MOVERS AND MEANS OF DISTRIBUTING THEIR POWER; RAILWAY PLANT.

Class 117.—*Steam Engines and Boilers.*—Boilers; fixed and portable steam engines; methods and means of preventing corrosion and incrustation.

Class 118.—*Gas and Hot Air Engines, Compressed Air Engines.*—Gas engines; hot air engines; air compressors; compressed air engines; vapour engines.

Class 119.—*Turbines, Water-wheels, Hydraulic Rams, Windmills.*—Means of utilising wave power, hydraulic rams, water-pressure engines, windmills, solar engines.

Class 120.—*Means of Transmitting Power and Accessories of Engines and Boilers.*—Belting, pulleys, shafts, gearing, clutches, fire-feeders, smoke-consuming apparatus, valves and valve gear, steam joints, governors, injectors, pumps, bearings, lubricators, indicators, gauges.

Class 121.—*Rails, Switches, Signalling Apparatus for Rail or Tramways.*—Crossings, turntables, communications in trams and with trams, modes of water-supply, signals and points, fixed and rolling-stock for tramways.

Class 122.—*Brakes, Hand and Automatic.*—Screw, chain, compressed air, vacuum, steam, electrical.

Class 123.—*Atmospheric Railways and Portable Railways.*—Rope railways and tramways; pneumatic railways.

GROUP XVIII.

NAVAL ARCHITECTURE AND ENGINEERING.

Class 124.—*Ship and Boat building.*—Models of ships and vessels of all kinds; also of boats for commerce or pleasure.

Class 125.—*Construction.*—Materials used in the construction of wood, iron, or steel vessels, armour plating, submarine armour, sternpost, etc.

Class 126.—*Ship's Fittings.*—Masts, sails, canvas and rope, wire rigging, anchors, and chains, boat-lowering apparatus, pumping and ventilating apparatus, winches and capstans, stearing gear, indicators and engine-room telegraphs, compasses, sextants, quadrants, repeating circles, ships' logs, instruments connected with ships and machinery.

Class 127.—*Marine Propulsion.*—Marine engines, full size and in models, from their first introduction to the present time; propellers, paddles, hydraulic propulsion, shafting and gear.

Class 128.—*Life-saving Apparatus.*—Life-boats, life-rafts, deck-seats, belts, and life-saving clothing of all kinds.

Class 129.—*Armament*—Heavy guns and fittings; torpedoes, torpedo catchers, machine guns.

GROUP XIX.

CIVIL ENGINEERING, CONSTRUCTION AND ARCHITECTURE, SANITARY APPLIANCES, AERONAUTICS.

Class 130.—*Road-sweeping Machines.*—Rollers; apparatus for removing mud or snow; water-carts, etc.; construction and maintenance of roads and trees.

Class 131.—*Bridges and Viaducts.*—Models, plans, apparatus used in construction; submarine construction.

Class 132.—*Docks and Harbours.*—Plans and designs, diving apparatus, dredging machines, pile drivers, caissons; hydraulic apparatus for working docks.

Class 133.—*Light-houses.*—Models and plans of light-houses.

Class 134.—*House Construction and Building Materials (other than Stone)*.—Fire-proof structures; materials for sanitary house construction, roofs, walls, damp courses, solid floors, cements, damp-proof wall coverings.

Class 135.—*Water-supply and Sewerage*.—Meters, filters, water fittings, house drains; their construction and ventilation; water and earth closets; ventilators, lavatories, baths, and bath fittings.

Class 136.—*Military Engineering*.—Models of bridges and fortifications, intrenching tools, field kitchens, field telegraphs, camp and bivouacking appliances, military clothing and accoutrements, transport arrangements, explosives for demolitions, submarine mine cases, and relative electrical apparatus, aeronautics.

GROUP XX.

MINING AND METALLURGY, MINERALS, QUARRYING, AND FUEL.

Class 137.—*Coal*.—Anthracite and bituminous, with samples showing thickness of seam; bitumen, kerosine, and other oil shales; pressed coal and coke.

Class 138.—*Building and other Stone*.—Rough, hewn, sawn, or polished stones; white, black, or coloured marbles, granite, and other ornamental stones in blocks or slabs; lithographic stones; hones, grindstones, whetstones.

Class 139.—*Iron, Lead, Copper Ore, etc.*—Iron ores, copper and lead ores.

Class 140.—*Pig-iron, Wrought-iron, and Steel*.—Iron and steel in pig, ingot, bars, plates, and sheets.

Class 141.—*Lead, Copper, Zinc, Tin and Brass in Process of Manufacture*.—Lead, graphite, copper in cakes, tiles, ingots, bars; tin, zinc, antimony, bismuth, brass, gun metal.

Class 142.—*Gold, Silver, Platinum*.—Samples of reef and alluvial gold and silver ores; gems and precious stones; collections of minerals.

N.B.—Machinery and appliances used in the production or manufacture of the above will be placed in the Machinery section.

GROUP XXI.

AGRICULTURE, HORTICULTURE, AND ARBORICULTURE.

Class 143.—*Field Implements*.—Ploughs, cultivators, harrows, rollers, presses, spades, forks, hoes, draining tools, sowing machines for grain and other farm seeds, manual distributors, reapers, mowers, binders, root thinners and raisers, potato-planters.

Class 144.—*Barn and Farmyard Implements*—Traction and other agricultural engines; threshing machines; winnowers, grain and seed cleaners and dressers; hay and straw elevators; trussers, compressors, root and chaff-cutters, grist mills, crop dryers, sheep dippers; barn requisites.

Class 145.—*Dairy and Poultry Farm appliances and Bee-keeping*.—Complete working dairies; dairy appliances, implements and utensils, cream separators, churns, cheesemaking apparatus, incubators, apiarian appliances.

Class 146.—*Farm and Dairy Produce*.—All grain, roots and seeds; dairy produce, butter, cheese, preservatives, colouring.

Class 147.—*Agricultural Construction*.—Models, plans, and designs for farm buildings; silos, rick stands, byre and stable fittings and requisites; field and other gates, hurdles, fencings, etc.

Class 148.—*Manures, Cattle, Food, etc.*—Artificial manures, cattle and poultry foods, sheep dips, materials, processes, etc.

Class 149.—*Horticulture and Floriculture*—Ornamental trees, shrubs, coniferæ, flowers, ferns; illustrations of and materials used in floral designs, etc.; hot-houses, conservatories, vineries, garden implements, vases, flower pots, etc.; borderings for walks and flower beds, park seats, chairs, garden statuary, fountains, rustic arbours, houses, chairs, bridges, etc.

Class 150.—*Arboriculture*.—Timber and trunks of trees, abnormal growths; specimens of barks, leaves, flowers and seeds, ship timber, shingles, laths, staves; wood for street paving; ornamental woods used in design and furniture; dye woods; preservation of timber; illustrations of planting and protecting forests; collections, illustrations, and descriptions of destructive insects.

GROUP XXII.

FISHERIES, INCLUDING NATURAL HISTORY BEARING THEREON.

Class 151.—Nets, rods, tackles, weirs, dams, passes; fish-breeding ponds and sluices; vessels for transporting ova and spawn; fish culture.

GROUP XXIII.

WOMEN'S INDUSTRY.

Class 152.—*Needlework and Knitting*.—Plain needlework; ladies' and children's underclothing; white embroidery on muslin and linen; plain knitting, fancy knitting, art embroidery.

Class 153.—*Mechanical Work.*—Straw and basket work; brush-making; filigree work; feather dressing; spinning, glove-making, flower-making, toy-making; fishing tackle and fly dressing; book-binding.

Class 154.—*Decorative Work and Furnishings, Carving on Wood, etc.*—Wall decorations; curtains, furniture screens, carved fret or painted work, brass work.

Class 155.—*Painting, Drawing and Engraving.*—Painting on fabrics, china, glass; missal painting; Christmas card and fan painting; wood and steel engraving; lithography; designs for wall and floor coverings; designs for art embroidery, etc.

GROUP XXIV.

ARTISAN SECTION.

Class 156.—Specimens of handicraft of all kinds of works executed by artisans, apprentices and pupils of Technical schools; models, drawings, carvings, castings, etc., etc.

DONATION OF HIS HIGHNESS THE MAHARAJA SCINDIA BAHADUR OF GWALIOR FOR PRIZES.

GENERAL DEPARTMENT, EDUCATION—No. 414T.-G.

Darjeeling, the 7th July 1893.

RESOLUTION.

READ—

Letter from the Director of Public Instruction, Bengal, No. 3206, dated the 6th June 1893.

The Director of Public Instruction reports that, in addition to the donation of Rs. 500 for the foundation of a prize for the benefit of the First Arts students of the Presidency College, which was acknowledged in the Government Resolution of the 17th March 1893, His Highness the Maharaja Scindia Bahadur of Gwalior has now made a further donation of Rs. 1,000, to be invested in 4 per cent. Government securities, for the award of annual prizes to the students of the institutions named below:—

(1) Rupees 500 for an annual medal or prize to the student of the Sanskrit College who, on passing the First Arts examination, stands next in order of merit to those who obtain scholarships or other prizes;

(2) Rupees 300 for an annual prize to a student of the Medical College, Calcutta, who obtains the highest marks at the preliminary M. B. Examination and does not get any other prize;

(3) Rupees 200 for an annual prize to the student of the Campbell Medical School, Sealdah, who stands at the head of the first class.

2. The acknowledgments of Government are again due to his Highness the Maharaja Scindia for his liberal donation and for the interest he has displayed in educational institutions in Calcutta.

3. The heads of the respective institutions will be appointed administrators of the funds.

4. His Honour approves the proposal made by the Director of Public Instruction that in the case of the Medical College and the Campbell Medical School the donations should, for the present, be placed in the Government Savings Bank till such time as the interest accrued shall cover the premium at which Government promissory notes now sell, and thus enable the Comptroller-General to make the necessary investment.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Director of Public Instruction and to the Accountant-General, Bengal, for information; also that the Government of India, Foreign Department, be requested to forward a copy, with the permission of His Excellency the Viceroy and Governor-General in Council, to His Highness the Maharaja Scindia Bahadur of Gwalior.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 8th July 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan July 8, '93 Kalna ... Katwa ... Raniganj ...	5·92 6·05 1·14 3·20	Weather—cloudy and showery. Transplantation of *aman* seedlings going on. Fine weather and sun wanted. Fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... ... 10 to 13 } per rupee. Kalna ... ... 10 to 13 Katwa ... ... 12 Raniganj 12
	2	Bankura „ 8, '93 Vishnupur ...	0·83 3·03	Weather—seasonable. Transplantation of *aman* rice going on briskly. Prospects good. Common rice selling at 11¼ seers per rupee at Sadar and 11 seers at the Vishnupur market.
	3	Birbhum „ 8, '93 Rampur Hát ...	3·14 4·06	Weather—rainy and cloudy. Transplanting of paddy seedlings going on. Fodder and water plentiful. Prices of common rice 12 to 14 seers per rupee.
	4	Midnapore „ 8, '93	0·70	There has been considerable but not excessive rain. The Sadar report says: "The cultivation of *haimanti* paddy is still continuing. Owing to the heavy rain some of the seedlings have been destroyed, and in some places they are still submerged under water." The report from Ghatal contains only the following remark regarding the damage caused by the floods:—"The *haimanti* paddy is in good condition in places not affected with flood." The report from Tamluk says: "In some places paddy crop has been damaged by constant rain and flood; low lands are submerged by water." There are no remarks on the subject from Contai. It is not possible yet to state fully how far the prospects are affected by the floods, but it is probable that considerable damage has been caused in Ghatal and Tamluk. Prices of common rice:— Srs. Sadar ... ... 11 } per rupee. Contai ... ... 12 Tamluk ... ... 10 Ghatal .. .. 8¼ to 11
	5	Hooghly „ 8, '93 Serampore ... Jahanabad ...	2·00 3·09 4·59	Ordinary monsoon weather. Progress of *aman* delayed in a considerable part of the district by excess of rain, the lands being too deep in water for transplantation, and in some cases the seedlings also are flooded. Jute and *aus*, however, are generally doing very well. Prices of common rice:— Srs. Sadar ... ... 11 to 12 } per rupee. Serampore ... ... 10¼ to 11¼ Jahanabad ... ... 11 to 12¼
	6	Howrah „ 8, '93 Uluberia ...	2·64 2·32	Weather—seasonable. Sowing of paddy has been resumed. A good deal of that formerly sown has been destroyed. Owing to excess of water prospects of paddy not very favourable. Jute doing well. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 9¼ to 11 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 8, '93	2·35	Weather—seasonable. Transplantation of *aman* is delayed by excess of water. Prospects bad in the south of district. Prospects of *aus* crop in north of district very good and that of jute fair. Sufficient water and fodder. No cattle-disease reported. Prices of common rice:— Srs. Sadar ... ... 10 to 11¼ } per rupee. Barasat ... ... 10½ Basirhat ... ... 11 Diamond Harbour ... ... 10-10 chs.
	8	Nadia „ 8, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	1·54 8·83 2·75 2·33 2·44	Weather—cool and showery. Prospects of crops good on the whole. In Kushtia the excessive rain has caused considerable damage. Price of rice has slightly risen.
	9	Khulna „ 8, '93 Bagerhat ... Satkhira ...	2·46 4·86 3·82	Weather—rainy. Ploughing and sowing have been retarded in some places owing to excessive rain; but prospects are still good. Prices are rising. Coarse rice is now selling at 9 to 11 seers per rupee. Fodder plentiful.
	10	Jessore „ 8, '93 Jhenida ... Narail ... Bangaon ...	3·43 2·83 1·69 3·05	Weather—cloudy and rainy. Rain has caused damage to the *aus* and *aman* paddy and jute on low lands. Fodder and water for cattle sufficient. Prices of rice have slightly risen. Rivers rising rapidly.
	11	Murshidabad „ 8, '93	1·45	Weather—rainy. The recent heavy rain has considerably damaged the paddy on low lands. Sugarcane and mulberry are not doing well for the same reason. Transplantation of *aman* still going on. Fodder sufficient for cattle. Coarse rice sells at 11 seers per rupee.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL—*concld.*		
	CHITTAGONG DIVN.		
12	Chittagong July 8, '93	8·31	Weather—unsettled and wet. Transplantation of *aus* is going on. The plants on the low lands have been damaged by the late heavy rain, but not those on the high lands. Condition of cattle generally good and supply of fodder sufficient.
13	Noakhali " 8, '93	5·59	Weather—showery. Early *aus* being reaped. Condition of late *aus* not favourable owing to overflooding of fields. State of *aman* not bad. Water is sufficient, but fodder scarce. Cattle-disease reported from all stations. Common rice sells at 10 seers per rupee.
14	Tippera " 8, '93	7·33	Weather—cool, cloudy; rain almost constant. *Aus* being reaped. State of crops fair in Chandpur and Brahmanbaria. Heavy loss of rice expected in Sadar subdivison near the Goomti (north bank) from floods.
15	Chittagong Hill Tracts. June, ...	...	Report not received.
	DACCA DIVN.		
16	Dacca July, 8, '93	2·79	Weather—cloudy and rainy. Prospects of standing crops generally good. Early rice has sustained some damage on account of the late incessant rain. Harvesting going on. Common rice selling at from 9 to 12 seers per rupee. Fodder available. No cattle-disease.
17	Faridpur " 8, '93 Goalundo ... Madaripur ...	2·41 3·59 3·29	Weather—seasonable. Standing crops will do fairly well if rivers do not rise too quickly, but damage has been done by the heavy rain of the last three weeks. Common rice sells at 10 seers per rupee at Faridpur, 10¾ seers at Madaripur, and 12 seers at Goalundo. Condition of cattle reported good generally, but cattle-disease still prevails in two thanas.
18	Backergunge " 8, '93 Pirojpur ... Patuakhali ... Bhola ...	6·86 5·06 3·30 3·80	Continuous rain. State and prospects of crops fair, but the *aus* has been considerably damaged in some places by the heavy rain. Common rice sells at from 9 to 12 seers per rupee. Fodder and water sufficient.
19	Mymensingh " 8, '93	6·60	Weather—cloudy and rainy. State and prospects of rice and jute crops are good. Harvesting of *aus* commenced. Transplantation of *aman* paddy going on. Common rice sells at 12 seers per rupee. Condition of cattle good and supply of fodder sufficient.
	RAJSHAHI DIVN.		
20	Dinajpur " 8, '93 Thakurgaon ...	0·60 12·31	Weather—rainy and cloudy. Prospects of standing crops good. Transplantation of *haimanti* in progress. Price of rice at Sadar 11¾ seers per rupee; that at Thakurgaon 10 to 12 seers. Condition of cattle good. Supply of fodder and drinking-water sufficient.
21	Rajshahi " 8, '93 Nator .. Naugaon ...	1·38 6·37 7·23	Weather—seasonable, somewhat less rainy than last week. *Aus*, *aman*, and jute are said to have been injured in places by the late heavy rain. It is impossible to say how much injury has been done; but the present fine weather should help to restore the plants not irretrievably injured. There is no cattle-disease. Water and fodder supplies ample. Rice selling from 10 to 14 seers per rupee.
22	Rangpur " 8, '93 Kurigaon ... Gaibanda .. Nilphamari ...	6·26 10·42 10·75 7·48	Weather—cloudy with occasional showers. *Aus* and jute are being cut. *Aman* being transplanted. Prospects continue favourable.
23	Bogra " 8, '93 Sherpur ... Naukhila ...	8·41 5·81 5·56	Weather—rainy. *Aman* is being transplanted. Prospects unchanged. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
24	Pabna " 8, '93	2·92	Weather—cloudy and rainy. Rivers rising. Too much rain is injuring the standing crops. Price of common rice at Pabna 12 seers per rupee, and at Sirajganj Rs. 3-12 to Rs. 4 per maund. Fodder and water-supply sufficient.
25	Darjeeling " 8, '93 Siliguri ...	8·62 7·33	Weather—rainy. *In the hills*:—*Bhutta, phaphur, kangni, shama* and potatoes are being harvested. *Bhadoi* and *chota marua* progressing favourably. *Aghani* paddy and *bara marua* are being transplanted. *In the Terai*:—Ploughing for *haimanti* paddy going on; jute and *bhadoi* doing well. Foot-and-mouth disease of cattl ereported from Siliguri. Prices of common rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 }
23	Jalpaiguri " 8, '93	14·00	Weather—rainy. Transplantation of *haimanti* paddy going on. Prospects of *bhadoi* and jute still good. Common rice sells at 10 seers 8 chitaks per rupee. Fodder and water sufficient. No cattle-disease reported.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.	27	Monghyr July 8, '93 Begusarai ... Jamui ...	5·87 7·61 4·78	Weather—cloudy with heavy rainfall throughout the week; alternately hot and cold. *Bhadoi* thriving well in high lands. Low land crops have been submerged. *Makai* has suffered much owing to the excessive rain. Indigo reaped. No cattle-disease. Prices of common rice:— Srs. Sadar ... ... 12 to 15 } Begusarai ... ... 14½ } per rupee. Jamui ... ... 13 }
	28	Bhagalpur „ 8, '93 Banka ... Madhipura ... Supaul ...	8·76 4·54 8·10 8·23	Weather—rainy. The heavy rain of last week has done some harm to the Indian-corn and *marua* in the Sadar and Banka subdivisions, but has been very beneficial in North Bhagalpur. Price of common rice, 13 seers 14 chittaks per rupee.
	29	Purnea „ 8, '93 Kishanganj ... Araria ...	11·87 13·44 10·00	Heavy rain and almost continuously cool weather. *Bhadoi* and jute doing splendidly. Transplantation of *aghani* in progress, but retarded by the excessive quantity of water lying about and some seedlings drowned. Floods have done damage in the west, and indigo produce has been much injured by the constant rain. Price of rice stationary at 12 seers per rupee.
	30	Malda „ 8, '93 Chanchal ... Shibganj .. Gajol ...	2·53 3·08 3·68 2·49	Weather—rainy and wet with little intervals of sunshines. Transplanting of winter rice in progress. *Bhadoi* paddy coming into maturity. Sudden rise of the river has slightly damaged this crop in Nawabgunj thana. Price of coarse rice 11 to 15 seers per rupee. Sufficient fodder and water.
	31	Sonthal Parganas „ 8, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	6·18 1·25 3·58 3·28 6·81 2·73	Rain every day. Transplanting now going on. Heavy rain is doing some damage to *bhadoi* crops. Prospects of *janera* unfavourable. Price of rice is varying from 12 to 13 seers per rupee.
PATNA DIVISION.	32	Patna .. 8, '93 Barh ... Bihar ... Dinapur ...	5·76 3·23 3·90 0·90	Weather—cloudy and rainy. The excessive rain has done some damage to *bhadoi* crops. *Marua* and paddy seedlings have also been slightly damaged by a kind of insect called *jhangurwa*, which is now said to be disappearing. Transplantation of *marua* almost completed. Paddy transplantation still going on. Prices of common rice:— Srs. Sadar ... ... 15½ } Bihar ... ... 16½ } Barh .. .. 13 } per rupee. Dinapore ... ... 13 }
	33	Gaya .. 8, '93 Jahanabad ... Aurangabad ... Nawada ...	0·27 0·81 2·11 1·95	Weather—seasonable. *Bhadoi* sowings approaching completion. Prospects favourable. Fodder and water-supply ample. Common rice sells at from 13 to 15 seers per rupee.
	34	Shahabad .. 8, '93 Buxar ... Bhabhua ...	5·21 2·22 4·21	Weather—cloudy with thunderstorm and heavy rain. Prospects of *aghani* and *bhadoi* excellent. Sugarcane also promising.
	35	Darbhanga .. 8, '93 Madhubani ... Samastipur ...	3·19 3·89 3·02	Weather—cloudy with frequent showers. *Makai* doing well. Transplanting of *marua* and paddy commenced in places. Prospects of indigo favourable. Fodder and water for cattle sufficient. Prices remain stationary.
	36	Muzaffarpur „ 8, '93 Hajipur ... Sitamarhi ...	2·81 1·74 3·64	Weather—cloudy. Sowing of *bhadoi* and paddy crops going on. Standing crops doing well. Transplantation of paddy in progress. Dakha disease among cattle in Belsund thana; otherwise general state of cattle satisfactory. Supply of fodder and water sufficient. Prices almost stationary.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran July, 8, '93 Siwan ... Gopalganj ...	3·24 5·29 2·31	Weather—seasonable. The first *general* rain fell on the night of the 7th. Prospects of crops very good. Fodder and water plentiful. Prices of common rice :— Srs. Chapra ... ... 13 } Siwan ... ... 12 } per rupee. Gopalganj ... ... 13 }
	38	Champaran „ 8, '93	9·59	Weather—fairly cool for the time of year. Rain nearly every night ; days generally fine. Transplantation of paddy going on. *Makai* being weeded. Prices nearly stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 8, '93	2·00	Weather—cloudy with occasional light showers. Sowing of *sarad* in progress. *Beali* doing well. Supply of fodder and water sufficient. Prices of common rice :— Srs. c. Srs. c. Sadar ... ... 10 8 to 13 2 } Jajpur ... ... 15 12 to 18 6 } Kendrapara ... ... 14 0 to 18 6 } per rupee. Banki ... ... 15 0 }
	40	Puri „ 6, '93 Khurda ... Banpur ...	0·87 3·69 1·19	Weather—cloudy. Lands are being sown. *Beali* being weeded. Miscellaneous crops doing well. Prices of rice stationary.
	41	Balasore „ 8, '93	1·71	Weather—seasonable. Paddy seedlings being transplanted. Prices of rice :— Srs. Balasore ... ... 13 } Bhadrak ... ... 14 } per rupee.
CHOTA NAGPUR. *South-West Frontier Agency.*				
CHOTA NAGPUR DIVN.	42	Hazaribagh July, 8, '93 Giridi ...	6·90 2·86	Weather—seasonable. Sowing still in progress. Indian-corn injured by excessive rain. Other crops doing well. Fodder sufficient. Prices of common rice :— Srs. Head-quarters ... ... 9 to 14 } Giridi ... ... 9 to 12 } per rupee.
	43	Lohardaga „ 8, '93	3 ·7	Weather—seasonable. Ploughing and sowing of winter rice continue. Prospect of *bhadoi* crops continues good. Common rice selling at 13 seers per rupee. Fodder and water plentiful.
	44	Palamau „ 7, '93	3·30	Heavy showers. Rain in all parts of the district. Sowing of paddy and *bhadoi* crops is in progress, but some damage has been caused by the heavy rain to paddy and *bhadoi* crops which were already sown. Cattle disease prevalent in a few places. Water and fodder sufficient. Prices stationary.
	45	Singhbhum „ 8, '93	1·17	Weather—seasonable. State of all crops good. Cattle-disease reported from some villages in the Kolhan.
	46	Manbhum „ 8, '93 Gobindpur ...	2·23 2·94	Weather—cloudy and occasionally fair. Sowing still going on. Transplantation commenced. Prospects of *jonar* bad. Price of rice 10 to 12 seers per rupee. Fodder and water sufficient.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1893.

The meteorological elements varied from the normal to an unusual extent, and of these irregularities the most noteworthy are—

1. Mean pressure for the month is uniformly above the normal over the whole province by about ·05 inch. Notwithstanding this large excess, the monsoon current during the latter half of the month was very strong as judged by the heavy rainfall.
2. The rainfall has been very irregularly distributed, and was largely due to local thunderstorms, which caused excessive rainfall over limited areas.
3. The days were much more cloudy than usual, and day temperatures are much below the normal, especially in the western districts. Mean minimum temperature, though below the normal, is only slightly so.

At the beginning of the month south-west monsoon conditions were fairly general in all districts, having followed the cyclonic storm at the end of May. Fine weather began over the Bay about the beginning of the month, and by the 4th was general over Bengal. With the exception of a few local thunderstorms, this settled weather with high, though not excessive, temperature continued till nearly the middle of the month, when a disturbance in the Bay caused the renewal of monsoon weather. This disturbance seems to have been due to the very high pressure which then prevailed in the north of the Bay and over Bengal, because at all the coast stations in Madras and Burma pressure continued practically normal except on the day when the centre of the disturbance was near the coast of the Circars, and there was then a very rapid fall. But that the intensity of the disturbance was dependent largely on this relatively high-pressure area in the north is shown by the rapid loss of intensity that occurred, when pressure over Bengal and the north of the Bay began to give way.

The first signs of the disturbance appeared on the 8th in the south-east of the Bay, but weather was not generally disturbed till the 12th, when pressure readings were very uniform round the coast and a diffused depression covered the Bay. The depression steadily developed, wind velocity increased daily at Diamond Island, but pressure changes continued small everywhere. The depth of the depression and the intensity of the disturbance were to a large extent due to the very high and increasing pressure in Bengal and the north of the Bay, and on the 12th, when the low-pressure area was shown over almost the whole of the Bay, the lowest readings were very little under 29·65 inches. These pressures were all above the normal values. On the 13th the distribution was almost the same, there being a slight fall in the south and a slow rise in the north of the Bay, but on the 14th the fall became brisk in Madras and the Circars, and the area of lowest pressure appeared much nearer the west coast. This was followed on the 15th by a very rapid fall in the Circars, and some time during the night the depression crossed the coast between Cocanada and Vizagapatam. By the time the centre reached the coast the depression was becoming much more diffused owing to the high pressure in the north beginning to give way, and at the same time it was filling up. Under these conditions the stormy weather moderated very rapidly, but for two or three days afterwards strong winds and a rough sea prevailed along the west coast as far south as Masulipatam.

While the depression was still over the sea, showery weather was being experienced in many parts of Bengal; but as the rainfall was due to local thunderstorms, it was scattered and irregular. On the 13th in Orissa and on the 13th and 14th in most of the other districts the showers were neither so heavy nor so general. After the depression crossed the coast and moved into Central India, winds became southerly in Bengal and ordinary monsoon weather was general except in North Bihar, where rainfall was still scattered. This monsoon weather continued with little change till the 19th, when a period of unsettled conditions began in Lower Bengal, and led to the unusually heavy rainfall, which was the chief feature of the weather in the latter part of the month. Pressure oscillations were unusually large and gave rise to thunderstorms of great local intensity. There was a rapid fall of pressure on the 19th and 20th, followed by an equally rapid rise on the 21st and 22nd, when the distribution was almost normal. To understand the great irregularity of the rainfall during these days reference must be made to the tables, when it will be seen that very heavy falls were recorded at some places, while at the neighbouring rain-measuring stations amounts were only light or moderate.

These changes led up to a depression which appeared in South-West Bengal on the 23rd, and which, owing to the continued decrease of pressure in East Bengal, covered the whole of Lower Bengal on the 24th with its centre about midway between Burrisal and Comilla. There was then defect of a quarter of an inch in East Bengal, and the cyclonic circulation caused by the depression extended over the whole province. Very heavy rain fell in Lower Bengal on the 23rd, but though it was general on the 24th, amounts were much smaller. The eastward motion of the low-pressure area then stopped, and after remaining stationary for a day, it began to move with moderate rapidity, but with little change of intensity towards the west, crossing Lower Bengal and Chota Nagpur. On the 26th the centre was between Jessore and Faridpur, on the 27th between Ranchi and Hazaribagh, and on the 28th after a rapid rise of pressure it had practically ceased to affect weather in Bengal. Though the depression remained in almost the same position for four days, and gradients were steep over the Bay, the increase of wind velocity was inconsiderable.

The quantity of rain, however, was unusually large in places, and, except in Orissa and South-West Bengal, just at the end of the month, the general rainfall continued. During the passage of the depression across Chota Nagpur the rainfall was very heavy, especially in Singbhum and Manbhum, and for that period the average fall in Chota Nagpur was two and-a-half times the normal. Owing to the rapid recovery of pressure, conditions were normal on the 28th, and the rise continuing there was soon a considerable excess. Ordinary monsoon weather continued, however, till the end of the month, and almost general rain fell in all districts. At the same time gradients became less steep in the Bay, and a period of comparatively calm weather began.

Pressure.—The chief peculiarity in connection with pressure has been the large excess which has generally prevailed before the formation of a depression. Just before a disturbance begins pressure is generally more uniform than usual, but this may be due to a relatively low distribution in the south or to relatively high readings in the north. The latter arrangement was very noticeable before the disturbance, which led to general monsoon weather in the middle of the month. Owing to these high readings the means for the month are above the normal at all stations by fairly uniform amounts. The largest excess is ·058" at Midnapore, and the smallest ·03" at Dacca and Hazaribagh.

Temperature—Has been steadily below the normal, especially during the day, throughout almost the whole month. During the first half of the month, when almost cloudless weather was general, rather high readings were recorded in the northern districts. The means in North and East Bengal and Bihar were above the normal by small amounts at the end of the first week, and also in East Bengal up to the middle of the month, but after that low temperatures prevailed except in the extreme north, where there was an occasional small excess. As stated above, the defect in maximum was much greater than in minimum temperature owing to the densely-clouded skies. The mean defect in the former is about 6° in Chota Nagpur, 4° in South-West Bengal and Orissa, and about 2° in the other districts, while in minimum temperature defect is under 1° in all districts except Chota Nagpur.

The difference between the mean for the month and the normal varies from —0·6° in North Bengal to —5·1° in Chota Nagpur.

Rainfall.—Owing to the local character of the rainfall, it is difficult to give a correct idea of the amount except by taking the means for the various districts or subdivisions, and even these show much variation. In Orissa the mean fall is slightly below the normal, in North Bihar exactly normal, and in North Bengal a tenth of an inch above, while in the other districts there is a large excess. In South Bihar the mean excess is 3·76, in East Bengal 6·12, in Chota Nagpur 6·81, and in South-West Bengal 8·4 inches. A large proportion of the rainfall occurred during the last week, and the excessive character of the falls in Lower Bengal, Chota Nagpur and South Bihar is due to the depression which formed in South-West Bengal, and after moving eastward, returned across Lower Bengal and passed through Chota Nagpur.

For the falls at the various stations reference must be made to the tables, but the more striking of the irregularities may be noted. In three separate areas in Lower Bengal the falls were between 20 and 30 inches, while intermediate between them there was a considerable tract in parts of which the fall was little over 10 and never over 15 inches. These areas contain portions of different districts. Those of the heavier rainfall included part of the 24-Parganas, Howrah and Midnapore, Singhbhum and Manbhum, also parts of Faridpur, Rajshahi, and Murshidabad. The lighter falls occurred in Burdwan and part of Birbhum. In Orissa the total fall varied from 2·4 inches in the south to about 15 inches in the north, but in East Bengal it varied from 55·4 at Cox's Bazar to less than 10 inches at Ramchandrapur in Tippera. In North Bengal the falls were generally between 15 and 25 inches, the chief exceptions being—Buxar 33·56, Kurseong 30·8, Bhagalpur and Debiganj in the Jalpaiguri district over 31, and Darjeeling 27·32 inches. In the greater part of Bihar the falls were between 5 and 10 inches.

As compared with the normal, the areas of deficiency are the south of Orissa, North Bihar, and the northern districts of North Bengal, where defect ranges up to 15 inches. Elsewhere there is excess, generally of less than 10 inches, but in some of the parts where falls were heaviest, excess reaches almost 20 inches and at Cox's Bazar exceeds it.

The following table gives a condensed view of the rainfall of the various divisions of Bengal in June and in each of the previous months of the present year as compared with the normal values for the same period. The figures given represent the actual falls expressed as a percentage of the normal falls, and it will be seen that almost without exception the rainfall has been above the normal since the commencement of the year, and that for the six months the percentage varies from 115 in North Bengal and North Bihar to 247 in Orissa:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	Actual rainfall of first six months of 1893 expressed as a percentage of the normal fall for the period.

The following table gives full data for the comparison of the actual and normal rainfall of the month of June for all the districts of the Province. The figures are derived from the average and actual rainfall of rain-recording stations in each district, due allowance being made for the area which each represents:—

Percentage Table for June 1893.

Division.	District.	Normal district rainfall for June.	Actual district rainfall for June 1893.	Percentage of actual to normal rainfall.	Percentage excess (+), deficit (−).
Orissa ...	Puri	7·89	3·56	45	— 55

METEOROLOGICAL OFFICE, BENGAL,
The 11th July 1893.

C. LITTLE,
Offg. Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of June 1893.

	Inches.	Date.	Hour.
The mean pressure of the month	29·597		
The average pressure of June from 24 years' registers ...	29·549		
The highest pressure in the month	29·765	9th	10
The lowest pressure in the month	29·316	26th	16
The range of pressure	0·449		
	Hours.		
The total number of hours of bright sunshine during the month	123·6		
The maximum possible number of hours of sunshine ...	403·4		
	Θ		
The mean temperature of the month	83·1		
The average temperature of June from 24 years' registers ...	85·0		
The highest temperature in the month	91·9	3rd.	
The lowest temperature in the month	75·4	1st.	
The range of temperature during the month	16·5		
The mean daily range of temperature	9·5		
The greatest range of temperature in one day	13·6	12th.	
	Per cent.		
The mean humidity of the month	86		
The average humidity of June from 24 years' registers ...	81		
	Inches.		
The mean vapour tension of the month	0·973		
The average vapour tension of June from 9 years' registers ...	0·998		
The mean cloud proportion of the month	7·67		
The average cloud proportion of June from 16 years' registers ...	7·04		
The total rainfall of the month	25·65		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	?		
The average fall of June from 48 years' registers ...	12·08		
The greatest fall in 24 hours	8·46	20th.	
	Days.		
The number of rainy days in the month	19		
The average number of rainy days in June from 24 years' registers	19		
	Θ		
The mean maximum equilibrium temperature of solar radiation during the month	140·8		
The mean difference of sun and air temperatures	53·2		
The greatest sun temperature	157·4	12th.	
The greatest excess of sun over air temperature	68·3	25th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·3		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·2	9th.	
	Miles.		
The mean movement of the wind per day	108·7		
The greatest movement of the wind in one day	241·0	27th.	
The greatest movement of the wind in one hour	18·0	27th, 10 to 11 and 11 to Noon.	

The number of hours with winds from each of the 8 points—

N. 11, N.E. 4, E. 29, S.E. 64, S. 230, S.W. 225, W. 62, N.W. 38, Calm 57.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·008 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;

Calcutta, the 10th July 1893.

Meteorological Report of the Province of Bengal

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns a[re] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at le[ast] 0·1 inches of rain has fallen.

CALCUTTA, *the 4th July* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 8TH OF JULY 1893.

ORDINARY monsoon weather has prevailed throughout the week, except that during the latter half rainfall was becoming more partial in Orissa and South-West Bengal. The rainfall in the northern districts has been general and in some places heavy, so that the averages for North Bengal and North Bihar are between two and three inches above the normal.

At the beginning of the week pressure was in excess by more than a tenth of an inch in Lower Bengal and the west of Bihar, while readings were practically normal in North Bengal and Assam. A low pressure area lay along the foot of the Himalayas, and winds were westerly in all districts. With these westerly winds rain fell in Bihar and North Bengal in fairly large amounts on the 2nd, but on the two following days it was much heavier in East and North Bengal, though as before there was greater irregularity than usual. From the 2nd to the 4th pressure continued to fall, at first more rapidly in the northern districts, but afterwards in Lower Bengal, where, at the beginning of the week, there was considerable excess. The steady fall during these days resulted in the normal distribution on the 5th, after which pressure rose briskly till the end of the week, the change beginning in the north-east and spreading south-westwards. While the brisk rise of pressure was confined to Assam and North Bengal, that is on the 6th, gradients were steeper than usual from east to west, and steady south-east winds were blowing over the greater part of Bengal. This must have led to the much heavier rain in North Bengal and North Bihar on the 7th and 8th, as on those days pressure was above the normal by nearly a tenth of an inch.

Pressure fell moderately to briskly during the first four days of the week, the change beginning in the north-east and spreading slowly towards the south-west. During the latter half the upward change followed the same course as the fall which preceded it, and the distribution at the end of the week was almost the same as at the beginning. The means for the week are above the normal by amounts generally ranging between ·04 inch and ·06 inch.

Temperature has again been steadily below the normal, the greater defect occurring by day owing to the very cloudy weather which has prevailed. Mean defect for the larger divisions varies from 1·5° in South Bihar to 4·2° in Orissa.

Rainfall has been almost continuous in all districts except Orissa and South-West Bengal, but more especially in East and North Bengal and North Bihar, all of which districts have received considerably more than the average for the week. During the two previous weeks the local character of the rainfall has been noted, and during the present week some very heavy local falls have again been recorded, owing to the occurrence of thunder-storms. These heavy falls have been almost all in East and North Bengal and Bihar. In Orissa, Chota Nagpur and South-West Bengal the average fall is very nearly normal, but in the other districts there is a large excess—in South Bihar of 1·62, East Bengal 2·15, North Bihar 2·77, and North Bengal 3·25 inches.

Falls of more than 15 inches in the course of the week fell at Mickliganj and Mathabhanga in Kuch Bihar and Buxa in the Darjeeling district, and more than 10 inches at the following places:—Sirajganj, Raiganj, Bhawaniganj, Kurigaon, Jalpaiguri, Alipore (Duar), Fallacotta, Debiganj, Bhogatpur (Nagrakatta), Kuch Bihar, Rangamatia, Atia, Araria, Purnea and Pratapganj.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 8th of July 1893:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

	Inches.
The total fall of rain from 2nd to 8th July 1893	2·35
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·86
The total fall from 1st January to 8th July 1893	52·13
The average fall of the corresponding period for 24 years, Surveyor-General's Office	24·82

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; p, passing, temporary showers ; t, thunder.

CENSUS OF BENGAL, 1891.

FINANCIAL DEPARTMENT—CENSUS.

Darjeeling, the 12th July 1893.

RESOLUTION.

READ—

The Report on the Census of Bengal taken on the 26th February 1891, by C. J. O'Donnell, Esq., M.A., C.S.

The Report on the Census of the Town and Suburbs of Calcutta, by H. F. T. Maguire, Esq., C.S.

The third complete census of the Lower Provinces of Bengal was taken on the night of the 26th February 1891 with entire success, and shows the population of the Provinces within the Lieutenant-Governorship of Bengal,

including the Feudatory States, to have been on that date 74,643,366 persons, of whom 37,236,485 were males and 37,406,881 females. The Provincial Superintendent of Census, Mr. C. J. O'Donnell, has now submitted his Report on this great undertaking, and the Lieutenant-Governor, who has perused it with interest, desires to place on record the following observations upon some of the more important points with which it deals.

2. The Report is contained in three volumes, forming numbers III, IV and V of the Imperial Census Series (volumes I and II of the same series being concerned with the Census of Assam). The first of these volumes comprises the Report proper, in the second are given the Imperial Tables, while the last is devoted to statistics of castes and tribes. For statistical purposes the territorial unit in those volumes is the district, but in order to place on record the statistics for smaller areas, the Lieutenant-Governor has caused to be published a selection of the tables showing details for each thana of a district, and the census reports submitted by District Officers are also in course of publication. When these operations are concluded, a mass of statistical information will be available, which cannot fail to be of the greatest utility. The Report itself falls naturally into two parts, viz., Chapters I to V, which describe the proceedings preliminary to the Census and the actual operations undertaken, and Chapters VI to XVI, which give the results and enter into a statistical examination of them.

3. In December 1889, a Census Conference sat at Agra, to which were deputed as delegates from the various provinces of India most of the officers who had conducted the Census of 1881, and as soon as the conclusions and recommendations of that Conference had been published, the preliminary arrangements for the enumeration to take place a year later were set on foot.

Preliminary operations.

4. The first step to be taken was the correction of the two great Registers A, and B, which were originally devised by Mr. Beverley in 1871, and were rightly designated by him as the basis of the whole Census fabric. Of these the first is a register of the survey areas or *mauzas* into which the whole Province is mapped out, and contains lists of the residential villages in each *mauza*: register B, on the other hand, is the converse of register A, and is a register of inhabited villages, with a column to show the survey *mauzas* in which each is situate. The work of completing and correcting these registers occupied the hot weather and rains of 1890, and was carried out almost entirely by police agency. Meanwhile District Officers were busy preparing lists of fitting persons to take up the work of enumerator and supervisor. Each district was divided into a number of charges, usually conterminous with the thanas, each of which was again broken up into circles under supervisors, and these again into blocks, each of which was as far as possible made over to one enumerator. The number of supervisors and enumerators in 1891 was much greater than in 1881, the numbers in the former year being 26,507 and 324,645 as against 13,942 and 207,683 in the latter year: the policy of the Census Superintendent was to work with small blocks and small circles, and this was rendered possible on the present occasion by the permission accorded by Government to utilize the services of police officers, a concession which was almost entirely withheld in 1881: as a matter of fact, the average number of houses in a block was 36 only. Simultaneously with the organisation of the machinery in the mufassal, the translation and preparation of the Census schedules, the "instructions to enumerators" and other forms was going on in Calcutta. These forms were printed in six different languages, viz., English, Bengali, Kaithi-Hindi, Uriya, Nepali-Hindi and the Nagri-Hindi of Chutia Nagpur. The total number of schedules printed was 22,779,507, and of other forms 2,649,198 or a grand total of 25,428,705. The expedient of making up the schedules into books of 60, 30, 20, and 10 schedules each, certainly brought about some economy in the expenditure of forms, and the Superintendent has embodied in his report recommendations for a still further progress in the same direction at the next Census, and has recorded in his office a careful statement showing the number of enumeration books of each size actually used in each thana, which cannot fail to be of use in future.

5. In addition to the arrangements for the ordinary house-to-house census, it also became the duty of the Superintendent to make special arrangements for the enumeration of cantonments, cooly lines and jails, to organise the counting

of the moving population on boats and sea-going ships, in railway trains and on roads, besides such special gatherings as fairs and wedding parties, and these were all accomplished with success. The Lieutenant-Governor has read with pleasure that, in this part of his duty, Mr. O'Donnell, like his predecessor in 1881, received willing and valuable assistance from the managers and officials of railways, the agents of steamer companies, and unofficial employers of labour throughout the Province, and Sir Antony MacDonnell gladly takes this opportunity of thanking them for services rendered often at considerable personal inconvenience.

The actual enumeration.

6. As in 1881, the enumeration of the people consisted of two processes, viz., the preliminary record and the final checking. The former operation was carried out by the enumerators at leisure between the 15th January and the 15th February, and thus ample time was allowed for the examination of their work by supervisors and other superior officers; but, as a matter of fact, the first fortnight was chiefly occupied by experiments, and few entries were made in the schedules till after the first of February. The Lieutenant-Governor agrees with Mr. O'Donnell that the additions and erasures which are necessarily implied by too early a preliminary record justify his arguments in favour of a later commencement. In a few special cases, chiefly backward and jungly tracts, like the Tributary States of Orissa and Chutia Nagpur and parts of the non-regulation districts of Bengal, the preliminary counting began earlier, and the final check was not carried out by night. Modified schedules of a much simpler character than those in ordinary use were employed in the Hill Tracts of Chittagong, Hill Tippera and Sikkim.

7. One great step in advance was taken at this Census, which had not before been generally attempted in Bengal, and which in fact formed a third or final process in the completion of the actual enumeration. This was the rough totalling of their enumeration books on the morning of the 27th February by the enumerators who were collected in a central spot for that purpose under the superintendence of their supervisor. Careful arrangements were made for the addition of the block, circle and charge totals so obtained, and in many districts the organisation was so good that the district totals were in the hands of the Magistrate within 48 hours of the actual enumeration. Moreover the general accuracy of the work was so great that between the preliminary provincial total so arrived at, and that which was ascertained at the close of the detailed abstraction, there was only a deficiency of 305,716, or 4 per mille. The most accurate work was done in Cuttack, where the error was only 291 in a population of 1,937,671, and in Rajshahi, where it amounted to 456 in a total of 1,313,336. The variation in 1881, when the preliminary total was compiled in district offices and not by the enumerators, was 9·8 per mille. Mr. O'Donnell recommended that this preliminary abstraction should comprise more than the simple totals of the sexes, but the Census Commissioner did not sanction the proposal: the recommendation is repeated in the report, but the Lieutenant-Governor does not consider it necessary to pass any orders upon the suggestion, which will doubtless be fully considered when the time comes for making arrangements for the Census of 1901.

The compilation of the tables.

8. The schedule of 1891 demanded practically the same information as that of 1881, but there has been a great difference in the manner in which this information has been combined for the published Census tables. Details of occupation in combination with age were extracted in 1891, but not attempted ten years previously. The heaviest and most vexatious tasks, however, were the extraction of details of education combined with caste, and of marriage combined with age and caste.

9. An entirely new departure was also taken in the establishment of offices at district head-quarters for the abstraction of the figures from the schedules and their subsequent tabulation. In 1881 there were three offices—at Calcutta, at Dinapore, and at Cuttack; the Agra Conference recommended the establishment of an office at the head-quarters of each Division, but the Census Superintendent in 1891, with the powerful support of the Census Commissioner, obtained permission from the Lieutenant-Governor to open offices at the head-quarters of each district. Mr. O'Donnell urges that the experiment has

been successful, but the Lieutenant-Governor is unable to accept this opinion without some qualification. It is true that a great deal of the work done by the clerks in the Calcutta offices in 1881 was very bad and entailed much costly checking and correction, but from reports which have reached him since the operations were completed, and from admissions made by Mr. O'Donnell himself, it is manifest to the Lieutenant-Governor that work in several district offices in 1891 was very badly done also. The new plan is certainly much cheaper, since it saves house rent, travelling allowance, freight on schedules, and the deputation of an expensive superior establishment; but, on the other hand, the diffusion of the work renders difficult the exercise of control by the Provincial Superintendent, and—a most important consideration—throws additional labour and responsibility upon the already overworked District Officer. For these reasons, the Lieutenant-Governor, while admitting that Mr. O'Donnell administered the district system as well as it could be done, and while cordially acknowledging the devotion of almost all District Officers in discharging this heavy additional duty, is inclined to think that on a future occasion the experiment of divisional offices under a small separate staff should have a trial.

10. Abstraction, or the transfer of figures from the actual enumeration books to twelve abstracting sheets in which the block was the unit, was commenced everywhere about the 8th of April 1891, and was concluded almost without exception by the 31st July. Tabulation, that is, the transfer of the block totals from the abstraction sheets into twenty-six totalling registers, was the second stage of the operations, and commenced on different dates in different offices, according to the accuracy of the antecedent abstraction or the rapidity with which errors in it were corrected. "It was at first intended," to quote from the report, "that tabulation should be completed by the middle of August, but only one district, Noakhali, was able to work within this limit of time, followed closely by Bogra. Most districts completed tabulation by the end of September, but a few dragged on to the end of the year."

11. On these two operations, which were carried out according to fixed scales of work, Mr. O'Donnell has a good deal to say, chiefly of a technical character, which the Lieutenant-Governor will not discuss in this place, but which will doubtless prove useful to the census officer ten years hence; but the arguments employed in favour of less haste in future in conducting abstraction and tabulation are very sensible. The basis of the scheme on this occasion was the completion of the work of abstraction in four months, or 100 working days, and to secure this end, great efforts were necessary in several districts where it was difficult to procure skilled labour. "The general opinion of District Officers," in which the Superintendent records his complete concurrence, "was that abstraction was pressed on much too quickly, and that thorough supervision was impossible, except by a demand on the time of District Officers and other gazetted subordinates, which it seems inadvisable to repeat."

The cost of the Census.

12. The fourth chapter of Mr. O'Donnell's Report deals with the cost of the Census. The total allotment made by the Government of India was eight lakhs of rupees, of which a lakh and a half were intended to cover the cost of actual enumeration, and six and a half lakhs that of compiling the resulting statistics. The saving effected on the allotment for enumeration was as much as Rs. 68,871. Very large savings were made under the heads of "Establishment" and "Paper and Printing;" the first being secured by the refusal to entertain Census clerks before the Census, so that nearly all preliminary work was done by the ordinary district staff and by the wholesale employment of the police, whose assistance was invaluable. The second was effected by the most rigorous scrutiny of indents for forms and by the diminished cost of paper, while the employment of larger machinery enabled the Press to turn out its work more cheaply. Excluding Calcutta, the cost of enumeration in 1891 was only Rs. 1,096 per million of population, as against Rs. 2,525 in 1881. Great variations in the cost of the Census were observed in different districts, the expenditure on enumeration per 100,000 of the population ranging from Rs. 278 in Darjeeling and Rs. 198 in Jalpaiguri, to Rs. 41 in Muzaffarpur, Rs. 45 in Champaran, and Rs. 49 in Dinajpur, the provincial average being Rs. 69.

13. The second and largest branch of expenditure was connected with the abstraction and tabulation of the Census schedules in the district offices.

Excluding Calcutta, as well as Kuch Bihar and Hill Tippera, the Administration of which States bore the entire cost of compilation, and making allowance for the municipal contributions and other recoveries, the Census statistics of a population of 73,245,496 persons were abstracted and tabulated at a cost of Rs. 6,20,000, so that the saving on the allotment made by the Census Commissioner was Rs. 30,000. Mr. O'Donnell's conclusion is that the allotments for abstraction were generally found to be ample, but that in tabulation they were very frequently exceeded, not because they were insufficient, but because the clerks in many offices combined to resist the tasks required of them, and so to prolong the period of their employment. His suggestions for future retrenchment in these operations do not call for present orders.

14. The Lieutenant-Governor considers the savings of nearly a lakh of rupees to be proof of the firm control maintained over expenditure by the Census Superintendent; but from information which has reached him from various quarters, Sir Antony MacDonnell is disposed to think that a little more liberality, while it would not have detracted from the credit due to Mr. O'Donnell, would have made the Census machinery work more smoothly. Serious inconvenience was caused in several districts by the rigid economy enforced in the supply of enumeration books. Sufficient allowance seems hardly to have been made in some instances for local difficulties, and the want of competent clerks, and funds for preliminary expenditure were not always adequate. It is not usual for the Government to look askance at economy of expenditure, and Sir Antony MacDonnell is far from under-estimating the Superintendent's devotion to this part of his duties. But it is to be remembered that if private persons did not largely assist the Government on these occasions by the gratuitous loan of their services, the cost of a Census in India would be enormous. Illiberality of treatment deters unofficial persons from helping us in time of need, and the Lieutenant-Governor therefore thinks that the claims to be recouped reasonable expenses, put forward by such private persons who have devoted time and trouble to the service of Government, should not be scrutinized in a grudging spirit. The Lieutenant-Governor takes this opportunity of recording his cordial acknowledgments of the invaluable assistance which private individuals have gratuitously given the Government on this occasion.

Census Legislation.

15. The chapter on Census Legislation, which is the fifth of Mr. O'Donnell's Report, the Lieutenant-Governor leaves for consideration when the arrangements for the next Census are under discussion.

The results of the Census.

16. The second part of the Superintendent's Report, dealing with the results of the Census, commences with his sixth chapter, which contains a statement of the actual population discovered by the Census, and a succinct but graphic account of the country in which they live. Mr. O'Donnell has abandoned the usual arrangement by which the Lower Provinces of Bengal are portioned out into administrative Divisions; and for the purpose of examination, looking chiefly to their geographical and ethnological characteristics, he has broken up the traditional provinces of Bengal, Bihar and Orissa, and has re-arranged the districts of Bengal into the following great groups: (I) Northern Bengal, consisting of (a) the plains portion of the Rajshahi Division with parts of Malda and Purnea, and (b) Darjeeling, the Western Duars and Kuch Bihar. (II) Eastern Bengal, comprising the Dacca and Chittagong Divisions and the Khulna district, divided into (a) the inland districts, (b) the littoral districts, and (c) the Sunderbuns, besides the Chittagong Hills and the State of Hill Tippera. Western Bengal (III) includes the districts of (a) the Presidency and (b) Burdwan Divisions, and (c) the metropolitan towns. North Bihar (IV) including the sub-Himalayan tract, South Bihar (V) the southern area bordering on the Chutia Nagpur Division. Orissa (VI) and Chutia Nagpur (VII) each fall naturally into two parts—that under the direct control of the Lieutenant-Governor, and that under the Chiefs of the Tributary States, to which has been added the British district of the Sonthal Parganas. This arrangement certainly groups the population upon an intelligent and instructive system, while the figures which are contained in the statements appended to the report enable an examination of the figures to be conducted upon the old lines.

17. The population is distributed as follows over the great natural divisions of the Province described above:—

The distribution of the population.

	Area.	Population.	Density.
Northern Bengal	21,836	10,002,671	456·6
Eastern Bengal	34,238	16,007,257	467·1
Western Bengal	22,994	14,388,337	622·7
Total Bengal Proper ...	79,068	40,398,265	510·3
North Bihar	19,118	12,901,025	674·8
South „	16,421	8,364,125	509·3
Total Bihar ...	35,539	21,265 150	595·8
Orissa	24,240	5,744,062	232·8
Chutia Nagpur	48.489	7,266,347	149·8
Grand Total	187,336	74,673,824	398·3

The above figures show that the Bengali population proper amounts to 54·09 per cent. of the total, and that it covers an area of 42·2 per cent. of the province; that the Biharis amount to 28·47 per cent. of the population and inhabit 18·9 per cent. of the area of the province; that the Uriyas, with a country covering 12·9 per cent. of the area of Bengal, are 7·69 per cent. of the population. Finally, the inhabitants of Chutia Nagpur, who are mostly aboriginals living in a thinly-populated tract, are 9·73 per cent. of the whole, and are scattered over an area which is equivalent to 25·9 per cent. of the whole country.

18. The figures for North Bihar are phenomenal. This tract contains no great cities, except Patna (165,192) and Gaya (80,383), and is in all respects a purely rural country; yet it carries a population of 674·8 to the square mile, and some of its districts show such wonderful figures as 930 (Saran), 902 (Muzaffarpur), and 840 (Darbhanga). Next in the list of sub-provinces comes Western Bengal, with a density of 622·7 per square mile, but this is largely due to the inclusion of Calcutta and the Suburbs with the towns of Howrah and Bally, and if these are excluded, the population of the sub-province amounts only to 508 to the square mile. How these figures compare with those recorded in other provinces of the Empire will be seen from the the statistics below, which are taken from Table I of the Imperial Census Tables—

	Area.	Population.	Density per square mile.
Bengal* ...	151,543	71,346,987	470·8
Assam ...	49,004	5,476,833	111·7
Bombay ...	125,144	18,901.123	151·
Burma ...	171,430	7,605,560	44·3
Central Provinces ...	86,501	10,784,294	124·6
Madras ...	141,189	35,630,440	252·3
North-Western Provinces ...	107,503	46,905,085	436·4
Punjab ...	110,667	20,866,847	188·5

Some of the district figures have been quoted above: the density ranges from 1,264 to the square mile in Howrah to 20 in the Hill Tracts of Chittagong. Altogether eleven districts have an average population of 700 or more to the square mile, as against ten in 1881. The two lists given in the margin show the comparative density at the two periods, and they also demonstrate clearly the general advance in density in these districts which were already over-populated.

1891.		1881.	
Howrah ...	1,264	Howrah ...	1,130
Saran ...	930	Saran ...	869
Muzaffarpur ...	902	Muzaffarpur ...	869

* Excluding Feudatory States, &c.

19. The seventh chapter of Mr. O'Donnell's Report deals with a subject of very great administrative importance, viz., the variation of the population, district by district, since 1881, and he rightly describes the chapter as one of the most important in the volume. The district figures are discussed with care and minuteness, and extracts are given from the reports of many district officers, which the Lieutenant-Governor has read with interest. These are, however, too numerous for notice here, and His Honour must content himself with referring to some of the most important among them, as well as the figures for areas larger than the district.

Increase and decrease of the population.

20. The Census Superintendent has followed the same arrangement of areas which has already been referred to in previous paragraphs. He has also, with commendable industry, carried still further the investigations into increase and decrease which were very fully discussed in Chapter V of the Bengal Census Report for 1881. Mr. O'Donnell has shown in a small table for every district the variation, actual and proportionate, in the number of persons actually enumerated in the district in 1881 and in 1891, and he has also ascertained, by a judicious use of the birthplace statistics, what may be called the corrected population for each district. From the recorded total have been deducted the figures for all persons enumerated in the district who were born elsewhere; on the other hand there have been added the numbers of those who, though born in the district, have been enumerated elsewhere, the result being the population actually born in the district. From this operation two important results emerge: it is possible to recognize very clearly in what districts population is increasing or decreasing, irrespective of outside influences, and it is not less easy to see to what localities immigrants resort and what tracts are being depleted by emigration.

21. When people are prosperous and live in a healthy climate, population usually increases. But it is not always safe to infer prosperity from an increase in population: the inference, however, in the case of Eastern Bengal would not be incorrect. An examination of the figures shows very clearly that, during the ten years which elapsed between 1881 and 1891, the districts of this sub-province have, without exception, made great strides in material prosperity and in numbers. Not long before the Census of 1881 their prosperity was rudely checked, and great loss of life and vast damage to property were caused by the cyclone and storm-wave of October 1876: but even in 1881 the ravages of that terrible calamity had been largely repaired, and the advance which had then commenced has been so well sustained, hat between that year and 1891 there was an increase of 10 per cent. or more in every district of the Dacca and Chittagong Divisions, the progress being greatest in those which had suffered most severely in 1876, viz., Noakhali, Chittagong, Backergunge, and Tippera. Not far behind these districts come the Tributary States of Chutia Nagpur and the districts of the Chutia Nagpur Division, with the exception of Hazaribagh. The non-Aryan races are said by Mr. O'Donnell to be extremely prolific, and the fine climate of this tract, and the simple habits of its people, all tend to the preservation of life and the rapid reproduction of the species. Nevertheless, these facts do not sufficiently account for the recorded increase, and it seems impossible to doubt that much of it is due, especially in the Tributary States, as in the contiguous Tributary States of Orissa, to more accurate enumeration, and in some extent to immigration. The same explanation alone suits the great increase in Darjeeling of 28·1 per cent. in the number of women. As soon as the figures of 1881 were published, it was suspected that there had been in this district a great concealment in the number of women, and the suspicion is now verified. The district of Malda, which, during the decade, has enjoyed a season of uninterrupted prosperity, has also increased 14·4 per cent. on the population of 1881. Saran, which is the most densely populated rural district in the province, and which was described by Mr. Beverley in 1872 as incapable of sustaining any further burden on the soil, shows an advance in its net population of 13·3 per cent.: Howrah, which is essentially an urban district, has an increase of 17·2 per cent., which the Census Superintendent is unable to credit. No districts give a net decrease except Birbhum (4 per cent.), Rajshahi (3·1), and Burdwan and Rangpur (1 per cent. each). In all these districts fever has been continuously prevalent.

22. The general results for the larger areas of Mr. O'Donnell's classification are as follow:—

		Variation in net population.		
		Males.	Females.	Total.
I.—Northern Bengal—				
Plains districts	...	+ 2·9	+ 1·7	+ 2·3
Hills and Terai	...	+ 7·6	+ 5·8	+ 6·76
II.—Eastern Bengal—				
Inland districts (*a*)	...	+ 10·7	+ 11·9	+ 12·3
Littoral districts (*b*)	...	+ 18·9	+ 16·4	+ 17·7
Hilly tracts	...	Not available.		
III.—Western Bengal—				
Presidency districts	...	Not available.		
Burdwan districts	...	+ 4·3	+ 2·4	+ 3·3
Calcutta	...	+ 16·4	+ 12·4	14·4
IV.—North Bihar	..	+ 6·4	+ 8·0	+ 7·2
V.—South Bihar (*c*)	..	− 1·8	+ 3·1	+ ·6
VI.—Orissa	..	+ 9·2	+ 11·3	+ 10·2
VII.—Chutia Nagpur (*d*)	..	+ 14·9	+ 14·3	+ 14·6

23. The statistics of gross population display, as might have been expected, greater variation, for whereas in respect of net population there were seventeen districts which showed an advance of 10 per cent. or more, and only four which returned an absolute decrease, the varying tide of migration has added so eccentric a factor to the natural progress of population, that while fifteen tracts show an advance in gross population, the number of tracts in which numbers have actually fallen off is seven, viz. Kuch Bihar (3·9), Birbhum (3·8), Jessore (2·5), Rangpur (1·6), Rajshahi (1·2), Nadia (1·1), and Burdwan (0·1). The districts of Eastern Bengal again take a prominent place, as the figures in the margin will show, clearly proving that the favourable conditions of life in those districts have invited settlers as well as stimulated natural increase. In Howrah and the 24-Parganas, "the Middlesex of Bengal," the attractions of the metropolis and of the great mills and factories which gird it about account for the increase: in Darjeeling and Jalpaiguri the very high figures are attributable to the development of the tea industry, the more accurate census being in Darjeeling an additional explanation. Malda and Bogra are two prosperous tracts in the generally stagnant area of the Rajshahi Division, while the prospect of virgin soil at easy rates of rent, and the facilities afforded by the new railway, have flooded the Sonthal Parganas, Manbhum, and the Chutia Nagpur States with immigrants.

	Increase of gross population.
Darjeeling ...	43·2
Chota Nagpur States	30·9
Noakhali	23·0
Tippera	17·9
Howrah	17·5
Jalpaiguri	17·3
Dacca	14·5
Malda	14·4
Chittagong	13·8
Mymensingh	13·4
Backergunge	13·2
Manbhum	12·9
24-Parganas	12·5
Sonthal Parganas	11·8
Bogra	11·2

24. Focussing all the province in one general view, it seems that only in one large tract, viz., Eastern Bengal, has there been a general and marked advance of the gross population, viz., 13·5 per cent. Orissa and Chutia Nagpur, it is true, yield an increase of 10·2 and 12·2 per cent. respectively: but this is due, to an indefinite but large extent, to better enumeration. Bihar, thanks to the development of the sub-Himalayan tract and to the advance in the marvellous district of Saran, has been able to withstand the loss of population in its southern zone from fever and the heavy drain of emigration, and shows a gross increase

(*a*) Excluding Jessore.
(*b*) Excluding Khulna.
(*c*) Including Monghyr and Bhagalpur.
(*d*) Including the Sonthal Parganas.

of 4·7 per cent. On the other hand, in Northern Bengal, excluding the hilly tracts, every district but Malda and Bogra has either retrograded or remained stationary, and the general advance is only 2·5 per cent. Lastly, Western and Metropolitan Bengal, owing to the persistent fever which throughout the decade has clung to the districts of that sub-province, has a percentage of increase, excluding the metropolitan towns, of only 3 per cent.

Emigration and Immigration.

25. The Report leaves no room for doubt that since 1881 the habit of emigration, chiefly of a temporary character only, has increased to some extent among the people of these provinces. The pressure on the soil in some districts, the facilities of railway communication, and the increased cost of living everywhere, have induced an emigration which was unknown ten years ago. Excluding those who had passed out of India and could not be traced, the balance of migration to and from other provinces against Bengal in 1881 was 147,001, whereas in 1891 as many as 821,998 persons had left Bengal, as against 506,423 who had come in, leaving a balance against the Lower Provinces of 315,575 persons, or more than double the loss of population ten years before. For this great drain Assam is mainly responsible, that province containing at the time of the census 418,360 persons born in Bengal, of whom 190,774 were emigrants from Chutia Nagpur. The distribution of the emigrants from Bengal is given below—

North-Western Provinces and Oudh	206,018	Madras	10,923
Assam	418,360	Punjab	7,654
Central Provinces ...	55,741	Bombay and Sindh ...	11,218
		Burma	112,084

26. The migration beyond the province is of course small compared to the movement of population within the province itself. Impressed with the greatness of the latter movement, Mr. O'Donnell doubts whether "any nation in the Old World is within its own limits in a more constant state of movement or more ready to change its homes." The Lieutenant-Governor has no information before him as to the volume of this migratory movement in European countries, but in Bengal the facts do not seem to warrant the significance which Mr. O'Donnell attaches to them, nor to show any very appreciable difference from what was already well known on the subject. In 1881, after excluding all those persons, the districts of whose birth had not been recorded, and all those enumerated in Bengal who were born outside the Province, there were found in Bengal 68,467,933 persons who had been born within its limits: to these may be added 615,286 persons born in Bengal and found elsewhere, so that the number of Bengal-born persons in that year, excluding those whose returns were indefinite, was 69,083,219. Of this number, only 3,428,867, or 4·96 per cent., were enumerated in districts other than that in which they were born, and 615,286 (or ·88 per cent.) were found in other provinces. The inter-district and inter-provincial migration of the people in 1881 then was measured by 5·84 per cent. of the total Bengal-born population. In 1891 the number of persons in Bengal, of whose birthplaces we have information, was 73,848,719, and those Bengal-born persons who were found elsewhere numbered 821,998, so that the total of natives of Bengal in 1891 was 74,670,717. Of this number 3,775,582, or 5·05 per cent., were found in districts other than that of their birth, and, as already stated, 821,998, or 1·1 per cent., were enumerated outside the province. The migration of the people in 1891 then is measured by 6·15 per cent. on the total Bengal-born population, or ·31 more than in 1881. The increase is not more than a very moderate response to the increased facilities of communication which have come into existence during the decade; while taken absolutely, the migration is not of a magnitude to call for any special notice, or to justify the Superintendent's description of it. If it be remembered that the boundaries of districts and of provinces are often merely conventional lines, the dwellers on both sides of which are practically the same people, intermarrying freely, and passing without stint backwards and forwards on business or pleasure, it would seem that the movement recorded is really inconsiderable, and that the statement of the Census Superintendent of 1881, that the natives of these provinces are "above all things a domestic and stay-at-home people," is nearer the mark than the later statement now under notice.

27. In many districts, of course, which march with provincial boundaries, there is a considerable immigrant population, and a considerable number of its natives are found elsewhere: so, also, where there are special attractions, a district shows a large immigrant population, or conversely, where the pressure on the soil is great or the climate unhealthy, the proportion of emigrants is large. These ratios are worked out district by district in Mr. O'Donnell's Report, in a series of tables for each sub-province of his classification. In eight districts the immigrants amount to 10 per cent. or more of the population, and in twenty others the ratio is 5 per cent. or more. Only three districts show a percentage of more than 10 of emigrants to the total born in the district, but in twenty-two others the ratio is between 5 and 10 per cent. The districts with the largest proportion of emigrants and immigrants are given in the two lists in the margin.

Immigration.		*Emigration.*	
Calcutta ...	66·3	Hooghly	15·9
Darjeeling ...	61·0	Saran	15·2
Hill Tippera ...	24·2	Lohardaga	11·7
Jalpaiguri ...	21·6		
Tributary States—Chutia Nagpur...	17·3		
Howrah ...	15·3		
Champaran ...	13·3		
Malda ...	10·5		

Urban population.

28. Bengal, as judged by the relative proportions of its urban and rural population, remains as much as ever an agricultural country of small villages and hamlets. The total figures of urban population in 1881 and 1891 unfortunately cannot be fairly compared, since the meaning of the term was differently construed in the two years. In 1881 every municipality, whatever its population, was reckoned as a town, as was every village or group of villages with more than 5,000 inhabitants, provided that it was really urban in character, while in 1891 that term only included those places to which Government has seen fit to extend municipal legislation. There is, therefore, an apparent decrease in the urban population of 203,811; but comparing the population of existing municipal areas with the population of the same places in 1881, there has been an increase of 304,236 persons, or 9·36 per cent., in the decade. This increase is far from universal, so that Bengal as yet knows nothing of that indraught to the great cities which is so prominent a feature of European sociology. Where the urban population has increased, there has always been a specific cause, such as the development of railway communications, as in Mokameh and Jamalpur, Lohardaga and Daltonganj, Muzaffarpur, Darbhanga, and Chapra, coupled sometimes with the attractions of climate as in Darjeeling; the development of trade, as in Jalpaiguri, Dacca, Chittagong, and Naraingañj, or a purely fortuitous and temporary influx of pilgrims as in Puri.

29. The number of villages with less than 200 inhabitants is 54 per cent. of the whole, and an interesting table shows what proportion of the total population in each geographical division lives in villages of different sizes. As might have been expected from the universal fertility of the country, the agricultural habits of the people, and their long freedom from war and rapine, Bengal has comparatively speaking fewer large towns than any other of the great Indian provinces. Mr. O'Donnell writes:—

"The Lower Provinces contain 37 towns with more than 20,000 inhabitants, the number in the North-Western Provinces and Oudh being precisely the same, and in the Madras Presidency only one less. In Bombay 21 towns exceed this population, and in the Punjab 23. In the proportion of great towns to total provincial population the rank of these great administrative divisions is the reverse of that in which they have been detailed above, the Punjab taking the first place and Bengal the last. The only point in which the Lower Provinces can claim any urban superiority lies in the fact that Calcutta, as befits its metropolitan position, is the largest city in the Empire, with a population, including its immediate suburbs, of 879,154 souls, Bombay with 821,764 inhabitants being a close second, Madras coming a rather distant third with 452,518 people within its municipal limits. The two former great Indian capitals have the distinction of exceeding in population every city in the British Empire except London, whilst only Liverpool, Manchester, and Birmingham surpass Madras. The only capitals in Europe that possess a larger population than Calcutta are Paris, Berlin, and St. Petersburgh; in Asia, Tokio; and in the rest of the world four great cities of the United States of America."

Europeans and Eurasians.

30. The numbers and distribution of the European and Eurasian population are matters of interest not only to the Administration, but to the general public. The numbers at the present census and the last appear to have been as follows:—

	British-born subjects.	Other Europeans.	Eurasians.	Total.
1881	10,583	13,638	14,705	38,926
1891	9,198	13,575	15,162	37,935
Difference ...	—1,385	—63	+457	—991

The decrease among the Europeans has been entirely in Calcutta, where the English-born fell from 5,923 in 1881 to 4,225 in 1891—a result so unexpected that the Superintendent hazards the conjecture that some of the forms for Europeans in Calcutta have been mislaid and their contents omitted from calculation. Rather more than half of the 22,773 Europeans, viz. 11,914, are found in Calcutta, the only other districts which have more than 1,000 Europeans being the 24-Parganas (2,010), Patna (1,662), and Darjeeling (1,049), their prominence being due to the cantonments they contain. Howrah, with 826 is not far behind.

31. The figures for the Eurasian population are full of significance, and it is to be regretted that it is not possible to place implicit confidence in them. It is well known that there exists among certain classes of them a tendency to record themselves as pure Europeans, and this must to a certain, though indefinable, extent impair the value of the returns. Nevertheless the fact that Europeans have not increased during the decade, even after making every allowance for possible errors in the Calcutta census, gives some ground for the belief that the Eurasian returns are fairly reliable. Their inclination, as is well known, is to cluster in colonies in the older towns of the province, so that Calcutta returns 9,818, or 64·7 per cent. of the whole number, Howrah, with its mills and railway workshops, shows 810, Chittagong contains 575, Patna 570, Burdwan 382, Monghyr 343. Their increase during the decade has only been 3·1 per cent., and the figures given by Mr. O'Donnell go to show that, contrary to the general opinion, they are not prolific. Moreover, his statistics confirm the conviction that the poverty and the habits of those who form a large percentage of the community are inimical to health and longevity. Out of every 20,000 persons in England of each sex, 1,380 males and 1,501 females are over 50 years of age; in the total population of the Lower Provinces, which is almost entirely native, the proportions are 1,032 males and 1,191 females, while among Eurasians the figures are for males 923 and for females 1,151.

The religions of the people.

32. The statistics of religious belief have at each preceding census afforded information of great interest, and the enumeration of 1891 is no exception to the rule. In 1872 it was demonstrated, for the first time, that the stronghold of Muhammadanism was not, as had till then been supposed, the great and ancient city of Patna and the old Moghul province of Bihar, but the swamps and rice-fields of Eastern Bengal: in 1881 a considerable advance of Hindus was displayed, which was attributed to the inclusion in that category of many members of aboriginal or semi-aboriginal tribes, while the Report of 1891 gives good ground for the conclusion that the feature of the past ten years has been the great development of Islam. Mr. O'Donnell has discussed the subject with care, and has shown conclusively, by the aid of statistical tables, that throughout the province during the past decade the Muhammadans have gained steadily on the Hindus, while in Bengal Proper, during the nineteen years which have elasped since the census of 1872, the deficiency of half a million of Muhammadans has been wiped out, and has been replaced by an excess of one million and-a-half. The Census Superintendent attributes this result less to conversion than to the fecundity of the Muhammadan population, and his remarks merit quotation:—

"On the other hand, the Muhammadan faith, like the Sikh, opens its arms to every comer and receives him on terms of the broadest equality, if the profession he actually pursues is not an essentially degrading one. All the agricultural castes—the Chandal, Kaibartta or Chasa—on joining Musalmansim develops into a Shaikh, and it depends only on his wordly wealth to what rank he may aspire in seeking a bride for himself or a husband for his daughter. It is a matter of history that the republican character of the domestic constitution of Musalman society won innumerable converts in Eastern Bengal when the Moghul supremacy was first established in that region a few centuries ago. It would be strange if it did not still exert

a strong attraction, and the great growth of the faith would seem to bear witness to this opinion, which, however, it is impossible to prove statistically. It is known that a powerful Muhammadan propaganda is at work, and that the preaching of the ubiquitous Mullahs and Mirs is directed not only to instil the precepts of a higher life, according to the doctrines of the Koran, on Musalmans, but to gain new followers for its teachings. That converts should result seem natural, but, however this may be, it is certain that the great growth of Musalmansim in Bengal Proper is connected rather with physical than doctrinal forces. The Musalman with his more varied and nutritious dietary is probably a more vigorous man than the Hindu. Moreover, the universal practice of widow marriage, which the Bengali Hindu holds in abhorrence, adds very largely to the reproductive class amongst Muhammadan women. On the other hand, ill-assorted marriages are far more common amongst Hindus, men well advanced in years being united to girl-wives who in the natural course of human life are left widows, debarred from further maternity at a comparatively early age Musalmans also, particularly in Eastern Bengal, are polygamists whenever they have the means to support a second wife, generally a widow, married as often as a convenient unpaid domestic drudge as for the sake of the children she usually bears her master."

33. The actual figures for the different religions in 1881 and 1891, their ratio in 10,000 of the population, and their variation during the decade, are shown in the statement below:—

Religions.	1891.		1881.		Variation.	
	Number.	Ratio in 10,000.	Number.	Ratio in 10,000.	Number.	Ratio.
Hindus	47,821,468	6,407	45,452,826	6,536	+ 2,368,662	— 129
Jains	7,270	1	1,609	·2	+ 5,661	+ ·8

34. It has been stated that the census figures of 1872 first showed how strictly localised the religions of the province were, and the localisation of religion is as distinct as ever. In every district of Orissa more than 90 per cent. of the population are Hindus, while Bihar is only slightly less Hindu, since in every district of the Patna and Bhagalpur Divisions, except Purnea, they number 85 per cent. or more. No district is so exclusively Muhammadan as these are Hindu, the highest proportion of Muhammadans being reached in Bogra (80·62), while in Rajshahi (78·72), Noakhali (75·30), Pabna (73·31), and Chittagong (71·69) they exceed 70 per cent., and the other districts of Eastern Bengal without exception have a Muhammadan population of more than 60 per cent. Animistic religions are of course most largely represented in the Orissa and Chutia Nagpur Divisions and in the districts bordering on them.

35. The Chutia Nagpur Division is also conspicuous for the great increase of Christians which it shows. Christianity, though the number of its adherents is still comparatively small, being 128,135 in all, or 26 in every 10,000 of the general population, has throughout the Lower Provinces made greater progress, relatively speaking, during the last decade than any other religion, the advance being 50·21 per cent.; but in the Chutia Nagpur Division the increase has been 122·6 per cent., the numbers having advanced from 40,373 in 1881 to 89,654 in 1891. Mr. O'Donnell's report examines the distribution of this increase among the various denominations of the Christian religion, and his observations will be read with interest by the friends of missionary enterprise in India. The recorded figures have, however, to be received with considerable reservations, and a comparison of figures for denominations at the time of the two censuses is extremely difficult, on account of considerable differences of description at the two periods.

The ages of the people.

36. Like his predecessor in 1881, Mr. O'Donnell has devoted much trouble and time to the extraction of the ages of the population, and, like him, has been compelled to confess

that the result is entirely incommensurate with the labour and expense involved. In 1881 age-periods were for the first time compiled in detail in India, and were worked out on two abstraction sheets. In 1891 four abstraction sheets were used to record the ages of the whole population, of which two (Nos. I and XI) formed the basis of check for all the work of abstraction, and were therefore corrected with the utmost care. The cost of preparing these great tables has been estimated by Mr. O'Donnell at about two and three-quarter lakhs of rupees, or more than one-half of the total cost of abstraction, and the Lieutenant-Governor notes with sympathy the Superintendent's disheartening conclusion that the greater part of this large sum was absolutely thrown away. So strong is Mr. O'Donnell's conviction on this point that he has proposed that in future the age-tables of only a part—perhaps six millions of the population—should be abstracted, typical circles, both urban and rural, being selected for treatment. No orders are required upon this proposal now, but the Lieutenant-Governor has no doubt that it will receive the fullest consideration before the census of 1901 is undertaken.

37. For the reasons stated above, it would be unprofitable to examine at any length the voluminous age-tables which are contained both in the statistical volumes of the Report and in the letter-press of Mr. O'Donnell's first volume, and in any case such interest as they possess is purely statistical. The errors in recording the ages of the population which were observed in 1881 are repeated in 1891 with very slight variations, so much so that the Superintendent of the Census just taken quotes *in extenso* the observations of his predecessor as exactly applicable to the figures before him. A great effort was made by the Agra Conference to remove one prolific source of error, by directing that children under one year of age should be described simply as "infant," instead of by the number of months of age—a device which in 1881 is believed to have resulted in large numbers of infants of less than 12 months being returned as of the corresponding number of years. This change, however, seems to have been quite unsuccessful, and the figures again present the absurd spectacle not only in Bengal, but all over India, of more children alive between the ages of 5 to 9 than those of 0 to 4; while in the first five years of life the fourth is most largely represented, followed in succession by the first fifth, third, and second, in that order. Again, too, the phenomenon reappears of large numbers of ages returned at the round numbers, multiples of 5 and 10; and the Superintendent, carrying his investigations beyond the quinquennial periods to groups for each year of life, has shown that certain favourite ages—12, 16, 22, 32, and 42—have been returned by an altogether disproportionate number of the population. The fact is that the vast majority of the people are still so illiterate, and their inaccuracy as regards their ages so universal, that the collection of trustworthy age statistics is for the present a hopeless task in Bengal.

38. After the census of 1881, the figures then obtained were referred to a distinguished English statistician, Mr. Hardy, who, by the aid of a small number of accurately recorded life statistics from the North-Western Provinces, elaborately corrected the chaotic figures presented to him. Mr. O'Donnell has applied the conclusions so obtained to the returns of the late census, and has redistributed the age figures over 10,000 of the population in all the great natural divisions of the country, producing statistics which, if they do not carry to the Lieutenant-Governor's mind complete conviction of their accuracy, bear testimony to the industry of the writer, who has based upon them conclusions as to the fecundity and longevity of the different religions and races in different parts of the province, which are at least plausible and ingenious. Out of the mists and uncertainties of these statistics, however, there emerge two conclusions of practical importance, which are at least *vraisemblable*. It is stated that in the Lower Provinces the true birth-rate is 47·9 per thousand (49·7 for males and 46·0 for females), and the death-rate 39·9 per thousand, being 41·7 for males and 38·0 for females. These ratios, based upon the conclusions of the European statistician already referred to, differ but slightly from those arrived at by Mr. Bourdillon in 1881, who deduced from the figures of that census a birth-rate of "not less than 45 per mille" and a death-rate of "about 34 per mille." These results go far to demonstrate, if further demonstration be needed, how exceedingly imperfect are the present vital statistics, which, according to the

report of the Sanitary Commissioner for 1892, yielded in that year a Provincial birth-rate of 28·15 and a death-rate of 31·92 per mille.

Sex and marriage.

39. Not less interesting than the question of the ages of the people are those of their sex and conjugal condition, which are discussed at length in Chapter XI of Mr. O'Donnell's Report (Volume III). At the census of 1872 no attempt was made to publish statistics of civil condition except as an experiment for a few towns, and even then they were not shown in connection with age. In 1881 civil condition, religion and age were shown in combination, and details of the single, married and widowed of each sex were given for every religion in nine age-groups. In 1891 the same statistics were shown again; but a great step in advance was taken in the abstraction of these figures not only for religions, but for castes. The results obtained at either census were practically identical, and this fact affords strong evidence of the general accuracy of both; but the statistics for marriage in each caste have enabled Mr. O'Donnell to make a deduction which, though already brought to notice by Mr. Risley, C.I.E., in 1887, has now been statistically established for the first time, and is among the most interesting results of the present census, viz., the great extent to which widow-marriage is practised among the Hindu population. This conclusion is opposed to Brahminical teaching and to the supposed customs of the people; but the figures, supported by the conclusions independently formed by Mr. Risley, leave little room for doubt on the subject.

40. The proportion of the sexes varies greatly in different parts of the Lower Provinces and in different religions. In 1881 the Provincial Superintendent remarked that the accuracy of a census in India varied with the excess of females over males, the measure of accuracy being the degree of excess; of course the generalization was only a rough one. Every census ought to be more accurate than that which preceded it, and accordingly, while in 1881 there were all over the Province 1,011 females to every 1,000 males, in 1891 the proportion had risen to 1,032. In all the other great provinces of India, except Madras, the ratio of females to males has also increased: in Madras the women to every 10,000 men are two less than in 1881. It is also to be observed that in Bengal and Madras alone do the women outnumber the men, the proportions for other provinces being as follow: Bombay 957, North-Western Provinces and Oudh 923, and the Punjab 854. The ratios in the two latter provinces are appreciably affected by the large number of troops enumerated therein.

41. The Census Superintendent has the following observations on the distribution of females. They are quoted with the view of inviting further examination of the question by persons interested in such enquiries—

"It thus appears that the excess of females is found only in the western moiety of the Lower Provinces, that is, west of a line drawn north and south from Darjeeling to Calcutta, and that it is most marked in Bihar, which touches on the North-Western Provinces, where women generally, and particularly those of marriageable age, viz., from five to twenty years of age, are singularly few. On the other hand," both in Northern and Eastern Bengal there is a deficit of females, there being only 966 persons of that sex to 1,000 males in each of these sub-provinces. As will appear in the Chapter on Castes and Tribes, this line of cleavage, marked by so important a physiologic distinction as sex predominance, corresponds exactly with the ethnical frontier which divides the races of Mongoloid origin to the east from those of Negritic descent on the west of the Bhagirathi. The deficiency of females in Northern Bengal is to some extent perhaps due to the large cold-weather immigration of men from Bihar, mostly Hindus, and so far counterbalances their excess in Bihar, but it is entirely insufficient to account for the great difference in sex proportion. Amongst Musalmans the sexes are in more nearly equal ratio. The low proportion of Hindu women in Eastern Bengal can hardly be in any degree due to immigration of males. Amongst Musalmans another influence reducing the number of females is indicated by the extremely small number of old women in that community. The prolificness of the Eastern Musalmans is proverbial, and has been proved in detail in the Chapter on Age, but it is bought at the price of a heavy female mortality and short lives amongst women. Whilst among Hindus out of 10,000 women 1,283 exceed 50 years of age, there are only 781 Musalman women of that age in an equal population. In Western Bengal there is an excess of women. Although nearly every district in this area receives a large immigration population, it is mostly derived from the Chutia Nagpur tribes, who, unlike the Bihari and Uriya, rarely leave their womenfolk at home. The great similarity of the proportions of the sexes at every age in both North and South Bihar for both Hindus and Musalmans is a striking evidence of the excellence of compilation in the Census offices of that province."

42. The proportion of single, married, and widowed of either sex in 10,000 of the population at each census is shown in the following table for the different provinces:—

PROVINCE.	SINGLE.				MARRIED.				WIDOWED.			
	Males.		Females.		Males.		Females.		Males.		Females.	
	1891.	1881.	1891.	1881.	1891.	1881.	1891.	1881.	1891.	1881.	1891.	1881.
Bengal Proper	5,068	5,010	3,113	2,912	4,556	4,600	4,571	4,604	376	388	2,316	2,483
Bihar	4,102	3,988	2,865	2,757	5,392	5,551	5,328	5,444	506	460	1,807	1,796
Orissa	5,214	5,024	3,489	3,378	4,432	4,658	4,476	4,571	354	317	2,035	2,050
Chutia Nagpur	5,095	4,866	3,935	3,727	4,535	4,851	4,553	4,860	370	281	1,512	1,412
Feudatory States ..	5,339	5,154	4,125	3,860	4,282	4,537	4,279	4,576	379	308	1,596	1,563
Total ..	4,755	4,671	3,105	2,971	4,827	4,930	4,829	4,900	418	398	2,066	2,127

43. The figures for males yield no very remarkable results, but it is a significant fact that since 1881 the general age of males at marriage has increased considerably, and that there are now a larger portion of the unmarried, both bachelors and widowers, than formerly. Mr. O'Donnell has ascribed these phenomena to the increased cost of living and to the greater weight now accorded to prudential considerations, to which must be added the fact that the population of Chutia Nagpur and Orissa, where males marry later than anywhere else, has increased very largely during the decade. Whatever be the cause, the above table shows there are now 103 fewer married men (not 97, as Mr. O'Donnell says) and 71 fewer married women in 10,000 of each sex than there were ten years ago. Infant-marriage among boys exists to an appreciable extent only among the Hindus of Bihar and Chutia Nagpur, and to a less degree among the Musalmans of the former province, being least common among the people of Orissa, both Hindu and Animistic. In Bengal Proper men marry later than in any part of the province, the percentage of unmarried males between 15 and 20 years of age being 70·5 in that sub-province and 74·3 in Orissa, as compared with 34·7 in Bihar and 47·5 in Chutia Nagpur; and the correctness of Mr. O'Donnell's inference that the age of marriage is fixed by local rather than by religious or social usage is proved by the fact that amongst Musulmans between 15 and 20 years of age as many as 67·8 per cent. are unmarried in Bengal against 51·4 in Bihar.

44. The facts elicited as regards female marriage are full of interest, and they show that custom in regard to the marriage of females is much more influential and much more divergent than is the case with males. If infant-marriage be, in regard to females, defined as the marriage of children under twelve years of age, then infant-marriage is almost universal in these Provinces, except in Orissa and Chutia Nagpur. But if the ten years' age-limit be taken, then Mr. O'Donnell finds that infant-marriage, that is, the marriage of children less than ten years of age, although far more common among girls than among boys, is less prevalent among females than some have believed—in fact, like the predominance of females noticed above, it is practically speaking only found in the western half of the Province. Musalmans do not follow the practice, for in no part of Bengal is the percentage of the married among Muhammadan girls under ten years of age higher than 8·66, and the general average is much less. The percentages for Hindus in different parts of the Province are marginally stated. It is established, further, that with some exceptions the earliness of female marriage varies inversely with the respectability of the caste or tribe, the lowest castes, who do not seclude their females, marrying off their daughters at the earliest age, while the better classes, by whom seclusion is practised, are able on that account to delay till a later period the choice of a husband. In the next place, the local rather than the religious or social variation in the age at marriage of females is more strongly marked than in the case of males. Girls married under ten years of age hardly exist except in North Bihar. The average age of marriage for girls all over the province is eleven years, but the Hindu girl of Orissa is married at thirteen years and four months, while the Dravidian girl in Chutia Nagpur marries at fourteen, and in Orissa at fourteen and-a-half years of age.

45. Lastly, to quote Mr. O'Donnell's words, the census statistics establish the fact that "young widows, an object of pity in all times and countries, are very few except among the Hindus of Bengal Proper. Everywhere else the Hindu widow remarries as freely as the Musulmani, in fact as freely as the non-Hindu tribes of the Western Hill districts;" and he sums up the conclusions at which he has arrived in the synoptical table quoted in the margin: "It shows how very widespread is this custom. It is in fact condemned only by the priestly, writer and soldier castes, and by some traders in all sub-provinces, by the Nabu-sakhs or pure Sudras in Bengal Proper, and in a less degree by a few Hinduized tribes, such as the Chandal, Kochh, and Kaiburtta, who are trying to raise themselves in the Hindu scale by a more exact observance of Hindu ordinances." This opinion coincides with the opinion independently expressed by Mr. Risley, who, after a careful examination of the whole subject, writes as follows:—

THE AREAS IN WHICH WIDOW-MARRIAGE PREVAILS.

Widow-marriage universal.		Percentage of widows amongst women aged 15 to 39 years.
Orissa ...	... The Animistic ...	5·61
Chutia Nagpur ...	,, ,, ...	7·07
Widow-marriage practised by all classes except a few of the highest Hindu castes.		
North Bihar ...	Hindus ...	9·08
Orissa	,, ...	9·85
Eastern Bengal ...	Musalmans ...	9·86
North Bihar ...	,, ...	10·06

,, ,, ...	Musalmans ...	10·54
Northern Bengal ...	,, ...	11·96
Chutia Nagpur ...	Hindus ...	12·14
Western Bengal ...	Musalmans ...	15·75
Widow-marriage forbidden except by Musalmans and the lowest Hindu castes.		
Northern Bengal ...	Hindus ...	23·04
Eastern ,, ...	,, ..	23·45
Western ,, ...	,, ...	24·12

"In Bihar a fairly liberal tendency seems to prevail. All castes except Brahmans, Rajputs, Babhans, and Kayasths, and certain castes belonging to the Baniya class, which are not properly native to Bihar, permit widows to marry again by the form known as *sagai*. * * * * In Chutia Nagpur the castes which are, or pretend to be, of Bihar origin, follow the Bihar rules in the matter of widow-marriage. The aboriginal tribes, Santhals, Bhumij, Mundas, Oraons, and Hos, permit widows to marry again. * * * * The tendency to imitate the usages of the higher castes, which has been remarked in Bihar and Chutia Nagpur, operates much more strongly in Bengal Proper and Orissa. * * * *

"The present attitude of the Hindu community towards the recent proposals to recognize and extend the practice of widow-marriage may, I think, be briefly stated somewhat to the following effect. The most advanced class of educated men sympathise in a general way with the movement, but their sympathy is clouded by the apprehension that any considerable addition to the number of marriageable women would add to the existing difficulty and expense of getting their daughters married. Below these we find a very numerous class of men who are educated enough to appreciate the prohibition of widow-marriage supposed to be contained in certain texts, and who have no desire to go behind that or any similar injunction in support of which tolerably ancient authority can be quoted. Then come the great mass of the uneducated working classes, with rather vague notions as to the Shastras, but strong in their reverence for Brahmans and keen to appreciate points of social precedence. To them widow-marriage is a badge of social degradation, a link which connects those who practise it with Doms, Boonas, Bagdis and 'low people' of various kinds. Lastly, at the bottom of society, as understood by the average Hindu, we find a large group of castes and tribes of which the lower section is represented by pure aborigines practising adult-marraige and widow-remarriage, while the upper section consists of castes of doubtful origin, most of whom, retaining widow-marriage, have taken to infant-marriage, while some have got so far as to throw off sub-castes distinguished by their abstention from widow-marriage."

46. The truth is that the practice of widow-remarriage is more prevalent in Bengal than is generally supposed, and—a most important consideration—the practice has apparently spread considerably since 1881. The statement in the margin, prepared from the table given at page 100, Volume I of the Census Report for 1881, and Table VIII-B of Volume IV of the census of 1891, compares the proportion of widows in every 10,000 Hindu females in four age-groups of the child-bearing period at each census. The great decrease in the proportion of widows is very striking, and, as might be expected, the decrease is most marked

Ages.	Number of widows in 10,000 Hindu females of each age.		
	1881.	1891.	Difference.
15—19 ...	791	654	—137
20—24 ...	1,136	1,032	—104
25—29 ...	1,661	1,583	— 78
30—39 ...	2,828	2,796	— 32
Total four periods	2,040	1,718	—322

at the most marriageable ages, though it exists at all child-bearing ages. These results must be due to one or more of three causes—*first*, there must have been a decrease in the comparative number of infant-marriages of girls, as the widows in the first period are so much fewer than in 1881; *secondly*, there may have been a general increase in the practice of widow-marriage; and, *lastly*, there may have been a great addition to Hinduism from those tribes and castes who do not practise infant-marriage, and allow the marriage of widows. To what extent each of these influences has been at work it is impossible to say: probably each has contributed its share; but bearing in mind the extreme conservatism of Hindu society, the efforts of some sections of the community to raise their social position by encouraging infant-marriage and forbidding the remarriage of the widowed, and the almost imperceptible progress which any social reform of this magnitude can make in so short a period as ten years, the Lieutenant-Governor is disposed to think that the third of the suggested influences may have been the most potent.

47. The statistics on which Mr. O'Donnell's general conclusions are based have been worked out in great detail for each caste and tribe, and have been exhibited in a series of elaborate tables. In dealing with the question of marriage by caste, however, the Census Superintendent appears to have fallen into a serious error; for he has included under the title of sub-caste not only the sub-castes properly so-called, but also the exogamous sections of a caste and its hypergamous groups. Thus Mr. Risley's enquiries have established the fact that in the great Bihar caste of Babhans (which according to the local proverb contains as many subdivisions as there are sorts of rice) there are no sub-castes; yet Mr. O'Donnell has returned 675. The same may be said of the Rajputs, of whom 634 sub-castes are reported from the Patna Division alone. Again, the Bagdis, a Western Bengal caste, although they have, so far as is known, only 14 sub-castes (which are enumerated by Mr. Risley), have a large number of sections: Mr. O'Donnell has reported the existence of 120 sub-castes of Bagdi, most of which it is almost certain are really exogamous sections. As the statistics on which Mr. (O'Donnell's conclusions are based are preserved in manuscript, the Lieutenant-Governor has directed that they may be made over to Mr. Risley for use in the preparation of the revised edition of his "Castes and Tribes of Bengal," when the figures now given will be examined and incorporated after correction.

Education.

48. The tendency to elaboration in the information collated at each successive census has been conspicuously displayed in the statistics of education prepared from the census figures of 1891. Not only have they been worked out for both sexes and for all religions, as in 1881, but they include the elements of age and caste, and they record the ability or inability of the population to read and write English, and the castes of those who have attained this proficiency. For the purpose of testing the accuracy of the figures obtained at the census, an obvious standard is available in the figures of the Department of Education. In 1881 the Superintendent of Census and the Director of Public Instruction exchanged congratulations upon a general accord in the two sets of figures, which argued the accuracy of both. On the present occasion in place of accord there is an excessive divergence both from the census figures of 1881 and the departmental figures of the year 1890-91; but the Census Superintendent stoutly maintains the accuracy of his statistics, and in consequence impugns the correctness of those supplied by the Department. It appears that according to the census the number of male pupils in British territory in 1891 was 883,990 against 992,559 in 1881 and 1,358,169, as returned by the Director of Public Instruction for 1890-91. A reference to the results obtained in other provinces shows that everywhere except in Madras the same phenomena occur; and Mr. O'Donnell cites this fact as some evidence of the probable correctness of his compilation. The Lieutenant-Governor has no reason to doubt the accuracy of the totalling operations; but he cannot accept as correct the facts recorded in the schedules, without also concluding that there exists among the officials of the Department of Public Instruction, not only in Bengal, but in every province but one of the Empire, a conspiracy to supply false returns to Government. Rather than adopt such a conclusion, the Lieutenant-Governor prefers to think that by some fault of translation, or some misunderstanding of the instructions,

enumerators have very largely understated the number of persons falling under the category of "learners." It has been suggested that the enumerators put a somewhat strict intepretation on the expression "learning," and on the one hand, returned as illiterate all the young children, and those who attend school irregularly are taught little and learn still less, and that, on the other hand, they returned as literate those who could read and write, although they were still scholars, and should have been returned as "learning."

49. Taking the figures as they stand, however, the following statement gives an abstract of the statistics for every 10,000 of each of the two principal religions:—

Hindus.						Musulmans.					
Males.			Females.			Males.			Females.		
Learning	Literate.	Illiterate.	Learning.	Literate.	Illiterate.	Learning.	Literate.	Illiterate.	Learning.	Literate.	Illiterate.
295	1,004	8,701	10	36	9,954	178	553	9,269	4	9	9,987

These figures afford ample food for reflection. As regards males, they show that 60 per cent. more Hindus are "learning" than Musalmans, and that the Hindus who can read and write are proportionately nearly twice as numerous as the Muhammadans. Among females ten Hindus are learning to every four Musalmanis, and the proportion of Hindus who can read and write is just four times as high as that of Musalmanis. The totals of illiterates are unnecessarily swollen by the inclusion of children and infants: in the Report on the Census of 1881 the Superintendent eliminated all children below five years of age, and worked out the proportion of learners, literates and illiterates in the remainder of the population, and the Lieutenant-Governor would have been glad had Mr. O'Donnell followed the same plan. As it is, it is impossible to institute a comparison between his carefully-prepared tables and those of the Census of 1881. The statistics of literacy are of the most satisfactory description. "The number of men in British territory who can read and write has increased from 1,955,177 to 2,948,794, or exactly 50 per cent., while for women the progress has been still larger, viz. from 60,567 to 109,684, or by 80·9 per cent." For males the increase appears in every district without exception, and the same is the case with females, except in those districts where it is almost certain that there was an excess in the returns of 1881. The largest increase appears in Bihar, the Patna Division having an advance of 85·4 per cent., and that of Bhagalpur an increase of 87·7 per cent.

50. An elaborate statement compares, district by district, the educational statistics of the sub-provinces, and Mr. O'Donnell's conclusions are these:—

"1. Western Bengal is the best educated division of the Lower Provinces, being closely followed by Eastern Bengal, which would excel it but for the great contingent of pupils and literate found in the metropolitan towns within the former area.

"2. In the Lieutenant-Governorship, including its tributaries, the proportion of Hindu literates is roundly double that of Musulmans.

"3. In Eastern Bengal, which is a stronghold of Islam, this proportion is still more unfavourable to Musulmans, Hindu literates exceeding them threefold.

"4. On the other hand, in the great Hindu countries of Orissa and Bihar, the small Muhammadan communities quite hold their own in the field of education, whilst in South Bihar they have decidedly the advantage."

Great as has been the advance of Bihar, it is a significant fact that the number of literate and pupil Hindus in Patna and Muzaffarpur, the two best educated districts in that sub-province, only brings them to the level of the most backward districts of Northern Bengal, which holds the lowest place among the divisions of Bengal Proper. On the other hand, a statement of the pupils and literates of different ages shows that great progress has been made in recent years in Bihar, since it is the only sub-province, besides Western Bengal, in which the proportion of males between the ages of 15 and 25 years able to read and write is greater than that of the literate over 25 years of age. In the progress of education lies the best hope of the prosperity of the Biharis. By the admixture of Hindus and Muhammadans, and the competition thereby engendered, the progress of education among the latter has been stimulated.

51. The statistics of knowledge of English now collected for the first time yield some interesting results; before they can be turned to any practical use, the figures of the next census must be awaited. Excluding students, who number 160,643, there are 158,414 males in the Lower Provinces able to read and write English, of whom 141,842 are other than Europeans, Eurasians, or Native Christians: of these, 80,108, or rather more than half, come from the metropolitan area. The number of women who can speak English, subject to the same limitations as above, is only 2,927. From a consideration of the educational statistics of Bengal during the last twenty years, the Lieutenant-Governor would have thought that Mr. O'Donnell's statistics of English-knowing people were under the mark, but assuming them to be correct, it would seem to follow that the number of natives of Bengal directly accessible to the influences of Western thought communicated through the medium of English is less than one half per cent. of the population. Those more or less directly accessible to such or similar influences conveyed through the medium of the vernacular languages and English combined are a little over 4 per cent. of the inhabitants. But, probably, many more are indirectly influenced. What the figures will be ten years hence, or in how many years Bengal will attain to the extension of English speech which prevails in Madras, it is useless to speculate.

Languages.

52. The value of the statistics of language obtained at the census of 1891, like that of the figures for castes and tribes, is almost entirely ethnological. The inclusion of this information in the census schedule and its reproduction in the tables seems to be somewhat of an anachronism and a survival, and although the process involved an inconsiderable degree of trouble and expense, it seems questionable whether it should be undertaken again. In 1878 the Committee which met to arrange for the census of 1881 recommended as the best way of ascertaining the nationalty of each individual, the collection and compilation of figures for birth-place and mother-tongue, intending that from a combination of the two should be deduced the nationality of every individual. But the Government of India rightly recognised the difficulty of such a combination, and disapproved the proposal, directing that the two sets of figures should be separately shown. At the Agra Census Conference of 1889 the suggestion was made that information as to mother-tongue should not be asked, but the majority of the members were of opinion that for purposes of comparison with the figures of 1881, and as a check on the returns of caste and tribe in 1891, the statistics might be collected again. The figures show that Bengali is the parent-tongue of more than half the population, and Hindi that of more than one-third, Uriya being spoken by rather more than 6 per cent. of them, and the minor languages by about three millions, or nearly 4 per cent. Wherever in any district or province there is a considerable number of persons speaking a foreign language, the phenomenon has been investigated, and a satisfactory explanation given, which is almost always immigration or the importation of foreign wives.

Infirmities.

53. As in 1881, the infirmities of the people, which were deemed of sufficient importance for record in the census schedule, were insanity, total blindness, deaf-mutism and leprosy, and the following table gives succinctly the principal results of the census in regard to them:—

INFIRMITIES.	NUMBERS.				PROPORTION IN 10,000 OF THE POPULATION.						NUMBER OF AFFLICTED FEMALES TO 100 AFFLICTED MALES.	
	Males.		Females.		Males.		Females.		Both sexes.			
	1881.	1891.	1881.	1891.	1881.	1891.	1881.	1891.	1881.	1891.	1881.	1891.
Insane	18,336	15,274	12,339	10,854	5	4	3	2	4	3	67·62	67·78
Blind	47,086	37,366	50,344	36,114	13	10	14	10	14	10	107·51	96·64
Deaf-mute	52,833	43,455	32,662	26,710	15	11	9	7	12	9	63·82	61·46
Lepers	42,283	34,716	14,240	11,074	12	9	4	3	8	6	33·67	33·62
Total afflicted ..	160,538	130,811	109,565	84,858	45	34	30	22	38	28	68·24	64·10

There has been a large decrease in all infirmities since 1881, but the extreme similarity of the proportion of females to males among the afflicted in both years (except in the case of blindness) seems to prove the accuracy of the

returns: moreover, every other province in the Empire shows a similar decrease, except in regard to blindness in the Punjab, and deaf-mutism in Madras, the North-Western Provinces and the Punjab. The position of Bengal with reference to other provinces of India is concisely explained by Mr. O'Donnell in the following passage:—

"Insanity is now most prevalent in Bengal, which takes the place held by the Punjab in 1881. Mental disease seems to be phenomenally rare in the North-Western Provinces, but the records of both censuses appear to establish the accuracy of the figures. It is a noticeable fact in this connection, as appears later on, that in Bihar, whose inhabitants nearly resemble those of the North-Western Provinces in physique and social characteristics, the same practical absence of insanity exists. As in 1881, the Punjab and the North-Western Provinces, although their relative position is reversed, suffer most from blindness, a fact due probably to the dust-storms that prevail during the hot season, and consequent ophthalmia. In Bihar, especially in the torrid area south of the Ganges, the same frequency of blindness is observed. In 1881 there were twice as many deaf and dumb in the Lower Provinces in proportion to population as in any other province, except Bombay. In 1891 the Punjab takes the first place, but this affliction is still comparatively prevalent in Bengal. In regard to the dreaded disease of leprosy, Bengal, although it shows a large diminution, still holds the first place by a long interval. Taking all infirmities together, Bengal, which nearly approached the highest Indian average (in Bombay) in 1881, is now low in the scale of the afflicted, being more exempt than any other province, except Madras."

At the present census statistics of infirmities were compiled by castes, and Mr. O'Donnell has discussed the results; but the numbers of the afflicted are so small that it is difficult to found any useful generalization upon the figures.

Insanity.

54. Insanity is most common in Bengal Proper, rare in Bihar, and almost unknown in the areas peopled by races of Dravidian descent. The decrease in the total recorded as compared with 1881 is most probably due to the more careful exclusion of idiots. The great mass of the insane are returned as between 20 and 45 years of age, the period when acquired mania is most common in all countries. The castes and races which show the largest proportion of insanes are Malos, Kochhs, and Baishnabs. The Census Superintendent, looking at the areas where insanity is most and least prevalent, makes the suggestion that much of it is due to the use of toxic drugs, a theory which finds some support from the fact that the sect or caste of Baishnab, who are understood to indulge in the use of such drugs, is so largely represented among the insane.

Blindness.

55. The report shows clearly that the castes which suffer most from blindness are those whose trade keeps them continually in a smoky atmosphere, *e.g.*, potters, washermen and blacksmiths, while those who work much in the open air enjoy great immunity. The disease is also comparatively common among the tribes of the eastern frontier and the low and semi-Hinduized tribes of Western Bengal, Chutia Nagpur and South Bihar, the cause probably being unclean habits of life. Of the blind, 41 per cent. of the men and 53 per cent. of the women are returned as more than 50 years of age.

Deaf mutism.

56. Deaf-mutism is again shown to be most prevalent in those tracts where cretinism is common, *i.e.*, the lower slopes of the Himalayas from Champaran to Kutch Bihar, and the districts watered by snow-fed streams from the same source. There is a decrease of 25 per cent. since 1881 in the proportion of deaf-mutes to the population, which is probably due to a more careful exclusion of those who are dumb but not deaf. The Maghs and Malos of the eastern frontier again take a high place, and other castes afflicted above the average are the Goalas and Baishnabs of Northern Bengal, and the Kamars, Sunris, Tantis, Koiris, Kahars, and Kurmis of Bihar.

Leprosy.

57. In regard to leprosy, a disorder to which so much attention has lately been directed, it is found that the total number of lepers, both male and female, has declined, but the disease is prevalent in the same areas as in 1881. This decrease probably connotes a more careful discrimination by the enumerators between mere leucoderma or white leprosy and the true tubercular and corrosive disease. One district officer suggests that the decrease in the number of lepers returned is due to a widespread rumour that all lepers were to be formally deported to asylums. No caste or district is exempt from this terrible disease; Kuch Bihar and the districts of Western Bengal suffer most severely, followed

closely by those of the Orissa Division, while in the Chutia Nagpur Tributary States the disease is almost unknown. The Bediyas of Western and the Kshatryas of Northern Bengal suffer most severely, while a high proportion is also recorded for the Bauris, Khairas, Sunris, and Khatris of Western Bengal, the Malos of Eastern Bengal, and the Kamars of North Bihar. The caste statistics enable the Superintendent to refute the theory suggested in 1881, that there was considerable concealment of female lepers, and it seems to be established that this disease attacks males more frequently than females.

Castes, tribes, and races.

58. In respect of the treatment of statistics of castes, tribes, and races, the report of 1891 differs greatly from that of 1881. In 1881 the opinion was entertained that it did not come within the proper domain of the Census Superintendent's work to attempt any exhaustive treatment of so large a subject. Mr. O'Donnell, on the other hand, has devoted much time and labour to discussing the views of Messrs. Nesfield, Risley, and others on many intricate anthropological questions. Upon these matters the Lieutenant-Governor does not propose to enter, being of the opinion that their interest is ethnological rather than statistical. Since the Census Report for 1881 was written, Mr. Risley has published his "Castes and Tribes of Bengal," which, though it has not in the provisional edition supplied a workable classification of castes and an index of sub-castes as was hoped when he first undertook the task, has placed before the public a great mass of information with which Mr. O'Donnell's statistics may with much advantage be compared by experts in ethnological investigations.

59. An interesting table in Mr. O'Donnell's Chapter XV gives in juxtaposition the totals of the different castes at the three census periods—1872, 1881 and 1891, and it shows clearly a very marked agreement between the figures of the three enumerations, allowance being made for the growth of the population in each decade. The paragraphs which discuss and explain the variations of each caste are full of interest, and Mr. O'Donnell seems to the Lieutenant-Governor to show successfully that wherever there has been a real decrease in the number of any caste it can be traced either to the fact that its chief home is in an unhealthy part of the province, or to its members forbidding widow-marriage. The first explanation accounts for the great diminution in the numbers of Sadgops and Kaibarttas, who chiefly inhabit the fever-stricken Burdwan Division, while the second applies to Brahmans, Kayasths and Baniyas. Both influences have combined to reduce by 15·6 per cent., since 1872, the numbers of the great caste or tribe of Koch, who not only inhabit the most unhealthy part of the Lower Provinces, but are also dominated at the present time by an extreme desire to raise themselves in the social scale of Hinduism—a desire which has led them to adopt with zeal the practice of infant-marriage of girls and to forbid widow-marriage.

Occupations.

60. The collection of statistics of employment has at all times and in all countries proved to be a fruitful source of labour and expense, giving quite incommensurate results. Mr. O'Donnell states that an elaborate industrial census of the German Empire was undertaken in recent times, which cost nearly a million of marks, and was no nearer statistical accuracy than the census of Bengal itself. In 1881 Mr. Bourdillon reported that the compilation of these statistics was the most tedious, complicated and delicate task in the whole of the operations of the census, and he calculated that to it must be debited at least one-third of all the labour, time and money expended upon the preparation of the census tables, while at the same time the result was of very little value. Mr O'Donnell's experience is the same; but one serious disadvantage under which he laboured has been counterbalanced by one great advantage which did not exist in 1881. In 1881 the classification of occupations adopted for the census of Great Britain was adopted by the Government of Bengal under the orders of the Supreme Government, but the results were so unsatisfactory that Sir Ashley Eden authorised the preparation of additional tables for the Lower Provinces, based upon a classification more in accordance with the actual facts of native life. In 1891 the English system was rejected and a more appropriate classification substituted for it. But orders passed after the Agra Conference had the unfortunate effect of obscuring the occupations of women and of lessening the value of the information collected on the subject. In 1881 the enumerator was told to enter the occupation of all women who actually worked, and to enter all others as unoccupied; in 1891 his orders were these: "In the case of children and

women who do not work, enter the occupation of the head of their family or of the person who supports them, but do not leave this column unfilled for any one, even an infant." The obvious intention, viz., to ascertain the number of persons dependent on each industry, was an excellent one, but the result has been disappointing, since the real facts as to female occupations in 1891 were not recorded, and it has become impossible to institute any comparison with the figures of 1881. The extent of this inconvenience is clearly set forth in the following extract from the report:—

"The immediate result of the above-quoted order was to absolutely obliterate all female occupations. It may be assumed that practically all males over 15 years of age, entered as subsisting by a profession or trade, actually work at it, but no such presumption exists in the case of women, and it is consequently impossible to discriminate between workers and dependents, say, between a lady doctor and a doctor's wife, a female landholder in her own right and a landlord's daughter, and so on. Had this uncertainty extended only to the professional or even to the commercial classes, the loss would not have been great, as we know that their women-folk are generally dependent. It is when we come to consider the great agricultural and industrial orders that the extent of the information thrown away is really felt. It is a known fact that a very large section of women of the peasant class in Bihar work in the fields in a manner that the wife of the Bengali agriculturist rarely does. The occupation returns of 1881 showed as many as 1,154,101 working agriculturists of the female sex in Bihar, against 413,972 in a population twice as numerous in Bengal Proper. Few facts would be more interesting than to determine whether these numbers have relatively changed in the past decade. There is reason to believe that poverty and an excessive population are forcing the male population of Bihar to seek the means of livelihood elsewhere, whilst their women-folk are left to till the fields at home. On the other hand, the growth of wealth in Eastern Bengal and the extension of caste ideas amongst the aboriginal races of the Western districts are causing the women of Bengal Proper to withdraw more and more from an active share in the employments of peasant life. The class of ordinary day-labourers receives from women a considerable contingent, which numbered as many as 1,101,216 in Bihar in 1881, and only 172,113 in Bengal Proper in that year. How many of the 4,169,959 female day-labourers, returned in the whole Province in 1891, are actual workers, and how these workers are distributed in the different provinces and districts, does not appear in the tables appended to this report. The number of female mill-hands employed in the jute and cotton factories of Calcutta and Howrah was a matter worth ascertaining, but the actual workers are necessarily confused with the housewives, who have no connection with these industries, except through their fathers or husbands. There is a large body of women-barbers in Bengal, but they have disappeared amidst the crowds of barbers' wives, daughters, and mothers, most of whom do not follow that occupation. In Nadia some hundreds of women used to make the earthenware figures the district is famous for. It would be interesting to determine whether this trade is passing further into female hands or the reverse. It is believed that the number of Hindu priestesses is smaller than it formerly was. The number of school-mistresses is undoubtedly increased, but they are indistinguishable from the possibly illiterate women-folk of schoolmasters, and so the degree of advance in this important guide to the development of female education is unknown. Whether the number of female medical practitioners and vaccinators is appreciably increasing is a matter of doubt, yet these and a dozen other similar questions, which the old method of enumerating occupations would fairly accurately answer, have been left in utter uncertainty, when every girl and every woman is entered under the occupation of the man who supports her."

61. In these circumstances it would serve no useful purpose to scrutinise the occupations of females. The statistics of male occupations are disorganised to a less extent, and the report contains several elaborate tables setting forth the leading points ascertained by the enumerators. Taking the figures for what they are worth, the following table gives the totals of the seven great classes by sex in the Lower Provinces:—

Occupations.	British Territory.				Feudatory States.	
	Urban.		Rural.		Males.	Females.
	Males.	Females.	Males.	Females.		
Class A— Government	73,657	37,077	319,247	281,276	21,646	17,786
Class B— Pasture and agriculture	328,016	255,295	22,408,167	22,546,455	1,122,119	1,094,644
Class C— Personal services	238,752	184,306	1,070,878	1,007,815	35,095	31,707
Class D— Preparation and supply of material substances	565,695	392,234	4,000,632	4,220,405	161,336	162,409
Class E— Commerce, transport, and storage	225,031	139,764	898,557	1764,848	19,979	14,797
Class F— Professions	127,110	96,954	580,644	584,092	21,811	17,751
Class G— Indefinite and independent	346,963	331,432	4,379,960	4,839,245	220,104	218,113
Total ...	1,905,224	1,538,652	33,658,075	34,245,036	1,601,590	1,556,347

62. The pursuits of the inhabitants of Bengal are shown to be as largely agricultural as before. Among the rural population as many as 65·61 per cent. are employed in agriculture, and even in towns the percentage is as high as 16·77. In villages the indefinite class comes next with 12·01 per cent., followed by those engaged in preparing food and drink, who amount to 4·54 per cent. of the total. In the towns naturally the disproportion is not so marked; pressing closely on the 16·77 per cent. employed in agriculture, follow 15·56 per cent. in the indefinite class, 12·54 per cent. employed in personal, household and sanitary service, and 10·19 per cent. who supply food and drink; manufactures, commerce, transport and the liberal professions all return a proportion of more than 5 per cent. Much was expected from the statistics of occupations connected with interest in land, to which attention was drawn more than twenty years ago by Sir G. Campbell; but it was found that the terms employed were so numerous, and that the same terms bore in different areas meanings so discrepant that nothing but very wide grouping was possible. So again at the late census the attempt was for the first time made to ascertain what number of persons, and of what pursuits, supplement their earnings by profits derived from some interest in land. The results form Imperial Table XVIIC., and are reported to be fairly correct for twenty-one districts, well distributed over the province.

63. The whole of the operations of the census, with the exception of those relating to the census of Calcutta, were from the first conducted by Mr. O'Donnell, and the Lieutenant-Governor cordially acknowledges the ability and assiduity which he has brought to bear upon his important duties, and the general success with which his task has been discharged. A great mass of valuable information has been collected with economy and despatch, and the results have been set forth in a careful, painstaking and interesting report. Sir Antony MacDonnell has read with pleasure the testimony which the Census Superintendent bears to the willing help rendered to him by district officials not only in carrying out the elaborate arrangements which preceded the actual enumeration, but in supervising the compilation of the district figures when the enumeration was completed. These additional duties cast a heavy burden on many overworked District Officers, and the Lieutenant-Governor desires once more to express his acknowledgments to them for the loyalty with which these duties were discharged: he has already acknowledged the obligations of the Government to the numerous non-official persons who have also assisted in this great work. Mr. Lewis, the Superintendent of Government Printing, Bengal, is again mentioned in terms of praise for the excellence and rapidity with which the Press performed the heavy task involved in the preparation and despatch of myriads of enumeration books and compilation forms to many districts. The Assistant Superintendent of Census Operations, whose services have also been brought specially to the notice of Government, has already been rewarded by promotion to an appointment in Assam.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 15th July 1893.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
BURDWAN DIVN.	1	Burdwan Kalna Katwa Raniganj	July 15, '93	5·53 1·84 1·05 1·07	Ordinary monsoon weather. *Aman* is being transplanted. *Aus* and jute doing well. Fodder sufficient. Prices of common rice:— Srs. Burdwan ... ... 10 to 14 } per rupee. Kalna ... ... 9½ to 13 Katwa ... ... 12 Raniganj 12
	2	Bankura Vishnupur	„ 15, '93 ...	3·47 2·62	Weather—cloudy with occasional light showers. Transplantation of *aman* going on. Common rice is selling at— Srs. Sadar ... ... 11¼ } per rupee. Vishnupur 11¼
	3	Birbhum Rampur Hát	„ 15, '93 ...	6·16 2·59	Ordinary monsoon weather prevails. Frequent showers. Transplanting of paddy seedlings in progress. Sugarcane not flourishing owing to continued rain. Price of common rice 12 to 15 seers per rupee.
	4	Midnapore	..		Report not received.
	5	Hooghly Serampore Jahanabad	„ 15, '93	1·30 0·13 1·20	Weather—hot with occasional showers. The damage done to the paddy seedlings by floods has not apparently been serious or very extensive. Some jute on the lower lands may also have been injured, but the extent of such damage also is inconsiderable. All crops now progressing favourably and prospects generally very good. Prices of common rice:— Srs. Sadar ... ... 11 to 12 } per rupee. Serampore ... ... 10 to 11½ Jahanabad ... ... 11 to 12
	6	Howrah Ulubaria	.. 15, '93 ...	4·37 1·70	Weather—seasonable. The late abnormal rain has destroyed the seedlings and retarded agricultural operations. New seedlings are coming up on high lands. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 to 11 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas	„ 15, '93	1·25	Weather—hot and cloudy with occasional light showers. Transplantation of *aman* going on except in some parts of the Diamond Harbour subdivision where the lands are still flooded. Prospects somewhat improved since last week. No complaints of want of fodder and water. No cattle-disease prevalent. Price of common rice varies from 10 to 11½ seers per rupee.
	8	Nadia Kushtia Meherpur Chuadanga Ranaghat	„ 15, '93	1·91 3·71 1·55 3·05 2·62	Weather—close and damp. Prospects on the whole fair. Transplantation of *aman* rice going on. Dry weather wanted.
	9	Khulna Bagerhat Satkhira	„ 15, '93	3·25 3·00 1·97	Weather—bright and rainy alternately. Some damage reported from Bagerhat owing to incessant rain, elsewhere prospects improved by the occasional cessation of the rain. Coarse rice sells at 9 to 11 seers per rupee. Fodder for cattle sufficient.
	10	Jessore Jhenida Magura Narail Bangaon	„ 15, '93	0·77 1·39 2·19 1·70 1·08	Weather—cloudy with occasional showers. Paddy on high lands progressing well. Transplantation of *aman* going on. Manufacture of indigo has commenced. Fodder and water sufficient. Cattle-disease reported from Salkhya in Magura and Monirampur in the Sadar subdivision. Price of rice has risen.
	11	Murshidabad	„ 15, '93	1·30	Weather—seasonable. Prospects of standing crops on the whole good, but the recent rain is said to have done some damage to the paddy crops. Fodder available for cattle. Coarse rice sells at 11 seers per rupee.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*				
CHITTAGONG DIVN.	12	Chittagong July 15, '93	0·51	Weather—unsettled. Transplanting of *aus* is still going on. Prices steady Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali „ 15, '93	3·41	Weather—cloudy with occasional rain. *Aus* is being reaped, but the state o the crop is not good. *Aman* is being transplanted. Fodder not sufficient water available. Cattle-disease reported from all stations. Price of ric stationary.
	14	Tippera „ 15, '93	1·57	Weather—cloudy and rain almost every day. Harvesting of *aus* paddy i vigorously being pushed on. Loss of early sowing of paddy owing to flood for unusual downpour of rain is still being reported. Price of rice and other articles of food is on the increase.
	15	Chittagong Hill Tracts. „ 13, '93	2·47	Weather—cloudy throughout the week with occasional showers of rain. *Jun* paddy plants progressing. Ploughing in low lands continues, and seeds ar being sown in nurseries. Common rice being sold at 8 seers per rupee No cattle-disease reported.
DACCA DIVN.	16	Dacca „ 15, '93	3·03	Weather—cloudy and rainy. Prospects of standing crops good. Harvesting of *aus* and jute going on. Rivers are rising gradually. Common rice selling at from 9 to 12 seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur „ 15, '93 Goalundo ... Madaripur ...	1·32 0·92 2·08	Weather—seasonable. Standing crops partially damaged by the sudden rising of the rivers. Common rice sells at 10 seers per rupee at Faridpur 11 seers at Madaripur, and 12 seers at Goalundo. Condition of cattle reported good generally, but cattle-disease still prevails in two thanas in Madaripur.
	18	Backergunge „ 15, '93 Pirojpur ... Patuakhali ... Bhola ...	1·94 2·20 2·53 0·81	Weather—seasonable. Prospects of crops fair, but *aus* has considerably been damaged in some places. *Aman* has been sown or transplanted to the extent of 4 annas up to date. Common rice is being sold from 9 to 12 seers per rupee. Fodder and water sufficient.
	19	Mymensingh „ 15, '93	8·07	Weather—generally cloudy with constant rain. Probable outturn of *aus* paddy is 10 annas. Heavy rain may injure the *aus* and jute to some extent in the low lands. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder sufficient.
RAJSHAHI DIVN.	20	Dinajpur „ 8, '93 Thakurgaon ...	3·67 13·42	Weather—rainy and cloudy with occasional breaks. Standing crops doing very well. Outturn of *bhadoi* and jute expected to be 16 annas. Transplantation of *haimanti* in full swing. Prices of rice:— Srs. Sadar ... ... 11½ } per rupee. Thakurgaon ... ... 10 to 12 } per rupee. Cattle in good condition. Fodder and drinking water plentiful.
	21	Rajshahi „ 15, '93 Nator .. Nauguon ...	3·09 0·80 5·83	Weather—seasonable with a tendency towards excessive moisture. Complete sunshine for several days is much needed. Jute is giving a poor outturn; and *aus* and *aman* are being affected by excessive moisture. Water and fodder-supply ample. No cattle-disease has been reported anywhere. Price of rice varies from 10 to 14 seers per rupee.
	22	Rangpur „ 15, '93 Gaibanda .. Nilphamari ... Kuriguon ...	5·81 4·60 14·06 12·92	Ordinary monsoon weather. Transplantation of *aman* in progress; somewhat retarded by heavy rain. Prospects favourable. Common rice 11 to 13 seers per rupee.
	23	Bogra „ 15, '93	3·05	Weather—unsettled. Standing crops are reported to have suffered somewhat from the heavy rain. Transplantation of *aman* is going on. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
	24	Pabna „ 15, '93	3·86	Weather—cloudy and rainy. *Aus* and jute on low lands are being cut. Fair weather now needed for the standing crops. Common rice sells at 11 seers per rupee at Pabna and Rs. 3-14 to Rs. 4 per maund at Sirajganj. Fodder and water-supply ample.
	25	Darjeeling „ 15, '93 Siliguri ...	6·48 10·63	Weather—rainy up to Thursday (13th); since fairly fine. *In the hills*:—*Bhutta*, *kangni*, *phaphur* and potatoes being harvested. *Bhadoi* and *chota marua* progressing favourably. *Bara marua* and *aghani dhan* being transplanted. *In the Terai*:—Transplanting of *haimanti* paddy commenced. Jute and *bhadoi* doing well. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 } per rupee.
	26	Jalpaiguri „ 15, '93	6·90	Weather—rainy and hot. *Bhadoi* paddy has in some places become fit for being harvested. Prospect of jute favourable. Transplantation of *haimanti* paddy going on. Price of rice stationary. Fodder and water sufficient. No cattle-disease.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr July 15, '93 Begusarai ... Jamui ...	3·08 6·23 0·79	Cloudy weather continues, with intervals of excessive heat. High land crops in excellent condition. Low land crops suffering from excessive rainfall. Poor outturn of *makai* and *marua* expected. Continued sunshine needed. Paddy transplantation commenced. Indigo—plenty of plant but little produce owing to rain. No cattle-disease. Fodder and water-supply sufficient. Prices stationary.
	28	Bhagalpur „ 15, '93 Banka ... Madhipura ...	7·22 4·26 6·60	Weather—clear with clouds and showers every now and then. Rain in north very beneficial. There has been too much rain in the Sadar and south, where *makai* and *marua* have been damaged to the extent of 6 annas. Transplantation of rice in progress. Common rice 13 seers 14 chitaks per rupee.
	29	Purnea „ 15, '93 Kishanganj ... Araria ...	5·40 13·24 9·69	Constant heavy rain. *Bhadoi* and jute damaged in parts by excess of water, elsewhere doing well. *Aghani* seedlings also damaged. Low lands too full of water for transplantation. Seedlings not fit for transplantation on high lands. Indigo outturn very bad owing to excessive rain and floods. Prices stationary.
	30	Malda „ 15, '93 Chanchal ... Shibganj ...	4·66 4·38 4·20	Weather—cloudy and wet. Rainfall was unprecedented throughout the week. Rivers rising fast. *Bhadoi* paddy on low lands has in consequence been slightly damaged in some places. Winter rice being transplanted. Price of common rice 11 to 15 seers per rupee. No want of fodder.
	31	Sonthal Parganas „ 15, '93 Deoghur .. Godda ... Jamtara ... Pakur ... Rajmahal ...	3·71 3·50 4·61 3·27 4·78 8·82	Weather—rain every afternoon; mornings generally fine. Transplanting nearly finished; promises well in Dumka and Pakur. Indian-corn in great danger. Sugarcane doing well in Jamtara, but prospects poor in other respects from excess of rain.
Patna Division.	32	Patna „ 15, '93 Barh ... Bihar ... Dinapur ...	5·00 5·08 3·62 8·19	Weather—cloudy and rainy. Transplantation of *marua* completed. Paddy seedlings look well. The continued rain has somewhat injured the low land crops where weeding operations have been much retarded. Prices of common rice:— Srs. Sadar ... ... 15½ Barh ... ... 13 Bihar ... ... 16½ Dinapore ... ... 13 } per rupee.
	33	Gaya „ 15, '93 Jahanabad ... Aurangabad ... Nawada ..	5·31 7·10 4·00 1·31	Weather—rainy. The rain has been too much in places and thus damaged the *bhadoi* crops somewhat. Prices as before. Common rice selling from 13 to 15 seers per rupee. Fodder and water-supply ample.
	34	Shahabad „ 15, '93 Buxar ... Bhabhua ... Sasaram ...	3·46 1·64 5·38 2·10	Heavy and frequent rain. *Bhadoi* promises well. Sowing of *aghani* nearly completed. A spell of drier weather is wanted to check the growth of weeds.
	35	Darbhanga „ 15, '93 Samastipur ...	3·49 4·25	Weather—cloudy and rainy. *Makai* is doing well. Transplantation of paddy and *marua* in progress. Prospects of sugarcane favourable. Fodder for cattle sufficient. Prices stationary.
	36	Muzaffarpur „ 15, '93 Hajipur ...	4·41 5·55	Weather—cloudy throughout the week. Transplantation of paddy and *marua* nearly completed. Prospect of *makai* not favourable in Hajipur owing to excessive rainfall. State of standing crops in the Sadar subdivision good. Cases of *dakha*, a disease among cattle, prevailing in some places in the mufassal. Eighteen deaths from this disease reported from Minapur *thana*. Supply of fodder and water sufficient. Prices stationary.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
Patna Division—concld.	37	Saran July, 15, '93 Siwan ... Gopalganj ...	3·71 1·89 3·81	Weather—seasonable. A break in the rains wanted for indigo and *bhadoi* crops. Prospects of crops very good at present. Fodder and water plentiful. Prices of common rice:— Srs. Chapra ... ... 13 } Siwan ... ... 12¼ } per rupee. Gopalganj ... ... 13 }
	38	Champaran „ 15, '93	8·27	Heavy rain daily. Paddy being sown and transplanted. *Makai* being weeded. Indigo suffering from the heavy rain. Fodder and water sufficient. Prices stationary.
ORISSA.				
Orissa Divn.	39	Cuttack „ 15, '93	...	Weather—cloudy with occasional showers. Sowing and transplantation of *sarad* in progress. *Beali* doing well. Supply of fodder and water sufficient. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 14 7 } Kendrapara ... ... 13 10 to 18 6 } Jajpur ... ... 15 12 to 18 6 } per rupee. Banki ... ... 15 12 }
	40	Puri „ 13, '93 Khurda .. Banpur ...	0·21 1·75 2·37	Weather—cloudy and hot. *Sarad* being sown and *beali* weeded. Miscellaneous crops doing well. Price of rice 13 seers 2 chitaks to 17 seers 1 chitak per rupee.
	41	Balasore „ 15, '93	1·79	Weather—fine but close, followed by rain yesterday (14th). Paddy seedlings being still transplanted. Prices of rice:— Srs. Balasore ... ... 13 } Bhadrak ... ... 14 } per rupee.
CHOTA NAGPUR.				
South-West Frontier Agency.				
Chota Nagpur Divn.	42	Hazaribagh July, 15, '93 Giridi ...	3·39 2·29	Weather—seasonable. Sowing and transplanting in progress. Indian-corn damaged by excessive rain. Other crops doing well. Fodder abundant. Prices of common rice:— Srs. Head-quarters ... ... 9 to 14 } Giridi ... ... 9 to 12 } per rupee.
	43	Lohardaga „ 15, '93	7·71	Weather—rainy and cloudy. Sowing of winter rice finished. Transplanting commenced. Prospect of *bhadoi* continues good. Common rice selling at 12 seers per rupee. Fodder and water plentiful.
	44	Palamau „ 14, '93	3·18	Weather—showery but close at times. Heavy showers reported from all parts. *Bhadoi* crops being sown. Some damage to *bhadoi* reported from parts. Transplantation of winter rice not commenced as yet. Cattle-disease reported from some thanas. Water and fodder abundant. Prices slightly falling.
	45	Singhbhum „ 15, '93	0·82	Weather—seasonable. Condition of all crops good. Price of rice ranges from 9 to 12 seers per rupee. Cattle-disease reported from some villages in the Kolhan.
	46	Manbhum „ 15, '93 Gobindpur ...	3·48 1·84	Weather—seasonable. Transplantation going on. Prospects so far good. Price of rice 10 to 12 seers per rupee. Fodder and water very sufficient.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least [illegible] inches of rain has fallen.

CALCUTTA, *the* 18*th July* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 15TH OF JULY 1893.

THE chief feature of the weather during the past week has been the light rainfall in the south-western districts and even over the whole of Lower Bengal as compared with the heavier falls in the northern districts.

At the beginning of the week there was, relatively to the normal, a high pressure area over the north-west of the Bay and the adjoining districts, and this may have caused the partial stoppage of monsoon weather in Orissa and parts of Chota Nagpur and South-West Bengal. The effect on the pressure distribution was seen in the greater uniformity over the Bay and Lower Bengal, but in the north of the province gradients were somewhat steeper than usual. At the same time comparatively light winds were blowing, and rainfall was almost entirely confined to North Bengal and Bihar. On the second day of the week pressure began to fall briskly, westerly winds spread over Bihar, and very heavy rain fell in some of the northern districts, but especially in Rangpur, Jalpaiguri, and Kuch Bihar. There was still excess of nearly a tenth of an inch over the whole province, but as the brisk fall of pressure continued, a shallow depression formed along the foot of the hills, and the westerly circulation of winds with the heavier rain in the northern districts continued. During the early part of the week the comparatively clear skies in Orissa, Chota Nagpur, and Lower Bengal led to slightly excessive temperature in these districts, but in the north, where heavy rain was falling, there was still comparatively cool weather. By the middle of the week the pressure distribution was nearly normal, gradients were steeper over the Bay, and rainfall was becoming more general even in Orissa. On the 13th there was very little change except that local storms began in the southern districts owing to a shallow depression which formed over South Bengal and the north of the Bay. This intensified slightly during the last two days of the week, and led to an irregularly cyclonic circulation of winds. Rainfall during these days was less heavy in the northern districts of North Bengal, but it became general in South-West and East Bengal, and continued with little change in Bihar and Chota Nagpur.

Pressure.—Changes have never been large. From being above the normal by amounts between ·1 inch and ·15 inch, readings steadily fell till they were slightly below the normal in the middle of the week. There was then practically normal distribution for a day or two, after which there was a further slow fall which resulted in a shallow depression over Lower Bengal and the north of the Bay. The mean difference from the normal for the week varies from —·011 inch in North Bengal to +·05 inch in part of Orissa and South-West Bengal.

Temperature.—As rainfall partially ceased in the south of the province during the early part of the week, temperature rose slowly, and there was a slight excess in all districts, except Assam, North Bengal, and Bihar. During the last half of the week this area of slightly excessive temperature gradually contracted, and by the 15th there was defect everywhere, greatest in Bihar, where it averaged about 3°. The means are practically normal in Orissa, Chota Nagpur, and Lower Bengal; in Bihar there is defect of rather more than 1°, in North Bengal of 2°, and in Assam of nearly 3°.

Rainfall as stated above has been light and scattered in Orissa and parts of South-West Bengal and Chota Nagpur, moderately heavy in East Bengal, and much heavier than usual in North Bengal and Bihar. The heaviest falls occurred in Kuch Bihar and parts of the adjacent districts on the 10th, when several places reported amounts between 6 and 10 inches. The total fall for the week at Mathabhanga is 16·79, at Dinhatta 15·91, Bagdogra (Nilphamari) 14·32, and Kuch Bihar 13·68 inches. The irregularity in the distribution of the rainfall continues, and in all districts, except Orissa, occasional heavy showers have been recorded. In South-West Bengal falls for the week vary between 0·1 inch at Midnapore and 6·16 inches at Suri (Birbhum); in North Bengal between 0·71 inch at Bogra and 16·79 inches at Mathabhanga; in East Bengal between 0·9 inch at Goalundo and Bhola (Backergunge) and 9·64 inches at Cox's Bazar; in North Bihar between 2·5 inches at Hajipur and 10·41 inches at Kishenganj; in South Bihar between 0·95 inch at Jamtara (Sonthal Parganas) and 7·68 inches at Jahanabad; and in Chota Nagpur between 0·82 inch at Chaibassa and 6·91 inches at Ranchi. From these limits it will be seen that falls have been more uniform in North Bengal than in any of the other districts.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 15th of July 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

The total fall from 1st January to 15th July 1893	53·70
The average fall of the corresponding period for 24 years, Surveyor-General's Office	27·51

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; [dew symbol], dew.

CONTENTS.

RANCHI ZENANA HOSPITAL.

No. 2420Med., dated Calcutta, the 24th July 1893.

From—J. A. BOURDILLON, ESQ., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 60Mis., dated the 8th July 1893, with which you forward a copy of a letter No. A., dated the 23rd June 1893, from the Honorary Secretary to the Dufferin Fund Committee, Ranchi Branch, reporting that Kumar Jagat Mohun Nath Sahi Deo, brother of the Maharaja of Chota Nagpur, has made a donation of Rs. 1,750 to the Fund on the occasion of the late visit of His Honour the Lieutenant-Governor to Ranchi. The amount is intended to defray part of the cost of building a zenana hospital to be attached to the charitable dispensary at that station.

2. In reply, I am directed to say that the Lieutenant-Governor accepts the donation, and to request that you will be so good as to convey to the donor an expression of His Honour's thanks for his liberality and public spirit. This letter will be published in the *Calcutta Gazette.*

THE following report is published for general information.

J. A. BOURDILLON,

Offg. Secy. to the Govt. of Bengal.

REPORT ON THE WORKING OF THE JUTE SCREW AND WAREHOUSES IN CALCUTTA FOR THE YEAR 1892-93.

No. 16A.J., dated Calcutta, the 13th July 1893.

From—J. G. RITCHIE, ESQ., Offg. Chairman of the Corporation of Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report, under section 30 of Act IV (B.C.) of 1883, on the jute and screw warehouses in Calcutta for the year ending 31st March 1893.

2. At the close of the last year there were 105 sanctioned warehouses on the register, and 8 new warehouses were established during the year. These make up a total of 113. Of these, the license of No 3, Circular Tallygunge Road, was cancelled during the year for default of payment of license fee. A complete list of the remaining 112, arranged according to the Acts under which they were originally licensed, is appended to this report.

3. Twelve applications were received during the year under report as will be seen in the statement below:—

No.	Locality.	Nature of application.	REMARKS.
1	135, Baliaghata Road	For construction of additional godowns.	Papers sent to Engineer for action.
2	13, Hurro Chunder Mullick's Street	For storing jute in the godowns.	Sanctioned.
3	59 and 60, Durmahatta Street ...	Ditto ...	Sanction refused, there being insufficient cart passage.
4	140-1 to 140-6, ditto ...	Ditto ...	Plans returned for correction.
5	6, Chitpur Bridge Approach ...	Ditto ...	Sanctioned.
6	23, Hurro Chunder Mullick's Street	For addition and alteration to his license godown.	Papers sent to the Road Department for action.
7	29-1, Canal West Road	For storing jute ...	Sanctioned.
8	12, Gailiffe Street	Ditto ...	Do.
9	2, Noyan Soor's Lane	For construction of a new godown.	Do.
10	15, Kassi Mitter's Ghât Street ...	For assorting jute ...	Provisionally sanctioned.
11	136, Durmahatta Street	For construction of a new godown.	Sanctioned.
12	65, Gooreebaree Lane	Ditto ...	Plans returned for correction.

The construction of the godowns at Nos. 2, Noyan Soor's Lane, 15, Kassi Mitter's Ghât Street, and 136, Durmahatta Street, not being thoroughly completed, no license was granted to the owners during the year under report.

4. During the year applications for Nos. 17 and 18, Hurro Chunder Mullick's Street, and 7 and 7-1, Hurro Chunder Mullick's Street, which had been under consideration last year, were sanctioned, and license granted to the respective owners on their depositing the usual license fee.

5. License was also granted to owners of warehouses at No. 7, Dhunnia Bagan Road, and 140-7 to 140-14, Durmahatta Street. These had been sanctioned last year.

6. There were 17 prosecutions instituted during the year against persons infringing the Jute Act, of which 1 case was withdrawn, in 2 cases fresh summonses were ordered to be applied for, and in the remaining 14 cases, including the 2 before mentioned, fresh summons cases, the parties were convicted and fined. The following is a detail of fines inflicted on the offenders:—

	Rs. A.	Rs. A.
One case fine inflicted	......	30 0
Seven cases do. at 10 each	10 0	
With cost in one case	0 8	
		70 8
One case fine inflicted at 5	5 0	
With cost	0 8	
		5 8
One case fine inflicted at 2	2 0	
With cost	0 8	
		2 8
One case fine inflicted at 15	15 0	
With cost	0 8	
		15 8
Three cases fine inflicted at 15 each	45 0	
With cost 8 annas	1 8	
		46 8
Total ...	......	170 8

7. The total amount realised during the year ending 31st March 1893 is shown in the following statement:—

	Rs. A. P.
License fees	28,358 4 9

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 22nd July 1893.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
BURDWAN DIVN.	1	Burdwan Kalna Katwa Raniganj	July 22, '93	2·83 3·97 3·56 2·15	Weather—seasonable. *Aus* and *aman* being transplanted. Jute doing well. Water and fodder sufficient. Prices of common rice :— Srs. Burdwan ... ... 10 to 12 } per rupee. Kalna ... ... 9½ to 13 Katwa ... ... 12 Raniganj 12
	2	Bankura	„ 22, '93	2·08	Weather—seasonable. Transplantation of *aman* continues. Prospects fair. Price of common rice has slightly fallen. It is now 11 seers and 14 chitaks per rupee at the Bankura market and 11¼ seers at Vishnupur.
	3	Birbhum Rampur Hát	„ 22, '93 ...	5·04 5·29	Showers throughout the week. Weather very favourable for agriculture. Transplanting of paddy seedlings still going on briskly. Price of common rice 10 to 15 seers per rupee.
	4	Midnapore	„ 22, '93	1·96	Weather—hot with occasional showers of rain. Transplanting going on. Prospects of sugarcane, mulberry and indigo at Ghatal not good. Prices of common rice :— Srs. Sadar ... ... 11 } per rupee. Contai ... ... 12 Tamluk ... ... 11 Ghatal 11
	5	Hooghly Serampore Jahanabad	„ 22, '93	3·16 4·36 2·19	Weather—showery : seasonable. Any serious damage to crops is limited to a few low-lying villages, and as the rainfall is now moderate, it is hoped that even in those the water may drain off in time for the *aman* to be planted. Otherwise all prospects are good. Prices of common rice :— Srs. Sadar ... ... 10 to 11 } per rupee. Serampore ... ... 10 to 11½ Jahanabad ... ... 10 to 11
	6	Howrah Ulubaria	„ 22, '93 ...	2·48 3·11	Ordinary monsoon weather. A good deal of land in the Ulubaria subdivision is still under water, and the prospects of the crops there are not favourable. It is hoped that the north of the district will be drained in time to allow of fresh transplanting. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 to 11 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas	„ 22, '93	3·29	Weather—cloudy and warm with constant showers. Transplantation of *aman* going on except in thana Bankipur in the Diamond Harbour subdivision, where the accumulated rain-water has not yet subsided. Prospects not very favourable at present. There is no present lack of fodder and water. No cattle-disease reported. Prices of common rice :— Srs. Sadar ... ... 10 to 10½ } per rupee. Barasat ... ... 9 Basirhat ... ... 10 Diamond Harbour ... 10½
	8	Nadia Kushtia Meherpur Chuadanga Ranaghat	„ 22, '93	3·89 2·43 3·72 2·20 4·79	Weather—wet and fairly cool. Prospects of paddy crops very fair. Paddy on high lands is doing very well. Prices stationary.
	9	Khulna Bagerhat Satkhira	„ 22, '93	2·22 3·66 7·25	Weather—showery with breaks of bright sun. There was heavy rain in the Satkhira subdivision and fields have again been flooded. In Bagerhat jute has been damaged by excessive rain, and transplanting of winter paddy is being retarded on account of constant rain. On the whole prospects are not good. Coarse rice sells at 9 or 10 seers per rupee.
	10	Jessore Jhenida Magura Narail Bangaon	„ 22, '93	1·10 1·45 1·10 2·92 2·25	Weather—cloudy with occasional light showers. Rivers rising slowly. Prospects of paddy on high lands good. *Aman* and jute grown on low lands have suffered. Harvesting of jute and manufacture of indigo going on. Cattle-disease reported from Salkya, Manirampur, and Keshabpur. Prices stationary.
	11	Murshidabad	„ 22, '93	2·69	Weather—hot and cloudy with occasional rain. Harvesting of *bhadoi* has commenced. The recent rain is said to have done some injury to the paddy crops, mulberry and sugarcane. Fodder available for cattle. Coarse rice sells at 11 seers per rupee.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*				
CHITTAGONG DIVN.	12	Chittagong ... July 22, '93	2·67	Weather—fitful. Transplanting of *aus* is nearly over. Prospects fair. Prices rising. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali ,, 22, '93	5·36	Weather—cloudy with occasional rain. Harvesting of *aus* paddy commenced. *Aman* is being transplanted. State of crop not favourable. Scarcity of fodder is felt and mortality among cattle reported from several stations. Water available. Common rice selling at 10½ seers per rupee.
	14	Tippera ,, 22, '93	2·09	Weather—seasonable. Prospects improved owing to fall in floods. *Aus* much damaged. A total loss expected in some places. *Aman* thriving.
	15	Chittagong Hill Tracts. ,, 21, '93	1·90	Weather—cloudy with occasional showers and sunshine. *Jum* paddy progressing. Prospects not good. Ploughing in low lands continues. Common (very coarse) rice being sold at 8 seers per rupee. No cattle-disease reported.
DACCA DIVN.	16	Dacca ,, 22, '93	1·67	Weather—cloudy and rainy. Prospects of standing crops good. Harvesting of *aus* and jute going on. Rivers rising rapidly. Common rice selling at from 9 to 12 seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur ,, 22, '93 Goalundo ... Madaripur ...	0·79 1·09 2·08	Weather—seasonable. *Aus* has failed in most parts of the district, and there is very little *aman* on the low lands, but it is doing well on high lands. Jute has been damaged also and is reported to be stunted. Common rice sells at 10 to 11 seers per rupee. Condition of cattle reported good generally, but there is cattle-disease in thana Palong. At this season of the year cattle must be short of fodder in many places.
	18	Backergunge ,, 22, '93 Pirojpur ... Patuakhali ... Bhola ...	3·24 3·07 6·80 5·80	Weather—seasonable. Prospects of crops fair, but *aus* has been damaged in some places by the flood. *Aman* has been sown or transplanted to the extent of 8 annas on the average Common rice is being sold from 9 to 12 seers per rupee. Fodder and water sufficient.
	19	Mymensingh ,, 22, '93	1·47	Weather—rainy and cloudy. About 4 annas of jute has been cut. Excessive rain may damage the crop on low lands to some extent. Outturn of *aus* paddy is about 10 annas. Common rice sells at 11 seers per rupee. Fodder and water sufficient. Condition of cattle good.
RAJSHAHI DIVN.	20	Dinajpur ,, 22, '93 Thakurgaon ...	1·02 2·21	Weather—hot, cloudy and rainy at times. Prospects of standing crops very good. Transplantation of winter rice is being vigorously pushed on. Condition of cattle good. Fodder and drinking water sufficient. Prices of rice:— Srs. Sadar ... ... 14¼ } per rupee. Thakurgaon ... ... 10 to 12 }
	21	Rajshahi ,, 22, '93 Nator .. Naugaon ...	Figures not given. 4·90 6·35	Weather—seasonable. The week has not been so wet as last week; and the crops have so far improved, but still absolutely dry weather for many days is required. *Aman* transplanting is drawing to a close. No cattle-disease reported. Fodder and water-supply ample. Price of rice varies from 10 to 12 seers per rupee.
	22	Rangpur ,, 22, '93 Gaibanda .. Nilphamari ... Kurigaon ...	1·46 2·02 1·64 0·07	Weather—sultry with occasional showers. *Aus* and jute being cut. *Aman* being transplanted. Prospects favourable.
	23	Bogra ,, 22, '93 Sherpur ... Naukhila ...	2·00 2·05 1·95	Weather—unsettled and showery. Transplantation of *aman* going on. Prospects of standing crops unaltered. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
	24	Pabna ,, 22, '93	2·35	Weather—cloudy and showery. Rivers falling. *Aus* and jute are being cut. Common rice sells at 11¼ seers per rupee at Pabna and Rs. 3-12 to Rs. 4 per maund at Sirajganj. Fodder and water-supply sufficient.
	25	Darjeeling ,, 22, '93 Siliguri ...	3·44 3·48	There has been a break in the rainfall. *In the hills:—Bhutta, kangni, shama*, potatoes and *phaphur* being still harvested. *Bhadoi* and *chota marua* progressing favourably. *Bara marua* and *aghani* paddy being transplanted. *In the Terai:*—Transplanting of *haimanti* paddy continues. Prospects of *bhadoi* and jute good. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 }
	26	Jalpaiguri ,, 22, '93	6·67	Weather—hot and cloudy. Steeping of jute and harvesting of *bhadoi* commenced. Prospect of the latter crop good. Transplantation of *haimanti* in progress. Price of rice stationary. Fodder and water sufficient. No cattle-disease.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.					
BHAGALPUR DIVN.	27	Monghyr Begusarai Jamui	July 22, '93	1·83 3·84 5·76	Weather—cloudy with successive showers of rain. Prospects of *bhadoi* crops on high lands very good. Paddy transplantation commenced. Condition of cattle generally good. Plenty of fodder. Prices of common rice:— Srs. Sadar ... ... 11½ to 15 } Begusarai ... ... 14 } per rupee. Jamui ... ... 13 }
	28	Bhagalpur Banka Madhipura Supaul	" 22, '93	1·65 1·98 1·89 2·56	Weather—rainy. The heavy rain has done a great deal of damage to *makai* and *marua*; otherwise prospects are good and the usual agricultural operations are going on. Common rice 13 seers 14 chitaks per rupee.
	29	Purnea Kishanganj Araria	" 22, '93	2·13 1·34 0·42	Weather—cloudy and muggy without much rain. The break in the rains has done much good to *bhadoi* and *aghani*, the prospects of which are now good except in flooded localities. Prices stationary.
	30	Malda	" 22, '93	3·90	Cloudy and rainy weather continues. *Bhadoi* paddy on high lands doing well, but the lowland crop has been slightly damaged by flood in thanas Nowabganj, Shibganj, Kaliachak, and Khorba. Winter rice is being transplanted. Price of coarse rice 11 to 15 seers per rupee. Fodder sufficient for cattle.
	31	Sonthal Parganas Deoghur Godda Jamtara Pakur Rajmahal	" 22, 93	1·85 5·22 1·24 2·21 4·36 2·92	Weather—cloudy and seasonably rainy. Prospects of *bhadoi* crops poor on account of heavy rain and want of sunshine. Transplantation of paddy in full progress. Water and fodder plenty.
PATNA DIVISION.	32	Patna Bihar Dinapur Barh	" 22, '93	3·00 3·02 7·33 1·32	Weather—cloudy. Standing crops are being damaged by the heavy rain. Transplantation of rice is being delayed for the same reason. Prospect of maize not very favourable. Prices of common rice:— Srs. Sadar ... ... 15 } Bihar ... ... 16½ } Dinapore ... ... 13 } per rupee. Barh ... ... 13 }
	33	Gaya Jahanabad Aurangabad Nawada	" 22, '93	6·20 8·76 3·27 3·02	Weather—very rainy. The heavy rain has damaged the *bhadoi* crops considerably in many parts of the district. Paddy being transplanted. Fodder and water-supply ample. Prices stationary.
	34	Shahabad Buxar Bhabhua Sasaram	" 22, '93	7·08 3·71 5·43 1·92	Weather—cloudy skies with strong north-westerly winds and heavy rain. The rainfall has been excessive and has damaged the *bhadoi* crops. *Aghani* is germinating, and in some localities transplanting has begun. All other crops promise well, and fodder is abundant.
	35	Darbhanga Samastipur Madhubani	" 22, '93	3·21 3·15 1·65	Weather—cloudy and rainy at the close of the week. *Bhadoi* prospects very favourable. Transplanting of *marua* and paddy in progress. Flood is subsiding. Some damage is reported to have been done to paddy and *makai* in tracts lying on river banks. Cattle in good condition. Prices stationary.
	36	Muzaffarpur Hajipur Sitamarhi	" 22, '93	3·14 2·47 1·81	Weather—hot but occasionally cloudy. *Bhadoi* crops, especially *makai*, affected to some extent by continued rain. A few days' sunshine urgently needed. Transplantation of paddy still going on. Prospects favourable. Indigo *mahai* going on. *Dukha* disease among cattle still prevailing in Janarh in Kutria thana, but no deaths reported. Water and fodder sufficient.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran July, 22, '93 Siwan ... Gopalganj ...	2·54 2·32 4·57	Weather—showery almost the whole week. All standing crops doing well. Weeding of *makai* impeded by constant showers. A break in the rains would be beneficial for this crop and indigo. Transplantation of paddy going on. Water and fodder abundant. Prices of common rice :— Srs. Chapra ... ... 13 } Siwan ... ... 12¼ } per rupee. Gopalganj ... ... 13 }
	38	Champaran „ 22, '93	5·57	Weather—cloudy with occasional sunshine. Sowing of paddy nearly finished and transplantation yet going on. Outturn of indigo has been reduced by the heavy rain, and consequent flooding of indigo lands. Prices nearly stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 22, '93	0·99	Weather—cloudy with occasional showers. Sowing and transplantation of *sarad* in progress. *Beali* doing well. Fodder-supply sufficient. Price of rice stationary.
	40	Puri „ 20, '93 Khurda ...	0·45 5·20	Weather—cloudy. *Sarad* thriving well. *Beali* is being weeded. Miscellaneous crops doing well. Rice sells at from 12 seers to 17 seers 1 chitak per rupee.
	41	Balasore „ 22, '93	8·69	Weather—cloudy, and very heavy rain on Thursday (20th) but apparently only local. Transplanting of paddy nearly finished. Prospect of 12 annas crop. Prices of rice :— Srs. Balasore ... ... 13 } Bhadrak ... ... 15 } per rupee. Chandbali ... ... 12 }
CHOTA NAGPUR.				
South-West Frontier Agency.				
CHOTA NAGPUR DIVN.	42	Hazaribagh July, 22, '93 Giridi ...	10·01 6·92	Weather—seasonable. Transplanting of rice and *marua* still in progress. Indian-corn seriously injured by excessive rain. Other crops doing well. Fodder abundant. Prices of common rice :— Srs. Head-quarters ... ... 9 to 14 } Giridi ... ... 9 to 12 } per rupee.
	43	Lohardaga „ 22, '93	2·67	Weather—seasonable. Transplantation of winter rice continues. Prospects of *bhadoi* good. Common rice selling at 12 seers per rupee. Fodder and water sufficient.
	44	Palamau „ ...	...	Report not received.
	45	Singhbhum „ 22, '93	4·34	Weather—seasonable. All crops doing well. Prices stationary. Cattle-disease reported from some villages in the Kolhan.
	46	Manbhum „ 22, '93 Gobindpur ...	7·08 10·03	Weather—fair from yesterday (21st). Transplantation vigorously going on. Prospects so far good. Prospects of Indian-corn and some pulses bad. Price of rice 10 to 12 seers per rupee. Fodder and water very sufficient.

* Mean of 6 days. | † Mean of 4 days.

planation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 22nd of July 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						District.
									Since 1st of month.			Since 10th May 1893.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 22nd of July 1893.

Meteorological Division.	District.	Station.	RAINFALL. Sunday, 16th.	Monday, 17th.	Tuesday, 18th.	Wednesday, 19th.	Thursday, 20th.	Friday, 21st.	Saturday, 22nd.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th May 1893.	Average rainfall from 16th May to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when as less 0·1 inches of rain has fallen.

CALCUTTA, *the 25th July* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 22ND OF JULY 1893.

At the close of the previous week a very shallow barometric depression existed in the north of the Bay, which gave rise to a series of small local storms over the southern districts, which were accompanied by rather heavy rain. On the 16th instant, or the first day of the present week, pressure increased moderately in the north of the Bay and in East Bengal and Assam, and the feeble low pressure area apparently moved inland from the Bay in a north-westerly direction. On this day the distribution of pressure over the province was nearly normal, except that pressure was low in Chota Nagpur and Western Bengal, and the monsoon current blowing was also fairly normal, though winds were a little more easterly than usual, the more pronounced easterly direction being probably produced by the low pressure in the west of the province. With these conditions general rain was reported on the 16th in all districts, the rainfall being decidedly heavy in parts of Chota Nagpur and South-West Bengal. On the 17th a further increase of pressure had occurred, and the feeble area of low pressure had again advanced in a north-westerly direction and was well to the west of Chota Nagpur. General rain continued over the province, the rainfall being again heavy at many of the western stations. On the 18th the pressure changes were small, and the feeble area of low pressure had quite ceased to affect the province. Rainfall continued general, and the falls were still heavy in the western districts. On the 19th pressure was increasing at the western stations, while winds were becoming rather westerly over this area, but on the other hand pressure continued to fall over the centre and east of the province, where winds were still south-easterly. The westerly winds just alluded to were probably an indication of the strengthening of the Bombay branch of the monsoon current, which was beginning to advance across Central India and to interact with the Bengal branch over the western districts of the province, and as a result of this interaction very heavy rain began to fall in Chota Nagpur and Bihar, while lighter general rain fell over the remainder of the province. The wave of increasing pressure extended over the greater part of the province on the 20th, and only a few stations in North-East Bengal reported a decrease. The westerly winds also forced their way further and extended over South Bihar, Chota Nagpur, Orissa and parts of South-West Bengal. The area of interaction between the two wind systems therefore also advanced in an easterly direction, and heavy rain fell in parts of Orissa, South-West Bengal and Bihar as well as in Chota Nagpur, the remainder of the province receiving lighter rain. On the 21st the westerly wind current made little progress in its advance, and the conditions of rainfall remained almost the same as on the 20th, while pressure was generally falling slowly. On the 22nd, however, a further extension of the westerly winds took place accompanied by a very decided increase of pressure, and winds became south-westerly over the greater part of the province, while a distinct area of comparatively high pressure was establishing itself over the south-western districts. With this further advance, the area of interaction of the winds and the accompanying heavy rainfall were shifted towards the east and north of the province, and rainfall became light in the western and south-western districts. Hence it will be seen that conditions during the week have been favourable for heavy rain in the west and south-west of the province, except in Orissa, while rainfall has been generally lighter elsewhere, and, compared with the normal for the week, very heavy rain has been received in Chota Nagpur and South Bihar, and moderately heavy rain in South-West Bengal and North Bihar, but all other divisions show defective falls.

Pressure has been increasing fairly steadily during the week, and hence the mean pressure now shows a distinct excess above the nornal, the average excess equalling about 0·03 inch, though on the last day of the week the excess ranged from about 0·02 inch in the north of the province to 0·08 inch in Orissa.

Temperature.—Owing to the continued heaviness of the rainfall the mean temperature for the week has again been in defect of the normal, the defect ranging from 2·4° in South Bihar to 0·6° in Orissa, while the mean defect for Bengal has been 1·2°. In Assam the defect has equalled 1·5°.

Rainfall.—Compared with the normal for the week, there has been an excess fall of four inches in Chota Nagpur, an excess of 1·6 inches in South Bihar, and of about half an inch in South-West Bengal. The fall in North Bihar has been slightly more than usual, but in the remaining districts defects have been registered, the defects ranging from four-fifths of an inch in North Bengal to an inch and a third in Orissa. The actual average divisional falls have varied from nearly seven inches in Chota Nagpur to an inch and two-thirds in Orissa. The number of rainy days during the week has indeed been rather largely in excess of the normal in all districts except Orissa. In all districts except Orissa rain has fallen on four or five days during the week, but in Orissa the falls have occurred on less than two days.

Some exceptionally heavy falls are reported—Jehanabad in the Gaya district has received 15·71 inches during the week; Hazaribagh Burhi, Gobindpur, and Raghunathpur falls of from 10 to 15 inches; Balasore, Satkhira, Mankur, Jalpaiguri, Patuakhali, Rajouli, Pakri Barawan, Bikram, Shaikpura, Chahai Bamda, Giridi, Karagdiha, Kalikapur, and Purulia falls of about 7 inches and upwards, while very numerous stations have received four and five inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 22nd of July 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day. The total fall from 1st January to 22nd July 1893	56·67
The average fall of the corresponding period for 24 years, Surveyor-General's Office	30·11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; p, passing temporary showers ; t, thunder ;

* Includes 4,887 tons and 10,288 tons of coal during 1893 and 1892, respectively, carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock, 19,366 tons and 7,159 tons for the years 1893 and 1892, respectively, for which no "Up" and "Down" register maintained.

Statement of principal commodities carried over the Eastern Bengal State Railway during the month of April 1893.

INCREASES.

	Tons.
Grains ...	1,271
Chuadanga, Kishanganj Bazar, Ramnagar, Forbesganj and Bhowanipore show increases under this head, due to good local crops and to a brisk demand in the Calcutta market.	
Jute, unscrewed ...	3,449
The principal increases are in despatches from Mymensing, Goalundo, Sirajganj, and Kushtia. The demand was in excess of the supply of jute of marketable quality.	
Kerosine oil ...	2,476
Due to the prohibition of carriage by boat within certain limits of the port of Calcutta.	
Oil-seeds ...	4,873
The increases are in despatches chiefly from Sonali, Kasba, Forbesganj, and Goalundo, due to good crop in those districts and brisk demand in Calcutta markets.	
Railway plant and rolling-stock ...	12,207
For repairs and renewals.	

DECREASES.

	Tons.
Coal ...	780
Ordinary fluctuation.	
Cotton piece-goods ...	824
Ordinary fluctuation.	
Salt ...	533
Chiefly in despatches from Chitpore.	

CALCUTTA, *the* 19*th July* 1893.

JAMES SHAW,
for Examiner of Accounts.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 *and* 1892.

THE Council met at the Council Chamber on Saturday the 22nd July, 1893.

Present:

The HON'BLE SIR ANTONY PATRICK MACDONNELL, K.C.S.I., Offg. Lieutenant-Governor of Bengal, *presiding.*
The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General.*
The HON'BLE T. T. ALLEN.
The HON'BLE H. J. S. COTTON, C.S.I.
The HON'BLE H. H. RISLEY, C.I.E.
The HON'BLE GONESH CHUNDER CHUNDER.
The HON'BLE D. R. LYALL, C.S.I.
The HON'BLE J. A. BOURDILLON.
The HON'BLE MAULVI ABDUL JUBBAR KHAN BAHADUR.
The HON'BLE F. R. S. COLLIER.
The HON'BLE MAULVI SYED FAZL IMAM KHAN BAHADUR.
The HON'BLE MAHARAJA RAVANESHWAR PROSAD SING BAHADUR OF GIDHOUR.
The HON'BLE SURENDRANATH BANERJEE.
The HON'BLE L. GHOSE.
The HON'BLE MAULVI SERAJUL ISLAM KHAN BAHADUR.
The HON'BLE P. PLAYFAIR.
The HON'BLE J. G. WOMACK.

NEW MEMBERS.

The Hon'ble Messrs. Lyall and Bourdillon, the Hon'ble Maulvi Abdul Jubbar Khan Bahadur, the Hon'ble Mr. Collier, the Hon'ble Babu Surendranath Banerjee, the Hon'ble Mr. Ghose, the Hon'ble Maulvi Serajul Islam Khan Bahadur, and the Hon'ble Messrs. Playfair and Womack took their seats in Council.

THE PRESIDENT'S ADDRESS.

The Hon'ble the President said:—"Gentlemen—Before we proceed to the business for which we are assembled, I wish to offer a few words of cordial welcome to the hon'ble members who appear in this chamber for the first time, and to congratulate the Council on its enlarged functions and wider sphere of usefulness. It is now 300 years, all but seven, since the Charter of Queen Elizabeth conferred on the Company of Merchants trading to the East Indies the power 'to make, ordain and constitute such and so many reasonable laws' as their enterprise required; and since then our legislative power in India has undergone various vicissitudes. Remaining in practical abeyance in the 17th century, it was not till the latter half of the 18th century that it was brought into active operation. You are all familiar with the difficulties to which the subjection of the legislative power to the veto of the judicial authorities led in the time of Mr. Hastings, and with the struggles which in the end of the last century resulted in the abolition of the veto. You are acquainted with the circumstances under which, in 1813, the powers of the Legislative Councils of all three Presidencies were enlarged and brought more into touch with the Government in England; and you know that the complications produced by the exercise of these extended powers in the Madras and Bombay Councils led to their disfranchisement in 1834, and to the concentration of all legislative authority in the Council of the Governor General. And you view, with perhaps something of an antiquarian interest, the introduction in 1853 of the judicial element into the Council, in the persons of two Judges of the Calcutta Supreme Court and the first faint glimmering of representation in the official nominees of the Governments of Madras, Bombay, Bengal and Agra. These various stages led up to the Act of 1861, by which a long step was taken in the direction of that liberal policy of which the Act of 1892 is a fuller realisation.

"Until 1861, then, Indian Legislative Councils were practically the executive Government acting in a legislative capacity, and according to modern notions that is not often a suitable arrangement. But, judged by practical results, the system on the whole worked well, and our Statute Book, from Lord Cornwallis's days to the days of the Penal Code, is no unworthy monument of the sagacity and the practical statesmanship of our predecessors.

"Thirty years ago, gentlemen, the old order of things had already begun to change, giving way to the new; our educational policy, ever to be associated with the names of Lord Macaulay, Lord Hallifax, and Mr. John Stuart Mill, had begun to take effect, and the change was stimulated by the transfer of the Government from the East India Company to the Crown. An early and expected effect of the extension of English education was the growth of a greater independence of thought on the part of the leaders of native society, and a fuller and freer criticism of the proceedings of Government. The number of Indian gentlemen who became accessible to the influences which swayed public opinion in England, and of those who were indirectly open to the same influence, increased rapidly. The time had come for a closer association of native gentlemen of light and leading with the Government of the country; and the prompt recognition of this fact will ever be connected with the honoured name of Canning.

"The establishment of local Legislative Councils and the addition of the native element brought our legislative system abreast of the public opinion of the day, and the results which have been attained are the best justification of the policy which inspired the Indian Councils Act of 1861. In Bengal, that policy has been entirely successful. No enactment on the long list of Bengal Statutes can be pointed to which was not called for by public necessity, or is

not instinct with the spirit of public duty. And if this be largely due to the broader sympathies and keener sense of responsibility, which are the product of modern times, it must be admitted that it is also due to the beneficial influences exercised by the native members of this Council on the legislation which has taken place.

"Gentlemen, to such an inheritance of honourable tradition you now succeed in peculiarly auspicious circumstances. The desire of the educated and forward sections of Indian society in these Provinces has been expressed in favour of more extended political privileges, and the Government has met that expression of opinion in the way most consonant with constitutional usage and most conducive to solid progress. The various influential public bodies to which the privilege of recommending Members of Council has been entrusted have received their mandate with gratification and have fulfilled it with propriety and self-respect. The very eagerness which other bodies of less, though still of considerable, influence have exhibited to share in the privilege is proof, if any were wanted, of the value they set upon it. All these considerations invest our meeting to-day with special interest. The occasion is a landmark which will be memorable in the constitutional history of the country. I am confident, gentlemen, that our deliberations will be always worthy of these high auspices, and that we shall ever approach the consideration of the questions with which we may have to deal in no spirit of factious criticism, but with the object of advancing the best interests of the people and maintaining the dignity of the Empire."

BENGAL PROVINCIAL SERVICE.

The HON'BLE BABU SURENDRANATH BANERJEE asked:—

What effect has been given to the notification issued in the *Calcutta Gazette* of the 5th April last, announcing that six posts of District and Sessions Judge, four posts of Collector and Magistrate of a district, one post of Junior Secretary to the Board of Revenue, and one post of Under-Secretary to Government and some other subordinate appointments have been thrown open to the Bengal Provincial Service; and how many members of the Provincial Service have been appointed District Judges and Magistrate-Collectors, and if any member of the Provincial Service has been appointed Junior Secretary to the Board of Revenue or Under-Secretary to Government?

The HON'BLE MR. COTTON replied:—

"The effect of the notification published in the *Calcutta Gazette* of the 5th April last is qualified by paragraph 6 of the Resolution of the Government of India, No. $\frac{9}{1342}$ C.Rev., dated the 21st April, 1892, which was published in the *Gazette of India* of the 23rd April, 1892, which declares that until all the existing statutory civil servants are provided for either by promotion or by amalgamation with the new Provincial Service, and until the prior claim of officers of the Civil Service of India and Commissions has been satisfied, the twenty posts referred to in the question cannot be thrown into the general *cadre* of the Provincial Service. There are now ten statutory civilians, of whom one, Mr. Brojendra Kumar Seal, holds the substantive appointment of a District Judge of the 1st grade, four hold the substantive appointment of Joint-Magistrate of the first grade, and five hold the substantive appointment of Joint-Magistrate of the second grade. Of the first grade Joint-Magistrates, three, viz., Mr. Nunda Krishna Bose, Kumar Gopendra Krishna Deb, and Mr. Ambika Churun Sen, are at present officiating as Magistrates and Collectors of districts. None of the statutory civilians, except Mr. Seal, are yet of sufficient standing in the service to be substantively promoted to the grade of District Judge or Magistrate and Collector of a district, but all of them have officiated in such appointments. In addition to these ten officers, there are three ex-statutory civilians who have been transferred to the Bengal Provincial Service. One of those officers, Mr. Umesh Chunder Batabyal, is now officiating as Magistrate and Collector of a district; another, Rai Nundo Kissore Das Bahadur,

is holding a special appointment as District Officer of Angul and the Khond Mahals. The third is still a probationer, as he has not yet passed the departmental examinations. There are thus thirteen officers belonging to the Statutory and Provincial Services who are now holding posts ordinarily held by members of the Civil Service of India, to which the question refers. No member of the Provincial Service has yet been appointed to be Junior Secretary to the Board of Revenue or Under-Secretary to Government."

NATIVE ASSISTANT SUPERINTENDENTS OF POLICE.

The HON'BLE BABU SURENDRANATH BANERJEE asked:—

What is the number of Native Inspectors, together with their names, who, since the date of the report of the Public Service Commission, have been appointed to the grade of Assistant Superintendent of Police?

The HON'BLE MR. COTTON replied:—

"The number is two, viz., Babu Ras Behary Biswas, appointed on the 19th January, 1891, and Maulvi Zinnet Hosain Khan appointed on the 23rd June, 1892."

THE BENGAL GOVERNMENT'S SUMMER HEAD-QUARTERS.

The HON'BLE MR. GHOSE, in the absence of the HON'BLE MR. BONNERJEE, asked:—

(a) For how many years has Darjeeling been the head-quarters of His Honour the Lieutenant-Governor of Bengal during the hot weather?

(b) What used to be His Honour's hot-weather head-quarters before Darjeeling became such quarters?

(c) Has any additional cost been incurred by reason of Darjeeling becoming such quarters? If so, what has been the additional cost per annum since Darjeeling became such quarters, and from what funds has such additional cost been defrayed?

The HON'BLE MR. BOURDILLON replied:—

"(a) For about 30 years.

"(b) Various places, including Calcutta, Darjeeling, Parasnath Hill and Bhagalpur, at the discretion of the Lieutenant-Governor for the time being.

"(c) Additional cost has been incurred, which is defrayed from the public revenues. I have this morning received an unofficial letter from the Accountant-[illegible]

formerly accounts of this expenditure were not separately kept. Since 1888-89, however, these charges have been separately recorded, and the figures from that year will be furnished to the hon'ble member."

THE LIEUTENANT-GOVERNOR'S TOURS.

The HON'BLE MR. GHOSE, in the absence of the HON'BLE MR. BONNERJEE, asked:—

(a) How many tours did the present permanent Lieutenant-Governor of Bengal undertake from the time he took charge of his office to the time he went away on leave in May last?

(b) From what funds were the expenses of such tours defrayed, and if they were defrayed from the public revenues, what were the amounts of the expenses of each such tour?

The HON'BLE MR. BOURDILLON replied:—

"(a) Fourteen tours.

"(b) The expenses of such tours are defrayed from a lump allowance for tours and miscellaneous expenditure, which is a charge upon the public revenues, and under Article 1275 of the Civil Service Regulations is controlled by the Lieutenant-Governor. Details of the expenditure for each tour cannot be furnished."

THE MYMENSINGH CASE.

The HON'BLE MR. GHOSE, in the absence of the HON'BLE MR. BONNERJEE, asked:—

(a) Has the attention of His Honour the Officiating Lieutenant-Governor of Bengal been called to the case printed as an appendix to the pamphlet called "Official Prestige *versus* the Liberty of the Subject"?

(b) Did the proceedings as printed in the appendix take place?

(c) Did His Honour approve of the proceedings? If not, will he, if he has not already done so, signify his disapproval to the officers concerned?

The HON'BLE MR. COTTON replied:—

"(a) The attention of the Officiating Lieutenant-Governor has been drawn to the case referred to by the receipt of the pamphlet.

"(b) No official enquiry has been made to ascertain whether the proceedings as printed in the appendix took place.

"(c) The Officiating Lieutenant-Governor expresses no opinion on the report of the proceedings which purport to have taken place eighteen months ago, and in regard to which it was competent for any parties who may have considered themselves aggrieved to seek for their remedy in the proper quarter at the time."

BRITISH SUBJECTS MADE OVER ON WARRANTS TO THE FRENCH POLICE AUTHORITIES.

The HON'BLE MR. GHOSE, in the absence of the HON'BLE MR. BONNERJEE, asked:—

Is His Honour aware that several British subjects are now in prison awaiting trial at Chandernagore who were handed over to the French Police authorities by the British Police without such British subjects being brought before any British Magistrate and without any investigation before such British Magistrate? If not, will he enquire whether the fact mentioned in this question is true or not?

The HON'BLE MR. COTTON replied:—

"The Officiating Lieutenant-Governor believes that the facts stated in this question are correct; the arrests having been made on warrants duly transmitted for execution by the French Government."

MUNICIPAL SANITATION PRIOR TO ACT XXVI OF 1850.

The HON'BLE MR. GHOSE, in the absence of the HON'BLE MR. BONNERJEE, asked:—

(a) Who were the Municipal and Sanitary authorities of the towns of Bengal, except Calcutta and Howrah, at the time Act XXVI of 1850 of the Legislative Council of India was passed?

(b) What steps, if any, did these authorities take for the proper drainage, water-supply or sanitation of the towns in their respective charge?

The HON'BLE MR. BOURDILLON replied :—

"(a) and (b).—It is understood that there were no municipal authorities in the towns of Bengal at the time Act XXVI of 1850 was passed. It is believed that the Magistrate and the Civil Surgeon attended to sanitation so far as was practicable."

INSPECTION OF TEA GARDENS.

The HON'BLE BABU SURENDRANATH BANERJEE asked :—

What steps, if any, have been taken by the Government to ensure the efficient inspection of tea-gardens in the Dooars and the proper protection of coolies employed therein, with a view of remedying the evils pointed out by the Hon'ble Judges of the High Court, and published in the newspapers in their appellate decision in the case of Empress *versus* George Murray?

The HON'BLE MR. RISLEY replied :—

"The Commissioner of the Rajshahi Division was officially requested on the 9th instant to submit a full report to the Lieutenant-Governor on the suggestion made in connection with the case referred to in the question by the Hon'ble Judges of the High Court as to the necessity of inspection of tea-gardens in the Dooars. It is to be remembered that the labourers employed in Dooar tea-gardens are free labourers not affected by any Labour Law."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The HON'BLE MR. RISLEY said :—"MR. PRESIDENT—Before the motion which stands in my name is put to the Council, I propose with your permission to make a statement, as brief as may be, reviewing the various stages through which the Bill to amend the Bengal Municipal Act of 1884 has passed, and indicating the general line of policy which the Government propose to adopt in respect of some of its more important provisions. It will be remembered that the Bill was introduced into Council on the 16th July last year, and was at once referred to a Select Committee. While in the hands of the Committee, numerous alterations and additions were made in it, some of which involved important questions of principle. For this reason the Committee recommended, in their Preliminary Report of the 25th August, 1892, that the Bill as amended should be republished for general comment, and, together with the opinions received, be again referred to the public before being taken into consideration by the Council. On the 30th August the Bill and the Report of the Committee were accordingly circulated to District Officers, Municipal Commissioners and Public Associations, with a letter explaining more fully the points upon which their opinions were invited. In reply to this circular, a very large mass of literature has been received, which the Select Committee—now somewhat reduced in numbers—have endeavoured to deal with. A revised Bill has been prepared, but since then some important opinions have been received, and for this and other reasons the measure is hardly yet ready to be finally laid before Council. I am confident therefore that I express the views of my colleagues on the Committee when I say that we not only feel that the addition to our number of two elected representatives of Municipal interests will be a source of strength to the Committee, and will add authority to our conclusions, but that we fully realise the advantage we shall derive from discussing the Bill, section by section, with gentlemen who have actual and recent experience of municipal administration. It may further be expected that our deliberations will have the effect of reducing the number of points upon which discussion is likely to arise when the Bill is again laid before Council for the consideration of its clauses.

"Although many of the sections of the Bill have not yet assumed their final form, and the ultimate decision regarding them must depend greatly on the view taken of them by the Select Committee as now to be enlarged, there are some provisions of such importance that it seems desirable to take the present opportunity of stating how it is proposed to deal with them.

"In the first place then, it seems proper that I should make mention of the fact that a recent decision of a Full Bench of the High Court has reversed the decision of the Hon'ble Judges in the case of Mohini Chandra Paul and another against the Municipality of Kushtea. In this case, as was explained in the Statement of Objects and Reasons annexed to the Bill as originally introduced, the High Court held that a notification by the Government of Bengal, dated the 18th March, extending Part VII, Chapter II, of the Bengal Municipal Act V of 1876 to the Municipality of Kushtea, was not a 'notification' within the meaning of section 2 of the Bengal Municipal Act III of 1884, but an 'order,' and that, as that section contains no provision saving all orders made under the former Act, none of the provisions of Part VI of the present Act, corresponding to Part VII, Chapter II of the old Act, were in force in Kushtia or in any other municipality to which they had not been extended by the present Act. The practical meaning of this was that a large number of municipalities found themselves stripped of their legal power to deal with a number of sanitary matters, to regulate buildings, obstructions and encroachments on roads, burial and burning grounds, offensive and dangerous trades, and the like. The difficulty thus created might have been met in two ways—by issuing fresh notifications under the present law or by amending the Act. It was thought better to adopt the latter alternative as being the simplest means of attaining the end in view, while the procedure for issuing fresh notifications is cumbrous and elaborate. At the same time it was decided, at the suggestion of the Government of India, to take the opportunity of making an exhaustive inquiry into the working of the Act with a view to the inclusion of all amendments which experience had shown to be desirable. When this decision was arrived at, the probability that a Full Bench of the High Court might reverse the judgment in the Kushtia case was taken into consideration, and it was held that that event, even if it occurred before the Bill was introduced into Council at all, would not be of itself a reason for abandoning the intention to amend the law. What was contemplated as possible two years ago has now actually happened. A Full Bench of the High Court has overruled the Kushtia case and has restored to the municipalities the legal powers of which they had been for a time denuded. Meanwhile, the Bill has been gathering to itself, as it rolled onward, fresh provisions drawn from the experience of the many critics, official and non-official, who have handled the subject, and it now aims at embodying several important administrative reforms, and at clearing up several practical difficulties regarding which public opinion is sufficiently unanimous, to make it clear that the amendment of the law ought to be proceeded with.

"The sections dealing with the introduction of schemes of water-supply and drainage give effect to a Resolution which was carried, with one dissentient voice, by a representative Conference held at Belvedere about this time last year. The Resolution in question was to the effect that, in the opinion of the Conference, it was expedient that the Local Government should be empowered to require municipalities to undertake projects of drainage and water-supply, it being provided at the same time, on the suggestion of the HON'BLE BABU SURENDRANATH BANERJEE, that each such scheme, with the reasons for compulsory action, should be published in the *Calcutta Gazette*, and opportunity given to the municipalities to show cause against such compulsion. The Government approves of the principle of these sections and proposes to proceed with them subject to certain minor changes, which I shall lay before the Select Committee, having for their object to make more efficient provision for voluntary action on the part of Municipal Commissioners, and for assisting them to get adequate professional supervision for sanctioned projects—a point which recent experience has shown to be one of considerable importance.

"Another important question which has received careful consideration is that of the appointment of an assessor. While adhering to the principle embodied in sections 32—39 of the Bill, the essential provisions of which have been adapted from English Municipal law, the Government is prepared to admit that there may be room for modification of details, and that there is much to be said for the opinion that the sections as drafted go too far in that they render it compulsory for all municipalities, small and great, well managed and ill managed, to provide themselves with an assessor. If then it is desired to make this portion of the

law more elastic and more readily adaptible to varying circumstances and requirements, the best plan would probably be to empower the Local Government to require any municipality to appoint an assessor, and to group municipalities for this purpose, and apportion the cost so as to provide for the case of a number of small municipalities having one assessor between them, other minor points being left to be provided for by rule.

"What I have just said about the desirability of making the assessor sections more elastic appears to apply in some measure to the Act itself. It is, I believe, a recognised principle in modern legislation, whether English or Indian, that matters of detail, which are liable to vary from time to time, should be dealt with, as far as possible, by rules having the force of law, adequate provision being of course made for notifying such rules to the persons likely to be affected by them, and for giving them an opportunity to object. For convenience of reference the subjects reserved for rule-making are grouped together in a single section, which enumerates the matters regarding which rules can be made. In the Bengal Local Self-Government Act this system has been adopted and has been found to work well, and a definite proposal to introduce into the Municipal Act a rule-making section, based partly on that Act and partly on the more modern municipal legislation of other provinces, will be laid before the Select Committee for their consideration.

"The only other sections which I need mention at present are those dealing with the cleansing of private privies and cesspools (sections 49 and 70—73 of the Bill as provisionally amended by the Select Committee). It appears from the opinions which have been received, and more particularly from a valuable note, for which I may be permitted to express my obligations to the HON'BLE SYED FAZL IMAM, who, as Vice-Chairman of the Patna Municipality, has had special experience of this difficult subject, it appears, I say, from those opinions, that these sections, which proceed on a novel principle, will have the effect of materially reducing the municipal income under this head in a direction which was not contemplated. No doubt this portion of the law needs some reform, but the changes suggested in the draft Bill seem to go too far, and the better course would apparently be to adhere in the main to the existing law, merely taking the opportunity to clear up doubtful points as to the holdings liable to be taxed for the cleansing of privies and relieving the poorer classes, by providing that the fee for cleansing latrines shall in no case exceed the house-tax or personal tax actually paid. This, it is believed, will remove what is felt to be a very great grievance."

The HON'BLE MR. RISLEY moved that the HON'BLE MESSRS. LYALL, COLLIER and GHOSE and the HON'BLE BABU SURENDRANATH BANERJEE be added to the Select Committee on the Bill to amend the Bengal Municipal Act, III of 1884.

The Motion was put and agreed to.

The Council adjourned *sine die*.

CALCUTTA;

The 28th July, 1893.

GORDON LEITH,

Offg. Assistant Secretary to the Govt. of Bengal,

Legislative Department.

DONATION BY HER HIGHNESS THE MAHARANI SUKHYA RAJA SAHEBA, C.I., REGENT OF GWALIOR.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 27th July 1893.

RESOLUTION No. 1848.

READ—

Letter from the Director of Public Instruction, Bengal, No. 3873, dated the 4th July 1893.

The Lieutenant-Governor has learnt with pleasure that, on the occasion of her last visit to Calcutta, Her Highness the Maharani Sukhya Raja Saheba, C.I., Regent of Gwalior, was pleased to place at the disposal of the Secretary to the Bethune School Committee, Calcutta, a donation of Rs. 500 to be invested in a 4 per cent. Government Promissory Note for the award, in Her Highness's name, of an annual medal or money-prize to the girl who stands first in the School Department of the Bethune College.

2. The acknowledgments of Government are due to Her Highness for this liberal donation, and for the interest she has displayed in the promotion of female education.

3. The Lieutenant-Governor approves the proposal made by the Director of Public Instruction that the Secretary to the Bethune School Committee be appointed administrator of the fund.

ORDER—Ordered that a copy of this Resolution be forwarded to the Director of Public Instruction, Bengal, and to the Accountant-General, Bengal, for information; also that the Government of India, Foreign Department, be requested to forward a copy, with the permission of His Excellency the Viceroy and Governor-General in Council, to Her Highness the Maharani Sukhya Raja Saheba.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

LIBERALITY OF KUMAR NORENDRA LAL KHAN, OF MIDNAPORE.

No. 2484Med., dated Calcutta, the 28th July 1893.

From—J. A. BOURDILLON, ESQ., Offg. Secy. to the Govt. of Bengal, Municipal Department.

To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your letter No. 489M., dated the 6th instant, in which you report that Kumar Norendra Lal Khan, of Midnapore, has agreed that the sum of Rs. 30,000 offered by him to perpetuate the memory of his father should be devoted to the endowment of a zenana hospital at Midnapore, and that he has offered in addition to the above amount a sum of Rs. 10,000 for the construction of the building for the proposed hospital.

2. In reply, I am to say that the Lieutenant-Governor is pleased to accept the very liberal offer now made, the particulars of which will be published in the *Calcutta Gazette.* You are requested to convey to the donor an expression of the Lieutenant-Governor's gratification.

SREEMUTTY BROHMOMOYI'S HINDU ORPHANS' FUND.

No. 3665F., dated Calcutta, the 31st July 1893.

From—J. A. BOURDILLON, ESQ., Offg. Secy. to the Govt. of Bengal, Financial Dept.,

To—MESSRS. SWINHOE and CHUNDER, Attorneys.

WITH reference to the correspondence ending with Government letter No. 2844F., dated the 13th June 1893, I am directed to forward for information and communication to Babu Money Lal Mullick the accompanying copies of two notifications regarding the endowment fund of Rs. 25,000 created by him for the maintenance and education of Hindu male orphans in and about Calcutta, called in memory of his mother "The Sreemutty Brohmomoyi's Hindu Orphans' Fund."

No. 3552F., dated the 24th July 1893.
No. 3663F., dated the 31st July 1893.

2. I am to request that you will be so good as to convey to the donor an expression of His Honour's acknowledgment of his liberality and public spirit. This letter wlll be published in the *Calcutta Gazette.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 29th July 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan July 29, '93 Kalna ... Katwa ... Raniganj ...	0·23 2·47 3·39 2·42	Weather—seasonable. *Aman* being transplanted. Prospects good. Fodder sufficient. Prices of common rice :— Srs. Burdwan ... ... 10 to 12 } Kalna ... ... 10 to 13 } per rupee. Katwa ... ... 11½ } Raniganj ... ... 13 }
	2	Bankura „ 29, '93 Vishnupur ...	3·69 0·56	Weather—cloudy with light showers followed by sunshine. Transplantation of *aman* is still going on. Sugarcane has been damaged by the late rain. Common rice selling at 11 to 12 seers per rupee at Bankura and 12 seers at the Vishnupur markets.
	3	Birbhum „ 29, '93 Rampur Hât ...	3·35 2·94	A break in the rains has occurred. Paddy seedlings are still being transplanted and prospects are very good. Common rice sells at from 12 to 15 seers per rupee.
	4	Midnapore „ 29, '93	2·35	Weather—on the whole fair with occasional showers, especially on Wednesday previous when it rained heavily. The prospects of the rice crop are good, although the damage caused by the flood last week is not yet ascertained. The indigo outturn is very poor indeed compared with last year. Prices of common rice :— Srs. Sadar ... ... 11 } Contai ... ... 13 } per rupee. Tamluk ... ... 10 } Ghatal ... ... 11 }
	5	Hooghly „ 29, '93 Serampore ... Jahanabad ...	·52 3·56 1·93	Weather—hot, and latterly there has been a distinct break in the rains. Prospects generally good; except for a little damage to crops in low lands, they are exceptionally good. Prices of common rice :— Srs. Sadar ... ... 10 to 11 } Serampore ... ... 10 to 11½ } per rupee. Jahanabad ... ... 9 to 12 }
	6	Howrah „ 29, '93 Ulubaria ...	1·08 3·10	Weather—hot and close. Transplantation of paddy going on on the higher lands. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 29, '93	3·26	Weather—cloudy and hot. Transplantation of *aman* going on except in some parts of thanas Bankipore, Debipore, and Mathurapore which are yet flooded. *Aus* and jute injured by excess of rain. Prices of common rice :— Srs. Sadar ... ... 10 to 10½ } Barasat ... ... 9 } Basirhat ... ... 10 } per rupee. Diamond Harbour ... ... 11½ }
	8	Nadia „ 29, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	0·44 5·05 3·63 1·19 2·17	Weather—hot with occasional showers. Crops on high lands doing well. Jute and early rice being harvested. Transplantation of *aman* going on. Prices stationary. Rivers rising. Ample fodder for cattle.
	9	Khulna „ 29, '93 Bagerhat ... Satkhira ...	0·10 2·21 0·69	Weather—hot with light clouds. The break in the rains which has occurred during the week has improved the prospects of all crops. Transplantation of *aman* going on briskly. *Aus* ripening, and a little of it is being reaped in a few places. Coarse rice selling at 9 to 10 seers per rupee. Fodder and water for cattle plentiful.
	10	Jessore „ 22, '93 Jhenida ... Magura ... Narail ... Bangaon ...	1·98 1·82 1·57 0·75 2·22	Weather—hot and cloudy with occasional showers. Harvesting of jute and *aus* commenced. Manufacture of indigo nearly over. Transplantation of *aman* going on. Cattle-disease reported from Salkhiya, Mahirampur, and Gorupota. Prices steady.
	11	Murshidabad „ 29, '93	3·93	Weather—sultry and seasonably rainy. Harvesting of *bhadoi* continues. Transplantation of *aman* nearly finished. The prospect of jute, mulberry and sugarcane is not so bad as might have been expected. Fodder available for cattle. Coarse rice sells at 11 seers per rupee.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
		BENGAL—*concld.*		
CHITTAGONG DIVN.	12	Chittagong ...	...	Reports not received.
	13	Noakhali ...	...	
	14	Tippera ,, 29, '93	6·93	Weather—seasonable. *Aus* is being reaped in some places. Much damage has been caused to *aus* by heavy flood. Condition of *aman* not very hopeful.
	15	Chittagong Hill Tracts. ,, 28, '93	1·87	Weather—cloudy with occasional showers of rain. Paddy plants in *jum* progressing. Condition of *aus* paddy good. No cattle-disease prevailing. Price of common rice 9 seers per rupee.
DACCA DIVN.	16	Dacca ,, 29, '93	1·08	Weather—cloudy and rainy. Prospects of standing crops generally good. Harvesting of *aus* and jute going on, but owing to rapid rise of water, *aus* in some places has been submerged and cannot therefore be conveniently gathered. Common rice selling at from 9 to 11 seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur ,, 29, '93	4·24	Weather—seasonable. *Aus* and jute are being cut in some places. *Aus* has failed in most parts of the district and the outturn is poor. The condition of jute is also bad, and it has been damaged in most places. The condition of the *aman* on high lands is hopeful. Common rice sells at 10 to 11 seers per rupee. Condition of cattle reported good generally, but cattle-disease still prevails in thanas Palong and Shibchar in Madaripur.
		Goalundo ...	2·67	
		Madaripur ...	0·84	
	18	Backergunge ,, 29, '93	1·15	Weather—seasonable. State and prospects of crops fair. Common rice is being sold from 9 to 12 seers per rupee. Fodder and water sufficient.
		Pirojpur ...	2·18	
		Patuakhali ...	4·00	
		Bhola ...	5·76	
	19	Mymensingh ,, 29, '93	10·14	Weather—showers of rain throughout the week. Harvesting of *aus* rice crop and jute continues and transplantation of *aman* going on. The subdivisional officers of Netrakona and Kishoreganj report that the unusually heavy rainfall has caused considerable damage to the *aus* crop and that transplantation of the *aman* crop has been impeded. Common rice sells at 10 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
RAJSHAHI DIVN.	20	Dinajpur ,, 29, '93	2·84	Weather—hot; occasionally cloudy and rainy. Prospects of standing crops continue to be very good. Transplantation of *haimanti* going on. Cutting of jute commenced in places. Prices of rice:— Srs. Sadar ... ... 14 } per rupee. Thakurgaon ... ... 10 to 12 } per rupee. Cattle in good condition. Fodder and drinking water sufficient.
		Thakurgaon ...	8·18	
	21	Rajshahi ,, 29, '93	0·39	Weather—seasonable and very hot occasionally. The improvement in the weather has brought about a corresponding improvement in the state of the crops. If sunshiny weather continues, a great part of the crops will entirely recover. The jute, however, to a great extent is put beyond recovery: where it is being reaped, the return is deficient. Water and fodder-supply ample. There is no cattle-disease. Price of rice varies from 10 to 13 seers.
		Nator ...	1·74	
		Naugaon ...	6·10	
	22	Rangpur ,, 29, '93	4·94	Weather—rainy. The *aus* harvest is nearly over. Transplantation of *aman* going on. Prices steady.
		Gaibandha ...	3·60	
		Kurigaon ...	7·19	
		Nilphamari ...	5·43	
		Govindganj ...	2·83	
		Ulipur ...	1·80	
		Sunderganj ...	6·54	
		Pirganj ...	3·82	
	23	Bogra ,, 29, '93	4·16	Weather—unsettled. Transplanting of *aman* goes on. Prospects of standing crops unchanged. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
		Sherpur ...	4·15	
		Naukhila ...	2·86	
	24	Pabna ,, 29, '93	4·22	Weather—cloudy and rainy. Rivers rising. *Aus* and jute are being cut. Common rice sells at 10 seers per rupee at Sirajganj and 11½ seers at Pabna. Fodder and water-supply ample.
	25	Darjeeling ,, 29, '93	2·58	Weather—less rainy. *In the hills:—Bhutta, kagni, shama, chota marua,* potatoes and *phaphur* being harvested. *Bara marua* and *aghani dhan* progressing favourably. *Bhadoi dhan* coming to perfection. *In the Terai:*—Prospect of crops good. *Bhadoi* paddy in ear. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 } per rupee.
		Siliguri ...	9·05	
	23	Jalpaiguri ,, 29, '93	6·28	Weather—seasonable. Harvesting of *bhadoi* continues. Transplantation of *haimanti* in full swing. Prospect of jute favourable. Price of common rice at 11 seers per rupee. Fodder and water-supply sufficient. No cattle-disease.

BIHAR.

No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BHAGALPUR DIVN.				
27	Monghyr Begusarai Jamui	July 29, '93	0·62 1·19 0·48	Weather—partly fair and partly cloudy with excessive heat. Low land crops injured by heavy showers. Indigo and sugarcane doing well. Paddy transplantation vigorously pushed on. Ample fodder and water. Prices of common rice:— Srs. Sadar ... ... 11 to 16 } per rupee. Begusarai ... ... 14 } Jamui ... ... 13 }
28	Bhagalpur Banka Madhipura Supaul	„ 29, '93	0·88 2·09 2·93 1·90	Weather—rainy. The damage done to *makai* and *marua* by the excessive rain has been estimated at about 6 annas. Otherwise the prospect of crops is good.
29	Purnea Kishanganj Araria	„ 29, '93	2·58 7·06 3·20	Weather—cloudy with occasional sunshine. Harvesting of *bhadoi* commenced. Transplantation of *aghani* going on. No cattle-disease reported. Fodder and water sufficient. Prices stationary.
30	Malda Chanchal Shibganj	„ 29, '93	3·45 2·63 1·64	Weather—hot, cloudy and rainy with intervals of sunshine. Harvesting of *bhadoi* rice has begun; average outturn is expected. Transplantation of winter rice is being pushed on. Ordinary rice selling at 11 to 15 seers per rupee. Supply of fodder ample.
31	Sonthal Parganas Deoghur Godda Jamtara Pakur Rajmahal	„ 29, 93	2·22 3·28 2·60 3·83 2·90 3·64	Weather—cloudy with occasional showers of rain. Transplantation of paddy going on briskly. Prospects of Indian-corn and other *bhadoi* crops not favourable owing to frequent rain. Prices stationary. Water and fodder plenty.
PATNA DIVISION.				
32	Patna Barh Bihar Dinapur	„ 29, '93	0·40 0·35 4·00 0·98	Weather—cloudy and hot and drizzling at times. The *bhadoi* crops are said to be damaged in flooded fields, but the comparative absence of rain in the first week in a large part of the district has given time for much of the excess water to drain off. Land is being widely prepared for the transplantation of paddy. Prices of common rice:— Srs. Sadar ... ... 15 } per rupee. Barh .. .. 12½ } Bihar ... ... 16 } Dinapore ... ... 13 }
33	Gaya Jahanabad Nawada Aurangabad	„ 29, '93	0·32 10·34 3·24 3·62	Weather—clear in the first part of the week and cloudy latterly. Transplantation of paddy going on. Absence of rain during the first part of the week has been somewhat beneficial to the *bhadoi* crops. Prices stationary. Fodder and water for cattle ample.
34	Shahabad Buxar Bhabhua Sasaram	„ 29, '93	0·35 4·67 3·53 4·00	A break in the rains with its usual features. The weather is most favourable for the crops, all of which promise well.
35	Darbhanga Madhubani Samastipur	„ 29, '93	2·52 5·92 3·20	Weather—cloudy and close. Transplanting of *dhan* and *marua* in progress. *Bhadoi* prospects still continue favourable. Weeding operations impeded by constant showers. A break in the rains would be beneficial for this crop. Fodder for cattle sufficient. Prices remain stationary.
36	Muzaffarpur Hajipur Sitamarhi	„ 29, '93	2·87 2·08 6·81	Weather—cloudy and rainy. Transplantation of *dhan* still going on. *Makai* injured to some extent, otherwise prospects good. No disease among cattle. Fodder and water for cattle sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
PATNA DIVISION—*concld.*			
37	Saran July, 29, '93 Siwan ... Gopalganj ...	0·25 2·38 3·76	Weather—seasonable. A break in the rains only in parts. Prospects of crops good on the whole. A break required for maize and indigo crops. Prices of common rice:— Srs. Chapra ... ... 13 } per rupee. Siwan ... ... 12¼ } per rupee. Gopalganj ... ... 13 } per rupee.
38	Champaran „ 29, '93	5·49	Weather—cloudy with rain every day. Sowing of *dhan* is over. Transplantation yet going on. Prices nearly stationary. Fodder and water sufficient.
ORISSA.			
ORISSA DIVN.			
39	Cuttack „ 29, '93	0·97	Weather—sultry. Transplantation of *sarad* in progress. *Beali* needs rain in parts. Supply of fodder sufficient. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 14 7 } per rupee. Jajpur ... ... 15 12 to 18 6 } per rupee. Kendrapara ... ... 16 0 to 18 6 } per rupee. Banki ... ... 15 12 } per rupee.
40	Puri „ 27, '93 Khurda ...	0·12 1·85	Weather—hot and cloudy. Rain is much wanted in the part of the district lying to the east of the pilgrim road. Agricultural operation is going on well in Khurda. Weeding of *beali* continues. Miscellaneous crops doing fairly. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 11 13 to 17 5 } per rupee. Khurda ... ... 12 0 to 17 1 } per rupee.
41	Balasore „ 29, '93	0·55	Weather—hot and dry. Transplantation of paddy seedlings almost finished; 12 annas crop almost assured. Prices of rice:— Srs. Balasore ... ... 13 } per rupee. Bhadrak ... ... 15 } per rupee.
CHOTA NAGPUR.			
South-West Frontier Agency.			
CHOTA NAGPUR DIVN.			
42	Hazaribagh July, 29, '93 Giridi ...	0·22 3·29	Weather—seasonable. Transplanting of rice and *marua* still in progress. Indian-corn injured by excessive rain. Fodder abundant. Prices of common rice:— Srs. Head-quarters ... ... 9 to 14 } per rupee. Giridi ... ... 9 to 11¾ } per rupee.
43	Lohardaga „ 29, '93	1·36	Weather—hot and cloudy. Transplantation of winter paddy continues. Prospect of *bhadoi* continues good. Common rice selling at 12 seers per rupee. Fodder and water plentiful.
44	Palamau „ 29, 93	1·58	Weather—hot and cloudy with occasional light showers. The *bhadoi* crops are said to be damaged in some thanas owing to excessive rainfall. Transplantation of paddy continues. Prices stationary. Fodder plentiful.
45	Singhbhum „ 29, '93	1·01	Weather—seasonable. Condition of the crops good everywhere. Price of common rice stationary. A few cases of cattle-disease reported from Ghatsilla and Kolhan thanas.
46	Manbhum „ 22, '93 Gobindpur ...	0·28 4·27	Weather—showery in early part of the week, bright and warm for the last two days. The break in the rains will do much good to all the crops. Prospects of *bhadoi* crops indifferent. Prices stationary.

The total fall from 1st January to 29th July 1893	59·93
The average fall of the corresponding period for 24 years, Surveyor-General's Office	33·41

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 1st August* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 29TH OF JULY 1893.

DURING the previous week a westerly wind current had gradually advanced over the province, and at its close westerly and south-westerly winds were reported at all except a few stations in the extreme eastern and northern districts. This was accompanied by the establishment of an area of decidedly high pressure over the southern and south-western districts, and on the 23rd, or the first day of the present week, there was an excess pressure above the normal of the day of about 0·06 inch over this area. Over the central parts of the province pressure was also in slight excess, but a distinct defect was registered in parts of North Bengal and North Bihar. This distribution of pressure hence caused the monsoon current to set away from the west of the province towards the east, and from the east to the north of Bengal. Conditions were therefore still favourable for rainfall in the north and to a certain extent in the east of the province, but the pressure conditions were unfavourable for the continuance of rainfall in the western and south-western districts. On the 24th there was a general fall of pressure over the province, and the distribution became rather more normal than it had been, but south-westerly winds still prevailed in most districts. On the 25th pressure again fell in Orissa, and partly in the southern districts, while it was rising elsewhere, particularly in Bihar, so that the area of high pressure in the extreme west of the province tended to re-establish itself. This was succeeded on the 26th by a further rather rapid general increase of pressure, and a decided area of comparatively high pressure again covered the western half of the province, and this area gradually extended on the 27th and 28th until it reached South-East Bengal, but on the 29th a moderate fall of pressure commenced, tending to partially efface this abnormal distribution of pressure With this unusual distribution of pressure existing for a considerable part of the week, the monsoon current has been deflected to a great extent towards the east of the province, and thence along the foot of the hills to the northern districts, while the western and south-western districts have not been much influenced by it. Indeed, during the second-half of the week a partial break in the rains obtained over Orissa, South-West Bengal, South Bihar and Chota Nagpur, and it even extended for a day or two to North Bengal, but the break was never complete, and in the eastern districts and in Assam rainfall has continued throughout the week. Hence the rainfall for the week has been in large defect from the normal in Orissa, Chota Nagpur and South Bihar, and in moderate defect in South-West Bengal. The falls have been about normal in amount in North Bihar and East Bengal, but on the other hand in North Bengal the quantity of rain received has been more than twice as great as usual.

Pressure.—The mean pressure of the province for the week has been in excess of the normal in all divisions. The usual excess in Chota Nagpur and South-West Bengal has been about 0·04″ to 0·05″, and in most other districts it has been from about 0·02″ to 0·025″, while in Assam it has only equalled 0·008.″ This abnormal distribution it will be seen would have the natural effect of deflecting the monsoon current away from the west towards the east and north of the province.

Temperature.—The variations of temperature over the province from day to day have been quite unimportant, but with the comparative lightness of the rainfall over a large area the mean temperature has ranged much higher than usual, and thus excess temperatures of from about 1° to 2° have been recorded in Chota Nagpur, Orissa and South-West Bengal, and smaller excess temperatures have been recorded in South Bihar and East Bengal. On the other hand defects of about a degree have been registered in North Bengal and North Bihar. In the whole of Bengal for the week the mean temperature has been about 0·5° in excess of the normal. In Assam also a considerable excess of 1·8° has been recorded.

Rainfall—Has been heaviest in North Bengal, which has received an average amount of 5·87 inches, or rather more than three inches in excess of the normal. East Bengal has received 4·06 inches, or slightly more than usual. In South-West Bengal and North Bihar the falls have varied from two to three inches, while in Chota Nagpur and South Bihar they have been little more than an inch. Finally, the falls have been smallest in Orissa, which has only received 0·71 inch. Expressed as a percentage of the normal fall for the period, the following are the amounts which have been received:—North Bengal 208 per cent., East Bengal 109 per cent., North Bihar 105 per cent., South-West Bengal 74 per cent., Chota Nagpur 43 per cent., South Bihar 37 per cent., and Orissa 23 per cent only.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 29th of July 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Averages for week. Of lowest of each day.	Averages for week. Of mean for each day. WORKING OF THE FIRE-BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH DURING THE YEAR 1892-93.

THE following report is published for general information.

J. A. BOURDILLON,
Offg. Secy. to the Govt. of Bengal.

No. 5318, dated Calcutta, the 14th July 1893.

From—SIR JOHN LAMBERT, K.C.I.E., Commissioner of Police,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, for the information of Government, a report on the working of the fire-brigade in the town and suburbs of Calcutta and in the Municipality of Howrah for the year 1892-93.

2. During the year 23 fires occurred. The brigade was in attendance at 20 of these fires. Of the remaining 3, 1 was extinguished by the local police and 2 by the people of the locality.

3. The estimated value of property destroyed was Rs. 1,42,529. At two busti fires in the suburbs three persons lost their lives.

4. No fire was reported to have occured in any building licensed under Act IV of 1883.

5. The following is a brief notice of the three most serious fires :—

I.—On January, the 11th, at 3-45 P.M., a fire broke out on the steamer *Mirzapore* and flat No. 10 in moorings off Nimtolla Ghât. The engines *Percy* and *Bengal* assisted the Port Commissioners' floating engine, and the fire was extinguished by 8 P.M. The loss of cargo consisting of jute and betel-nuts was valued at Rs. 9,500. The damage done to the vessels was estimated at Rs. 1,00,000.

II.—On May, the 20th, a large *busti* fire broke out in Tollygunge and lasted from 2-20 P.M. till midnight. Two hundred and fifty huts, together with household property, valued at Rs. 20,040, were destroyed. There was a strong wind blowing at the time, which caused the fire to spread rapidly. The brigade arrived at the spot with engine *Gunga* at 3-30 P.M., but could not work, as there were no tanks within reach of the fire. Eventually a road was cut from the foot of Tollygung bridge to Tolly's Nullah, a distance of about 50 yards, and the engine was brought into play at 4 P.M.

III.—On December, 27th, the cargo of the jute-laden ship *Dumbarton Rock* caught fire in the river while she was putting to sea. The ship was brought back to Matiabrooj, and four men of the brigade were sent on board to render assistance. The fire was caused by the 2nd officer having accidentally dropped a lantern in the hold, and the cargo was partially destroyed. The extent of damage was not ascertained.

6. During the year there were five prosecutions under the Explosives Act IV of 1884—two in the town and three in the suburbs. Convictions were obtained in all five cases.

7. A memorandum of the fires which occurred and a statement showing receipts and expenditure on behalf of the brigade are enclosed.

Memorandum of fires in the Town and Suburbs of Calcutta and in Howrah from 1st April 1892 to 31st March 1893.

Number.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	REMARKS SHOWING NATURE OF DAMAGE DONE, &C.
			Town.	Rs.	
1	13th April 1892 ..	Free School Street, section M., Town.	3 hours and 45 minutes	2,500	Six tiled houses containing straw, wood and grain.
2	6th November " ..	Bow Bazar Street, section K., Town.	1½ hours	1,000	A one-storied brick building containing a poddar's shop and a bikreewallah's shop.

CALCUTTA POLICE OFFICE,
The 14th July 1893.

H. PAGET,
Offg. Deputy Commissioner of Police.

WORKING OF THE BENGAL JUTE WAREHOUSE AND FIRE-BRIGADE ACT IV OF 1883 IN THE COSSIPORE-CHITPUR AND MANIKTOLA MUNICIPALITIES DURING THE YEAR 1892-93.

The 3rd August 1893.—The following reports are published for general information.

J. A. BOURDILLON,
Offg. Secy. to the Govt. of Bengal.

No. 58M.M., dated Calcutta, the 13th July 1893.

From—E. V. WESTMACOTT, ESQ., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith copies of the reports on the working of the Bengal Jute Warehouse and Fire-brigade Act IV of 1883 in the Cossipore-Chitpur and Maniktola Municipalities during the year 1892-93. The reports do not call for any special remarks.

No. 200, dated Barrackpore, the 13th May 1893.

From—RAI GOPAL CHANDRA MOOKERJEE BAHADUR, C.E., Chairman, Cossipore and Chitpur Municipality,
To—The Magistrate, 24-Parganas.

I HAVE the honour to submit for your information the following report on the working of jute warehouses and fire-brigade for the year 1892-93.

1. Management of the fire-brigade in Calcutta and the suburbs are in the hands of the Commissioner of Police, Calcutta, and that officer submits his annual report direct to Government.

2. As regards the working of jute warehouses, the Commissioners of this Municipality realized on account of licenses Rs. 34,809-11 as detailed below. Out of this amount 80 per cent., viz., Rs. 27,766-2-6, was made over to the Commissioner of Police, Calcutta, Rs. 102 refunded (which was paid under protest), and the balance at 20 per cent., *i.e.*, Rs. 6,941-8-6, was credited to the Municipal fund as per Act IV of 1883:—

	Rs.	A.	P.
No. 12, Jute Press-house with attached godowns, at the rate of 10 per cent. on rental valuation of holdings	23,644	13	0
No. 34, Jute godowns, rental valuation of which Rs. 500 and upwards per annum, at the rate of 10 per cent. on rental valuation of holdings	9,198	14	0
No. 29, Jute godowns, rental valuation of which is under Rs. 500 per annum, at the consolidated rate of Rs. 50 for each godown	1,450	0	0
No. 1, Cotton strong godown, at the rate of 10 per cent. on rental valuation of the holding	66	0	0
No. 9, Ropery strong godown, at the consolidated rate of Rs. 50 per each ropery	450	0	0
Total ...	34,809	11	0

3. I beg further to report for your information that the budget estimate submitted by the Commissioner of Police for the year 1892-93 for the maintenance of the fire-brigade at Chitpur was as follows:—

	Rs.
Establishment	3,192
Contingencies	4,550
Total ...	7,742

No. 154, dated Manicktollah, the 1st July 1893.

From—G. C. RAY, ESQ., Vice-Chairman, Maniktola Municipality,
To—The Magistrate of the 24-Parganas.

WITH reference to your reminder B, dated the 27th June 1893, I have the honour to submit the following report on the working of the jute warehouses within this municipality and Fire-Brigade Act IV of 1883 for the year 1892-93.

2. There were eight jute warehouses against six of the previous year, and the license fees received from them under the Act amounted to Rs. 644, against Rs. 784-8 of the preceding year. The decrease in the receipt is due partly to the fact that the Soora Jute Mill Company paid their license fees of Rs. 120 for the year under report during the year 1891-92 (*i.e.*), on the 28th March 1891. Most of the godowns for the storage of jute are pucca, and are situated on the eastern or the left bank of the Circular Canal, and possess the advantage of importing and exporting jute through the canal which communicates with the eastern districts on one side and the Calcutta port on the other. It has been roughly estimated that about 4 lakhs of maunds of jute were stored during the year; the quantity imported was less than in the previous year. There was one jute rope manufactory within the municipality and a jute mill at Soora, the proprietor of which is a Marwaree gentleman.

3. Rupees 682-9-6 were paid to the Commissioner of Police on account of the maintenance of the fire-brigade. There were no fires this year within the limits of this Municipality.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 5th August 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Aug. 5, '93 Kalna ... Katwa ... Raniganj ...	1·11 1·63 1·41 2·79	Weather—seasonable. Transplantation nearly completed. *Aus*, jute and sugar-cane doing well. Prices of common rice :— Srs. Burdwan ... ... 10 to 12 Kalna ... ... 9 to 13 Katwa ... ... 11¼ Raniganj ... ... 13 per rupee.
	2	Bankura „ 5, '93 Vishnupur ...	3·38 3·77	Weather—cloudy with occasional showers. Transplantation of *aman* rice still going on. Prospects of *aus* rice good. Prices of common rice :— Srs. Bankura ... ... 12½ Vishnupur .. .. 12 per rupee.
	3	Birbhum „ 5, '93 Rampur Hát ...	2·50 4·70	Weather—seasonable. Transplantation of paddy seedlings nearly finished. Prospects continue good. Common rice sells at from 11 to 14 seers per rupee.
	4	Midnapore „ 5, '93	6·84	The total rainfall has been very heavy as the figures show. It has, however, come in very heavy showers, and there has been much sunshine. This is the fourth cyclone this year. The river is in high flood again, but if this is the last flood, the damage will not be irreparable. Transplanting is going on throughout the district, and so far there is no reason to take a gloomy view of the prospects. Prices of common rice :— Srs. Sadar ... ... 11 Contai ... ... 12 Tamluk ... ... 10 Ghatal .. .. 11 per rupee.
	5	Hooghly „ 5, '93 Serampore ...	4·79 2·68	Weather—hot and showery. Prospects of all crops good except in a very few villages on the lowest lands where the flood water is not yet fully drained out. It is hoped that rice will be transplanted even on these by the 15th of the month. Prices of common rice :— Srs. Sadar ... ... 10 to 11 Serampore ... ... 10 to 11½ Jahanabad ... ... 9 to 12 per rupee.
	6	Howrah .. 5, '93 Ulubaria ...	2·80 1·42	Weather—seasonable. Transplantation of paddy on high lands continues. Condition of cattle good. Fodder and water-supply sufficient. Prices of rice 9½ to 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 5, '93	1·73	Weather—seasonable. Transplantation of *aman* going on. *Aus* and jute injured by excess of rain. A considerable portion of the paddy lands in thana Baukipore is still under water. Prospects not favourable in southern portion of district. Prices of common rice :— Srs. c. Sadar ... ... 10 to 11 8 Diamond Harbour ... ... 11 0¼ Barasat ... ... 9 8 Basirhat ... ... 10 0 per rupee.
	8	Nadia „ 5, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	1·53 1·07 1·84 1·67 2·73	Weather—hot with occasional showers. Crops doing well. Harvest of early rice and jute proceeding. Transplantation of *aman* rice going on. Rivers falling. Prices stationary.
	9	Khulna „ 5, '93 Bagerhat ... Satkhira ...	2·30 2·87 1·52	Weather—seasonable. Harvesting of *aus* has commenced; outturn estimated at about 10 annas. *Aman* is being vigorously transplanted; prospects generally fair. Jute has been damaged to some extent by the rain. Coarse rice selling at 9 to 10 seers per rupee. Fodder sufficient.
	10	Jessore „ 5, '93 Jhenida ... Magura ... Narail ... Bangaon ...	1·25 1·25 1·58 0·96 1·07	Weather—hot and cloudy with occasional showers. Harvesting of *aus* and jute going on. Manufacture of indigo nearly completed. Cattle-disease reported from Salkhiya and Manirampur. Fodder sufficient except in Mahmudpur. Prices steady.
	11	Murshidabad „ 5, '93	4·58	Weather—seasonable. Harvesting of *bhadoi* still going on. Jute and mulberry doing well. Outturn of indigo said to be poor this year. Fodder sufficient for cattle. Coarse rice sells at 11 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Aug. 5, '96	5·34	Weather—seasonable. *Aus* is being harvested. *Aman* is still being transplanted. Prospects not good. Prices rising. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	„ 5, '96	4·62	Weather—showery with occasional fine weather. Harvesting of *aus* and transplanting of *aman* continue. Prospects unfavourable. Cattle-disease prevailing throughout the district. Common rice selling at 10 seers per rupee.
	14	Tippera	„ 5, '93	1·56	Weather—seasonable. *Aus* crop on low lands almost totally destroyed. About 10 annas of the crop harvested. Chillies destroyed. *Til* much damaged, and also jute. *Aman* promises well in most parts. Fodder scarce. Country under water.
	15	Chittagong Hill Tracts.	„ 4, '93	1·38	Weather—hot and occasionally cloudy. Paddy plants in *jum* and early plough-paddy (*aus*) progressing. Condition of cattle generally good. Common rice (coarse) selling at 10 seers per rupee.
DACCA DIVN.	16	Dacca	„ 5, '93	3·16	Weather—cloudy and rainy. Prospects of standing crops fair. Harvesting of *aus* and jute going on. The former has been partially damaged by sudden rise of water. Common rice selling at 9 to 10½ seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	„ 5, '93	2·54 2·41 0·88	Weather—seasonable. *Aus* and jute are being cut. *Aus* has failed in most parts of the district and the outturn is poor. The condition of jute is no better. *Aman* on high lands is hopeful, but on low lands much damaged by rain and rising of the rivers. Common rice sells at 10 to 12 seers per rupee. Condition of cattle good generally, but cattle-disease continues in thanas Palong and Shibchur in Madaripur.
	18	Backergunge Pirojpur Patuakhali Bhola	„ 5, '93	3·43 3·28 5·54 2·90	Weather—seasonable. State and prospects of crops fair except in a small tract in the centre of the bils where the deep water has destroyed the crops. Common rice is being sold from 8 to 12 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 5, '93	2·39	Weather—cloudy and rainy. *Aus* and jute are being harvested. Unusually heavy rainfall has caused much damage to the *aus* crop in the Sadar, Kishorganj and Netrokona subdivisions. Transplantation of *aman* has also been impeded in those subdivisions. Common rice selling at from 9½ to 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 5, '93 ..	0·80 0·98	Weather—hot; occasionally cloudy. Prospects of standing crops very good. Transplantation of *haimanti* still going on. Cutting of jute continues. Price of rice at Sadar 12½ seers per rupee; that at Thakurgaon stationary. Cattle continue to be in good condition. Fodder and drinking water plentiful.
	21	Rajshahi Nator Naugaon	„ 5, '93	2·82 0·63 0·96	Weather—seasonable; very heavy showers fall now and then. The condition of crops has improved owing to the drier weather. Water and fodder-supply ample; there is no cattle-disease. Price of rice varies from 10 to 13 seers per rupee.
	22	Rangpur Gaibanda Kurigaon Nilphamari	„ 5, '93	0·58 3·75 6·83 1·83	Weather—sultry with occasional rain. Harvesting of *aus* and jute going on. *Aman* is being transplanted. Price of common rice from 11 to 13 seers per rupee.
	23	Bogra Sherpur Naukhila	„ 5, '93	0·19 4·31 2·45	Weather—changeable and unsettled. Transplantation of *aman* still goes on. Cutting of jute has commenced. General prospects unchanged. Common rice sells at 10½ seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 5, '93	1·31	Weather—cloudy and cool. Rivers rising. It rained more or less all the days in the week. *Aus* and jute are being cut. Common rice sells at 11 seers per rupee at Pabna and Rs. 3¾ to Rs. 4 per maund at Sirajganj. Water and fodder sufficient.
	25	Darjeeling Siliguri	„ 5, '93 ...	6·19 4·04	Weather—rainy. *In the hills*:—Indian-corn, *kangni*, *shama*, potatoes and *phaphur* being harvested. *Chota marua* and *bhadoi* rice coming to perfection. *Bara marua* and *haimanti* rice progressing favourably. *In the Terai*:—*Bhadoi* paddy being harvested. Sowing of *haimanti* paddy being continued. Jute doing well. Prices of coarse rice:— Hills ... ... 9 Srs. per rupee. Terai ... ... 11 Srs. per rupee.
	26	Jalpaiguri	„ 5, '93	8·76	Weather—cloudy and hot. Harvesting of *bhadoi* still going on. Transplantation of *haimanti* in full swing. Prospects of jute favourable. Common rice sells at 11 seers per rupee. Fodder and water sufficient. No cattle-disease.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr July 5, '93 Begusarai ... Jamui ...	4·35 2·02 0·38	Weather—cloudy with occasional rain. Prospects of *bhadoi* on high lands good; low land crops partly damaged. Transplantation of *aghani* crop going on. Sugarcane doing well. Indigo is being harvested. Fodder and water plentiful. Small-pox among cattle reported from Nawadi. Prices of common rice :— Srs. Sadar ... ... 13 to 14 } per rupee. Begusarai ... ... 14 } Jamui ... ... 12 }
28	Bhagalpur „ 5, '93 Banka ... Supaul ..	1·47 0·82 1·66	Transplantation actively in progress and will be finished soon. There is every prospect of an excellent winter rice crop. Common rice 13 seers 14 chitaks per rupee.
29	Purnea „ 5, '93 Kishanganj ... Araria ...	2·20 1·12 1·48	Weather—cloudy with showers and intervals of sun. *Bhadoi* ripening, and the recent weather having been suitable, a full outturn is expected except where floods did damage in Amour, &c. *Aghani* transplantation in full swing. Weather propitious. Jute doing well. Some cattle-disease in parts. Prices inclined to fall.
30	Malda „ 5, '93	2·58	Weather—hot and occasionally cloudy. *Bhadoi* paddy being harvested. The outturn is expected to be an average one. Transplanting of winter rice is in progress. The temporary break in the rains has improved the condition of all standing crops. Ordinary rice selling at from 11 to 16 seers per rupee. Fodder and water sufficient.
31	Sonthal Parganas „ 5, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	6·01 3·84 1·62 4·23 2·92 0·97	Weather—rainy almost throughout the week; now clear. Break in the rains has done some good to the *bhadoi* crop. Transplantation of paddy nearly completed. Prices stationary. Water and fodder sufficient.
PATNA DIVISION.			
32	Patna „ 5, '93 Barh ... Bihar .. Dinapur ...	1·42 0·35 0·64 0·61	Weather—cloudy and hot with occasional showers. Prospects of *bhadoi* unfavourably affected by continued rain, but it is being weeded. Paddy transplantation in progress. Harvesting of *cheena* has commenced. Prices of common rice :— Srs. Sadar ... ... 15 } per rupee. Barh .. .. 12½ } Bihar ... ... 16 } Dinapore ... ... 13 }
33	Gaya „ 5, 93 Jahanabad ... Nawada .. Aurangabad ...	2·97 1·08 3·86 0·94	Weather—seasonable; rain on a few days. Paddy transplantation progressing. *Bhadoi* crops not doing very well. Prices unaltered. Fodder and water-supply ample.
34	Shahabad „ 5, '93 Buxar ... Bhabhua ... Sasaram ...	0·69 0·40 1·60 1·67	Weather—bright sunshine alternates with showers; westerly winds prevail. *Bhadoi* crops continue to promise well. *Aghani* rice is being transplanted. Fodder ample. Prices stationary.
35	Darbhanga „ 5, '93 Madhubani ... Samastipur ...	3·45 3·17 1·40	Weather—cloudy with occasional sunshine. There has been a break in the rains for the last few days. *Makai* and low land *marua* injured to a certain extent by excessive rain. Otherwise prospects continue favourable. Some damage is reported to have been done by floods to crops lying on river banks. Transplanting of rice in progress. Fodder for cattle sufficient. Prices stationary.
36	Muzaffarpur „ 5, '93 Hajipur ... Sitamarhi ...	1·61 0·55 3·18	Weather—seasonable. Transplantation of paddy plants still in progress. The Bor Gandack is in high flood and much damage is being done to the *makai* and *bhadoi* crops. Some paddy also washed away. Fodder and water sufficient. No cattle-disease.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
PATNA DIVISION—*concld.*			
37	Saran Aug. 5, '93 Siwan ... Gopalganj ...	0·87 0·51 0·96	The week has been fine with only a few showers. On the whole the crops are fair. The break in the rains is benefiting maize, but in some parts delaying transplanting of rice. Fodder and water plentiful. Prices of common rice :— Srs. Chapra ... ... 13 } per rupee. Gopalganj ... ... 13 }
38	Champaran " 5, '93	3·55	Weather—cloudy with occasional sunshine. Flood has somewhat damaged *bhadoi* and paddy. Prices nearly stationary. Fodder and water sufficient.
ORISSA.			
ORISSA DIVN.			
39	Cuttack " 5, '93	8·51	Weather—cloudy with heavy showers occasionally. *Beali* in ear. *Sarad* being transplanted. Fodder-supply sufficient. Prices of common rice :— Srs. C. Srs. C. Sadar ... ... 10 12 to 14 7 } Jajpur ... ... 15 12 to 18 6 } per rupee. Kendrapara ... ... 13 10 to 18 6 } Banki ... ... 15 12 }
40	Puri " 3, '93 Khurda ...	2·94 3·39	Weather—cloudy with occasional showers. *Sarad* paddy much benefited by the late rain, especially in the eastern part of the district. *Beali* is in ear and in some places ripening. Miscellaneous crops doing fairly. Prices of common rice :— Srs. C. Srs. C. Sadar ... ... 11 13 to 17 5 } per rupee. Khurda ... ... 12 0 to 17 1 }
41	Balasore " 5, '93	1·91	Weather—cloudy with showers. Rice transplanting in progress. More rain required in parts. Twelve annas crop expected. Prices of common rice :— Srs. Balasore ... ... 13 } Bhadrak ... ... 15 } per rupee. Chandbali ... ... 12 } Prices have fallen slightly in the interior.

* Mean of 6 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, *i. e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 5th of August 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns a[re] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at lea[st] 0·1 inches of rain has fallen.

CALCUTTA, *the 8th August* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 5TH OF AUGUST 1893.

THOUGH the principal feature in the weather of the early part of the week was one of the small depressions which form in the north-west angle of the Bay at this season of the year, still the changes in the meteorological elements were unusually small, and the rainfall for the week is below the average in all districts. When the weather of the past week is compared with what obtained in the latter half of June and the early part of July, one important difference appears. The rainfall, though not heavy, has been more uniformly distributed, and the electrical disturbances which caused the unusually heavy local falls of those weeks either no longer occur, or their effect in causing precipitation of rain is to a large extent modified.

On the first day of the week the low pressure area began to form off the south Orissa coast, and north-westerly winds prevailed in Orissa, Chota Nagpur, and part of South-West Bengal. The shallow diffused low pressure which then covered the north of the Bay slowly drifted towards the west without much increase of intensity, causing easterly winds in all districts, except South-West Bengal and Orissa, where directions were more northerly. General light rain occurred in all districts during these days, the falls being somewhat more scattered in part of East Bengal, while in North Bengal they were heavier than at any other time during the week. Temperature was slightly above the normal. While the depression continued its slow westerly or north-westerly motion, these conditions prevailed over the province, but over the Bay owing to the steeper gradients winds became stronger and the sea continued rough till the end of the week. On 2nd August pressure began to recover very slowly and continued briskly on the 3rd, by which time the pressure distribution was practically normal. The wind circulation was then becoming more mornal, and rainfall would have continued probably over the whole province but for a brisk fall of pressure occurring in Assam and North Bengal at the same time as a brisk rise in Orissa and the Sircars. These changes leading to a depression along the foot of the hills caused a westerly wind to blow over the whole province, and as this wind was comparatively dry, rainfall almost ceased, especially in the southern and western districts.

Pressure.—During the first-half of the week slow downward changes continued, but defect was never greater than ·1 inch. As the depression moved away the recovery was also slow. The means for the week are below the normal by small amounts at all stations.

Temperature.—At the beginning of the week there was slightly excessive temperature in Lower Bengal, but during the cloudy weather which accompanied the shallow depression, the day temperatures fell and the air remained cooler till the end of the week, when owing to the westerly wind and comparatively clear skies it again began to rise. The difference from the normal was never very large. The means for the week are below the normal by less than half a degree except in Assam where defect is 1°·4.

Rainfall.—Light general rain fell over the greater part of the province except on the last two days in the south-western districts and on the last day in all districts. Though the rainfall was almost continuous from day to day, the total fall has not been large, and the means for the large divisions are all below the normal. Defect in North Bengal is 1·64 inches, in East Bengal 1·43 inches, and in South Bihar 1·35 inches. In Orissa and North Bihar the difference is only a quarter of an inch, and in South-West Bengal and Chota Nagpur between half an inch and an inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 5th of August 1893:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	143·7		
The mean difference of sun and air temperatures	56·7		
The greatest sun temperature	154·6	27th.	
The greatest excess of sun over air temperature	68·3	16th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	77·1		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·1	10th and 28th.	
	Miles.		
The mean movement of the wind per day	87·8		
The greatest movement of the wind in one day	239·0	2nd.	
The greatest movement of the wind in one hour	15·0	1st, noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 0, N.E. 3, E. 19, S.E. 70, S. 222, S.W. 277, W. 41, N.W. 3, Calm 109.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore,. and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

The total fall from 1st January to 5th August 1893	61·66
The average fall of the corresponding period for 24 years, Surveyor-General's Office	37·00

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

* Includes 1,290 tons and 9,479 tons of coal during 1893 and 1892, respectively, carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock, 16,098 tons and 7,560 tons for the years 1893 and 1892, respectively, for which no "Up" and "Down" register maintained.

Statement of principal commodities carried over the Eastern Bengal State Railway during the month of May 1893.

INCREASES.

	Tons.
Coal	5,066
Due to the carriage from Saidpur to Jalpaiguri of coal sold to the Bengal Duars Railway and to an increase in deliveries to presses on the Strand Bank, Calcutta.	
Jute, unscrewed	3,349
Sirajganj, Kushtia and Mymensingh show increases. There was no jute available at the same time last year.	
Kerosine oil	1,111
Due to prohibition of carriage by boat within certain limits of the port of Calcutta.	
Seeds	2,947
The increases are in despatches principally from Kasba, Sonali, Forbesganj, and Goalundo. Due to good local crops.	
Railway plant and rolling-stock	8,538
Chiefly from Calcutta for the Bengal Duars and Kuch Bihar Railways.	

DECREASES.

	Tons.
Rice	1,595
The principal decrease was in despatches from Goalundo. Last year the northern had to draw food-supplies from the eastern districts.	
Salt	1,076
Ordinary fluctuation of traffic.	

CALCUTTA, *the 31st July* 1893.

JAMES SHAW,
for Examiner of Accounts.

* Includes 46 tons and 1,537 tons of coal during 1892 and 1893, respectively, carried for Revenue, for which no "Up" and "Down" register is maintained.

† Railway plant and rolling-stock 175 tons and 371 tons for the years 1893 and 1892, respectively, for which no "Up" and "Down" register is maintained.

Statement of principal commodities carried over the Bengal Central Railway during the month of May 1893.

INCREASES.

	Tons.
Grains	480
Slight increase due to a brisk demand in the Calcutta market.	
Sugar	580
Jhikargachi contributed nearly the whole of this increase.	

DECREASE.

Coal ... ... 1,492 tons.
The inclement weather was unfavorable to brick-burning.

JAMES SHAW,
for Examiner of Accounts.

SURVEY AND RECORD OF RIGHTS IN BIHAR.

THE following papers relating to the survey and record of rights in Bihar are published for general information.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary.

Dated Calcutta, the 15th August 1893.

From—J. A. BOURDILLON, ESQ., Secretary to the Govt. of Bengal, Revenue Dept.,
To—The Secretary to the Board of Revenue.

I AM directed by the Officiating Lieutenant-Governor to acknowledge the receipt of the Hon'ble Mr. Stevens' letter No. 826A., dated 14th August 1893, with its enclosure. Mr. Stevens' letter and the Minutes of Proceedings give a clear account of the deliberations of the Conference held with the representatives of the zamindars and indigo-planters of Bihar on the subject of the cadastral survey and maintenance of the record of rights in North Bihar, and of the results of that Conference. Briefly stated, the results are that the influential and representative gentlemen who attended the Conference, while reaffirming their opposition to the survey and maintenance of the record altogether, but regarding the contingency that such opposition might prove fruitless, have

admitted their preference for a system of maintenance through kanungos; that is, in the lines of the scheme proposed for criticism by His Honour the Officiating Lieutenant-Governor. This preference implies the rejection of the system of maintenance through village patwaris. The expression of this preference has been accepted by His Honour as decisive between the several schemes of maintenance, and orders will be at once issued to suspend the registration of patwaris under Regulation XII, 1817, or their utilization for survey purposes. The Lieutenant-Governor understands that this decision, which has already been communicated to the zamindars and indigo-planters, has afforded them gratification.

The results of the Conference are satisfactory to the Officiating Lieutenant-Governor as clearly defining the situation, enabling Government to act with greater freedom and effect, and leading to the immediate removal of all these difficulties and uncertainties as to the agency by which the survey should be made and the record subsequently maintained, which had been gathering round the operations in North Bihar. These operations will now be prosecuted with vigour to a well-defined end by officers under the complete control of the Government alone, and subject to the checks and guarantees for accuracy of work, which have been sanctioned by the Officiating Lieutenant-Governor at his interviews with the Hon'ble Mr. Stevens and the Settlement Officers. and Messrs. Carey and Craddock of the Central Provinces Commission.

Measures will also be taken now to procure the necessary legal sanction to the creation of a land record agency on the lines indicated in the draft scheme and Bill which were laid before the Conference.

Sir Antony MacDonnell desires me in conclusion to convey his thanks to the Hon'ble Mr. Stevens for the judicious and effective way in which the proceedings were conducted by him. His Honour fully endorses the praise given by Mr. Stevens to the gentlemen, official and non-official, who attended the Conference. In his reply to the Tirhoot Landholders' address on the 7th instant, at Muzaffarpur, Sir Antony MacDonnell acknowledged the practical and helpful manner in which, always on the assumption that the record was to be maintained, the zamindars had co-operated with the officers of Government during the discussions and the assistance they promised the Survey Department in the shape of unskilled labour free of charge.

No. 826A, dated Calcutta, the 14th August 1893.

From—The Hon'ble C. C. STEVENS, Senior Member of the Board of Revenue,
To—The Secretary to the Government of Bengal, Revenue Department.

THE HON'BLE C. C. STEVENS.

I HAVE the honour to make the following report on the Conferences which, under the instructions of the Lieutenant-Governor, I held at Muzaffarpur on the 3rd and 5th instant, with the representatives of the zamindars and indigo-planters of North Bihar, on the subject of the Bihar survey and of the future maintenance of the record of rights.

2. Before these Conferences I informally met the Government officers employed in the tracts immediately concerned. The object of this meeting was merely to obtain such general information relating to the facts and to the wishes of those affected by the survey as the local officers could give and was not already known. No proceedings were recorded.

3. I submit full reports of the Conferences, but it is desirable that I should lay before Government a brief summary of what was said and done, and should state the points which appeared to me to have been made clear.

4. I was assisted by the Hon'ble H. H. Risley, C.I.E., Secretary to Government in the Revenue Department, and by Mr. M. Finucane Officiating Secretary to the Board of Revenue and permanent Director of Land Records and Agriculture, while Mr. Lyon Settlement Officer of Muzaffarpur acted as Secretary. To all these gentlemen I am much indebted for their valuable help. The Commissioner of Patna, the Collectors of Muzaffarpur and Chumparan, the Officiating Director of Land Records and the Director of Survey, and the Settlement Officer of Chumparan, were also present.

5. On the other side, the Maharaja of Darbhanga with his Manager Mr. Bell, the Maharaja's brother Raja Rameshvar Singh, Mr. Gibbon the Manager of the Bettia estate, the Secretaries to the Bihar and Tirhut Landholders' Association, Sir W. B. Hudson, K.C.I.E., President, and Mr. Macnaughten Secretary, of the Bihar Indigo Planters' Association, together with several other influential European and native gentlemen, represented the zamindars and indigo-planters. I endeavoured to find some persons who might represent the raiyats; and it is a significant fact in considering the conditions of North Bihar that no adequate representation of this class could be obtained, and consequently the attempt had to be abandoned. There probably is not a single raiyat in Bihar of intelligence and education sufficient to enable him to take part in such a conference; and the raiyats' feeling on the subject can only be ascertained by personal enquiries in their villages.

6. I opened the proceedings by saying that the intentions of Government must be understood to be unalterable on the following points, which were not therefore open to discussion:—

(1) The survey is to be made and record of survey and rights is to be maintained up to date.
(2) The record is to be a public document, the accuracy of which Government must guarantee, so far as may be practicable.
(3) Since the Government is thus responsible, it must not be fettered in its discretion, as to the period at which corrections of the record should be made.
(4) The work must be done by an agency under the complete control of Government, and independent of any interested party.

It was then explained that in order to attain these objects, the Government was anxious to know the views and to study the interest of those affected.

7. I then proceeded to sketch the two systems which had suggested themselves to Government, *viz.*, (1) the patwari scheme, under which the unit would be the village, and the survey would be made, and the record kept up, by the patwari; (2) what might be termed the kanungo scheme, under which the survey would be made by amins, and the record for a circle of villages be maintained by an officer of higher qualifications and on higher pay. It was made clear that the former of these two plans would require legislation; the patwari would be a Government servant, appointed, controlled and paid by Government, and the cesses now collected from the raiyats for the payment of patwaris, under whatever name, must be taken in a legal and probably altered shape. The kanungo scheme was then sketched in outline following the note which had been under the Lieutenant-Governor's orders previously forwarded to the Indigo Planters and Landholders' Association.

8. A discussion followed, for which reference may be made to the detailed Minutes of the Proceedings appended to this report. It was apparent that the unofficial gentlemen present were hostile to any maintenance of the record at all. They pressed for information on many points of detail involved in either of the schemes laid before them, and to meet their wishes I distributed copies of the first draft of a Bill which had been prepared, embodying the Lieutenant-Governor's scheme of kanungos. This Bill although prepared under the orders of the Lieutenant-Governor had not yet been submitted to His Honour, and consequently he had had no opportunity of expressing his approval or disapproval of the draft. But since it was in general accord with his views, and there was an evident desire on the part of the unofficial gentlemen attending the Conference to be informed of the methods by which practical difficulties might be overcome, it was thought less inconvenient to produce the Bill somewhat prematurely than to reserve it till instructions could be taken.

9. It was not to be expected that any opinion should forthwith be given by the Conference; and it would have been manifestly unfair to press for criticisms without giving time for consideration. The Conference was then adjourned till the 5th, after the difference between the patwari and kanungo schemes had been again explained. No original plan was brought forward by the unofficial gentlemen present, but it was suggested that, instead of attempting to maintain a current revision of records, there should be a decennial revision.

Since this suggestion was inconsistent with the principle that Government, being responsible for the accuracy of the record, cannot be fettered as to the periods of revision, I was unable to permit it to be discussed as a proposal, though I directed that it should be recorded as an opinion.

10. On the 5th instant the Conference reassembled. The explanation given by Mr. Finucane of a remark made by him at the previous sitting led to a short discussion regarding the sanction proposed in the Bill for enforcing the communication of information as to transfers. The general feeling among the unofficial members was that the provision was open to objection, as giving the sub-kanungo a lever which he might use for purposes of oppression. It was obviously impossible to promise that no power of punishment for passive obstruction should be retained in the Bill, but it was explained that the details were open for consideration, and that any reasonable modifications which could be suggested were likely to be adopted.

11. I then read an extract from a letter written by Mr. Gibbon on the 24th October 1878, to the President of the Bihar Rent Committee. The advice given in this letter, as I pointed out, depended on the following principles:—

(1) It is right that Government should have at its disposal a local agency of contemporaneous record.
(2) That agency should have no connection with the collection of rents, but should be entirely at the service of Government, and should be nominated and paid by Government officers.
(3) It is reasonable that the zamindars should pay at least a share of the necessary expenditure direct into the Government Treasury.
(4) It is possible to secure, consistently with due economy, the services of efficient men.
(5) The areas to be dealt with by these record-keepers should be readjusted, and the district divided into convenient and fairly uniform circles considerably larger than those of the existing patwaris usually are.
(6) The present staff of patwaris should be placed at the disposal of the zamindars, to keep or to dispense with at their option.

These considerations, I pointed out, are exactly those on which the Bill under discussion is founded.

12. I regretted that Mr. Gibbon was not present, but I had mentioned to him personally my desire to bring his letter forward, and he was aware that I attached much importance to it. I had abstained from reading it on the first day, partly because I had feared that it might lead to irrelevant discussions, and especially because it seemed undesirable to take Mr. Gibbon at a disadvantage or to forestall and hamper him in anything which he might wish to say. After I had read the letter, Mr. Macnaghten, by Mr. Gibbon's authority, said that circumstances had changed since 1878, and that Mr. Gibbon claimed the right to change his opinions; Sir William Hudson further attributed Mr. Gibbon's change of opinions to the state of the law regarding the transfer of raiyats' holdings.

13. My object in reading the letter and laying stress on it was not to deny Mr. Gibbon the right to change his views, but to show that the scheme now brought forward was in precise accordance with that which had commended itself to one of the most valued unofficial advisers of Government, who even 15 years ago had had large practical experience. To me, I may remark in passing, it does not appear that the reasons given for a change from those views are adequate. The law as to transfers of occupancy rights has not been changed. If such transfers have become more numerous, surely the necessity for recording them has increased. And if the country is being surveyed and rights ascertained and recorded, it should be easier and less expensive to maintain the record. On the other hand, the interference of Government with the zamindars will be less under the Lieutenant-Governor's scheme than under the scheme which Mr. Gibbon proposed, since it is not now intended to register collections of rents.

14. The members of the Conference were next informed that His Honour the Lieutenant-Governor had now seen the Bill which was produced at the former meeting, and had accepted it as a provisional basis of legislation, with certain modifications which were read and explained, and will be found reproduced in the minutes of the Conference. Under the authority which had been given to me, I announced that Sir Antony MacDonnell would, if desired, be happy to come to the meeting and discuss any suggested amendments of the Bill. It was, however, considered unnecessary to trouble His Honour to do this.

15. I then asked whether the gentlemen present could now give me their opinion as to which of the schemes was to be preferred. The reply was given that, though those present could not bind absent interested persons, they were themselves of opinion that the kanungo scheme was the lesser of the two evils which were presented to them. This expression of preference, taken with the absence of any counter-scheme of maintenance from the zamindars was all that the Lieutenant-Governor asked for in his speech at the Bankipur Durbar, and under these circumstances I said that I was prepared under the Lieutenant-Governor's instructions to stop all further action in the direction of the registration and training of patwaris, and pointed out that the entire abolition of the patwari system is involved in the kanungo scheme. This announcement appeared to give satisfaction.

16. The discussion then fell upon the question of the area to be dealt with by the kanungos. It was desired that this should be as large as possible, that a superior class of men should be employed, and that the corrections should not be made annually. The landholders were assured that these expressions of opinion would have full weight given to them, and it was understood that Government would extend the area to the maximum consistent with efficient work. Speaking only for myself, I said that I could not advise that so large an area should be at first adopted as to produce any risk of failure. The work must first be made safe, and the details might afterwards be modified by the light of experience. I declined to promise that the corrections should not be made annually, since it is a fundamental part of the scheme that this must be left to the discretion of Government.

17. The Maharaja of Darbhanga then asked that the Lieutenant-Governor's notes might be regarded as part of the proceedings, and that the zamindars might be favoured with as full an exposition of the views of Government as could conveniently be given. This was assented to.

18. It was once more pointed out that, subject to the four principles stated in paragraph 6 above, which are insisted on by Government as fundamental, all details, however important, are open to discussion, and that His Honour the Lieutenant-Governor is most anxious to receive all the assistance which the practical experience of those interested can afford him, in order to make the working of the proposed arrangements as little inconvenient as possible. In breaking up the meeting, I then, on behalf of Government, thanked the gentlemen present for their attendance, and acknowledged the courtesy which had lightened my own labour.

19. As the Conference was rising, a further conversation took place between some of the members and Mr. Finucane on the subject of the provision by the zamindars of coolies for the survey, the Lieutenant-Governor having, it was understood, expressed the hope to several zamindars, at his interviews with them, that help in this direction might be given so as to lighten the cost of survey. The offers then made were subsequently confirmed by an official letter from the Secretary to the Tirhut Landholders' Association, a copy of which is appended to this letter.

20. The general results of the Conference appear to me to be these:—

(1) It was made perfectly clear that the Government would insist on the maintenance of the record of rights up to date as necessary to secure permanent benefit from the original operations. It was made clear that the record should be maintained by a Government agency independent of all parties, and that a revision at the end of five or ten years was an arrangement which the

Government could not accept while remaining responsible for the accuracy of the record as representing existing facts.

(2) It was evident that, though the interests of the zamindars and the indigo-planters are not uniform, and perhaps in some instances conflict, both these classes object to the annual maintenance up to date of the record of rights. They would rather that the records should not be maintained at all. Next to this they would prefer a revision after long periods—say of five or of ten years.

(3) Of the two schemes suggested to them, they prefer that of the kanungo dealing with larger areas to that of patwaris dealing with villages.

(4) The announcement of this preference enabled us to make the immediate concession, that the existing patwaris shall not be made use of for purposes of the survey and shall remain free for the performance of zamindari duties. The concession was received with satisfaction by zamindars and planters alike.

(5) We were able to show that the adoption of the kanungo scheme would involve the repeal of the Patwari Regulation, XII of 1817 (a measure which would probably be satisfactory to zamindar and planter); provided that an efficient mode of maintaining the record of rights can be brought into operation.

(6) I hope that it was made quite clear that the Government, while adhering to the principles laid down, will consider, and adopt if possible, all reasonable proposals intended to meet the wishes, or guard the interests, of those affected.

21. The main objections put forward to the introduction of any scheme were (1) the interference, (2) the cost, and (3) the probable dishonesty and exactions of the establishments: As the kanungo will have nothing to do with the collection of rent, or recording such collection, or with the letting of land; but will only deal with the maintenance of the record as completed by the survey, whereby all parties will have a standard of right to which to appeal, and as besides he will be closely supervised by superior officers, the interference will be reduced to a minimum, and it will be certainly less than that authorized by the existing patwari regulations. The landlord's share of the cost, though to large zamindars it may be considerable simply because they possess large property, will be small to other classes, and every effort will be made to avoid needless expenditure. Among other things it is under consideration whether the fees and fines under the Land Registration Act, VII (B.C.) of 1876, may not be credited to a District Fund for the maintenance of these land records. And after all, though that part of the expense which will not be recovered by registration fees, &c., will have to be met by a cess, the amount so raised will be much less than that now levied with doubtful legality for or by the patwaris. At the present time a zamindar has a patwari in every village, it is understood. When the record of rights has been prepared and is maintained, the duties of the patwaris will be diminished; and it will probably be possible for a zamindar to do with fewer men than he now employs. Sir William Hudson, who has an intimate knowledge of the needs and condition of the raiyats, has publicly stated his opinion that they will gladly pay a rupee an acre for copies of the original record relating to their holdings. If this be so, they are not likely to object to pay their share at the rate of half an anna or so per acre per annum for its maintenance. It is too much to hope that there will be no instances of dishonesty or exactions; but the landholders of North Bihar possess great power and influence, and are in no way deficient in energy and courage, so that we may confidently look to them to report all instances which may come to their knowledge of malpractices directed to the injury of their raiyats and themselves. I cannot but hope that on further examination the force of these objections will prove to be less than it at present appears to them.

Proceedings of a Conference held at Muzaffarpur on August 3rd, 1893.

PRESENT:

The Hon'ble C. C. Stevens, Member of the Board of Revenue, Lower Provinces (in the Chair).
The Maharaja Bahadur of Darbhanga, K.C.I.E.
Raja Ramesvar Singh Bahadur.
A. Forbes, Esq., Commissioner of the Patna Division.
The Hon'ble H. H. Risley, C.I.E., Secretary to the Government of Bengal in the Revenue Department.
Sir W. B. Hudson, K.C.I.E., President, Bihar Indigo Planters' Association.
Colonel Sandeman, Director of Bengal Surveys.
M. Finucane, Esq., Officiating Secretary to the Board of Revenue.
T. Gibbon, Esq., C.I.E., Manager, Bettiah Raj.
Henry Bell, Esq., Manager, Darbhanga Raj.
L. Hare, Esq., Collector of Muzaffarpur.
W. D. Blyth, Esq., Collector of Champaran.
W. C. Macpherson, Esq., Officiating Director of Land Records and A[illegible]
[illegible]
Rudston Brown, Esq., Indigo Pl[illegible]
R. Macrae, Esq., Indigo Planter.
E. G. Colvin, Esq., Settlement Officer, Champaran.
Babu Parmesvar Narain Mahtha.
Babu Mangal Pershad.
Babu Ramesvar Narain Mahtha.
Babu Jamuna Pershad Sukul.
Babu Sridesvar Narain Mahtha.
P. C. Lyon, Esq., Settlement Officer, Muzaffarpur (Secretary).

MR. STEVENS, in opening the Conference, said:—

I have been directed by the Lieutenant-Governor to meet you for the discussion of the best means of making and maintaining the survey and record of rights in North Bihar.

I may say frankly that it has come to my notice that two nearly opposite doubts have been expressed regarding the objects and procedure of Government in this matter. Some appear to think that the Lieutenant-Governor has come down with his officers, bringing schemes cut and dried, and determined to adopt them, merely asking for the assent of those interested. Others think that there is nothing definite before them, and that they run the risk of being required to commit themselves prematurely to an opinion on propositions of a vague and shadowy nature. Neither of these apprehensions is well founded.

The points which may be taken at the outset as settled finaly and definitely are (1) that the record of survey and of rights is to be maintained; (2) it is to be a public document, the authenticity of which the Government must guarantee, so far as this is practicable; (3) and since the Government is thus responsible, it must not be in any way fettered in its discretion as to the period at which correction of the record should be made; (4) and, lastly, this is to be done by an agency under the complete control of Government and independent of any interested party.

As to the best method of attaining these objects, His Honour the Lieutenant-Governor is anxious to know the views and to study the interests of those who will be affected. The key to his position is to be found in the last paragraph of his reply to the landholders' address:—"Gentlemen," (he said) "I do entreat you to regard the question in a considerate and conciliatory spirit. I am here to discuss every point with you in a friendly and amicable way. I will do everything I can do within reason and the law to meet your wishes; and if only you will meet me in a similar spirit, as I feel confident you will, then I do think that between us we shall be able during the next few days to arrive at a reasonable understanding and a workable agreement on the matters that have to be settled between us." These are not the words of a Government which is prepared to neglect or refuse advice.

Two plans have been under consideration, viz., (1) the use of the patwaris registered under Regulation XII of 1817 to make the survey and to maintain the record, and (2) the employment of amins for the survey and of a special agency for maintenance. As to the former, it may serve to clear away some misapprehensions if I say at once that the retention of the present patwari in his existing relations is not proposed. If retained at all he would be made a Government servant, subject only to the orders of the officers of Government, and liable to transfer or removal by them. The extent of the area assigned to him would be reconsidered and readjusted. The cesses levied for the patwaris' remuneration, under whatever name, must be taken for him still, though in a legal and probably altered shape. It is recognized that Regulation XII of 1817 must be revised so as to secure the above objects, though the Government is advised that the Regulation, as it stands, gives it a right to the services of the patwari, for the purposes of ascertaining and of recording facts connected with the villages, such as would be recorded in the record of rights, and that this right (though fallen into practical disuse) still exists legally. The Government is entitled to require the patwaris to give assistance and information in framing the record and in ascertaining the identity, and measuring the area, of the various plots of land in the village, to the extent of their ability. The exercise of these powers under the Regulation as it stands, especially

under the unfavourable conditions which have gradually grown up, would however be involved in difficulty; and the dual control which it recognizes would be adverse to efficiency, even were there no other objections. If, therefore, the patwari agency is to be employed, it must be under considerably altered conditions.

The other scheme which has been suggested is that there shall be an unit of area. The unit of area is the circle of villages—the circle will contain perhaps 20 villages—instead of the single village. The circle officer will be, not the patwari, but a more highly qualified and better paid Government official, and the information to be recorded will be reduced to the minimum necessary for supplying adequate information as to the actual occupation of each field, its area and soil quality, the status of the occupier, conditions of occupation, and the rent and rent-rate payable. The scheme leaves the question of rent payment to be settled between the tenant and landlord without any intervention on the part of the executive Government. There will be only one statistical statement maintained, the "jinswar," which is not directly concerned with the relations of landlord and tenant, and which may be said to have more of an administrative than a fiscal aspect. The following is an extract from the Lieutenant-Governor's note on this scheme:—

"The importance of careful supervision in such a scheme as that under notice cannot be over-rated. I would therefore group the sub-kanungos' circles into circuits (of, say, 20 circles), to be placed under a kanungo on Rs. 50 per month, whom I would include in the subordinate Provincial service. The entire land record staff of the district I would place under a Sub-Deputy Collector. The following estimate of total cost for an average Bihar district is therefore tentatively proposed:—

		Rs.
120 Sub-kanungos	... ...	3,000
120 Chainmen muharrirs	... ...	1,200
6 Kanungos	... ...	300
1 Sub-Deputy Collector	...	175
		4,675
Pensionary charges at one-fifth	...	935
Per mensem	... ...	5,610
Per annum	... ...	67,320
Tour expenses	... ...	2,500
Stationery and survey appliances	...	1,180
Total	...	71,000

As establishments have a tendency to grow, and as it might be found desirable to employ senior officers as District Land Records Deputy Collectors, this estimate might in time be exceeded. But it ought, I think, never to go beyond Rs. 75,000 per annum." I may, to prevent all risk of misunderstanding, repeat in other words what I have already said. The discussion must postulate the maintenance of the record. This is not an open question. The record will be a public document, the authenticity of which the Government must guarantee so far as this is practicable. The Government must therefore not be in any way fettered as to its discretion to have annual corrections of the record, if it so decides.

The agency by which the record is to be maintained may be an agency dealing with (*a*) individual villages, or (*b*) circles of villages. If the former be decided on, the unit of agency would be the patwari. If the latter be decided on, the unit of agency would be the circle kanungo. In either case, the officer would be a whole-time Government official entirely independent of any other control.

If the patwari is decided on, the control exercised through him by Government will be close and continuous: and he may be required to furnish any information or statistics required by Government in regard to his village for administrative, judicial or other purpose. The patwari will not be at the disposal or control of the zamindar for any purpose whatever. He will have nothing to do with the collection of rent. But all arrangements connected with the land or the tenants must be brought on his records.

His pay will be levied from the zamindar and raiyats. It is believed that no more will be needed than the raiyats now pay for this purpose in the shape of *neg* where the *neg* has not been already consolidated with the rent or than what they pay for the purpose though disguised as an addition to the rent, where the *neg* has been incorporated with the rent.

The landlords must make their own arrangements for rent collection.

If the circle kanungo be decided on, the information to be brought on record, and the enquiries to be made into village economy from time to time, will of course be less. And in this case the pay to be given to the officer will be higher; and generally the status of the officer will be better. The control to be exercised over the circle kanungo will be constant, and such as the Government deems adequate for guaranteeing the accuracy of the records.

When the agency is settled, the character of the maintenance will have to be discussed. The principle to be insisted on here is that we shall make the map the basis, and that we shall work up from the occupancy of every field to the landlord.

In conclusion, Gentlemen, I would note that it is necessary for us to decide first by what agency the record is to be maintained, before we discuss what agency we shall employ to make it.

Mr. Bell said he was not quite sure that he understood the proposal as regards patwaris. If it was intended that they should cease to do any work for the zamindar, how were they to be paid?

Mr. Risley said that the method that would very likely be adopted was the addition of ¼ anna to the road cess now levied, calculated on the present road cess returns. Where the patwari *neg* had not been consolidated with the rent, a share, probably a half, would perhaps be levied from the raiyats.

Mr. Bell said that, as far as he knew, no patwari *neg* was levied.

Mr. Gibbon said that Government appeared to be under a misapprehension as to the nature of the patwari *neg*. It seemed to be assumed that the zamindar collected this cess from the raiyats and paid the patwari from the proceeds. This was not the case. The patwari was the person who levied the cess, which was called by different names in different villages, and he collected the cess himself. In some villages he had recently taken to entering the amount of this cess as a footnote to the jamabandi, but the zamindar never fingered it. He believed that whether Government took away collections from the patwari or not, he would continue to collect his cess from the raiyat.

Mr. Finucane said that Mr. Gibbon's account of the cess might be presumed to be correct in reference to Champaran, but that this would make no difference to the scheme.

Mr. Bell, on the other hand, considered that the point was a most important one. Although the zamindars were to get no benefit from the patwari, they were to have to pay for him. He asked why they should have to pay at all when no cess had been consolidated with the rent. They had no concern with mere matters of general administration, which should be paid for by the whole community.

Mr. Gibbon protested that Government was still assuming that the raiyats paid the cess to the zamindar.

Mr. Risley said that the effect of the High Court judgment in the matter of patwari *neg* had been to give them a *tabula rasa*, and any scheme now proposed would have to be a wholly new one.

Mr. Bell said that the arrangements for payment would in fact amount to the imposition of a patwari cess.

Mr. Finucane concurred.

Mr. Bell said that the zamindars were not at present in a position to express any opinion on the schemes. His Honour the Lieutenant-Governor in writing demi-officially to Sir William Hudson had promised them a scheme combining the minimum of expense and the minimum of interference. At present they had no knowledge of the details of these schemes. How was the sub-kanungo going to perform his duties? What powers were to be given to him? Was he to be authorised to go into the villages, summon all the raiyats, call for papers and books, &c., &c.? It was most important that such points as these should not be reserved for future determination, but should be decided first. Again, what validity was to be given to these men's corrections? They had no information on these points, and would be glad to see the two schemes drawn up in bill form, and to be given time to consider those bills.

Mr. Risley enquired whether they were prepared to consider the schemes at once if they should be put before them in bill form.

Mr. Bell could not promise this, and said that the action to be taken now was too important to be hurriedly decided on, as any scheme now adopted would probably be extended later on to the whole of Bihar and to Bengal as well.

Mr. Risley then explained further the details of the second, or kanungo, scheme. He claimed that it prescribed the minimum of interference. The irreducible minimum of that interference was the year-by-year correction of entries affecting the possession, area, &c., of the fields in each village. The minimum of expense was secured by making the area to be dealt with by each sub-kanungo as large as possible. In the matter of legal validity, it was necessary to go back to section 119 of the Bengal Tenancy Act, and to consider what the legal validity was which was attached to the original entries made in the record. This was the starting point. The original entries were of two classes, (1) disputed, and (2) undisputed. The High Court had declared that the decisions arrived at in the matter of disputed entries were *res judicata*. The undisputed entries were merely presumed to be correct until the contrary was shown. The corrections would similarly be divided into disputed and undisputed entries. The undisputed corrections to which both parties agreed would stand on the same footing as the original undisputed entries, and the burden of proof that they were incorrect would lie on the person contesting them, whereas, in the case of disputed entries, the statements made by each party would be noted by the sub-kanungo, and a contemporaneous record would thus be secured of the allegations made on each side, *valeat quantum*, admissible in evidence but not creating any legal presumption whatever.

Mr. Bell contended that such entries could not be made evidence, as being *res inter alios acta*.

Mr. Risley went on to say that, if it was objected that no legal presumption should attach in any case to an unverified entry made by a sub-kanungo, there was the alternative of having every entry made by him attested by an officer exercising the powers of a Revenue Officer under the Tenancy Act, during an annual revision. The officer in this case would be of equal rank with the Settlement or Assistant Settlement Officer who framed the original

record, and it would be proposed to attach a legal presumption of correctness only to those entries which had been verified by him, and to attach no importance to unverified entries. But this development of the scheme would of course somewhat enhance the cost.

Mr. Bell said he would be glad to see all these proposals down on paper.

Sir William Hudson enquired whether the officials present were pledged to act on lines already laid down for them, or were free to give their own views on the schemes under discussion. He said that he and others with him required assistance in dealing with such administrative schemes, and that there were many non-officials who would give much weight to the opinion of officials who had had practical experience of the difficulties to be met with in the field.

Mr. Finucane pointed out that the two schemes were very similar, and that the choice lay merely between the employment of small men in small areas, and the employment of more important and better paid men in larger areas. Did the gentlemen present want large or small areas as units?

Sir William Hudson enquired whether Government was prepared to accept and debate any scheme other than those now proposed.

Mr. Risley replied in the affirmative, but added that Government would reserve the right to declare that any scheme that might be proposed did not amount to maintenance of the record at all.

Mr. Stevens repeated the limitations referred to in his opening speech, on which Government had determined, and said that the Lieutenant-Governor was anxious to receive the views of non-officials.

Sir William Hudson said that the non-officials would be glad to have the opinion of officials of practical experience as to whether they believed in the present schemes and anticipated their success.

Mr. Forbes remarked that Government had had the benefit of the opinion of such officials before propounding the present schemes.

Mr. Stevens added that the present meeting had been called in order that Government might ascertain the facts and hear the opinions of non-official gentlemen interested.

Mr. Bell was afraid that time was being wasted, as no real discussion could be entered upon until the details of the scheme had been considered. There being no reporters present, mere verbal statements could not be accepted by the zamindars. Sir Charles Elliott had promised the abolition of the patwari.

Mr. Risley said that any such promise was conditional on the acceptance of the scheme then under discussion, which had been abandoned.

Sir William Hudson concurred.

Copies of a draft Bill, with rules to be made under it, were then distributed to the gentlemen present as being a first sketch of the kanungo scheme.

Mr. Gibbon then enquired whether the sub-kanungo would not form some sort of court, how he was to compel the production of evidence, and what he was to do when evidence was persistently withheld from him. He contended that no case had yet been made out for the maintenance of the record at all, but that if it was to be maintained, they must choose whichever scheme appeared to them to be the lesser evil. How could they do this with no details before them? How was evidence to be taken? Would the sub-kanungo have power to summon him (Mr. Gibbon) and to call upon him to produce papers. If he refused, was he to be fined?

Mr. Risley said that all these points would be provided for in a rule-making section, and that all rules drafted under the section would be published for criticism, and that all criticisms would be considered by the executive authorities.

Mr. Bell intimated that the zamindars would be more strongly opposed to the Bill if power were to be given to the executive to make rules to carry out its provisions.

Mr. Finucane said that all of the points raised by Mr. Gibbon would be found to have been answered in the Bill and the rules drafted under it.

Mr. Gibbon enquired further whether the courts would accept the entries as evidence without the evidence of the man who made them.

Mr. Finucane said that this was provided for, and proceeded to explain that a safeguard had been introduced into the scheme in the provision made for the filing of lists of changes to be made in the record in the sub-kanungo's office. In this way a zamindar would be able to place on record his opinion as to the alterations which the sub-kanungo should make. The Deputy Collector would go into every village and verify every entry in detail.

Mr. Bell asked what would happen if no one appeared before the Deputy Collector or sub-kanungo, or if the raiyats and zamindars all agreed to conceal alterations and to announce that there were none to be made.

Mr. Finucane said that in such cases no changes would be recorded.

Mr. Bell contended that in that case the scheme would not secure the maintenance of the record, and said that in the North-Western Provinces raiyats and zamindars combined to deny the existence of changes in order to get rid of the harassment of the Government agent who was deputed to record them.

Mr. Risley and Mr. Finucane believed that the parties to changes would not adopt this attitude as soon as they appreciated the advantages that they would obtain by having the corrections made.

Mr. Finucane said, in answer to Mr. Gibbon, that all transfers of holdings or portion of holdings that were alleged to exist would be noted, even if they were illegal, but that such entries would in no way operate to legalise them.

Mr. Gibbon further enquired whether the record was to be binding as between zamindar and raiyat only, or as between raiyat and raiyat also. Were all mortgages, zar-peshgis, and the like to be recorded, even though they were illegal without the zamindar's approval.

Mr. Finucane said that all these points were to be found in the Bill and the rules under it. All mortgages involving possession would be noted.

Mr. Bell enquired what difference there was between the two schemes.

Mr. Finucane said that any Bill and rules that might be drafted to give effect to the patwari scheme would be very similar to those in the hands of the gentlemen present. There would be a change in the area of the unit, in the personality of the agent, and in the method of realising the cost of the maintenance of the record. The patwari scheme would be the more expensive. Both schemes were purely tentative, Government would be prepared to accept any better scheme if one can be put forward

Mr. Risley added that the tendency under the patwari scheme would undoubtedly be towards greater interference The area dealt with by each patwari being small, he would be asked for more elaborate information about it, and would probably be called on for local reports in judicial matters, and for census and other statistical information useful for administrative purposes. It would be impossible to ask for all these statistics from men dealing with the larger areas that were to be given to sub-kanungos.

Mr. Bell understood that the zamindars were to have nothing to do with the patwari or his returns or his statistics, or indeed with his work in any way, but were to retain the privilege of paying for him.

Mr. Risley and Mr. Finucane agreed that the zamindars would not be called upon for any returns or statistics of a general character, but added that the zamindars and raiyats alike would be benefitted by the operation of the scheme, and would be asked to pay in equal shares for the benefit derived.

Mr. Gibbon then enquired whether Government would devise some summary procedure for the recovery of rent.

Mr. Risley said that it was impossible to devise any such procedure until the maintenance of the record had been secured.

Mr. Gibbon asked whether Government would promise to devise some such procedure, if the zamindars agreed to the proposals made for the maintenance of the record.

Mr. Risley said that no such promise could be given, and that Government could not go beyond Sir Charles Elliott's statement in Council that "he hoped it might be possible" to devise such a scheme.

Mr. Gibbon wanted to know what security they had that Government would not go beyond their present requirements in the matter of returns and statistics, and that interference would always be at a minimum. He contended that no one could pledge Government to this.

Mr. Finucane referred to the draft Bill, and pointed out that everything done under it must be confined to the record of transfers and to subjects connected with the maintenance of the record of rights. Obviously if any summary procedure could be devised at all it could not be till we got rid of disputes. The first step to shortening procedure is to minimise the possibility of there being matter left to dispute over; the record of rights, and the scheme for its maintenance aim at effecting this object.

Mr. Gibbon feared that interference would certainly increase.

Babu Parmesvar Narain Mahtha cited as an example of increasing interference a recent addition to the road cess return form which required the entry of rates of rent—a completely new departure.

Mr. Bell thought that the instance showed the danger of trusting to the generalities that were being freely expressed.

Mr. Risley enquired what Mr. Bell would regard as an ideal method of maintaining the record.

Mr. Bell said that he agreed with Mr. Gibbon and Mr. Macnaghten that a periodical revision should be made at intervals of 10 years, and that no farther attempts should be made to devise a scheme that it was impossible to work.

Mr. Stevens said that this could not be taken as a proposition, but merely as an opinion.

The Maharajah of Darbhanga said he could not express any opinion until the papers had been circulated among the members of the Bihar Landholders' Association and he had received their replies, but he would prefer Mr. Bell's suggestion for the periodical revision of the records if they were to be kept up at all.

Sir William Hudson agreed, but wished to add:—"Unless Government is prepared to give us a summary procedure for the recovery of rent."

Mr. Gibbon agreed, but wished to add:—"If Government insist, against our opinion, on the maintenance of the record by any other means, I would prefer the scheme suggested in the Government letter of June 30th, 1892."

Babu Ram Dhari Sahai agreed with Mr. Bell's suggestion.

Mr. Risley enquired whether, if Mr. Bell's suggestion could not be accepted by Government, the gentlemen present were prepared to offer an opinion on the schemes that had been submitted to them.

Mr. Bell and the Maharaja of Darbhanga expressed their inability to give a personal opinion on the point at present, as time was required to enable them to circulate the scheme among the members of the Bihar Landholders' Association.

Mr. Stevens enquired whether the opinions that had been expressed preferring a decennial revision were also liable to modification after further consideration.

Sir William Hudson said that those opinions were a plain and clear answer to a definite question propounded by Mr. Risley.

The Maharaja of Darbhanga in reference to his opinion on that point cited the case of the records of his own villages which were surveyed in 1878, and had recently been resurveyed, and in which very few alterations were found to be necessary.

Mr. Bell gave some details of those changes.

Mr. Finucane pointed out that a record that had been left uncorrected for five years would be quite useless in the courts, and that legal validity could only be secured for the record by its proper annual maintenance. Unless this were secured it would be impossible to devise any procedure for the summary recovery of rents or for simplifying the evidence under the ordinary procedure.

Mr. Bell disagreed and expressed his opinion that the Government of India should not force the maintenance of the record on the Provincial Government when a gentleman of the vast experience of Mr. Gibbon had declared that it was impossible to secure it.

Mr. Risley enquired, with reference to the registration scheme preferred by Mr. Gibbon, what was to be done with the map. The papers could be kept up under that scheme, but not the map.

Sir William Hudson pointed out that 8 out of 10 per cent. (the figure adopted as representing probable alterations) would be succession transfers involving no alteration of the map.

Mr. Stevens then asked for an answer whether, if it be determined that the record must be maintained annually or concurrently, the patwari would be preferred to the sub-kanungo.

Mr. Finucane again explained the difference between the two schemes.

The Maharaja of Darbhanga said no answer could at present be given.

Mr. Gibbon enquired whether he was to continue to nominate additional patwaris, substitutes for unfit patwaris and the like.

Mr. Stevens said that Mr. Gibbon should formulate his question and send it up through the Collector of Champaran, but that in the meantime no change should be made in his present procedure.

Babu Ram Dhari Sahai enquired whether the registration of patwaris was to continue.

Mr. Stevens said that further orders would be subsequently issued on this point.

Messrs. Gibbon and Bell enquired whether the draft Bill and rules could be regarded as an official document.

Mr. Finucane said it was only a first draft not yet seen by the Lieutenant-Governor, but added that it had been prepared on the lines of His Honour's scheme.

Mr. Bell thought that the details of the scheme were of such importance that he would like to know, before he considered it, whether the Lieutenant-Governor approved of the draft.

As to a further meeting of the Conference, Sir William Hudson thought any such meeting would be unnecessary until at least a definite reply had been given to the suggestion that the records should be revised decennially.

After some discussion the Conference was adjourned to 8 A.M. on Saturday, the 5th August.

P. C. LYON,
Secretary.

Proceedings of a Conference held at Muzaffarpur on August 5th, 1893.

PRESENT:

The Hon'ble C. C. Stevens, Member of the Board of Revenue, Lower Provinces (in the chair).
The Maharaja Bahadur of Darbhanga, K.C.I.E.
Raja Ramesvar Singh Bahadur.
A. Forbes, Esq., Commissioner of the Patna Division.
The Hon'ble H. H. Risley, C.I.E., Secretary to the Government of Bengal in the Revenue Department.
Sir W. B. Hudson, K.C.I.E., President, Bihar Indigo Planters' Association.
Colonel Sandeman, Director of Bengal Surveys.
M. Finucane, Esq., Offg. Secretary to the Board of Revenue.
Henry Bell, Esq., Manager, Darbhanga Raj.
Babu Bepin Behari Bose, Manager, Hutwa Raj.
L. Hare, Esq., Collector of Muzaffarpur.
W. D. Blyth, Esq., Collector of Champaran.
W. C. Macpherson, Esq., Offg. Director of Land Records and Agriculture, Bengal.
E. R. Macnaghten, Esq., Secretary, Bihar Indigo Planters' Association.
E. G. Colvin, Esq., Settlement Officer, Champaran.
H. Collingridge, Esq., Indigo Planter.
Rudston Brown, Esq., „
Rowland Hudson, Esq., „
A. Macrae, Esq., „
E. Stevens, Esq., „
Babu Ram Dhari Sahai, Secretary, Tirhut Landholders' Association.
Babu Ramesvar Narain Mahtha.
„ Parmesvar Narain Mahtha.
„ Sridesvar Narain Mahtha.
P. C. Lyon, Esq., Settlement Officer, Muzaffarpur (Secretary).

The minutes of the proceedings of the meeting held on August 3rd were taken as read and were agreed to, Mr. Bell and Sir William Hudson having previously read and considered them and admitted their accuracy. With reference to the remark made by him (see page 4 of the

minutes) that in certain circumstances "no changes would be recorded," Mr. Finucane explained that he meant that no changes would be recorded by the sub-kanungo at that time. But the draft Bill provided for further action to compel information in cases of wilful obstruction or concealment. If it were found that information as to transfers was being kept back, and all other means of obtaining that information failed, the Collector would issue a notice calling for returns, and would insist on their being filed, imposing a fine for their non-production. And should the returns thus obtained prove incorrect, the zamindar would be liable.

Mr. Bell enquired whether the zamindar was to be held responsible for all inaccuracies in his returns discovered or alleged to exist by the sub-kanungo. In many cases he might be unaware of the existence of changes.

Mr. Finucane explained that it was only in cases of direct obstruction that the penal clause would come into play. The stages would be as follows:—

(1) The parties would or would not file returns. This was at their option.
(2) The sub-kanungo would go to the village and make enquiries as to changes after due notice of his intended visit to all parties concerned.
(3) If he could gather no information, and there was evidence to show that there had been changes, and that both zamindars and raiyats were combining to conceal them, the sub-kanungo would report accordingly.
(4) The Collector would then consider the report and, if he thought fit, call on both parties to file statements.
(5) Then, if the parties still refused to file statements, or filed false ones the penal clause would come into operation.

Sir William Hudson said that he thought that self-interest would prevent the occurrence of such cases.

Mr. Finucane said that his long practical experience satisfied him that as a matter of fact neither zamindar nor raiyat was ever found to resist contumaciously any reasonable procedure of the Government, and he hoped and believed they would not do so in the matter now under consideration.

Mr. Risley said that a draft Bill must be consistent and complete to stand against criticisms in Council, and that even unlikely contingencies had to be provided against.

Sir William Hudson said that he and others objected to the penal clause, on the ground that it gave the sub-kanungo a handle against both zamindar and raiyat, and that it was by using this handle that he would be enabled to extort bribes and reap his harvest.

Mr. Finucane said that the provision was not essential to the Bill, and might perhaps be modified in Select Committee.

Mr. Stevens remarked that at the last meeting they had been asked what sanction had been provided for such a case.

Sir W. Hudson said that the enquiry had only been made to show that the last state of the zamindar would be worse than the first. He contended that the section would give the sub-kanungo power to harass.

Mr. Risley pointed out that he was to be checked by superior officers, among whom was the Collector.

Sir William Hudson said that the Collector must be omitted from consideration, as he could not be expected to exercise effective control.

Mr. Bell said that as a matter of fact the zamindars would never be disabused of their belief in the power of the sub-kanungos. They would be paid for making entries, and then, in order to avoid the payment, both zamindar and raiyat would combine to conceal changes. The sub-kanungo would also think that he could best justify his appointment and show zeal by harassing all parties for information.

Mr. Finucane said he had not wished to raise a discussion about details, but only to point out what procedure would be followed in the case of combination.

Sir William Hudson said that if the zamindar and raiyat combined and were determined to conceal changes, no procedure could be devised to make them disclose them. They wished to have the provision omitted.

Mr. Stevens then said:—At the end of our last meeting it was remarked that perhaps no further meeting was necessary till the definite orders of Government should be given on the suggestion of quinquennial or decennial revisions. I had intended to make it clear that this suggestion could not be adopted. The Lieutenant-Governor is fully persuaded that the discretion of the Government, which will be responsible for the accuracy of the record, should not be fettered by any conditions as to the periods at which corrections should be made, and he cannot accept the proposals to make these periods quinquennial or decennial.

I regret that Mr. Gibbon is not with us to-day, not only because we shall miss the benefit of his present advice and criticisms, but also because I wish to read to you a part of a letter, to which I attach great importance, written by him on the 24th October 1878, to the President of the Bihar Rent Law Committee:—

"The patwari should be nominated by the district officers, be the servant of Government paid by the Government: he should be, as originally intended, 'a record-keeper,' and nothing but a record-keeper, entrusted with no executive powers. He should have nothing to do with the village collections, granting receipts, giving pattas and kabuliyats, &c., &c.; the zamindar should be compelled to do all this through his own servants.

"The patwari being the record-keeper, the zamindar should be compelled to hand him copies in duplicate of the past year's rent-roll (*jamabandi*) and balance sheet (*wasil-baki*), the current year's ticca land accounts (*arsatta*) and instalments paper (*behri*), quarterly returns of all assessment papers (*khasras*), and also collections made (*seahas*), memoranda of lands relinquished by raiyats and new lands bandobasta with raiyats, with a list of pattas given and kabuliyats received.

"One copy should remain with the patwari, the other be signed by the patwari and returned to the landholder. The patwari should be a good accountant and know something of surveying, in case you think it necessary that all measurement of jots should be made by the patwari. The raiyat should at all times have access to the patwari's papers, and the patwari be bound to afford him all information as to the state of his account.

"Instead of each petty village of from one to two hundred rupees rent-roll having a patwari of its own, the district should be divided into circles with rent-rolls of not less than Rs. 5,000, not more than Rs. 10,000. It should be optional with landholders to dispense with the present staff of men. Half the amount of money now expended by zamindars on the present staffs paid into Government treasuries would be sufficient to secure the services of efficient men, and would be a saving to the zamindars, as it would enable them to get rid of the men who cannot afford to be honest on the small salaries they receive.

"All returns called for by district officers should represent the exact terms of the holdings, however ridiculous to them such terms may appear."

After our meeting on Thursday I told Mr. Gibbon that I had thought of reading this letter to the Conference that day, but that I deemed it better not to do so, since I was afraid that the effect might be to lead to irrelevant discussion, and I might have added that I was unwilling to forestall him in anything he might wish to say. He replied that I might have read it, and that there was nothing in it regarding which he had changed his views as to the conditions which then existed, but that circumstances have since become altered: when the letter was written, there was no survey or immediate prospect of one. But the difference which this change has made seems to me to be at the most one of convenience rather than of principle. In other words, the suggestions then made were proper in themselves, though the survey now, in Mr. Gibbon's opinion, makes it unnecessary that they should be carried out. You will notice that the following considerations underlie those suggestions:—

(1) It is right that Government should have at its disposal a local agency of contemporaneous record.
(2) That agency should have no connection with the collection of rents, but should be entirely at the service of Government, and should be nominated and paid by Government officers.
(3) It is reasonable that the zamindars should pay at least a share of the necessary expenditure direct into the Government treasury.
(4) It is possible to secure, consistently with due economy, the services of efficient men.
(5) The areas to be dealt with by these record-keepers should be re-adjusted, and the district divided into convenient and fairly uniform circles considerably larger than those of the existing patwaris usually are.
(6) The present staff of patwaris should be placed at the disposal of the zamindars, to keep or to dispense with at their option.

These considerations, Gentlemen, are, you will perceive, exactly those on which the scheme now before you is based, and the only question is whether the survey has superseded them. In the opinion of Government it has not done so.

Just before we separated on Thursday, the very natural question was asked, whether the Bill then in your hands was to be taken as official, and as representing the views of the Lieutenant-Governor. You were told in reply that it was based on the Lieutenant-Governor's suggestions, but had not in its present form been considered by him. He has since seen the Bill, and I am authorised to tell you that he has accepted it as a provisional basis of legislation subject to the following modifications on which he would like to be favoured with your opinion:—

(1) A section should be introduced (after section 12?) imposing on the transferee (or successor) of a tenure, rent-free holding, or occupancy right, the obligation (subject to penalty of fine?) to report the circumstance of transfer to the kanungo. A fee should be levied on each transfer, &c.
(2) The Collector and Registrar of Assurances should be bound to report to the kanungo all mutations, transfers, &c., under Acts VII (B.C.) of 1876 and III of 1877.
(3) The fees to be levied under clause (1) above to be credited to a Land Record Fund for the district. All copying fees and fines, &c., to be credited to the same Fund. [It is for consideration whether fees under the Land Registration Act VII (B.C.) of 1876 should not be credited to the same Fund.]
(4) The 'Land Record Cess' to be subject to a statutory maximum of ¼ anna per rupee of rent, but the *rate* at which it is to be levied to be fixed annually, with reference to the estimated income from "Fees" and "Fines." The accounts of the Fund to be published annually.
(5) Omit the proviso to section 4 of the draft Bill.

(6) Consider whether the officer should not be called kanungo instead of sub-kanungo. The higher officers to have higher titles.

(7) The question of amending the Land Registration Act of 1876 and the Transfer of Property Act, with the view of relieving landholders from the obligation of effecting double registrations (*i.e.*, in the Land Record and the Land Registration Offices), and of giving them the option of registering in the Land Registration Office alone, to be considered when the Bill is being prepared for submission to the Government of India, previous to introduction into Council."

I will say in conclusion that the strength of the supervising staff and the area of the sub-kanungo's jurisdiction are matters still open to consideration. If it be found possible for a better paid and higher class of official to cover a larger area, this may be subsequently arranged.

Mr. Macnaghten said that Mr. Gibbon had authorised him to say, with reference to the letter that had been quoted, that he claimed his right to change his opinions, that circumstances had altered since 1878, and that he did not adhere to the opinions expressed in the letter.

Sir William Hudson said that the principal reason that had induced Mr. Gibbon's change of opinion was the state of the law as regards the transfer of raiyats' holdings. As long as that was in a fluid state he could not hold by that former opinion. He (Sir William Hudson) was personally of the opinion that in the raiyats' interest the right of transfer should be abolished.

Mr. Bell said that they preferred Mr. Gibbon's present opinions to those expressed 15 years ago.

Mr. Stevens said that he hed not understood Mr. Gibbon to say that he had changed his opinions, but that the conditions on which those opinions had been based had been changed. The letter had been read from no desire to convict Mr. Gibbon of inconsistency, or to deny him the right to change his views; the object was to show that the Lieutenant-Governor's scheme was not a mere official invention, but was exactly consistent with the opinion once held by an esteemed unofficial adviser of Government of great experience.

Sir William Hudson said that he understood that the Lieutenant-Governor's remarks on the Bill were all dependent on the choice that might be made by them.

Mr. Stevens agreed and said that he was authorised to say that the Lieutenant-Governor would be quite prepared to come down to the meeting and discuss any particular points or amendments to the Bill.

Mr. Bell thought it was not necessary to trouble the Lieutenant-Governor to come.

Mr. Finucane said that the Lieutenant-Governor's note consisted of a series of concessions that he believed would be acceptable to the zamindars.

Mr. Stevens then asked whether the gentlemen present could now give him an opinion as to which of the schemes was to be preferred.

The Maharaja of Darbhanga said that he could not give an authoritative reply, as he had not had time to consult the members of the Bihar Landholders' Association, but that personally, as a choice of evils, he preferred the scheme in which the agent was to have a larger area and be better paid.

Sir William Hudson concurred and asked that the complete scheme for the employment of sub-kanungos might be circulated for criticism. He then asked what executive orders were now to be issued respecting the registration and training of patwaris.

Mr. Stevens said that if the sub-kanungo scheme was the one preferred by them, he was prepared, under the Lieutenant-Governor's instructions, to stop all further action in the direction of the registration and training of patwaris. The entire abolition of the patwari system formed part of the kanungo scheme.

Mr. Finucane said that the Lieutenant-Governor was prepared to consider any reasonable modifications of the provisions of section 17 of the draft Bill when it went into Select Committee. It would not be put forward as a Government proposal to be necessarily passed in its present form.

Mr. Stevens added that in all matters of detail His Honour would be prepared to consider any reasonable proposals.

Sir William Hudson said that the question of the amount of interference was of great importance to them. Many of them thought that an extension of the area of the circles, and of the period of each revision, would diminish the amount of interference. He believed that three-quarters of the transfers would be succession transfers, involving little alteration of the records, and that the work in an area of 25 square miles would be light, especially if it should not be deemed necessary to recognise as transfers petty family arrangements, by which members of the same family privately divided up their lands amongst themselves. He was of opinion that the area might be extended, and that, if the period were also extended, a sub-kanungo might do the work of 100 square miles.

Mr. Finucane understood that the principle that Government would follow would be to extend the area to the maximum consistent with efficient work. Experience would show what that maximum was.

Sir William Hudson asked if Government would say definitely that no extension of time could be granted.

Mr. Stevens replied that this could not be said. Government could not bind itself as to the period of revision. In the matter of area, his personal opinion was that it would be

dangerous to start by giving the sub-kanungo too large a charge, as this would involve risk of failure, but the general wish to have larger areas and fewer men, and those of a higher class. would be borne in mind; and if experience should show that larger areas could be adopted, it would be easy to make a change.

Sir William Hudson remarked that if we began with small areas, it was improbable that those areas would afterwards be enlarged.

Mr. Risley asked whether biennial corrections would not be of less value from a landlord's point of view in Civil Court suit than annual corrections.

Mr. Stevens thought it was unnecessary to discuss these details at the present time.

The Maharaja of Darbhanga asked that the Lieutenant-Governor's remarks might be put on the minutes of the proceedings, and that the zamindars might be favoured with as full an exposition of the views of Government as could conveniently be given.

Mr. Risley said that the Bill and rules would be circulated for criticism and would doubtless form the nucleus of a vast amount of literature and discussion.

Mr. Stevens said that on Thursday he had laid before them, on behalf of Government, the four principles which the Government insisted on as fundamental. The details to be found in the draft Bill and rules and in the Lieutenant-Governor's remarks were on a different footing altogether. In reference to these the Government was not only willing but anxious to obtain advice and help. It was completely recognised that the gentlemen present were in possession of a practical knowledge of facts which few officers of Government could acquire, and it was highly probable that even those gentlemen themselves could not fully appreciate the interests of other classes not represented at the meeting. He thanked the gentlemen present for their attendance; and on his own behalf he thanked them for making his labours easy by the friendly and courteous manner in which their discussions had been conducted.

The meeting then adjourned.

P. C. LYON,

Secretary.

Dated Muzaffarpur, the 7th August 1893.

From—Babu Ram Dhary Sahoy, Hony. Secy., Tirhut Landholders' Association,
To—The Secretary to the Board of Revenue, L.P.

With reference to the supply of coolies by zamindars, I am directed to state as follows:—

2. The zamindars are willing to give the services of three coolies at their own cost to accompany each amin that will be deputed to survey their entire and partitioned villages, it, of course, being understood that they will be employed by the amins solely on survey work and for such length of time only as the survey will continue; their employment will be contemporaneous with the continuance of the survey, and it will cease on the evening of the day it is completed. The amins should be directed to give a receipt to each zamindar specifying the date, time and the number of coolies that have been placed by him at their disposal. The zamindars should have the option, on receipt of the notice proposed to be given to them by the Survey Office, as to the probable date of the commencement of the work, and the estimated number of days for which the coolies would be required either to supply coolies on pay in a lump sum of money to the Survey Office sufficient to cover their wages. We consider that Rs. 1-13 per 100 bighas would sufficiently cover them, calculating their wages at Rs 3 a month. On payment of such sum of money, all responsibilities of the zamindar to provide for coolies shall cease.

3. As regards coparcenary villages, any zamindar giving coolies shall be entitled to recover the amount jointly and severally from the pottidars. I am aware that there is no legal provision to that effect, but consideration might be made for it in the apportionment of costs, and on this subject I shall address you later on.

4. I may add that the advantages of the present offer would only be complete with the co-operation of the amins. As we have every desire to reduce the cost of the survey and meet the wishes of Government, we have made the offer; but as it will go to reduce a considerable amount of the profit which is now being made in the supply of coolies, you must be prepared to face considerable obstacles and opposition from the interested quarter.

5. I am directed to say that His Highness the Maharajah Bahadur of Darbhanga, Raja Rameshwar Singh Bahadur, and Mr. Rott, Manager, Nurhan estate, fully agree with the above.

6. I may add that a large number of zamindars have signed a declaration form undertaking to supply coolies for each amin while the survey is going on or to pay in their wages to the Survey Office in a lump sum at Rs. 3 a month.

Scheme for maintaining a record of rights in Bihar, circulated to the Indigo-planters and Bihar Landholders' Association, and referred to in the Minutes of the Muzaffarpur Conference.

THE following draft scheme for maintaining a record of rights is submitted for criticism. Two points are reserved for further discussion, namely—

(*a*) The legislation necessary and practicable to give a sanction to the scheme and provide the funds:

(*b*) The validity or effect to be attached to the corrections effected in the record from time to time.

The scheme differs in no fundamental particular from the Patwari Bill of 1885, except in regard to—

(*a*) the unit of area;
(*b*) the rank and qualifications of the officers who are to deal with that unit;
(*c*) the information to be recorded.

2. In the scheme which follows, the unit of area is the circle of villages—the circle will contain perhaps 20 villages—instead of the single village. The circle officers will be, not the patwari, but a more highly qualified and better paid Government official, and the information to be recorded will be reduced to the minimum necessary for supplying adequate information as to actual occupation of each field, its area and soil quality, the status of the occupier, conditions of occupation, and the rent and rent-rate payable. The scheme leaves the question of rent-payment to be settled between the tenant and his landlord without any intervention on the part of the executive Government. There will be only one statistical statement maintained, the "jinswar," which is not directly concerned with the relations of landlord and tenant, and which may be said to have more of an administrative than a fiscal aspect.

This plan will not yield that wealth of statistical, fiscal, and general information which a patwari system furnishes in other provinces; but it will be an enormous improvement on the present state of things, and it will effectively safeguard the interests of the cultivator of the soil; it will facilitate the realization of the landlord's rent, and it possesses advantages of its own in the direction of (*a*) economy, (*b*) application to areas, such as Orissa or Chittagong, in which no patwari system exists, and (*c*) susceptibility of effective control by a smaller supervising staff.

3. An effective system of land records involves—

(*a*) field duties;
(*b*) office duties.

The field duties reduced to their simplest expression consist of (*a*) field inspection, (*b*) map amendment, (*c*) khasra correction.

The office duties reduced to their simplest expression, or at all events the simplest expression consistent with our objects, consist of—

(1) Jamabandi.
(2) Jamabandi goshwara
(3) Milan khasra.
(4) Jinswar.

Perhaps, also, as I have said, No. (4) is not absolutely essential; but it is very desirable and should be included. I append drafts of the statistical forms with explanations on the reverse, when necessary, which, in the system I am developing, would be maintained by the registering officer, or, as I shall call him, the sub- (or circle) kanungo. The forms were prepared under my orders by a Committee of Settlement Officers in the Central Provinces, and the references are to the Central Provinces' Patwari Rules. But alterations may be necessary to suit the circumstances of Bengal.

3. I proceed to consider what is the smallest staff by which the duties enumerated above can be efficiently discharged.

I am informed by the Director of Land Records, who has on this point consulted Colonel Sandeman, that in Muzaffarpur, Darbhanga, and Saran there are 3 plots to an acre, while in Champaran and Gaya there are 2½ plots. I shall subsequently indicate a means whereby the number of khasra entries may possibly be reduced: but here I assume that we have to deal with a three-field to-the-acre country.

4. The work of maintaining the record varies with—

(*a*) the total area of the circle;
(*b*) the cultivated area;
(*c*) the number of khasra entries;
(*d*) the local condition of the tract, *i.e.*, whether changes in fields, boundaries, possession, &c., are numerous or otherwise, and whether assistance is readily given by the proprietors, raiyats, and so forth.

From my own experience of North Bihar, not very recent it must be said, and from my recent experience of this sort of work on a grand scale in the Central Provinces, I should say that mutations will occur annually in (say) not less than 5 per cent., nor more than 10 per cent., of the khasra numbers; and that an expert man of the Central Provinces' Revenue Inspector class (pay Rs. 25 per mensem) can verify 250 khasra numbers a day, or 6,250 numbers in a working month of 25 days. That means 37,500 numbers during the open season of six months, or, with 3 khasra numbers to the acre, say 20 square miles.

5. I have stated above that possibly the number of khasra numbers might be reduced. The smallness of the average field indicates an intention to give to each individual rice or bhadoi plot a separate khasra number. In Raipur, which is largely a rice country, the rule was that each individual rice plot should be surveyed, but that in khasra writing they might be clubbed together into one *khasra* number—*provided* that (*a*) the plots are held by the same tenant in the same right; (*b*) that the fields were alike in soil and position; and (*c*) that the class of soil was not one on which double cropping was habitually practised. Although the holdings in Raipur consist of isolated plots much scattered, this method of clubbing led to a reduction of about 15 per cent. in the khasra entries. In Bihar it will probably not be necessary to take the soil class and position class into account, while fields making up the holdings are perhaps not so scattered. If this be so, a still larger reduction in khasra numbers may be effected. Say that the number is reduced, then the area with which an expert officer of the stamp I have mentioned can deal during the open season will be somewhat increased, though probably not to the extent, or in so large a porportion, as the khasra numbers are reduced by the plan of clubbing plots.

	Sq. miles.
Muzaffarpur	3,003
Darbhanga	3,665
Saran	2,622
Champaran	3,531
Total ...	12,821

6. The areas of the four North Bihar districts are shown in the margin, but there are, so far as I know, no authentic statistics showing the cultivated area of any Bihar district. In these circumstances, perhaps, I may take the estimates of cultivated areas offered in my Report on the Food-supply of Bihar (1876) as reasonable approximations. They were in round numbers for—

District.	Cultivated area. Sq. miles.
Muzaffarpur	2,240
Darbhanga	2,600
Saran	2,360
Champaran	2,250

or say 9,450 square miles of cultivation altogether. This shows three-fourths of the area to be on the average under cultivation and one-fourth waste, which is probably not far from the truth. The *average* North Bihar district has therefore in round numbers, on these calculations, 2,360 square miles of cultivated and 840 square miles of uncultivated area.

7. The maximum number of officers necessary to maintain the record of rights in the cultivated area of such an average district would be 118. The maintenance of the record of the uncultivated land would not be onerous unless much reclamation were going on. Having regard to the possibility of clubbing plots and so reducing the khasra entries, I should say that, for the average Bihar district, 120 such officers—I will call them sub-kanungos—ought to suffice. Each sub-kanungo will want a chainman in the open season.

8. Experience in the Central Provinces has shown that it takes about twice as much time to compile the statistical information as it does to complete the field-to-field inspection. No doubt on the system now being explained the statistical information will not be so elaborate as it is in the Central Provinces, still the sub-kanungos will want some clerical help during the recess months. This I propose to give them by employing literate chainmen each on Rs. 10 per mensem.

We have thus worked out a staff for each district of—

	Rs.
120 Sub-kanungos at Rs. 25	3,000 per mensem.
120 Chainmen-muharrirs at Rs. 10	1,200 ,,

9. The importance of careful supervision in such a scheme as that under notice cannot be overrated. I would therefore group the sub-kanungos' circles into circuits (of, say, 20 circles), to be placed under a kanungo on Rs. 50 per month, whom I would include in the Subordinate Provincial Service. The entire Land Record Staff of the district I would

place under a Sub-Deputy Collector. The following estimate of total cost for an average Bihar district is therefore tentatively proposed :—

		Rs.
120	Sub-kanungos	3,000
120	Chainmen-muharrirs	1,200
6	Kanungos	300
1	Sub-Deputy Collector	175
		4,675
	Pensionary charges at one-fifth	935
	Per mensem	5,610
	Per annum	67,320
	Tour expenses	2,500
	Stationery and survey appliances	1,180
	Total ...	71,000

As establishments have a tendency to grow, and as it might be found desirable to employ senior officers as District Land Records Deputy Collectors, this estimate might in time be exceeded. But it ought not, I think, to go beyond Rs. 75,000 per annum or thereabouts.

In this first draft I do not enter into the manner on which the sub-kanungos should perform their duties: that will fall for later consideration.

DARJEELING,

The 24th June 1893.

A. P. MACDONNELL,

Offg. Lieutenant-Governor.

No. 748T.—R., dated Darjeeling, the 6th July 1893.

From—H. H. Risley, Esq., c.i.e., Secy. to the Govt. of Bengal, Revenue Dept.,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

Since taking over charge of this province from Sir Charles Elliott, the Officiating Lieutenant-Governor has paid much attention to the question of the Survey and Settlement of Bihar, and I am now to submit, for the consideration and orders of the Government of India, a copy of a Minute which His Honour has recorded on those important subjects.

2. It will be perceived that the chief matter upon which the orders of His Excellency in Council are required is concerned with the maintenance of the record of rights when once it has been correctly prepared. This question is touched upon in your letter No. $\frac{1028}{43}$ of the 1st August 1892, which Sir Charles Elliott did not dicuss with Sir Antony MacDonnell. So far as the Officiating Lieutenant-Governor understood, Sir Charles Elliott was tending, just before he left India, to adopt the conclusion that the task of maintaining the record was one of very formidable magnitude and difficulty, and that, in view of the inadequacy of the executive establishments available for administration and supervision, and of the opposition of the zamindars to the exercise of any control by Government over the patwari under the existing law (Regulation XII of 1817 and Regulation I of 1819), it was hopeless to attempt anything of the kind; but it was evident that the Lieutenant-Governor's mind was unsettled on the point. He was, however, entirely opposed to legislation having for its object the reform of the patwari system on the lines of the Bill of 1885, for these reasons—

(a) that such legislation had been negatived by the Secretary of State;
(b) that a patwari scheme would impose too great a strain on the administration;
(c) that it would be unpopular with the zamindars.

There was a fourth reason in certain hopes which Sir Charles Elliott seems to have unofficially held out to the zamindars and planters, that Regulation XII of 1817 might be entirely repealed, presumably after a sufficient scheme had been made out for maintaining the record by some agency other than that of the patwari.

3. In the enclosed Minute, Sir Antony MacDonnell has endeavoured to place the case in its historical and practical aspects fully before the Government of India, and has stated with, it is hoped, adequate clearness what his own views and recommendations are. He is very strongly of the opinion that the record, when once it has been correctly prepared, should be maintained up to date. By the survey and record the landlords will gain substantially not only in that the recovery of existing rents will be materially facilitated and its cost reduced, but by the increase of rents in cases where the survey enables the landlord to prove that the tenant is holding land in excess of the area for which he is paying rent. In a very large proportion of the holdings in the Bettiah Raj it is believed that such enhancement will be feasible; and although it is hoped that the Manager will not take advantage of the survey to attempt a general raising of rents on this ground, it can hardly be doubted that the fact that he holds this power in reserve will tell in favour of the Raj in any question that may arise between it and its tenants. The presumption in favour of existing rents created by section 104(3) carries with it the consequence that if there be a variation of the rent, it must be in the direction of an enhancement, unless power is given under section 112 of the Act to reduce rent (a power which it is invidious to exercise if it can be avoided, and for which the Officiating Lieutenant-Governor does not now ask). The experience already acquired in the settlement of wards' and private estates under the Act shows that on an average the zamindars may count upon realising a return of from 12 to 15 per cent. on the expenditure incurred. Regarded, therefore, as a mere investment, the making of a survey and record of rights is a source of substantial profit to the landlords. In Bihar they will further gain by the stereotyping of *sir* or demesne lands, which play so important a part in the agricultural system of that province, and over which raiyats henceforward will be debarred from acquiring occupancy rights. The planters, who are not solely landlords, and

who regard the acquisition of rights in land as merely subsidiary to the cultivation and manufacture of indigo, will find their position enormously strengthened and their initial expenditure reduced by the survey placing on record the exact nature and extent of all proprietary rights; so that in future the planter will know exactly with whom to deal when taking a lease of a village. He will also be enabled, on occasions, to ignore the zamindars and to acquire effective rights for the purpose of cultivating indigo by entering into agreements with the raiyats direct.

4. So far, then, looking at the matter from the raiyat's point of view, it will be seen that for a survey and record which will lead probably to an enhancement of their rents, and certainly to a curtailment of the area within which the rights conferred on them by the Tenancy Act can take effect, the raiyats will have to pay a sum amounting in the aggregate to one-half of the charges imposed upon the land. Clearly they have the strongest equitable claim to some substantial counterbalancing equivalent for proceedings which are likely, or which have a tendency, to produce such results. This equivalent is chiefly to be found in the maintenance of the record of rights, which, if it mulcts the raiyats now, will, it must be hoped, give them freedom from illegal demands and adequate protection in the future. Sir Antony MacDonnell does not deny that the survey and record of rights, especially if conducted in the way indicated in paragraph 34 of the Minute, will do some immediate good to the raiyats; and though he regrets that the operations were begun without previous provision being made for maintenance, he thinks they must be prosecuted now. But he does very earnestly urge on His Excellency in Council that application should be made to the Secretary of State for permission to legislate for a cess of such amount as will enable this Government to create an efficient record establishment such as is detailed in the scheme marked B attached to the Minute. If the Secretary of State declines to accord this permission, then, if the record is to be maintained at all, no means is left except to organise and administer a patwari system in Bihar under the old Regulations XII of 1817 and I of 1819, either as they stand or with the minimum of amendment that may be found necessary in order to make them workable enactments.

5. The Officiating Lieutenant-Governor is by no means sanguine that a Land Record establishment can be satisfactorily worked under these Regulations, the terms of which are in many respects obscure and indefinite, while the procedure laid down is cumbrous and antiquated. His fear is that it cannot, and that the strong and continuous opposition with which the effort to work it will certainly be met, will add enormously to the difficulties which must attach to any scheme based on the Regulation. No record scheme can be satisfactory when the Revenue authorities and the Executive Government have not exclusive and complete control over the appointment and remuneration of the agency by which the scheme has to be carried out. Although the Officiating Lieutenant-Governor thinks that, if no other resource is left, an effort should be made to maintain the record under Regulation XII of 1817, he trusts that this Government may not be placed in what he cannot but regard as a position of very exceptional difficulty and embarrassment, but that power may be conferred upon it to organise by legislation upon modern lines such a local Land Record establishment as may be sufficient for the end in view.

6. If the Government of India can see its way to expressing general approval of the views stated in the Minute, the Officiating Lieutenant-Governor will be in a position, when he visits Bihar at the end of the current month, to act in pursuance of that approval, and he is not without hope that he may be able to induce the zamindars to accept a compromise and to intimate their readiness to accept scheme B as set forth in the appendix to the Minute. For his own part the Officiating Lieutenant-Governor considers that in the present circumstances of Bihar a land record scheme which concerns itself merely with the permanent facts and conditions of tenancy, leaving the registering of payments of rent to the parties concerned, is all that need be insisted on.

MINUTE ON THE SURVEY AND RECORD OF RIGHTS IN BIHAR, AND ON THE SUBSEQUENT MAINTENANCE OF THE RECORD.

THE subjects of this paper are perhaps the most difficult and important of any now pending before the Bengal Government. I had the advantage of discussing them with Sir Charles Elliott before he went on leave, and of being placed to some extent in possession of his views on points which are still unsettled. On other points Sir Charles Elliott's opinions are to be readily ascertained from the correspondence. Since taking over charge of the Province, I have given my anxious attention to the question, and have consulted the responsible officials and several unofficial gentlemen on, I think, every phase which it presents. It is now necessary for me to state my provisional opinions on unsettled points, and to indicate the action which should be taken on them, though I retain full liberty to modify my views should I see reason to do so after consultation with the zamindars of Bihar on my approaching visit to that Province. But before stating my present opinions, it will be useful to trace as briefly as may be the origin and the successive stages of the development of this question of a survey and record of rights in Bihar. This retrospect will throw some light on the measures we should adopt in the future.

2. It is unnecessary for my present purpose to go further back than Lord Ripon's administration, when the Government of India addressed to the Secretary of State the important Despatch No. 6 of 21st March 1882, in which the whole agrarian question in Bengal was summed up, and the outcome of the various enquiries and Commissions that had been appointed to enquire into it set forth and formulated. One of the proposals (head XIII, paragraph 108 of the Despatch) therein made was "to take up the question of introducing throughout Bengal the system of village records and field surveys, commencing with the Patna Division." The Survey and Record of Rights now in progress in Bihar are therefore immediately due to the initiative of the Marquess of Ripon's administration. But before that time they were among the most urgent recommendations of the Famine Commission, and had been in principle recognized in the time-expired Agrarian Disputes Act VI (B.C.) of 1876: since then they have been supported by all the most competent officers, who have had to deal with the subject, as the only effective means of improving the condition of the Bihar raiyats, whose condition appears to be more depressed than that of any cultivators in the whole of India. I may add that in the area within which the survey and record have been already completed, the peace and security which they have produced are, I understand, very highly appreciated by zamindars and raiyats alike, though as time advances and the record becomes obsolete, it may be doubted whether this gratifying state of things will be adequately maintained.

3. To the Despatch of the 21st March 1882, Lord Hartington, then Secretary of State, replied in his letter No. 54 (Rev.) of 17th August 1882, paragraph 19 of which runs thus—

"As regards head XIII, while fully admitting the advantages which would attend the establishment of village records and accounts, the formation of a record of rights and the introduction of a field survey, I cannot avoid the apprehension that the difficulties of carrying out these measures in those parts of Bengal in which village accounts and accountants, if they ever existed, have long ago entirely disappeared, even from tradition and remembrance, may prove greater than you anticipate. Your present proposal, however, merely contemplates an experimental commencement of the work in the Patna Division of the Province of Bihar, where the need for it is, you think, most pressing and the conditions least unfavourable, and to this I will make no objection. I shall be glad, however, to receive full reports of the progress of the work, of the expenditure likely to be incurred, of the difficulties which may be encountered, and of the expedients by which they may, in your opinion, be overcome."

4. The Government of Bengal (then administered by Sir Rivers Thompson), whose Revenue Secretary I was at the time and for four years afterwards, was thus confronted with the most important administrative undertaking of a fiscal character since the Permanent Settlement, and it began work by considering, *first*, what agency, and *secondly*, what legislation, was necessary to give effect to the policy enjoined on it. Its consideration of the question of

agency led to the proposal made in the Bengal letter to the Government of India, No. 309T.—R., dated 1st June 1883, to create a Department of Land Records in Bengal. The Government of India, in forwarding* that proposal to the Secretary of State, made the following remarks, which I quote as being the earliest opinion to which I wish to refer on the subject of the maintenance of the record of rights when once it had been correctly prepared :—

* See despatch No. 13 of 25th September 1883.

"All attempts to obtain trustworthy agricultural statistics or to maintain correct village records of rents and tenures such as are found in other parts of India have failed in Bengal owing to the decline of the patwari and kanungo system. This defect is prominently noticed in the Report of the Famine Commission, and its evil consequences have been brought clearly before us in dealing with the rent question in Bengal. We agree with the Lieutenant-Governor that legislation (on the rent question) itself will not solve the difficulties which have grown up in many parts of the province, and we think that *in Bihar at least a survey and reorganization of the patwaris will be necessary when the Rent Bill passes into law.* This great undertaking cannot in our opinion be satisfactorily completed without the continuous supervision of a special department; and to avoid unnecessary delay in entering on important measures, we think that steps should be immediately taken to constitute the Department of Land Records. We have ascertained from the Bengal Government that though the measures in contemplation for the above purpose cannot be exactly formulated while the provisions of the Rent Bill are still in some respects unsettled, it hopes to be in a position to legislate on the subject (of patwaris) early next year."

5. The Secretary of State in his letter No. 24, dated 10th April 1884, sanctioned the creation of a Department of Land Records as a provisional arrangement which has since become permanent, and then proceeded to make the following remarks with special reference to the second subject, namely, legislation, to which, as stated in paragraph 4 above, the Government of Bengal had to address itself in order to give effect to Lord Hartington's orders of August 1892:—

"It is impossible to doubt that the results of a general field survey of Bengal and the establishment of detailed village records, if they be found practicable, will be most beneficial. But the task must be acknowledged to be a gigantic one, whether its difficulty, its cost, and the time it must take be considered, and the opposition which may probably have to be encountered on the part of both landlords and tenants, and I am unable to sanction any step with a view to so great an undertaking until I am furnished with fuller information than that which I at present possess with respect to the methods to be adopted, the expenditure likely to be incurred, and the difficulties which may have to be met. These points should not be reported on without the opinion of the Board of Revenue and of the chief administrative officers having been obtained."

6. The question of legislation in amendment of the Patwari Regulation was therefore postponed pending the submission of further information to the Secretary of State, and with a view to procuring such information the Board of Revenue (and administrative officers through the Board) was consulted. I make the following extract from the Board's reply (letter No. 841A, dated 23rd September 1884, to the Government of Bengal):—

"The importance of this question (maintenance of the record of rights) is only equalled by the difficulty of dealing with it—a difficulty so great that some officers (notably Mr. Wilson of Midnapore) look upon it as fatal to a proposal of attempting a survey at all. It must be conceded that there is no agency in Bihar (Bengal?) to which the duty of maintaining the village records and maps could be committed, and that it will be necessary to create an organization for the purpose. Throughout the greater part of Bihar there are village servants known by the name of patwaris, but they would not, and indeed could not, discharge the duties performed by patwaris in the North-Western Provinces, and the supervising staff, on which the efficiency of the patwaris depends, does not exist all. The difficulty, however serious it may be, must be faced and surmounted. *The rent bill would lose half its usefulness if it were not supplemented by a survey and record of rights, and the survey would be of no value unless measures were taken to maintain its accuracy from year to year.*"

7. The Hon'ble Mr. Reynolds, who was then in charge of the Land Revenue Department of the Board of Revenue, concluded his Minute by expressing concurrence in the views† of Sir Charles Bernard that though there might be opposition and difficulty in the way of the proposed survey and record operations, neither would be insurmountable. Fearing, however, that a general settlement of rents might, on a rigid interpretation of the law untempered by equitable considerations, lead to universal enhancements of rent in Bihar (where reports went to show

† Stated in a Minute, dated 18th February 1884.

that rents were already very high), Mr. Reynolds advised the limitation of the operations to a survey and record of existing rights and rents alone.

8. The Government of Bengal, in forwarding the Board's report to the Government of India (Bengal letter No. 2426T.R., dated 25th October 1884), expressed the following opinion:—

"While thinking that in 'exceptional circumstances and special areas,' as stated by the Hon'ble Mr. Ilbert* in introducing the Tenancy Bill, we may have to settle rents, the Lieutenant-Governor is quite of the opinion that anything like a general settlement of rents in any district is to be deprecated. He accepts the view that on a survey introduced under the orders of Government, if the record of rights shows the existence of exorbitant rents and the raiyats put forward claims for reductions, then only should such claims to have fair rents fixed be entertained."

* *Gazette of India* (Supplement) of March 3rd, 1883, page 295.

9. The Government of India (letter No. 996A. of 20th November 1884), in acknowledging the receipt of the Bengal letter and calling for further information, observed—

"It is hardly necessary to remark that the value of the survey and the record of rights will be incommensurate with the cost unless an efficient staff of patwaris and supervisors is organized on the lines suggested in Mr. Reynolds' Minute. * * * If it be decided to commence operations in 1885 or 1886—and on this point the Government of India will expect to be advised hereafter by the Government of Bengal—His Excellency the Governor-General in Council trusts that no effort will be spared to obtain at an early date the requisite legal powers to organize the patwari staff, and that the work of organization will be vigorously prosecuted."

10. In accordance with these instructions, and in fulfilment of the original intention of legislating mentioned in paragraph 4 above, I introduced a Bill into the Bengal Legislative Council to amend the Patwari Regulation XII of 1817, and I attach to this Minute a copy of my speech on that occasion, as it sets forth in sufficient detail the history and existing condition of the patwari system and the reasons for its proposed reorganization.

11. One object of this Bill was to levy the cost of a reformed patwari establishment by a cess on the land which, it was contended, would not amount to more than the people already paid for patwaris under the designation of "*neg*" or customary fees. The intention was to fund these payments, and from the amount so funded, which would be under official control, to pay the patwari and supervising kanungos. The Secretary of State was not disposed to sanction the imposition of a cess for an object the success of which he regarded as doubtful: and it was with a view to solve his doubts that it was determined to make an experimental survey and record of rights in a selected area. Accordingly, the Patwari Bill was suspended, pending the result of this experimental survey and record of rights, which was begun under the direction of Mr. E. W. Collin in about 500 square miles of the Muzaffarpur district.

12. While this experimental survey was in progress, further correspondence passed between the Government of Bengal, the Government of India, and the Secretary of State, in regard to the latter's instructions to charge the cost of the experimental operations to Provincial Revenues, and generally in regard to the Patwari Bill, the object of the correspondence on the latter subject being to remove His Lordship's objections to this proposed measure. In this correspondence the Government of India, supporting the Government of Bengal, said:—

"We need not again point out what has been already admitted by all parties in the correspondence, that an elaborate survey and record of rights are a pure waste of money, unless due provision is made for keeping the information they furnish up to date. * * * * Unless Your Lordship should be of opinion that the explanations now given are sufficient to remove the objection entertained by your predecessor to the inclusion in the Patwari Bill of authority to levy a cess for the payment of village accountants, we concur with the Bengal Government that the only course to pursue is to close the cadastral survey at the end of the present season, and to abandon altogether for the present the attempt to obtain an accurate record of the land and of the incidents of its tenure."

13. The efforts of the Government of India were, however, fruitless; the Secretary of State in his letter No. 21, dated 15th July 1886, stated that his objections to the cess were not removed, and he considered that, under the circumstances, "the only course to pursue was to abandon the proposed measure

for the present." This decision involved the abandonment of the experimental survey and record, which was accordingly brought to an end after a large area had been cadastrally surveyed and a record of rights completed in about 80 square miles of that area. No provision was made to maintain this record up to date, and it must now have become somewhat obsolete; but, as observed in paragraph 2 above, it has given much satisfaction to those interested in it.

14. This order of the Secretary of State's closes what may for my present purpose be regarded as the first stage in these proceedings. During this stage it was, to use the words of the Government of India just quoted, admitted by all parties, firstly, "*that an elaborate survey and record of rights are a pure waste of money unless due provision is made to keep the information they furnish up to date*;" secondly, *that the agency necessary to maintain the record should be provided before the survey and record were begun.*

15. The second stage of these proceedings is practically an endeavour to carry out, without legislation, the accepted policy in regard to the record of rights in Bihar. Legislation on the patwari question having been denied, a change of opinion in regard to its necessity gradually supervened; it being, as the Board observed, a comforting doctrine that what is unattainable is also undesirable. But apart from this natural disposition of practical administrators to adjust measures to circumstances, the change of opinion can, I think, be traced to two distinct sources, one dating from Sir Rivers Thompson's administration, the other from that of his successor, Sir Steuart Bayley. While the experimental survey and record was going on in Bihar, the Bengal Government was also considering the desirability of introducing surveys and record of rights into certain estates managed by the Court of Wards; and in these estates, being limited areas (in some of which, moreover, acute disputes regarding rent actually existed), the Bengal Government did not attach the same importance to the maintenance of the record as it did in the case of a whole district and much more a whole province, when the object was not only to allay existing acute disputes, but also to make lasting provision for the prevention of disputes in the future and for the settlement of a basis of agrarian prosperity. This policy and view of the application of section 101 of the Tenancy Act in regard to Wards' estates was set forth in the Bengal letter No. 2419—915L.R., of 1st December 1886, and there is no doubt that once started it obtained a hold over the spirit of the administration, and an extension which was not at first intended.

16. This result was helped by the report which Mr. Collin in 1887 submitted on his experimental survey operations, and this report is the second source to which I trace the change of opinion referred to in the preceding paragraph. Mr. Collin, who is an officer of ability and judgment, there said—and his words, which are the outcome of practical experience, afford a striking confirmation of the wisdom of the policy of survey and record of rights embodied in Chapter X of the Tenancy Act:—

> "Some such measure as survey and record of rights is absolutely necessary if the rights of the raiyats are not to be entirely confiscated, and if a system by which they have been hitherto deprived of more than half of their legitimate share of the profits of their land is not to be perpetuated."

And again—

> "The main point is to ascertain the existing rent and certify it to the raiyat. * * I believe it is a sufficient protection to the raiyat to ascertain and certify his rent to him. The danger lies in his ignorance of his rental."

Mr. Collin, it will be seen, supports the view urged by Mr. Reynolds and Sir Charles Bernard, as stated in paragraph 7 of this Minute—a view in which I entirely concur—as to the desirability of *not* interfering with rents whenever interference can be avoided.

17. Mr. Collin advocated a survey and record of existing rights as good and necessary in itself and worth the cost, even if not afterwards maintained. He did not, indeed, undervalue the great advantage of maintaining the record; but he had no faith in any system of maintenance by unreformed patwaris, and he thought with Mr. Finucane (see paragraph 26 below) that something might be done by making zamindars file returns and checking these by Government

agency. Even this way of looking at the matter was not followed by Mr. Norman, then Collector of Muzaffarpur, who, in forwarding Mr. Collin's report, not only denied the possibility of maintaining the record by means of patwaris or zamindars, but went the length of affirming that its maintenance would be of no use or advantage.

18. On this report and these recommendations the Board, having been consulted, replied* as follows:—

* Letter No. 608A., of 15th June 1888.

"The Board cannot console themselves with the acceptance of Mr. Norman's opinion that it matters very little whether the record is maintained or not. On the contrary, they are firmly persuaded that the record will year by year become of less and less value unless adequate measures be taken to ensure its periodical examination and correction, so as to bring it into accordance with the state of things actually existing at the time. The Board would greatly regret to see these registers,† on which a large sum of public money has been spent, and which are described by the Commissioners as excellent and well-arranged, gradually becoming 'waste paper' for want of supervision and correction. * * But in a permanently-settled area, such as is now under consideration, the Board are reluctantly compelled to say that the existing law leaves the Government practically without any resource. It is hopeless to expect that the record can be maintained by the agency either of patwaris (unreformed) or zamindars. The feeling which has prompted Messrs. Finucane and Collin to urge the adoption of some measures which will give a permanent value to the work in which they have taken so much interest, and which they have accomplished so well, has the entire sympathy of the Board. But the Board would be wanting in their duty if they failed to represent that Government has practically before it only the alternatives of abandoning all measures for the proper maintenance of the records of the Muzaffarpur survey, or of invoking the aid of the Legislature for the establishment of an efficient system of patwaris and kanungos."

† Of Mr. Collin's survey.

Thus it will be seen that the Board of Revenue adhered to the principles of what I have called the first stage of the proceedings, while the Government had begun to vacillate.

19. The Board's views did not commend themselves to His Honour Sir Steuart Bayley, who, in submitting Mr. Collin's report on the experimental survey to the Government of India, had supported the proposal to extend to the rest of Bihar a survey and record, even if it were not afterwards to be maintained. And the Government of India, in its letter No. $\frac{438R}{39-2}$ of 16th June 1888, agreeing with the Bengal Government, said—

"In view of the facts brought out, the arguments urged against a survey and record until an agency was made to maintain it lose some of their force. That the full benefits of a record of rights cannot be secured unless it is continuously maintained is obvious; and the Government of India is not without hope that a solution of the difficulty will be found in the enquiries in progress. But even were it otherwise, His Excellency in Council is forced by the recent experiment to the conviction that a survey would be justified by the unquestionable advantages it would confer in determining existing tenures and rents in a manner which could be asserted and maintained under the Tenancy Act.

"Holding these views, and apart from the financial cost of the operations, His Excellency the Governor-General in Council entirely concurs in the opinion of His Honour the Lieutenant-Governor that the experimental survey has been a success, and that it is desirable to extend the measure to other tracts where uncertainty as to existing rents prevails."

20. The correspondence was submitted to the Secretary of State, who, in his letter No. 66 of 16th August 1888, said—

"I observe you incline to the opinion that even if the continuous maintenance of the village record cannot be fully secured, still an accurate record of existing facts would be of great advantage as affording a basis on which a better state of things might grow up under the Tenancy Act. * * * If the work is to be undertaken in other localities, the cost of *and subsequent maintenance of the village record* must be kept within the narrowest possible limits of cost, *as the expenses will have to be defrayed by the classes and localities concerned.*"

I invite particular attention to the words I have italicized, as they seem to indicate the possibility that the prohibition against legislation on the patwari question may be reconsidered by the Secretary of State. For the rest His Lordship adopted an attitude of benevolent neutrality and watchfulness, as regards the new departure, rather than of active approval; but he gave the Government of India a free hand.

21. Thus the Governments of Bengal and India, gradually abandoning the doctrine that a survey without subsequent maintenance of the record was a waste of money and useless, came to think that a survey and record without subsequent maintenance is useful, and worth the cost. The reasons for this change were—

(a) the strong necessity that existed, and still exists, for supplementing, in the interests of the depressed tenantry of Bihar, the operation of the Tenancy Act by a record of tenants' rights and status;

(b) the Secretary of State's opposition to legislation on the patwari question.

22. But while deciding on a survey and record even without provision for subsequent maintenance, the Governments of Bengal and India and the Secretary of State have not ceased to insist on the desirability and importance of maintaining the record up to date, and the later communications from the Government of India, especially the letter No. $\frac{1628}{43}$ of 1st August 1892 (which I had no opportunity of discussing with Sir Charles Elliott), indicate a marked urgency of desire that provision should be made for maintaining the record when once it has been correctly prepared.

23. In all this I entirely agree. It is true that my position in regard to this question, before I left the Bengal Government in 1886, had been not only that the record should be maintained when framed for a large tract of country, but that it should not be begun till provision for its maintenance had been made. On these points my opinion has undergone no change; and undoubtedly I should be glad if the Secretary of State were again approached with a view to our taking power by legislation to raise as much money as will enable us to maintain the record, if not by patwaris then in the way I shall presently indicate, which involves the minimum of interference between landlord and tenant. In this way I clearly see my road to the effective maintenance of the record without any trouble, and at a cost to the zamindars and raiyats which would be trifling compared to the immense benefits which both would reap from such a measure. I have suggested in paragraph 20 above that His Lordship might possibly be now willing to consider the fresh representations in regard to legislation, which I trust the Governor-General in Council will permit us to make. But in any case His Excellency in Council may rely on me to give effect to the policy he has been pleased to sanction.

24. In a subsequent portion of this Minute I shall consider the procedure for making the record, the agency for making it, and the cost. Here I wish to dispose, so far as possible, of the question of maintenance, and to state the measures I propose to take to that end. In June 1892 Sir Charles Elliott, addressing the Board of Revenue, proposed a scheme for maintaining the record, which depended for its efficacy on the raiyats and others reporting to a registering officer all changes in their holdings which might occur from time to time. I have carefully examined that scheme in the light of my own knowledge of Bihar and of recent experience acquired in the Central Provinces, where survey and record operations are now in progress on a larger scale than elsewhere in India. My conclusions were that the scheme would not give the information which the Lieutenant-Governor wanted, and that even if it did, the information would be inadequate for the purposes of an effective record. The local criticisms on the scheme were of a similarly unfavourable character, and Sir Charles Elliott himself being now satisfied that the scheme would not work, has agreed to abandon it.

25. Sir Charles Elliott's idea was to have a self-acting or automatic and self-supporting scheme not resting on local enquiries or on the maintenance of the village map. He hoped that the people, rent-payers and rent-receivers, would by the operation of certain sanctions explained in the letter be induced to report mutations, and would, by various fees, pay for the recording establishments. But it may be taken as an axiom that no system of maintenance is of use which does not rest on the bases of village inspection, map amendment, and *khasra* corrections on the spot. It is also doubtful whether, as khasra corrections will probably not annually be more than about 5 per cent. of the entries, the fees levied from the persons served, *i.e.*, whose record is

corrected, would pay for the correcting establishment, unless they were pitched high. To levy much fees would be contrary to practice in other provinces, and no doubt unpopular. It follows, with certainty, that no self-acting agency would be effective, and with probability, that an effective record agency must be paid for from some other source than fees charged for the special services rendered.

26. In 1885, the Director of Land Records in Bengal prepared a scheme which I understand the Bihar zamindars, believing legislation to be imminent, accepted* subject to certain conditions. This scheme is given in Appendix A, and has some points in common with the proposals made by Sir Charles Elliott while it differs from those (*inter alia*) in requiring new legislation for the imposition of a special cess. It was, however, disapproved by the Boord and by the Government of Bengal for the reasons expressed in the following extract from the Bengal letter to the Board of Revenue of the 9th January 1886:—

* See enclosure to the Director of Land Records' letter to the Board, No. 767, dated 19th November 1885.

"In reply, I am to say that the Lieutenant-Governor having perused your letter and the careful report prepared by Mr. Finucane, comes to the same conclusion upon the question as that at which the Board have arrived.

"Sir Rivers Thompson is unable to accept the proposals which have been made, and to which Mr. Finucane has given his support that the present staff of patwaris are to be henceforth regarded as zamindari servants paid from the cesses now levied on their account, nor that in his record of rights and of payments the patwari shall depend for his information upon returns and accounts furnished to him by the zamindar, and that he should confine himself to ascertaining how far these accounts agree with what the raiyats admit to be correct. To define the duties of a patwari in such terms would, the Lieutenant-Governor considers, be fatal to the maintenance in the villages of an accurate and effective record of rights. Furthermore, it must be made clear that no cess whatever shall be levied from the raiyats for payment of patwaris except that which is realizable under the Bill.

"The patwari's work should, in Sir Rivers Thompson's opinion, represent the results of his own personal observation and inspection, and should not entirely depend on its operation upon the information which the zamindar supplies to him. A system under which the patwari makes his original record entirely depend upon returns and accounts periodically given to him by the zamindar must lead to conflict and controversy.

"It is not necessary that any rule should be made that all payments of rent must be made in the presence of the patwari; but in the work connected with the maintenance of the record of rights, measures should be adopted to make the patwari's action, as far as possible, independent."

These objections appear to me now, as they did in 1885, to be fatal to such a scheme; but I understand that Mr. Finucane has since represented that his proposals were not fully understood at the time, and that they are not really open to the objections stated. This may be a matter for subsequent consideration; but in any case if as a last resource we are compelled to look to the patwari of Regulation XII of 1817 for the maintenance of the record, then we must deal direct with the patwari himself, and control him in the actual preparation of the village papers.

27. I am well aware that the great zamindars and landlords of Bihar are opposed to an enforcement of Government control over the patwaris under Regulation XII of 1817. Herein I confess to having some sympathy with them, and I do not propose to employ the patwari of Regulation XII of 1817 for the purpose of maintaining the record, except as a last resource. But I attach such extreme importance to the maintenance of the record, that failing other means I should endeavour to work through that Regulation. I am, however, anxious to meet the wishes of the Bihar landlords, many of whom are my personal friends, and for all of whom I entertain a strong liking; and I have therefore framed a scheme which is marked B in the enclosures to this Minute. That scheme dispenses with the patwari altogether, or rather substitutes for him an officer on higher pay and of superior status, whose functions would correspond more closely to those of the kanungo under the Emperor Akbar's land system, as I explained in introducing the Bill of 1885 into the Bengal Legislative Council. The sub-kanungo of scheme B would, like the original kanungo established or recognised by Raja Todar Mal, be the servant of Government alone, and would be in no way subordinate to the zamindar. This follows from the fact that the scheme, broadly speaking, limits the maintenance of the record to the facts of occupation, status, and rent payable;

leaving the question whether in any case the rent has or has not been actually paid to be settled between the raiyat and his landlord, without any interference on the part of the Executive Government. This is the minimum of maintenance on which Government must insist in the interests of the raiyats; and I am, subject to the orders of the Governor-General in Council, willing to abide by it for the sake of concord, and compromise with my Bihar friends. This scheme will cost about Rs. 70,000 per district anually, but where is that sum to come from if we do not legislate? Only a very small portion could be supplied by copying fees and such like miscellaneous income, and it would not be fair to the general public to pay the entire sum from Provincial Revenues even if these revenues were able to afford it, which they are not. The bulk of the money must come, if it is to be raised at all, from the people interested, "from the classes and localities concerned," as the Secretary of State said in his letter No. 66 of 16th August 1888, already referred to in paragraph 20 above. That the money would be cheaply and well spent, I have no doubt at all; for with such a record as I contemplate, we should attain what we have been striving for since the Permanent Settlement—a sufficient knowledge of the facts of each holding and estate, whereby agrarian disputes would be reduced to a minimum, such disputes as occurred would be susceptible of easy and speedy decision, and, for the first time within a century, a real and lasting foundation would be laid for the agricultural prosperity of Bihar.

28. If the Bihar zamindars reject the scheme which, in my anxiety to meet their objections, I propose, and if, moreover, the Secretary of State maintains his veto on the imposition of a cess for maintaining the record, then, undoubtedly, there are only two courses before us: to abandon all attempts to maintain the record, and prepare for ourselves, 10 or 15 years hence, the same chaotic state of things as we now find in existence; or to see what can be done under Regulation XII of 1817. Having already stated that I regard the maintenance of the record as of extreme importance, it will be understood why I shrink from the former alternative. I am well aware of the difficulties in the way of working the patwari of Regulation XII of 1817, difficulties which I myself and abler Revenue officers have thought insurmountable. But an actual experiment has never yet been made in such circumstances as we are by our survey and record calling into existence. And it may possibly be that practice may falsify our theory, and show us how, by some slight alterations in the Regulation, consistent with its principles, means may be found to make it a more effective instrument in our hands. At all events I cannot entertain any proposals—some have, I understand, been made—to repeal Regulation XII of 1817, and so abolish the slight control Government now has over the registered patwari—except on the condition of the provision of an efficient substitute, such a substitute, for instance, as would enable us to work scheme B in the Appendix.

29. And this, I understand, was the attitude adopted by my predecessor up to the eve of his departure. It is true, I believe, that Sir Charles Elliott contemplated the abolition of the Patwari Regulation (XII of 1817) when an effective scheme for maintaining the record had been provided. But the hopelessness of devising a scheme which should not involve the imposition of a cess, and yet be independent of Regulation XII of 1817, had apparently come home to him, for in the seventh paragraph of the Resolution on the Survey and Settlement Reports for 1891-92, which was recorded by him on the day before he made over charge of these Provinces to me, I find the following expression of his views on the subject of the training of local agency for the purpose of executing and maintaining surveys and records of rights:—

"Another satisfactory feature of the year's work is the progress made in training local men in survey work. The employment of local agency on survey and settlements not only materially reduces the cost, *but provides an efficient means of maintaining the maps and records when the work is complete.* During the season under notice the following local establishments were put through a course of instruction and will be utilized as far as

"In the Champaran district, 181 patwaris and their relatives.

"In the Muzaffarpur district, 270 patwaris and their relatives and other local men (80 more were under training).

"In Tippera, 300 local men (Bengalis).

"In the coparcenary villages in Bihar, it is possible that some difficulty may be experienced in arranging for a patwari or other resident of the village to do the survey and record writing, but it is hoped that this difficulty may not be insurmountable. Section 5 of Regulation I of 1819 empowers the Collector, with the approval of the Board of Revenue, to appoint patwaris in such villages with or without reference to the proprietors, and if it is found that the latter cannot agree among themselves to nominate a joint patwari, it may be necessary to take action under this section."

This paragraph, it will be observed, refers to the questions of reducing the cost of the Bihar survey and maintaining the record hereafter, and it distinctly contemplates the employment of the patwari not merely to make the survey in the first instance, but also to maintain it when made. The injunction to have recourse to section 5 of Regulation I of 1819 in order to provide patwaris in those villages where, owing to the number of joint proprietors, no registered patwari has at present been appointed, leaves no doubt on the point that the patwari to be so employed is the statutory patwari, *i.e.*, the patwari appointed by the Collector under the Regulations.

I am aware from my conversations with Sir Charles Elliott that he did not wish to force the inclinations of Bihar landlords in connexion with the employment of the Regulation Patwari to maintain the record. Neither do I. But if I am driven to it, if I have to choose between abandoning the attempt to maintain the record, and endeavouring to maintain it through Regulation XII of 1817, then I shall decide on the latter course, though I shall do this with reluctance.

30. This conclusion to which I have come, to work under the Regulation XII of 1817, if I am precluded from working outside it, confirms a decision which, on the independent ground of economy in survey expenditure, I have already taken, while it links up and harmonizes, so far as may be, our present policy and practice with the policy which, as stated in paragraph 14 above, was approved in the earlier stage of these proceedings. The decision is to take up in earnest the registration of patwaris under the Regulation (this was begun in 1876 and carried some length in Bihar), and to employ none but registered patwaris (or, failing them, amins) on the survey and record operations now in progress. I do not conceal from myself the probability that this endeavour to procure registered patwaris even for survey work will be met with opposition by Bihar zamindars. They will probably think it is the thin edge of the wedge, and that having got patwaris registered for survey work, I shall retain them for the maintenance of the record. Undoubtedly I shall retain them if I am driven to maintain the record under Regulation XII of 1817; but that is not my primary object in getting them registered. My direct and primary object is to reduce the expenditure on the [illegible] considerable and admits of great reduction by the [illegible] of surveying his village [illegible]

[illegible] (to meet the Board of Revenue's reasonable wishes) that, although the registered patwari is bound to survey his village as part of his statutory duties and without further payment, it may be well, as he is not always well paid, to give him a special allowance as a reward for good work.

[illegible] to a scheme of maintenance outside Regulation XII, I shall, after the survey is over, see what I can do to assist them in procuring the repeal of Regulation XII of 1817, and thus cut the patwari loose from all official control and supervision. If then I had a free hand in this matter, and time were no object, I should, in the interests of economy (and of the future maintenance of the record if we *must* act under Regulation XII, 1817), be disposed to suspend the survey and record operations until the patwaris had all been registered and trained to survey. But I apprehend that the obligation to carry on the work from the point at which I find it leaves me no choice but to work through amins, when registered and trained patwaris are not forthcoming.

31. And this brings me to a very important matter indeed. I find that in some places Colonel Sandeman has been making the survey and record through so-called patwaris who are not registered, and are in point of fact zamindari servants pure and simple, paid by the zamindar, and merely temporarily lent by them to the survey authorities. Over these men no effective control can be exercised. They work or leave off working just as they please, and if detected in making false measurements or false entries, there is no means of adequately punishing them. The Board of Revenue and the Director

of Land Records are strongly opposed to this system; the Settlement Officer has objected to it; and the Superintendent of Surveys, Colonel Sandeman, is himself dissatisfied with it. Certainly I consider it open to the very gravest objections. As the Board of Revenue observe, "it cannot be forgotten that one of the main objects of the Bihar Survey and Settlement was the protection of the raiyats, and the Board consider that the experiment of having a large part of the work done by the servants of the very party against whom, if any one, the raiyats require protection, must be attended with some hazard." Manifestly no real trustworthiness can attach to records prepared by the servants of one of the parties concerned. To obviate this formidable objection, Colonel Sandeman has been employing muharrirs to check the entries made by the zamindari patwaris. But this double agency adds largely to the cost of the record, and who that knows Bihar can think that after all this is a real check? The record must be prepared under conditions which shall relieve it, so far as we can guarantee, from any suspicion of onesidedness; and to this end I have decided that mere zamindari servants shall, on no account, be employed in surveying and preparing the record of the raiyats' holdings. It will no doubt be urged that as the patwari registered under the Regulation is also under the zamindar's control to some extent, the objections to the employment of unregistered patwaris apply also to him. But it cannot be contended that the position of the Government is the same in regard to the registered as to the unregistered man. We hold a strong position in regard to the registered patwari; he is a Government servant; we can dismiss him and we can criminally prosecute him for making a false entry. We have no such hold as this over a private patwari, who is merely lent to us, and whom we do not pay. The position is explained in the following extract from a letter which I have caused to be addressed to an influential gentleman in Bihar, who has taken exception to my orders, directing the employment of registered patwaris alone, and, failing them, professional amins. The letter refers to an important opinion given by the Advocate-General as to the obligation the registered patwari is under, to survey his village by order of the Collector:—

"The Officiating Lieutenant-Governor has received your letter of the 9th instant, referring to the employment of patwaris on the Bihar Survey, and is glad that you have written to him on the subject.

"The matter stands thus. On going through the papers connected with the Bihar Settlement, and on hearing what influential gentlemen in Calcutta had to say regarding it, it appeared to Sir Antony MacDonnell that there were two aspects of the proceedings which needed special attention—(*a*) the expense, (*b*) the absence of an effective plan for maintaining the record when completed.

"The latter aspect of the question is now engaging His Honour's attention, and he trusts to have an opportunity of consulting you and Bihar zamindars generally on it when he visits Muzaffarpur next month. On the former aspect of the case, it seemed to His Honour eminently desirable that something should be done to reduce the cost of the survey. The cost of survey and 'khanapuri' is now very considerable, and the tendency is to further increase. On enquiry Sis Antony MacDonnell found that the survey was being chiefly carried on by amins (to whose employment objections have been raised apart from the matter of cost). The belief was entertained that the Collector could not legally require patwaris to measure their villages. To test the accuracy of that belief, which the Officiating Lieutenant-Governor personally doubted, the question was referred to the Law Officers of the Crown. The Advocate-General has now advised Government (and the Board of Revenue accepts the opinion) that patwaris can be required under the usual sanction to survey their villages as part of their statutory duties.

"But the patwaris over whom the Government can exercise this measure of legal control are the registered patwaris alone, that is to say, the patwaris whom the Collector, usually on the zamindar's nomination, recognises for each mahal or village. Over the unregistered patwaris, who are merely the private servants of the landlords, the Collector can exercise no control.

"You will, His Honour is sure, recognise that it is most undesirable that the survey should be made and the record prepared by a private servant of one party concerned, or by any one over whom the Settlement Officers have no adequate control.

"If Bihar zamindars and planters assist the Government in this matter, by registering their patwaris where none have yet been nominated and registered, and thus gratuitously procuring for them the requisite status, then the Lieutenant-Governor has no doubt that the cost of the survey and initial record operations will be very greatly reduced, while the efficiency of the patwari as a village servant will be immensely increased by the experience and training in survey he will gratuitously receive. By this means it is not impossible that the cost may be reduced under one-half the present figure. This would be an enormous

gain to landlords, tenants and all concerned. But if landlords and others do not help in this matter by coming forward and nominating their patwaris, so as to enable the survey authorities to work through registered patwaris, then, if the operations are to be successfully prosecuted, the Government has no resource left but to work through amins. (Of course the survey authorities will continue to work through amins until the registered patwaris are ready to take the amins' place.) In this alternative the objection based on the expensiveness of the survey, &c., will not lie at the door of the Government, but at the doors of those who, being under a legal obligation to nominate parwaris, abstain from doing this, and thereby impede the adoption of a procedure whereby the cost can be substantially reduced."

On this part of the subject, then, what we have to do is—

For purposes of survey—

(*a*) To make out a list of the villages in which survey operations have begun or are contemplated.

(*b*) To forward that list to the Collectors of the districts concerned, and ask them to take immediate steps under the Patwari Regulation to have patwaris registered for these villages. In the case of coparcenary villages, to which class most villages in Muzaffarpur are understood to belong, it may be necessary, as was observed by Sir Charles Elliott in the Resolution quoted above, to take action under section 5 of Regulation I of 1819.

(*c*) To train the patwaris so registered, if they need training, to survey.

(*d*) To employ the registered and trained patwaris in the survey and record operations instead of amins. Until the patwari is ready to take the professional amin's place, the latter must be kept on.

For purposes of subsequent maintainance of the Record, if we must act under Regulation XII, 1817—

(*e*) To request the Board to direct that the recording establishments shall for each village carefully enter the nature and amount of all and every payment customarily made by (*a*) rent-payers, (*b*) rent-receivers to, or for the services of, patwaris.

(*f*) To request the Board to prepare and submit a scheme for maintaining the record through the agency (i) of the registered patwari, and (ii) of such supervising staff of kanungos and Revenue officers as may be necessary. An estimate of the cost of this supervising establishment must be submitted at the same time. How it is to be provided will be a matter for subsequent consider-tion.

(*g*) To request the Board to consider, in communication with the Law officers, whether, having regard to the terms of sections XVIII and XX of Regulation XII of 1817, the Government has the power (*a*) of determining what the patwaris' salary shall be; (*b*) of laying down by whom and in what proportions it shall be paid, and (*c*) of requiring the parties, who are directed to pay such salary, to deposit it in a Government treasury in the manner contemplated in Rule XXI of the Board's Rules regarding patwaris in Bihar (section XIV, Revenue Officers' Manual, 1888).

(*h*) To request the Board generally to consider whether Regulation XII of 1817 is susceptible of any modifications (and if so what modifications) not inconsistent with its principles, whereby it may be made a more efficient instrument for maintaining the record of rights.

33. I now pass on to the consideration of the actual procedure of record ing rights, and the cost of survey which is being incurred. With the method of survey I need not concern myself, though I shall later on make a few remarks regarding the subordinate agency and the establishment of permanent survey marks. The notifications that have hitherto been issued run as follows:—

"Under the powers conferred on him by section 101(1) of the Bengal Tenancy Act VIII of 1885, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect to all lands included within the external boundaries of pargana in the district of

The particulars to be recorded in the survey and record of rights shall be the following:—

The name of each proprietor, with the character and extent of his interests.

The situation, quantity, and boundaries of proprietors' private lands, as defined in Chapter XI of the Act.

The name of each tenant.

The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

The situation, quantity, and boundaries of the land held by him.

The name of his landlord.

The rent payable.

The mode in which that rent has been fixed, whether by contract, by order of a court, or otherwise.

If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

The special conditions and incidents, if any, of the tenancy."

34. This form of notification seems to me to be appropriate, and it should be continued. It will be noticed that it requires merely a record of existing facts, not a settlement of rents; and herein it agrees with the views held by the Board of Revenue in 1884 and by Mr. Collin in 1887, as stated in paragraphs 7 and 16 above. If either landlord or tenant applies for a settlement of rent, then under section 104(2) of the Tenancy Act the Revenue Officer is bound to settle the rent, but he should not attempt to settle rents in any other case. It has been, I understand, contended by a gentleman in Bihar, whose opinion must always carry weight with me, that the initial words of section 104(2) impose on the Revenue officer the duty of settling rent of his own motion "when it appears that a tenant is holding land in excess of or less than that for which he is paying rent." But in the first place the Act does not afford any rule or criterion by which the Revenue officer is to be guided in determining the area for which rent has been previously paid, unless it can be said that section 52(2) of the Act affords such a rule. And secondly, the contention here referred to amounts to saying that the Revenue officer is bound to take judicial notice of the landlord's measurement papers, a proposition which is on the face of it inadmissible.* It is clear, moreover, that this section deals with matters essentially for judicial decision, and I think therefore it will be prudent for Revenue officers not to attempt to settle rents, except on the application of either the landlord or the tenant. I am very indisposed to adopt any course which may have the effect of enhancing, through Revenue officers, rents in Bihar, where, if the fullest enquiries are to be trusted, rents are often too high. I am anxious to leave this question of fixing fair rents to the civil courts, in which, carefully controlled as they are by the Hon'ble Judges of the High Court, I have confidence; but if the Settlement Officers are compelled by a judicial interpretation of section 104(2) of the Tenancy Act to consider *suo motu* the question of rent enhancement on the ground of excess area, then I shall probably apply to the Governor-General in Council for the general power under section 112 of the Act to reduce rents which are unfair and inequitable (a power not conferrable on the Civil Courts). Thus a settlement which shall not be one-sided, but fair to all parties concerned, may be made.

* On this point see the very important decision of the High Court, dated 30th May 1892. Gouree Patro *versus* Manager, Burdwan Raj Estate.

35. When the facts of the holdings, &c., have been recorded, an extract of the record (*parcha*) should invariably be furnished to each tenant. I attach the highest importance to this. It is essential that the tenant should be in a position to know, before attestation, what has been entered regarding his holding, in order that at attestation he may, if necessary, object to any wrong entry. It is essential that people should not be taken by surprise, but that they should have ample time to consider the proposed entries affecting them before they became final.

36. Attestation is, so far as the raiyat is concerned, the most important link in the chain, and I must insist on the entries of area, rental and status made in the record of rights being attested with special care by a Revenue officer of gazetted rank. I must absolutely prohibit attestation of such entries by muharrirs

or any subordinate officers whatever. A Sub-Deputy Collector is the lowest grade officer whom I would entrust with the duty, and the Sub-Deputies so entrusted should be picked men. If we are to make a record, no pains should be spared to make it an authentic statement of the facts. I should say that in an area where the disputes about existing rents and status are few, a competent officer should be able to attest the *khatians* for from 250 to 300 tenants in a working day.

37. The cost of the operations is at present high, and if we are not able to use registered patwaris for survey and khasra writing, I fear it will tend to increase. So far as I can gather at present, the—

	Rs.	
Traverse survey costs	40	per sq. mile.
Cadastral survey and "khanapuri" (estimated)	170	"
Attestation, publication and settlement (estimated)	160	"
Total	370	

The ways in which this cost can be reduced are (*a*) employment of patwaris instead of amins, on their customary and statutory duty of surveying, (*b*) invoking the voluntary assistance of the raiyats and others interested in the measurement of their own fields, (*c*) making no settlements of rents unless required to do so by landlord or tenant, (*d*) employing as few muharrirs as possible to write *parchas* and help in making the "khanpuri." The reduction of expenditure depends so much on attention to details that I can give no more precise indications as to sources of possible economies; but the expenditure is so much higher than I was accustomed to in the Central Provinces, that I have, with the premission of the Government of India and the consent of the Chief Commissioner of Central Provinces, decided to arrange for the deputation of the Officiating Commissioner of Settlements, Mr. Carey, and a selected Settlement Officer, to consult with Colonel Sandeman and Mr. Macpherson on the whole question of expenditure, which depends to a very great extent on a careful consideration of a multitude of details and their relative adjustments.

38. In the matter of survey marks, I would say that the fewer permanent marks we have the better. They are a great trouble and expense to examine and maintain. I would have no marks except on triple junction points, unless a flag raised at one such point cannot be seen from the next adjacent point. In that case, an intermediate mark is necessary. I understand Colonel Sandeman agrees to this.

39. In addition to prosecuting operations in the parganas in the Hajipur sub-division of Muzaffarpur and in the tappas of the Bettiah sub-division of Champaran already under survey, it is proposed next season to begin work in two areas of 500 square miles each in Muzaffarpur, in one area of similar extent in Saran, in one area of similar extent in Champaran, and in 500 square miles of the Tikari Ward's Estate in Gaya. The Saran area belongs to the Maharaja of Hutwa, and the Champaran area belongs in great part to the Bettiah Estate, managed by Mr. Gibbon. If the Maharaja of Hutwa and Mr. Gibbon give assistance, there ought to be no difficulty at all in registering patwaris in these areas and subsequently training them. The amins would then be got rid of and the expenses of survey probably reduced by one-half. In the Tikari Estate in Gaya, which is under the Court of Wards, there will be no difficulty. In other estates the rapid and smooth progress of operations cannot be so certainly counted on, the Bihar zamindars being, as I have said, jealous of the exercise by the Government of control over patwaris, and anxious that the latter should become zamindari servants absolutely. It is said that the Bihar patwari is wholly untrustworthy, and I myself have not painted him in very flattering colours. But the patwaris in other provinces were probably as bad before they were taken well in hand, and there have been cases in which the denunciations of even the Bihar patwari were due to his not being as pliant an instrument as the denouncer wished. At all events the patwari, be his character what it may, is at the present moment a power in Bihar: and if the zamindars refuse to meet us in some such way as that indicated in paragraph 27, it will

be for us to see, before throwing up the sponge, whether we cannot make him a power for good instead of for evil.

40. I have forwarded this Minute to the Board of Revenue for any remarks they might wish to offer: and I annex their observations on it. I am gratified to find that both Members are in complete accord with the opinions I have expressed.

A. P. MACDONNELL,

Officiating Lieutenant-Governor.

DARJEELING,

The 24th June 1893.

APPENDIX A.

Outlines of Mr. Finucane's scheme referred to in paragraph 26 *of the Minute for provision of establishment for maintenance of records of survey and record of rights and of village accounts.*

1. A Government servant to be appointed for each circle or number of villages containing an area with about sixteen thousand rupees rental, which in Bihar would cover about ten square miles.

2. This officer to be called munserim patwari, to receive a salary of from Rs. 15 to Rs. 20 a month, to possess the attainments of an amin or the like qualifications.

3. The duties of the munserim Government patwari would be—

(*a*) to receive from the zamindars at stated times a statement showing the changes to be made year by year in the survey records. This would practically be the khasra rewritten for plots in which any change in occupancy occurred;

(*b*) to receive from the zamindar a *jama-wasil-baki* or other account showing the realization from each raiyat year by year.

4. The zamindar would make his own arrangement for keeping his own and his raiyats' accounts, and would simply make over to the Government patwari copies of such accounts as may be prescribed for record and attestation.

5. The Government patwari on receipt of the zamindar's *jama-wasil-baki* would visit the villages of his circles, explain to the raiyats the amounts shown by the zamindar as realized, ask them if the amounts thus shown are correct. If the raiyat admits their correctness, the fact would be noted; if he denies their correctness, the Government patwari would make a note of the raiyat's allegation on the *jama-wasil-baki*, but would not attempt to decide which allegation, whether the raiyat's or zamindar's, is correct. The *jama-wasil-baki* would thus be a record of the contemporaneous allegations of both parties, and might be made admissible in evidence in suits between landlord and tenant as such and nothing more. Further, the munserim patwari would compare the amounts entered in the receipts held by the raiyats with the amounts shown by the zamindars as realized from them. If he found a discrepancy, he would content himself with explaining to the raiyat that he ought not to pay rent without obtaining a receipt, and with warning him that if he persists in being foolish enough to do so, he must put with the consequences.

6. As regards agricultural statistics, the Government patwaris need not trouble the zamindars at all They would simply go on the land with the maps in their hands and make out for themselves any statistics of cultivated area or the like which may be required.

7. Over every ten of these munserim patwaris a kanungo at Rs. 50 to be appointed.

8. Over five kanungos, that is to say, over an area of about 500 square miles a Deputy Collector.

9. After these officers had been at work for a short time in this way, supervised and controlled as they would be by the kanungo and the Deputy Collector, it is to be reasonably supposed that raiyats would take care to obtain receipts for all payments made by them, and that after a short time they would not make any payment without first obtaining a receipt.

There would then be no reason why the peripatetic Deputy Collector should not be vested with powers of a civil court, or even with summary powers for disposal of rent-suits.

In this way a rent-suit would resolve itself into this: the rent payable by the raiyat is known from the settlement records. If a zamindar alleges an arrear to be due from a raiyat, the raiyat may be asked to produce his receipts to show he has paid the amount due of him: should he fail to do so, the Deputy Collector would give a decree.

10. The present staff of patwaris (or such of them as are not required for Government service) to be made zamindars' servants to be retained or dismissed at the pleasure of the zamindar.

11 A cess of half an anna in the rupee would meet the expenses of the requisite establishment; of this one-half should be paid by the zamindars, the other half by the raiyats, as the former would derive quite as much benefit from the successful working of the scheme as the latter.

12. The cess would only be realized and the Bill would only apply where a survey and record of rights has been made.

13. For other parts of the country, the zamindars may be made responsible for the supply of such information or agricultural statistics as Government may reasonably require and prescribe, but they could make their own arrangements for obtaining such informations.

No. 1794/174, dated Simla, the 24th July 1893.

From—Sir E. C. Buck, Kt., c.s.i., Secretary to the Government of India, Revenue and Agricultural Department,

To—The Secretary to the Government of Bengal, Revenue Department.

In reply to your letter No. 748T.R., dated 6th July 1893, on the subject of providing for the maintenance of the land-record in Bihar by a cess, I am desired to communicate the following remarks and instructions.

2. The minute recorded by His Honour the Officiating Lieutenant-Governor contains a clear history of the correspondence which has taken place in respect to the maintenance of the record. As indicated by Sir A. MacDonnell, the Government of India have persistently urged that arrangements must sooner or later be made for maintaining it, and the survey was only sanctioned on the understanding that action would be taken in this respect as soon as the scheme sketched in the final paragraph of Sir Charles Elliott's letter No. 883L.R. of 9th July 1891 had received detailed consideration.

3. Like Sir A. MacDonnell, the Government of India would have preferred that the method and means for maintaining the record should have been decided before the survey commenced; but in view of the consideration urged in their letter No. 2135 of the 18th September 1891, that the survey itself was a task which from its magnitude and importance was not likely to be successfully undertaken by a Lieutenant-Governor whose term of office was drawing to a close, they apprehended that if operations were deferred until a complete scheme for the maintenance of the record had been prepared and sanctioned, the entire project might be indefinitely postponed. It seemed possible, indeed, that if a beginning were not made in 1892, a further period of inaction would set in, ending perhaps in the abandonment of the whole undertaking.

4. As matters now stand, the Governor-General in Council is fully alive to the necessity of urgent action, and desires that his thanks may be conveyed to Sir A. MacDonnell for the energetic manner in which he has taken up the subject. I am to convey the assurances of the Government of India that they will give every support in their power to His Honour in any measures which may be shown to be really necessary for the accomplishment of an object which they have always urged to be an inevitable adjunct to the survey, and will, if funds can be provided in no other way, be prepared to recommend to Her Majesty's Secretary of State the imposition on the landholders of a cess within the limits indicated in Sir A. MacDonnell's minute.

5. His Excellency in Council is glad to observe that in some of its leading features Sir A. MacDonnell's scheme is in accordance with that sketched in Sir Charles Elliott's letter of 1891. In both schemes the inspection and correction of the record is to be effected by a special staff of kanungos or land inspectors; in both the circle of each inspector, or in other words, the unit of area, is to be 20 square miles; and in both the correction of the record is to be confined to the entry of facts and is in no way to deal with the collection or settlement of rents. The important point of difference is that in the scheme of 1891 the funds were to be raised by mutation fees, while it is now proposed that they be provided by a cess.

6. It seems probable that, as elsewhere in India, the amount which can be raised by fees for mutations will not, in any case, provide a sufficient amount to meet the cost of all establishments. But it would seem desirable that before finally determining the amount required to be raised by cess, steps should be taken to ascertain what funds can be realised by the system of compulsory mutation adopted in the revenue codes of other provinces, and whether any economies can be effected by the utilisation of the special staff for registering assurances. On these questions the Government of India will await your opinion.

RULES RELATING TO THE DEHRA DUN FOREST SCHOOL.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

CALCUTTA;
REVENUE DEPT., FORESTS,
The 14th August 1893.

Circular No. 11-F.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, Forests, dated Simla, the 28th June 1893.

READ—

(i) Circular Resolution of this Department, No. 25-F., dated 13th October 1891, promulgating rules to regulate appointments and promotions in the Provincial Forest Service.

(ii) Circular of this Department, No. 22-F., dated 25th July 1892, forwarding, for the consideration of Local Governments and Administrations, draft rules for the recruitment of the Provincial Forest Service.

Read also—

(i) Replies from Local Governments and Administrations to the Circular of 25th July 1892.

(ii) Letter from the Inspector-General of Forests, No. 379, dated 10th May 1893, submitting, for the consideration and orders of the Government of India, a copy of Resolution No. II passed by the Imperial Forest School Board of Control for 1893-94, containing draft rules to regulate the constitution of, admission to, and studies and discipline at, the Forest School.

RESOLUTION.

The draft rules prepared by the Board of Control have been considered by the Government of India in connection with the opinions expressed by Local Governments and Administrations in response to Circular No. 22-F., dated 25th July 1892, and after such revision as has been deemed necessary, are now issued, in the appendix to this Resolution, for adoption, with effect from 1st July 1893, in supersession of those promulgated with Circular No. 25-F., dated 13th October 1891.

2. With reference to Rule 12 (ix), the Government of India desire that Local Governments and Administrations will consider whether the maximum number of stipends to be granted in each year under that rule might not with advantage be notified, with the object of inducing competition for them by candidates at the entrance examination of the Forest School and of thus transforming them into actual scholarships.

ORDER.—Ordered that a copy of this Resolution, and of the new Rules referred to, be forwarded for information and guidance to the Government of Madras, the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Hyderabad.

Ordered also that a copy be forwarded to the Foreign Department for communication to the Agent to the Governor General in Baluchistan.

Ordered, further, that the Resolution, with its appendix, be published in the Supplement to the *Gazette of India.*

[True Extract.]

E. C. BUCK,

Secretary to the Government of India.

APPENDIX.

RULES TO REGULATE THE CONSTITUTION OF, ADMISSION TO, AND STUDIES AND DISCIPLINE AT, THE IMPERIAL FOREST SCHOOL, DEHRA DUN.

Section I.—Constitution and Studies.

1. The School is under the administrative control of the Inspector-General of Forests, who is assisted by a Board consisting of—

1. The Inspector-General of Forests, *President.*
2. The Director of Public Instruction, North-Western Provinces and Oudh;
3. The Director of the School;

One Conservator from each province (not more then three serving in any given year);

with, as *Secretary*, the Assistant Inspector-General of Forests.

2. The Superior Staff of the School consists of—

1. The Director,
2. The Deputy Director,
3 & 4. Two Instructors,
5. The Vernacular Instructor,

} assisted by the Forest Officers of the School Circle, North-Western Provinces.

The Conservator of Forests, School Circle, North-Western Provinces, will ordinarily be Director of the School. The Deputy Director and two Instructors are officers of the Indian Forest Service on the Imperial List. The Vernacular Instructor is an officer of the Provincial Forest Service, also on the Imperial List.

3. The Director of the School is charged with (1) the general administration of the institution, including the regulation of the course of study under the arrangements prescribed by the Board of Control, subject to the sanction of the Government of India; (2) the supervision of the School buildings, quarters and gardens; (3) the control of the accounts, and the conduct of correspondence.

4. *Courses.*—There are two courses—one in English, the other in the Hindustani language. Each course lasts 21 months. The English course is that followed by the "Upper Class;" the Hindustani course that followed by the "Lower Class." The first year's students are called "Juniors," the second year's students "Seniors." In the English course students are prepared for the certificate in Forestry by the "Higher Standard;" in the Hindustani course for that by the "Lower Standard."

The subjects taught in these courses are the following, described in the School syllabuses:—

1. Forestry, including Sylviculture, Utilisation and Forest Working-Plans, both theoretical and practical.
2. Mathematics—elementary Arithmetic, Algebra, Trigonometry, and Mechanics, in their application to forest questions.
3. Physical Science, including Chemistry, Physics, Physiography, Geology, Mineralogy and Soils.
4. Botany, both theoretical and practical, including the collection and preservation of plants.
5. Zoology—the classification of animals and the study of useful and dangerous species, especially of insects, including the collection and preservation of specimens.
6. Drawing, Surveying and Estimating, as required for forest officers.
7. Forest Engineering, theoretical and practical.
8. Forest Law, the elements of Criminal Law, and departmental organisation.
9. Forest Accounts and Procedure.

5. *Terms.*—The terms of study are as follows:—

1st year- {
Rains term—July 1st to October 31st, in Dehra Dun.
Winter term—November 1st to December 22nd, in camp.
Vacation—December 23rd to January 5th.
Spring term—January 6th to March 31st, in camp.
Hill tour term—April 1st to May 31st, in camp.
Vacation—June 1st to 30th.

2nd year- {
Rains term—July 1st to October 31st, in Dehra Dun.
Winter term—November 1st to December 22nd, in camp.
Vacation—December 23rd to January 5th.
Spring term—January 6th to February 15th, in camp
Examinations, including survey test—February 16th to March 31st.

6. *Examinations.*—The School examinations are—

1. Monthly, to test progress and application.
2. Final.

The *Monthly Examinations* are usually held on the last two working days of each month as the Director may order. The marks obtained at these examinations are counted for one-fourth of the aggregate at the Final.

The *Final Examinations* are held in March of the second year, and the marks then obtained count for three-fourths of the aggregate.

7. *Certificates.*—There are two certificates obtainable in each class after the final examinations: a "pass" certificate and a "honours" certificate. The former is granted to students who obtain over 50 per cent. of the aggregate marks allotted to all subjects, provided this includes 50 per cent. of the marks allowed for each of the subjects of Forestry, Botany, Surveying, and Engineering. The latter is granted to students who obtain over 75 per cent. of the aggregate marks allotted to all subjects, including over 50 per cent. in each individual subject. These certificates are only granted on the orders of the Board of Control, who have authority to exercise their discretion in doubtful cases.

8. *Prizes.*—The School medals are awarded by order of the Board of Control, but only if "honour" marks (75 per cent.) have been obtained. Other prizes, whether given by Government or other donors, are also awarded by the Board of Control.

9. Should any student of the three categories enumerated in Rule 11 be unable (*a*) to appear at the final examinations, or, having appeared, (*b*) fail to pass those examinations, he will not be permitted to appear at any subsequent final examination, unless he follows a second time the whole course of instruction at the School, or, at the discretion of the Director, the second year's course.

Section II.—Admission Rules.

10. The total number of students of each class who can be admitted into the School each year will be limited to such number as the Board of Control may decide, from time to time, can be accommodated in the School. The number of studentships to be allotted each year to the respective Provinces, as well as the number of nominations to be made by the Director, will, with due regard to the total prescribed by the Board of Control, be decided by the Director of the School before the 1st of January, after consultation with the Provincial authorities as to their requirements, and communicated to the Local Governments concerned.

A.—Upper Class.

11. There are three categories of students in the Upper Class—

(1) Private Students.
(2) Students already in the Government service.
(3) Students deputed by Native States.

12. *Private Students* comprise all those students who are at present without appointments in any Forest Service, and whose object it is, by becoming possessors of Forest School certificates, to obtain employment, either in the Forest Service of the Government of India, or in that of a Native State or some other owner of forest property.

(i) Candidates for admission to the Forest School as private students must not be less than 18 or more than 25 years of age, and their applications must be sent to a Conservator of Forests* through a Divisional Forest Officer of rank not below that of an Assistant Conservator of the 1st grade, or through a Collector or other district officer. Neither the Conservator, the Divisional Forest Officer, nor the Collector need belong to the forest circle or province in which the candidate seeks employment; but Divisional Forest Officers and Collectors may not forward to Conservators applications unsupported by the five certificates enumerated below, namely—

* Conservator of Forests, Bengal Circle, at Darjeeling.
Conservator of Forests, Assam Circle, at Shillong.
Conservators of Forests, North-Western Provinces and Oudh—
School Circle, at Dhera Dun.
Central Circle, at Naini Tal.
Oudh Circle, at Naini Tal.
Conservators of Forests, Central Provinces—
Southern Circle, at Nagpur.
Northern Circle, at Jabalpur.
Conservator of Forests, Berar Circle, at Amraoti.
Conservator of Forests, Punjab Circle, at Lahore.
Conservators of Forests, Upper Burmah—
Eastern Circle, at Mandalay.
Western Circle, at Mandalay.
Conservators of Forests, Lower Burma—
Pegu Circle, at Rangoon.
Tenasserim Circle, at Moulmein.
Conservators of Forests, Madras Presidency—
Northern Circle, at Bezvada.
Central Circle, at Madras.
Southern Circle, at Coimbatore.

(*a*) A certificate that the candidate is a "Native of India" within the meaning† assigned to those words by section 6 of 33 Vict., Cap. 3.

(*b*) A certificate of age.

(*c*) A health certificate in the form prescribed by article 61 of the Civil Service Regulations, signed by the Civil Surgeon of the district in which the said Divisional Forest Officer's or Collector's duties lie, and testifying to the candidate's sound constitution, good vision and hearing, and general physical fitness for a rough out-door life in the Forest Department.

(*d*) A certificate of respectability and good moral character from two or more persons, whose social or official position can be accepted as a guarantee of reliableness.

(*e*) A certificate from an officer of the Educational Department, of a rank not less than that of a Deputy-Inspector of Schools or the Head-master of a High School under public management, to the effect that the candidate's education appears sufficiently good to give hopes of his being able to pass the entrance examination.

The last three certificates must bear date not further back than the 1st October of the year preceding that in which the candidate proposes to present himself at the entrance examination.

If any person giving certificates as above under (*c*), (*d*) and (*e*) is in a position to mention anything more to the credit of the candidate than the certificates actually call for, he may do so.

(ii) Upon the receipt by the Conservator of any application in respect to which the preceding conditions shall have been observed, that officer may either accept or reject the application, without assigning any reason for so doing; or he may require the candidate to produce other or better certificates in person before him.

† 'Native of India' means any person born and domiciled within the dominions of Her Majesty in India, or within th territories of Indian Princes tributary to or in alliance with Her Majesty, of parents habitually resident in India, and not established there for temporary purposes only. (Article 45, Civil Service Regulations.)

(iii) Conservators may, at their option, test the fitness of a candidate who desires to enter the service of Government by practical work in the forests.

(iv) Those candidates who have been approved by the Conservator will be permitted, under his recommendation, to appear at the next entrance examination for the Forest School held in his circle.

(v) The *Entrance Examination* is held early in March each year, on such date as may be fixed by the Director, both at the Imperial Forest School and at such centres as may be fixed from time to time by Local Governments, and under such officers—Educational, Revenue, Forest or other—as may be appointed: provided that the date shall be communicated by the Director to Local Governments and Conservators on or before 1st January. The subjects of examination are—

			Minima pass marks.
1.	English	Conversation	50 per cent.
		Composition	33
2.	Arithmetic		40
3.	Algebra, up to and including quadratic equations		40
4.	Elements of Euclid, Books I to IV and Book VI		25
5.	Mensuration—lengths, areas and volumes, with examples		25 „

The examination papers on the above subjects will be forwarded by the Director, in sealed covers, to such officials as the Local Governments may direct, in the month preceding the examination.

(vi) A local Government may lay down rules under which the number of candidates allotted under Rule 10 to the Province for admission into the school shall be selected from the number of passed candidates. In such rules due regard must be had to the place taken in the examination, but the Local Government shall not be debarred from preferring, for good and sufficient reasons, a passed candidate who may have taken a lower place in the list to one higher on the list; provided that the Director may, after inspection of the papers of the selected candidates, place before the Local Government an objection to the admission of any of such candidates on the ground that he is below the required standard.

(vii) The Local Government may, if it thinks fit, exempt from the entrance examination any candidate who is a Bachelor of Arts, or who has obtained a degree or diploma of about the same standard, at any University in India or in the United Kingdom or in a British Colony, or at any educational institution to which the Government of India may extend the privilege: provided that such degree or diploma shall not give such candidate a preferential claim over any candidates who have passed the entrance examination, and who may appear more eligible for the Forest Service.

(viii) Prior to the admission of a student, his parents or guardians must satisfy the Director that they are willing and able to defray the expenses of the student at the School. These expenses are estimated to be not less than Rs. 735 for each student living in native fashion, and Rs. 945 in the case of those living in European fashion (*vide* Rule 21). Of these sums, parents or guardians must deposit with the Director, before the course commences, a sum of Rs. 126 in the case of native students, and Rs. 168 in the case of European students, to meet the initial cost of uniform, books, instruments, stationery and camp-equipage (*vide* Rule 18), and in addition Rs. 50 as caution-money.

(ix) Local Governments may, on the recommendation of a Conservator or of the Director, and in exceptional cases, allow selected private students who have passed the entrance examination a monthly stipend not exceeding Rs. 50, to assist them through the School course; provided that such selected private students previously execute an agreement binding themselves to serve the Local Government concerned (in the event of their obtaining the school certificate) for a period of not less than five years (*vide* Rule 17). Such monthly stipend may, in case of misconduct or unsatisfactory progress at the School, be reduced or altogether withdrawn at the discretion of the Director.

(x) The names of those private students who succeed in obtaining the School certificate will be entered by the Director in a register to be kept for that purpose, and the Conservators of those circles, in which the non-stipendiary private students may severally desire or be willing to serve, will be addressed by him with the view of obtaining appointments for such students. The Conservators concerned will for this purpose be furnished with the original certificates already referred to in clause (i) of this rule, the School certificates and such other useful information, more especially regarding the physical qualifications of the students, as the Director may be in a position to furnish.

(xi) A list of private students, who may not succeed in obtaining appointments, will be forwarded by the Director to the Inspector-General of Forests, who will circulate the list amongst Durbars, Conservators, and other persons likely to be in need of the services of trained forest officials.

(xii) The appointment to the service of Government of passed private students depends on the existence of vacancies in the various circles, and even a stipendiary student has no claim to such appointment.

RULES RELATING TO THE DEHRA DUN FOREST SCHOOL.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

CALCUTTA;
REVENUE DEPT., FORESTS,
The 14th August 1893.

Circular No. 11-F.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, Forests, dated Simla, the 28th June 1893.

READ—

(i) Circular Resolution of this Department, No. 25-F., dated 13th October 1891, promulgating rules to regulate appointments and promotions in the Provincial Forest Service.

(ii) Circular of this Department, No. 22-F., dated 25th July 1892, forwarding, for the consideration of Local Governments and Administrations, draft rules for the recruitment of the Provincial Forest Service.

Read also—

Secretary to the Government of India.

APPENDIX.

RULES TO REGULATE THE CONSTITUTION OF, ADMISSION TO, AND STUDIES AND DISCIPLINE AT, THE IMPERIAL FOREST SCHOOL, DEHRA DUN.

Section I.—Constitution and Studies.

1. The School is under the administrative control of the Inspector-General of Forests, who is assisted by a Board consisting of—

1. The Inspector-General of Forests, *President.*
2. The Director of Public Instruction, North-Western Provinces and Oudh;
3. The Director of the School;

4. One Conservator from each province (not more than three serving in any given year);
with, as *Secretary*, the Assistant Inspector-General of Forests.

2. The Superior Staff of the School consists of—

1. The Director,
2. The Deputy Director,
3 & 4. Two Instructors,
5. The Vernacular Instructor,

assisted by the Forest Officers of the School Circle, North-Western Provinces.

The Conservator of Forests, School Circle, North-Western Provinces, will ordinarily be Director of the School. The Deputy Director and two Instructors are officers of the Indian Forest Service on the Imperial List. The Vernacular Instructor is an officer of the Provincial Forest Service, also on the Imperial List.

3. The Director of the School is charged with (1) the general administration of the institution, including the regulation of the course of study under the arrangements prescribed by the Board of Control, subject to the sanction of the Government of India; (2) the supervision of the School buildings, quarters and gardens; (3) the control of the accounts, and the conduct of correspondence.

4. *Courses.*—There are two courses—one in English, the other in the Hindustani language. Each course lasts 21 months. The English course is that followed by the "Upper Class;" the Hindustani course that followed by the "Lower Class." The first year's students are called "Juniors," the second year's students "Seniors." In the English course students are prepared for the certificate in Forestry by the "Higher Standard;" in the Hindustani course for that by the "Lower Standard."

The subjects taught in these courses are the following, described in the School syllabuses:—

1. Forestry, including Sylviculture, Utilisation and Forest Working-Plans, both theoretical and practical.
2. Mathematics—elementary Arithmetic, Algebra, Trigonometry, and Mechanics, in their application to forest questions.
3. Physical Science, including Chemistry, Physics, Physiography, Geology, Mineralogy and Soils.
4. Botany, both theoretical and practical, including the collection and preservation of plants.
5. Zoology—the classification of animals and the study of useful and dangerous species, especially of insects, including the collection and preservation of specimens.
6. Drawing, Surveying and Estimating, as required for forest officers.
7. Forest Engineering, theoretical and practical.
8. Forest Law, the elements of Criminal Law, and departmental organi
9. Forest Accounts and Procedure.

5. *Terms.*—The terms of study are as follows:—

1st year—
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to March 31st, in camp.
- Hill tour term—April 1st to May 31st, in camp.
- Vacation—June 1st to 30th.

2nd year—
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to February 15th, in camp
- Examinations, including survey test—February 16th to March 31st.

6. *Examinations.*—The School examinations are—

1. Monthly, to test progress and application.
2. Final.

The *Monthly Examinations* are usually held on the last two working days of each month as the Director may order. The marks obtained at these examinations are counted for one-fourth of the aggregate at the Final.

The *Final Examinations* are held in March of the second year, and the marks then obtained count for three-fourths of the aggregate.

7. *Certificates.*—There are two certificates obtainable in each class after the final examinations: a "pass" certificate and a "honours" certificate. The former is granted to students who obtain over 50 per cent. of the aggregate marks allotted to all subjects, provided this includes 50 per cent. of the marks allowed for each of the subjects of Forestry, Botany, Surveying, and Engineering. The latter is granted to students who obtain over 75 per cent. of the aggregate marks allotted to all subjects, including over 50 per cent. in each individual subject. These certificates are only granted on the orders of the Board of Control, who have authority to exercise their discretion in doubtful cases.

8. *Prizes.*—The School medals are awarded by order of the Board of Control, but only if "honour" marks (75 per cent.) have been obtained. Other prizes, whether given by Government or other donors, are also awarded by the Board of Control.

9. Should any student of the three categories enumerated in Rule 11 be unable (*a*) to appear at the final examinations, or, having appeared, (*b*) fail to pass those examinations, he will not be permitted to appear at any subsequent final examination, unless he follows a second time the whole course of instruction at the School, or, at the discretion of the Director, the second year's course.

Section II.—Admission Rules.

10. The total number of students of each class who can be admitted into the School each year will be limited to such number as the Board of Control may decide, from time to time, can be accommodated in the School. The number of studentships to be allotted each year to the respective Provinces, as well as the number of nominations to be made by the Director, will, with due regard to the total prescribed by the Board of Control, be decided by the Director of the School before the 1st of January, after consultation with the Provincial authorities as to their requirements, and communicated to the Local Governments concerned.

A.—Upper Class.

11. There are three categories of students in the Upper Class—

(1) Private Students.
(2) Students already in the Government service.
(3) Students deputed by Native States.

12. *Private Students* comprise all those students who are at present without appointments in any Forest Service, and whose object it is, by becoming possessors of Forest School certificates, to obtain employment, either in the Forest Service of the Government of India, or in that of a Native State or some other owner of forest property.

(i) Candidates for admission to the Forest School as private students must not be less than 18 or more than 25 years of age, and their applications must be sent to a Conservator of Forests* through a Divisional Forest Officer of rank not below that of an Assistant Conservator of the 1st grade, or through a Collector or other district officer. Neither the Conservator, the Divisional Forest Officer, nor the Collector need belong to the forest circle or province in which the candidate seeks employment; but Divisional Forest Officers and Collectors may not forward to Conservators applications unsupported by the five certificates enumerated below, namely—

* Conservator of Forests, Bengal Circle, at Darjeeling.
Conservator of Forests, Assam Circle, at Shillong.
Conservators of Forests, North-Western Provinces and Oudh—
School Circle, at Dhera Dun.
Central Circle, at Naini Tal.
Oudh Circle, at Naini Tal.
Conservators of Forests, Central Provinces—
Southern Circle, at Nagpur.
Northern Circle, at Jabalpur.
Conservator of Forests, Berar Circle, at Amraoti.
Conservator of Forests, Punjab Circle, at Lahore.
Conservators of Forests, Upper Burmah—
Eastern Circle, at Mandalay.
Western Circle, at Mandalay.
Conservators of Forests, Lower Burma—
Pegu Circle, at Rangoon.
Tenasserim Circle, at Moulmein.
Conservators of Forests, Madras Presidency—
Northern Circle, at Bezvada.
Central Circle, at Madras.
Southern Circle, at Coimbatore.

(*a*) A certificate that the candidate is a "Native of India" within the meaning† assigned to those words by section 6 of 33 Vict., Cap. 3.

(*b*) A certificate of age.

(*c*) A health certificate in the form prescribed by article 61 of the Civil Service Regulations, signed by the Civil Surgeon of the district in which the said Divisional Forest Officer's or Collector's duties lie, and testifying to the candidate's sound constitution, good vision and hearing, and general physical fitness for a rough out-door life in the Forest Department.

(*d*) A certificate of respectability and good moral character from two or more persons, whose social or official position can be accepted as a guarantee of reliableness.

(*e*) A certificate from an officer of the Educational Department, of a rank not less than that of a Deputy-Inspector of Schools or the Head-master of a High School under public management, to the effect that the candidate's education appears sufficiently good to give hopes of his being able to pass the entrance examination.

The last three certificates must bear date not further back than the 1st October of the year preceding that in which the candidate proposes to present himself at the entrance examination.

If any person giving certificates as above under (*c*), (*d*) and (*e*) is in a position to mention anything more to the credit of the candidate than the certificates actually call for, he may do so.

(ii) Upon the receipt by the Conservator of any application in respect to which the preceding conditions shall have been observed, that officer may either accept or reject the application, without assigning any reason for so doing; or he may require the candidate to produce other or better certificates in person before him.

† 'Native of India' means any person born and domiciled within the dominions of Her Majesty in India, or within the territories of Indian Princes tributary to or in alliance with Her Majesty, of parents habitually resident in India, and not established there for temporary purposes only. (Article 45, Civil Service Regulations.)

(iii) Conservators may, at their option, test the fitness of a candidate who desires to enter the service of Government by practical work in the forests.

(iv) Those candidates who have been approved by the Conservator will be permitted, under his recommendation, to appear at the next entrance examination for the Forest School held in his circle.

(v) The *Entrance Examination* is held early in March each year, on such date as may be fixed by the Director, both at the Imperial Forest School and at such centres as may be fixed from time to time by Local Governments, and under such officers—Educational, Revenue, Forest or other—as may be appointed: provided that the date shall be communicated by the Director to Local Governments and Conservators on or before 1st January. The subjects of examination are—

			Minima pass marks.
1.	English	Conversation	50 per cent.
		Composition	33 "
2.	Arithmetic		40 "
3.	Algebra, up to and including quadratic equations ...		40 "
4.	Elements of Euclid, Books I to IV and Book VI ...		25 "
5.	Mensuration—lengths, areas and volumes, with examples		25 "

The examination papers on the above subjects will be forwarded by the Director, in sealed covers, to such officials as the Local Governments may direct, in the month preceding the examination.

(vi) A local Government may lay down rules under which the number of candidates allotted under Rule 10 to the Province for admission into the school shall be selected from the number of passed candidates. In such rules due regard must be had to the place taken in the examination, but the Local Government shall not be debarred from preferring, for good and sufficient reasons, a passed candidate who may have taken a lower place in the list to one higher on the list; provided that the Director may, after inspection of the papers of the selected candidates, place before the Local Government an objection to the admission of any of such candidates on the ground that he is below the required standard.

(vii) The Local Government may, if it thinks fit, exempt from the entrance examination any candidate who is a Bachelor of Arts, or who has obtained a degree or diploma of about the same standard, at any University in India or in the United Kingdom or in a British Colony, or at any educational institution to which the Government of India may extend the privilege: provided that such degree or diploma shall not give such candidate a preferential claim over any candidates who have passed the entrance examination, and who may appear more eligible for the Forest Service.

(viii) Prior to the admission of a student, his parents or guardians must satisfy the Director that they are willing and able to defray the expenses of the student at the School. These expenses are estimated to be not less than Rs. 735 for each student living in native fashion, and Rs. 945 in the case of those living in European fashion (*vide* Rule 21). Of these sums, parents or guardians must deposit with the Director, before the course commences, a sum of Rs. 126 in the case of native students, and Rs. 168 in the case of European students, to meet the initial cost of uniform, books, instruments, stationery and camp-equipage (*vide* Rule 18), and in addition Rs. 50 as caution-money.

(ix) Local Governments may, on the recommendation of a Conservator or of the Director, and in exceptional cases, allow selected private students who have passed the entrance examination a monthly stipend not exceeding Rs. 50, to assist them through the School course; provided that such selected private students previously execute an agreement binding themselves to serve the Local Government concerned (in the event of their obtaining the school certificate) for a period of not less than five years (*vide* Rule 17). Such monthly stipend may, in case of misconduct or unsatisfactory progress at the School, be reduced or altogether withdrawn at the discretion of the Director.

(x) The names of those private students who succeed in obtaining the School certificate will be entered by the Director in a register to be kept for that purpose, and the Conservators of those circles, in which the non-stipendiary private students may severally desire or be willing to serve, will be addressed by him with the view of obtaining appointments for such students. The Conservators concerned will for this purpose be furnished with the original certificates already referred to in clause (i) of this rule, the School certificates and such other useful information, more especially regarding the physical qualifications of the students, as the Director may be in a position to furnish.

(xi) A list of private students, who may not succeed in obtaining appointments, will be forwarded by the Director to the Inspector-General of Forests, who will circulate the list amongst Durbars, Conservators, and other persons likely to be in need of the services of trained forest officials.

(xii) The appointment to the service of Government of passed private students depends on the existence of vacancies in the various circles, and even a stipendiary student has no claim to such appointment.

13. *Candidates in the Government Service*, who may be deputed to the School, will ordinarily be either—

(*a*) members of the Provincial Service (Forest Rangers) who desire to qualify themselves for further promotion in their own or to a higher class; or

(*b*) members of the Subordinate Service (Foresters and other subordinate officials) similarly desirous of qualifying for promotion.

(i) Forest Rangers may be deputed by Local Governments, provided the candidates are certified by the Conservator under whom they are serving to possess sufficient knowledge of English and general education and ability to enable them to profit by the course. Such officers may be above 25 years of age, and need not pass the entrance examination. While at the School they will draw the pay of their grade, and the travelling allowances to which they may be entitled under the Civil Service Regulations.

(ii) Officers of the Subordinate Service may be deputed by Local Governments, provided that—

(*a*) they have been in that service for not less than three years;
(*b*) they have passed the School entrance examination;
(*c*) they are under 25 years of age;
(*d*) they have executed the formal agreement referred to in Rule 17.

Such officers will, while at the School, draw the pay and travelling allowances of their grade in the service; provided that the total amount sanctioned to meet the cost of their training, inclusive of travelling expenses, shall not be less than Rs. 735 in the case of students living in the native style, and Rs. 945 in the case of students living in European fashion (*vide* Rule 21).

14. *Students deputed by Native States* may be admitted on the request of the State concerned; provided that—

(*a*) they have passed the entrance examination of the School;
(*b*) they have produced the certificates required for admission, specified in Rule 12 (i).

The Durbars of Native States sending students to the School shall, before the beginning of each term, or of each year if preferred, deposit with the Director a sum sufficient to meet the expenses of the students. This sum, for the whole course, must not be less than Rs. 735 for students living in native fashion, and Rs. 945 for those living in European fashion (*vide* Rule 21).

B.—Lower Class.

15. There are also three categories of students in the Lower Class—

(*a*) Private students.
(*b*) Students in Government service.
(*c*) Students deputed by Native States.

The rules for admission to the Lower Class are the same as those detailed in Rules 12, 13, and 14 for admission to the Upper Class, with the following exceptions:—

(i) Instead of the Entrance Examination, the candidate must furnish a certificate of having passed the Middle Class Examination in the North-Western Provinces and Oudh, or an equivalent standard in another province, as well as a certificate that he possesses a competent knowledge of Hindustani.

(ii) The cost of training will not be less than Rs. 588 (*vide* Rule 21) for the whole course of 21 months.

(iii) The required deposit will be Rs. 84, and the caution-money Rs. 25.

C.—General.

16. No student of European or Eurasian extraction, not already in the permanent employment of Government or of a Native State, shall be admitted into the Forest School if he is married; nor shall any such student, whether in the permanent employment of Government or of a Native State or not, marry whilst at the School or until he has joined a permanent appointment. A breach of this rule will render the student liable to dismissal from the School, or to forfeiture of any appointment in the Forest Service which may have been promised to him, or to which he may otherwise have a claim.

17. *Agreement and Security Bond.*—Officers of the Subordinate Service, deputed to the School by Local Governments under Rules 13 (ii) and 15, shall execute a formal agreement—the sureties for the fulfilment of which should be men of position and means—to continue in the Forest Service of the Local Government concerned for a period of not less than five years after passing out of the Forest School, and on such rates of pay as may be in accordance with the existing organisation of the Department. A breach of this condition will render the defaulter and his sureties liable for the refund of the entire cost of the student's education at the School. The agreement and security bond shall be in the appended forms, and must be executed before the student is admitted to the School. The agreement will be signed by the student and, if he is a minor, by his father or guardian also; the bond by the student and two sureties. The amount of security to be taken will be—

		Rs.
For a Lower Class student	... ...	600
„ an Upper Class student	Native	750
	European	1,000

The agreement and security bond need not be stamped.

The same rule shall apply to private students who may be granted stipends under Rule 12 (ix), subject, however, to the proviso of Rule 12 (xii). Should any such student not be appointed to the Forest Service of Government at the end of his School course, his agreement and security bond will be returned to him.

18. *Uniform, book, and camp allowances.*—The Director is authorised to make deductions from the pay of Forest Ranger students under Rule 13 (i), or of students of the Subordinate Service under Rules 13 (ii) and 15, or from the stipends of private students under Rules 12 (ix) and 15, to the following amounts:—

		Rs.		Rs.	
Lower Class students	...	4	monthly, or	84	in all
Upper Class students { Native	...	6	" "	126	"
Upper Class students { European	...	8	" "	168	"

in order to meet the following items of initial expenditure, viz.:—

	Upper Class.		Lower Class.
	Native.	European.	
	Rs.	Rs.	Rs.
Uniform and equipment	20	50	20
Books and instruments	60	60	24
Camp outfit	46	58	40
Total ...	126	168	84

The Director will charge off in his accounts such portions of the above as may be necessary from time to time to meet expenditure on the items mentioned, until the whole of the amounts are exhausted, after which the student will be required to pay in cash for articles supplied.

19. *Travelling allowances of private students in receipt of stipends.*—Students holding stipends from Local Governments under Rule 12 (ix) are not entitled to travelling allowance; but as the tours entail greater expenditure in some months than in others, the Director is authorised to make a further monthly deduction from their stipends of Rs. 5 from Upper Class Native students and Rs. 7 from Upper Class Europeans students, and to disburse the amounts in the following manner:—

	Native students.	European students.
	Rs.	Rs.
Monthly travelling allowances { November-May, 1st year. November-March, 2nd year.	4	8
Or for 12 months ...	48	96
Special additional allowance for Hill tour ...	22	16
" " for Punjab tour ...	35	35
Total ...	105	147

20. Should the Conservator of a Circle from which any Government student of the Subordinate Service is deputed to the School, under Rule 13 (ii), prefer it, he can, subject to the orders of his Government, authorise the Director to pay travelling allowance to such student at the rates given in Rule 19, instead of at the rates allowed by the Civil Service Regulations. And in the case of Lower Class Government students, deputed to the School under Rule 15, he may similarly authorise the payment of travelling allowance at the following rates, instead of the rates permissible under the Civil Service Regulations:—

	Rs.
Monthly travelling allowance at Rs. 4	48
Special hill tour allowance	16
" Punjab tour allowance	20
Total ...	84

which rates are equivalent to a permanent travelling allowance of Rs. 4 per month for the whole course.

21. *Estimated expense of training.*—It has been calculated that, in addition to the amounts specified in Rule 18 for cost of uniform, books, &c., and camp equipment, and in Rules 19 and 20 for travelling, the minimum monthly subsistence money for students comes to Rs. 20, 24, and 30, respectively; so that the minimum pay and travelling allowances of Government students under Rule 13 (ii), and the minimum stipends for stipendiary students under Rule 12 (ix), should not be less than Rs. 35 and Rs. 45, respectively, nor should the minimum pay and travelling allowances of Lower Class students (Rule 15) be less than Rs. 28. Thus, the minimum cost of training will be as follows:—

	Lower Class.	Upper Class.	
		Native.	European.
	Rs.	Rs.	Rs.
Subsistence money	20	24	30
Uniform, books, and camp outfit	4	6	8
Travelling allowance	4	5	7
Total per mensem ...	28	35	45
Or for the 21 months of the course ...	588	735	945

The same amounts should be taken as minima in calculating the allowances to be deposited on account of students from Native States under Rules 14 and 15, or provided by parents and guardians for the cost of training of private students.

Section III.—Disciplinary Rules.

22. *Quarters.*—The Director will allot to students, on their arrival in Dehra, such quarters as may be available in the School buildings or in the houses rented by him for students' accommodation. The School quarters are tenable during the whole period of the students' course, and the rent is Rs. 2 monthly for each student, or Rs. 4 for each room. Students for whom there is no accommodation in quarters or in houses rented by the Director, or who may prefer it, can, with the permission of the Director, reside in the town in lodgings selected by themselves; but in that case the Director will accept no responsibility for the rent.

All students, living in quarters or in the rented houses, are expected to abide by such orders as the Director may issue from time to time for the purpose of ensuring cleanliness and sanitation.

No dogs are allowed in quarters, nor may dogs or horses be brought inside the School grounds.

Breakages of furniture, etc., in the quarters or School buildings must be paid for by the students. Students are responsible for the acts of their servants.

23. *Uniform.*—All students must wear the School uniform, which consists of a suit of khaki drill with white-metal buttons, and a grey turban of prescribed pattern, for the hot weather, and of khaki serge with similar buttons for the cold weather and camp. Those students who become members of the Dehra Dun Mounted Rifles are, however, permitted to wear the undress uniform of the corps, which also consists of a suit of khaki drill, of pattern similar to that of the School. Students who are Volunteers will wear, as head-dress, a brown shikar hat while at the School, and the regular corps helmet when on parade. Native students may dispense with turbans, or wear other head-dress, only with the Director's special permission. Uniform must always be worn inside the School building. It must also be worn in the School grounds up to 5 P.M.

24. *Uniform and Camp Equipment.*—The uniform of members of the Dehar Dun Mounted Rifles may be obtained through the corps staff; that of other students through the Storekeeper of the School, on the Director's order. As camp equipment each student requires—

(1) A small tent, not larger than 10 feet × 8 feet.
(2) A camp bed.
(3) A small camp table.
(4) A camp chair or "morah."

These articles are made at the School and issued at cost price to students.

25. *Books and Instruments.*—The list of books and instruments required by each student will be published by the Director from time to time. The articles must be purchased from the Director, who endeavours to obtain them of the best quality procurable, consistent with cheapness. No article will, however, be issued by the Storekeeper, except (*a*) on order of the Director, or (*b*) on cash payment.

Copies of the Forest Acts and Forest Code, as also surveying instruments and herbarium presses, are issued on loan, and students using them will be responsible for their safe custody and return.

26. *Leave.*—During the course of instruction, no student may leave Dehra without the written order of the Director. Nor may students, while in camp, leave the camp head-

quarters without the written order of the Deputy Director or the Instructor in charge. Subsidiary rules regarding leave will be made by the Director from time to time.

27. *Holidays.*—During the rains term, Saturday will usually be observed as a holiday or devoted to excursions. In camp, it will ordinarily be a half-holiday. Such of the usual gazetted holidays as are allowed will be notified as such from time to time.

28. *Punishments.*—Students are liable to the following punishments :—

(1) Reprimand by the teacher in class.
(2) Reprimand by the Director or the Deputy Director at any time.
(3) Reprimand before a meeting, convened by the Director, of not less than three School officers, one of whom must be either the Director or the Deputy Director. The proceedings of the meeting will be reported to the Conservator or the Native State deputing the student, or to his parents or guardians if he is a private student; and, if the meeting so decides, a note of them will be made on his final certificate.
(4) The Director, acting with the consensus of the meeting referred to under (3), has power to inflict, in addition, a fine to the extent of one-third of the salary or allowances of the student for a period not exceeding three months.
(5) The Director, acting with the consensus of a full meeting of the School officers presided over by himself, has power to dismiss any student for misconduct; and a student thus dismissed cannot be re-admitted to the School. The Director may remand any student who, in his opinion, is not sufficiently promising.

29. *Monthly Reports.*—A progress report on the work of each student will be issued monthly by the Director. It will record the number of marks obtained by the student at the last monthly examination, his application to his studies, and his conduct generally. It will be sent, for Government students or private students in receipt of stipends, to the Conservator of the Circle from which the student is deputed; for Native State students, to such person as the Durbar may direct; and for ordinary private students, to the parent or guardian concerned.

30. *Library.*—The books in the School Library are available for the use of students under such rules as the Director may make from time to time. Books of reference must be consulted in the library itself, and no books may be taken away except after application to the librarian and entry in a register.

31. *Museum.*—The Museum and Herbarium are also available for the use of students; but the objects in the museum may not be handled or removed without the express permission of the Director or the Deputy Director. Permission to consult the herbarium may be obtained from the Director or the Deputy Director, but the plants must be kept in their order as arranged, and no sheets removed or altered without permission.

32. *Athletic Sports.*—The gymnasium and the tennis-courts will be available for the use of students during all recreation hours on week-days. Cricket and football may be played on the old parade ground. Students are recommended to join the School Athletic Club, the subscription to which is Rs. 4 yearly, and half-rates for those who do not play all the games.

Forms of Agreement and Bond to be executed by students already in the service of, or in receipt of stipends from, Government, previous to entry into the Forest School, Dehra Dun.

ARTICLES OF AGREEMENT made and entered into this day of 18 BETWEEN of of the first part of son of the said of the second part and the SECRETARY OF STATE FOR INDIA IN COUNCIL hereinafter referred to as the Secretary of State of the third part. Whereby each of the parties hereto so far as the covenants and conditions on his own part are to be observed and performed covenants with the other of them as follows:—

1. The said hereby of his own free will and consent and with the approbation and consent of the said testified by the execution by him of these presents agrees with and to the Secretary of State his successors in office and assigns that he the said shall well and faithfully pursue his studies at the Government Forest School, Dehra Dun, and qualify for the Forest Service of the Government of British India or of any Local Government.

2. The said shall after completing his studies at the said Forest School and if so required to do serve the Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department.

3. The Secretary of State his successors in office and assigns hereby engages to educate the said at the Dehra Dun Forest School in all matters relating to forest service forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said

4. The Secretary of State shall pay the said during the whole period of his stay at the said School at and after the rate of Rs. per month and thereafter while the said shall faithfully and diligently serve

as an officer of the said Forest Department at and after the rate of not less than Rs. per month and the said shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time by the Rules and Regulations of the Department.

5. Lastly it is hereby agreed and declared that the Secretary of State his successors in office or assigns shall be at liberty to rescind this agreement on account of the negligence failure to attend to duty idleness or any insubordination or misconduct on the part of the said and to dismiss him from the said Forest School or the service of the said Department and the said shall not be entitled to any of the privileges hereby imposed on him but the said or shall thereupon refund to the Secretary of State his successors in office and assigns the total cost including the monthly payments made to the said while at the said School incurred by the Secretary of State or his successors in office or assigns in respect of the education of the said at the said School. IN WITNESS whereof the said parties to these presents have hereunto set their respective hands and seals the day and year first above written.

KNOW ALL MEN by these presents that we of (principal obligor) of and of (sureties) are jointly and severally bound to the SECRETARY OF STATE FOR INDIA IN COUNCIL in the sum of Rs. to be paid to the said Secretary of State his successors in office or assigns or his or their certain attorney or attorneys for which payment well and truly to be made we bind ourselves our heirs executors administrators and representatives and each of us binds himself his heirs executors administrators and representatives firmly by these presents sealed with our seals and dated this day of 18 .

WHEREAS the Secretary of State for India in Council for himself and his successors in office and assigns has engaged to educate the said at the Dehra Dun Forest School in all matters relating to forest science forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said and has also agreed to pay him during the whole period of his stay at the said School at and after the rate of rupees per month and whereas the cost per annum of such education without any such allowance being included is estimated to be Rs. which shall be taken to be the actual cost for the purpose of these presents and whereas in consideration of such education and pay to be given to the said as aforesaid by the said Secretary of State and his successors in office and assigns the said has agreed with the said Secretary of State his successors in office and assigns that he will after completing his studies at the said School and if required to do so serve in the Forest Department of the Government of British India for a period of not less than five years during the whole of which time he will diligently and efficiently do all acts and discharge all duties which may be required of him to be done in his capacity as an officer of the said Department. AND WHEREAS the said Secretary of State has also on his part agreed that the said shall be paid for such service at and after the rate of not less than rupees per month and shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time being by the Rules and Regulations of the Department. AND WHEREAS for the purpose of securing and indemnifying the said Secretary of State his successors in office and assigns against all loss and damage which he or they might or may in any way suffer by reason of the said leaving without permission the service of the said Secretary of State his successors in office or assigns in less than five years after the completion of his studies at the said School and for the purpose also of securing the refund to the said Secretary of State his successors in office and assigns of the total cost including the monthly payments made to the said while at the said School incurred by the said Secretary of State or his successors in office or assigns in respect of the education of the said at the said School and in consideration of the payment and education so as aforesaid to be made and given to the said at the said School and as one of the conditions of the admission of the said to the said School it has also been agreed that the said and the said and as his sureties should execute the above-written Bond subject to the condition hereinafter contained. Now the condition of the above-written Bond or obligation is such that if the said shall well and faithfully and diligently pursue his studies at the said School and qualify for the said Forest Service and shall also after completing his studies at the said Forest School and if so required to do serve the said Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department and if the said and or either of them their or either of their heirs executors administrators and representatives shall well and truly indemnify the said Secretary of State his successors in office and assigns against all loss and

damage which he or they might or may in any way suffer by reason of the said giving cause for dismissal either while at the said school or while in the service of Government thereafter or of his leaving the service of the said Secretary of State his successors in office or assigns without permission in less than five years after the completion of the studies of the said at the said school and if the said and or either of them their or either of their heirs executors administrators or representatives shall also pay to the said Secretary of State his successors in office or assigns all sum or sums in any way expended paid or incurred by the said Secretary of State his successors in office or assigns in respect of the education of the said at the said school then the above-written bond or obligation shall be void otherwise the same shall remain in full force and virtue. PROVIDED ALWAYS and it is hereby expressly agreed and declared that these presents shall be treated and considered as entered into under the orders of the Government of India for the performance by the said and and of a public duty and an act in which the public are interested within the meaning of section 74 of Act IX of 1872 of the Legislative Council of India.

IN WITNESS, &c.

Notification by the Government of India, Finance and Commerce Department, No. 4760S.R., dated Calcutta, the 29th November 1892.

IN exercise of the powers conferred by section 8 of the Indian Stamp Act (I of 1879), the Governor-General in Council is pleased to remit the duties payable on the agreements and security-bonds required to be executed, under the rules to regulate appointments and promotions in the Provincial Forest Service, by students and their sureties previous to entry into the Forest School, Dehra Dun.

INTERNATIONAL EXHIBITION OF ARTS AND MANUFACTURE TO BE HELD AT ANTWERP IN 1894.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secy. to the Govt. of Bengal.

REVENUE DEPT.,
The 15*th August* 1893.

No. $\frac{2634}{51}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Museums and Exhibitions),—dated Simla, the 4*th August* 1893.

READ—

Letter dated 21st June 1893 from the Consul-General for Belgium, Bombay, intimating that an International Exhibition will be held at Antwerp between the months of May and November 1894, and inviting the co-operation of the Government of India.

RESOLUTION.

THE Consul-General has been informed that the Governor-General in Council regrets that financial considerations prevent any extensive contributions being furnished by the Government of India itself. Arrangements will, however, be made by the Reporter on Economic Products to contribute a collection of products either likely to be useful to Indo-Belgian trade or calculated to attract Belgian capital to India. A small grant of money will be allowed for the freight of this collection and of such articles as may be provided by private exhibitors and approved by the Reporter on Economic Products. The Inspector-General of Forests has also been instructed to arrange for a collection of forest products and timbers which are likely to find a demand on the Continent. As regards the representation of artware, one of the leading dealers in Indian art manufactures has been informed that if he is prepared to exhibit a collection of such manufactures the space required at the Exhibition will be provided at the cost of Government.

Mr. E. Thurston, Officiating Reporter on Economic Products, has been placed in charge of arrangements so far as the participation by the Government of India in the Exhibition is concerned. But the general conduct of arrangements for representation of Indian exhibitors will be undertaken by the Consul-General, Bombay, and by the Indian Consular Agents for Belgium at Calcutta, Bombay, Madras, Karachi and Rangoon, and intending exhibitors should apply to them for any information which they may require.

ORDER.—Ordered that the Resolution be published in the Supplement to the *Gazette of India* for general information, and that copies be forwarded to all Local Governments and Administrations with a request that the above information regarding the Exhibition may be notified in the local Gazettes.

[True Extract.]

E. D. MACLAGAN,

Under-Secy. to the Govt. of India.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 12th August 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Aug. 12, '93 Kalna ... Katwa ... Raniganj ...	2·69 3·31 1·24 1·64	Ordinary monsoon weather. Transplantation nearly over. *Aus* and sugarcane doing well. Prices of common rice :— Srs. Burdwan ... ... 10 to 12 } Kalna ... ... 9 to 12½ } per rupee. Katwa ... ... 11¾ } Raniganj ... ... 13 }
	2	Bankura ,, 12, '93 Vishnupur .	2·85 0·67	Weather—seasonable. Transplantation of *aman* rice still going on in places. *Aus* plants coming on well. Common rice selling at — Srs. Bankura ... ... 13½ } Vishnupur ... ... 12 } per rupee.

	4	Midnapore ,, 12, '93	2·31	Weather—cloudy. There has been more or less rain all over the district. Cyclone in Contai. Prospects of crops good except in parts of Patashpur and Bhagabanpur where the land is submerged under water. Indigo and sugarcane doing well. Transplantation of *haimanti* crops going on. No want of water and fodder. No cattle-disease. Prices of common rice :— Srs. Sadar ... ... 11 } Contai ... ... 12½ } Tamluk ... ... 10 to 11 } per rupee. Ghatal .. .. 10 }
	5	Hooghly ,, 12, '93 Serampore .. Jahanabad ...	2·76 4·03 1·11	Weather—seasonable. Jute and *aus* doing well; harvesting of both commencing. Transplantation of *aman* nearly finished; prospects generally favourable. Prices of common rice :— Srs. Sadar ... ... 10 to 11 } Serampore ... ... 10 to 11½ } per rupee. Jahanabad ... ... 9 to 11 }
	6	Howrah ,, 12, '93 Uluberia ...	1·85 1·48	Weather—seasonable. Transplantation of *aman* paddy continues. Sugarcane, jute and paddy doing pretty well. Condition of cattle good. No cattle-disease. Fodder and water-supply sufficient. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas ,, 12, '93	2·47	Weather—seasonable. Transplantation of *aman* going on except in the tracts under water. *Aus* and jute injured by excess of rain. Prospects of crops not favourable in the south of the district, but fair elsewhere. Prices of common rice :— Srs. Sadar .. .. 10 to 10¾ } Diamond Harbour ... ... 11 } Barasat ... ... 10 } per rupee. Basirhat ... ... 10 }
	8	Nadia ,, 12, '93 Kushtia Meherpur ... Chuadanga ... Ranaghat ..	3·26 3·28 2·20 2·26 1·27	Weather—hot with heavy showers. Prospects of crops fair. Transplantation of *aman* rice continues. Harvest of early rice proceeds. Prices stationary.
	9	Khulna ,, 12, '93 Bagerhat ... Satkhira ...	8·65 8·54 7·19	Weather— cloudy with very heavy rain about the middle of the week. Transplantation of *aman* going on. Both *aus* and *aman* in Khulna thana in Sadar and in many parts of Satkhira and Bagerhat badly damaged by the heavy rain and the sudden rise of the rivers. If the water does not subside soon there will be serious loss. Jute badly damaged in Bagerhat. Coarse rice selling at 9 or 10 seers per rupee. Fodder sufficient.
	10	Jessore ,, 12, '93 Jhenida ... Magura ... Narail . Bangaon ..	3·57 3·20 1·45 5·08 3·32	Weather—cloudy and rainy. Harvesting of *aus*, transplantation of *aman*, and jute extracting going on. Fodder and water for cattle sufficient. Prices steady.
	11	Murshidabad ,, 12, '93	3·17	Weather—seasonable. Transplantation of *aman* nearly finished. Harvesting of *bhadoi* continues. State of jute, mulberry and sugarcane appears to be good. Fodder sufficient for cattle. Coarse rice sells at 11 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Aug. 12, '93	8·30	Weather—seasonable. *Aus* being still harvested and *aman* transplanted. Prospects not good. In some places in the Sadar sub-division the standing crops have been damaged by insects, and in Garjonia in the Cox's Bazar subdivision an insect called *chuna poka* is reported to have made appearance. Prices rising. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	„ 12, '93	11·16	Almost continuous rain with occasional break. State and prospects of crops not good. Cattle-disease abating. Fodder not available in sufficient quantities. Common rice selling at 10 seers per rupee.
	14	Tippera	„ 12, '93	8·36	Constant rain throughout the week; no sunshine at all. If the floods in the north of the district rise no higher *aman* will do well: *aus* is a poor crop, and in several small tracts has been totally destroyed by rapid rise and strong current of floods. Rice selling at 10 seers per rupee.
	15	Chittagong Hill Tracts.	„ 11, '93	5·30	Weather—cloudy and rainy. Paddy plants in *jum* are forming ear in some places. *Aus* paddy in low lands progressing. Price of common rice 10 seers per rupee. No cattle-disease reported.
DACCA DIVN.	16	Dacca	„ 12, '93	Figures not furnished	Weather—cloudy and rainy with high wind. Harvesting of *aus* and jute going on. These crops have been partially damaged by the floods. If the floods do not subside soon and if the wind continues higher the *aman* crop is likely to be damaged. Common rice selling at 8 to 10 seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	„ 12, '93	5·55 3·56 4·42	Weather—seasonable. *Aus* is being cut and jute-steeping going on. Rivers rising, and the condition of the *aman* on high lands is still hopeful. The *aman* on low lands much damaged by rain. Common rice sells from 10 to 12 seers per rupee. Condition of cattle good generally, but cattle-disease continues in thanas Palang and Shibchar in Madaripur.
	18	Backergunge Pirojpur Patuakhali Bhola	„ 12, '93	5·59	Weather—seasonable. State and prospects of crops not promising. The standing crops have been damaged in places by the flood and heavy rain. Common rice is being sold from 8 to 10 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 12, '93	7·93	Weather—rainy throughout the week. *Aus* and jute are being reaped. Considerable damage has been caused to these crops by heavy rain, and the outturn is not expected to be more than 10 annas. Transplantation of *aman* going on, but is impeded by heavy rain. Common rice selling at 9 to 10 seers per rupee. Condition of cattle good. Supply of fodder sufficient except in Badla station.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 12, '93 ..	7·83 5·84	Weather—wet and rainy. Standing crops doing well. No more rain wanted at present. Transplantation of *haimanti* still going on. Jute being cut and steeped. Price of rice at Sadar 13¼ seers per rupee; that at Thakurgaon unchanged. Cattle in good condition. Fodder and drinking water sufficient.
	21	Rajshahi Nator Naugaon	„ 12, '93	4·48 2·67 0·74	Weather—seasonable and rainy. The general condition of the crops is reported to be good, but we are still having more rain than we want. There is no cattle-disease. Fodder and water-supply ample. Price of rice varies from 10 to 13 seers per rupee.
	22	Rangpur Kurigaon Gaibanda Nilphamari	„ 12, '93	8·18 7·26 1·91 5·99	Heavy rain during the week. The rain came opportunely after a long break. Transplantation of *aman* going on. Common rice 11 to 13 seers per rupee.
	23	Bogra Sherpur Naukhila	„ 12, '93	2·49 3·85 3·89	Heavy rain in the latter part of the week. Transplantation of *aman* goes on. Cutting of jute has commenced; probable outturn estimated at 12 annas. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 12, '93	5·92	Weather—cloudy and rainy. Raining every day. *Aus* and jute are being cut. Common rice sells at 10¼ seers per rupee at Pabna and Rs. 3-14 to Rs. 4-2 per maund at Sirajganj. Fodder and water-supply sufficient.
	25	Darjeeling Siliguri	„ 12, '93 ...	14·58 3·83	Weather - rainy. *In the hills*:—Indian-corn, *kangni*, *shama*, potatoes and *phaphur* being harvested. *Bhadoi* ripening. *Aghani* paddy and *bara marua* progressing favourably. *Chota marua* flowering. *In the Terai*:—Harvesting of *bhadoi* going on. Transplanting of *haimanti* continues. Jute doing well. Prices of coarse rice:— Srs. Hills ... . 9 } per rupee. Terai ... ... 10 }
	26	Jalpaiguri	„ 12, '93	14·11	Weather—rainy. Harvesting of *bhadoi* continues. Transplantation of *haimanti* still going on. Prospects of jute good. Common rice sells at 11 seers per rupee. Fodder and water sufficient. No cattle-disease reported.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Aug. 12, '93 Begusarai ... Jamui ...	4·35 2·78 3·29	Weather—cloudy with frequent showers. *Bhadoi* crops on the low lands are damaged to a certain extent; high land crops are doing well. Transplantation of *aghani* is being vigorously pushed on. Indigo and sugarcane doing well. Fodder and water plentiful. Small-pox among cattle towards Nawadi, Sheikhpura and Bukhtiarpur. Prices of common rice:— Srs. Sadar ... ... 11 to 13¼ } Begusarai ... ... 13 } per rupee. Jamui ... ... 12 }
28	Bhagalpur „ 12, '93 Banka ... Madhipura ... Supaul ...	4·09 1·46 2·75 4·49	The *marua* and *makai* crops will yield about 8 annas. Indigo 14 annas. Transplantation in progress. Prospects of *bhadoi* and winter rice good. Price of common rice 13 seers 14 chittaks per rupee.
29	Purnea „ 12, '93 Kishanganj ... Araria ...	3·83 6·35 7·25	Weather—hot at the beginning of the week, but rainy towards the end. It has become cooler. *Bhadoi* doing well in most parts and being cut in Kishanganj. Transplantation of *aghani* progressing. The heavy rainfall in the subdivisions has done much good. Jute doing well in Sadar and Arraria. It is being steeped in Kishanganj, where new jute is being exported. No cattle-disease. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 10 to 14 } Kishanganj ... ... 13 } per rupee. Arraria ... ... 16 }
30	Malda „ 12, '93	5·76	Weather—first part of the week fair; latterly hot and cloudy with frequent heavy showers. Harvesting of *bhadoi* paddy continues; estimated outturn not less than 16 annas. Transplanting of winter paddy not yet finished. Coarse rice selling at from 11 to 16 seers per rupee. No want of fodder or drinking water.
31	Sonthal Parganas „ 12, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	5·46 1·17 1·37 2·22 3·5 1·22	Weather—sunshine at intervals and many heavy showers. Prospects of Indian-corn very poor—probably from 4 to 8 annas. Paddy nearly all transplanted. Prospects good. *Bhadoi* paddy being cut. Prices unchanged. Fodder plentiful.
PATNA DIVISION.			
32	Patna „ 12, '93 Barh ... Bihar ... Dinapore ...	4·05 3·80 2·46 2·57	Weather—cloudy and rainy. There has been heavy rain during the latter part of the week, which is sufficient for the transplantation of paddy now in full progress. It is, however, not favourable for *bhadoi* crops on low lands. *Cheena* is being harvested. Prices of common rice:— Srs. Sadar ... ... 15 } Barh ... ... 12 or 12½ } Bihar ... ... 15 } per rupee. Dinapore ... ... 13 }
33	Gaya „ 12, '93 Jahanabad ... Aurangabad ... Nawada ...	2·86 1·31 0·99 3·4	Weather—seasonable. Paddy transplantation going on. Harvesting of *marua* commenced in places. Prices stationary. Fodder and water-supply sufficient.
34	Shahabad „ 12, '93 Buxar ... Bhabhua ... Sasaram ...	4·71 3·62 4·15 4·04	Weather—cloudy skies with westerly winds and frequent heavy showers. *Bhadoi* has been damaged in some localities by excessive rain. A break is now wanted. Young *kharif* is looking splendid.
35	Darbhanga „ 12, '93 Samastipur ... Madhubani ...	7·57 3·22 1·81	Weather—rainy almost throughout the week. Prospects of *bhadoi* unfavourably affected by continued heavy showers. Rivers also are in floods, and much damage is apprehended to *makai* and other *bhadoi* crops on low lying lands. Paddy is also being washed away in places. Fine weather is very much needed everywhere. Prices remain stationary.
36	Muzaffarpur „ 12, '93 Hajipur ... Sitamarhi ...	6·83 3·10 2·90	Weather—somewhat rainy. *Bhadoi* generally damaged by excessive rain. Floods in Sitamarhi and Sadar and Katra and Paru thanas have destroyed much *makai*. Paddy on low lands in Sitamarhi washed away, but will be retransplanted. Fodder and water sufficient. No disease among cattle.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*					
PATNA DIVISION—*concld.*	37	Saran	Aug. 12, '93	3·38	Weather—fair during the first two days of the week; showery since Monday (5th). Maize crop much improved by the break in the rains. What areas had not been transplanted with paddy have now been transplanted with the favourable rain now falling. The Gogra is rising and supplying water to higher paddy lands. Prospects on the whole which were fair have improved. Fodder and water sufficient. Prices of common rice:— Srs. Chapra ... ... 13, Siwan ... ... 13, Gopalganj ... ... 13 } per rupee.
		Siwan	...	2·39	
		Gopalganj	...	2·66	
	38	Champaran	„ 12, '93	8·18	Heavy rain every day, and latterly almost incessant though less heavy rain. Transplantation of paddy is generally in abeyance in consequence of incessant rain. *Makai* damaged by flood. No cattle-disease. Fodder and water sufficient. Prices stationary.
ORISSA.					
ORISSA DIVN.	39	Cuttack	„ 12, '93	3·70	Weather—cloudy with occasional heavy showers. *Beali* in ear. *Sarad* being transplanted. Supply of fodder sufficient. Price of common rice almost unchanged.
	40	Puri	„ 10, '93	4·20	Weather—stormy with frequent showers. Sufficient rain has fallen all over the district. Agricultural operations are in good progress. *Beali* is in ear. Miscellaneous crops doing well. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 12 8 to 17 5, Khurda ... ... 11 0 to 17 1 } per rupee.
		Khurda	...	3·20	
		Banpur	...	1·47	
	41	Balasore	„ 12, '93	5·78	Weather—cloudy with showers. Winter rice 12-anna crop expected. Transplantation still going on. The winter crop will be very late. More rain required. In Bhadrak *beali* 15-anna crop expected. Prices of common rice stationary:— Srs. Balasore ... ... 13, Bhadrak ... ... 15 } per rupee.
CHOTA NAGPUR. *South-West Frontier Agency.*					
CHOTA NAGPUR DIVN.	42	Hazaribagh	Aug. 12, '93	3·69	Weather—cloudy with frequent showers. Paddy and *marua* transplanted. *Goondli* being harvested. Excessive rain damaged *bhadoi* crops. Prospect of paddy fair at present. Prices stationary.
	43	Lohardaga	„ 12, '93	4·90	Weather—seasonable. Transplantation of winter paddy nearly finished. Prospects of *bhadoi* good. *Goondli* and *makai* are being reaped. Common rice selling at 14 seers per rupee. Fodder and water plentiful.
	44	Palamau	„ 11, '93	2·96	Heavy rain during the week. *Bhadoi* seriously damaged. Transplantation of paddy in full swing. Cattle-disease reported from some parts. Prices slightly rising.
	45	Singhbhum	„ 12, '93	3·53	Weather—seasonable. There has been a good deal of sunshine this week which will do great good. The condition of the crops is good everywhere. Cattle-disease on a small scale reported from Kolhan. Prices of common rice stationary.
	46	Manbhum	„ 12, '93	4·33	Weather—stormy and damp with occasional sunshine. Rice crop doing well. Indian-corn coming into market. Outturn will be meagre. Prices of rice 10 to 12 seers per rupee. Fodder and water sufficient.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1893.

A VERY noticeable feature of the pressure arrangement during July has been the displacement of the trough of low pressure towards the north. This trough usually extends from the head of the Bay in a north-westerly direction, and when it occupies its normal position there is a free easterly air current up the plane of the Ganges. During the past month it has very frequently been close to the foot of the hills, and then, instead of the easterly winds in North Bengal and Bihar, directions have been westerly. As in that case the wind blows from the Central Provinces, the air is not so highly saturated with moisture, and under ordinary circumstances gives very little rain to the districts where westerly winds prevail.

In the light of these remarks it appears easy to account for the great variation of rainfall during July in the various districts, with the exception of North Bihar, where the very heavy falls are not so easily dealt with. The strength of the monsoon current crossing the Burma and Bengal coasts is very little affected by the position of the trough of low pressure till the current is well inland. Instead of moving westward across North Bengal when the trough is near the hills, the pressure distribution bars its progress, and whether because of interference of two different air currents, or because the moist current from the Bay is forced upward, there is under these circumstances much more precipitation of moisture in North Bengal and the adjoining districts of East Bengal and Assam.

During the past month these conditions have obtained very frequently. Rainfall has been scanty in Orissa and South-West Bengal, normal in East Bengal, and much above the normal in North Bengal and North Bihar. The large average excess in North Bengal is, as stated above, due to the monsoon current undergoing the check to its westward progress over that part of the province. The almost as large excess of 6¼ inches in North Bihar is probably due to the monsoon current moving westwards at a higher level, gradually descending as it gets further west. That this is possible is shown by the excess rainfall in the various districts of North Bihar with the exception of Champaran. Excess gradually diminishes from 77 per cent. of the normal fall in Purneah to 51 in Bhagalpur, 40 in Darbhanga and Muzaffarpur and only 4 in Saran. The large excess of 113 per cent. in Champaran is probably due to local conditions. The rainfall in Chota Nagpur and South Bihar is about 2 inches above the normal, a small excess, which is probably due to these districts being partly affected by the conditions which determined the defect in Orissa and the larger excess in North Bihar.

Another noteworthy circumstance in connection with the general weather conditions is the almost entire absence of depressions in the north of the Bay. An important disturbance developed over Lower Bengal at the end of June, but by the beginning of July the normal distribution of pressure prevailed. There was little change up till the 15th, when a shallow depression again formed over Lower Bengal and practically disappeared on the following day. Another and somewhat deeper depression formed on the 29th in the north-west angle of the Bay, where it remained till the end of the month, developing slowly and causing much steeper gradients towards the south, a cyclonic circulation over the Bay and the province, and stronger winds.

At the beginning of the month pressure was in excess by more than a tenth of an inch in Lower Bengal and the west of Bihar, while readings were practically normal in North Bengal and Assam. A low pressure area lay along the foot of the Himalayas, and winds were westerly in all districts. From the 2nd to the 4th heavy rain fell in Bihar, North Bengal and East Bengal. Owing to a steady fall of pressure which then commenced, the distribution of pressure became normal by the 5th, and the usual south-easterly winds prevailed except in Orissa and South-West Bengal. Pressure fell briskly in the northern districts on the 10th, the trough of low pressure moved close to the hills and westerly winds again prevailed. As before, heavy rain was reported from North Bengal, but especially Rangpur, Jalpaiguri and Kuch Bihar. At the same time there was a high pressure area over the north-west of the Bay and the adjacent country, which was attended in these parts by fine and almost rainless weather. Up till the 13th there was little change, but then pressure began to fall in Lower Bengal, and the shallow depression mentioned above began to form. Local storms occurred in the south of the province, and rainfall became lighter in the northern districts. The cyclonic circulation continued for two or three days, but by the 16th normal pressure and wind circulation were established. General rain fell for some days with the heaviest falls in the western districts. Up till the 21st no change of importance took place, and almost general rain was falling. On the 22nd, however, a further extension of the westerly winds took place over the province, accompanied by a distinct area of relatively high pressure in the south-western districts. With this change the area of heavy rainfall was shifted towards the east and north, and conditions became unfavourable for rain in Orissa and South-West Bengal. "On the 24th there was a general fall of pressure over the province, and the distribution became rather more normal than it had been, but sout h-westerly winds still prevailed in most districts. On the 25th pressure again fell in Orissa, and partly in the southern districts, while it was rising elsewhere, particularly in Bihar, so that the area of

high pressure in the extreme west of the province tended to re-establish itself. This was succeeded on the 26th by a further rather rapid and general increase of pressure, and a decided area of comparatively high pressure again covered the western half of the province, and this area gradually extended on the 27th and 28th until it reached South-East Bengal; but on the 29th a moderate fall of pressure commenced, tending to partially efface this abnormal distribution of pressure." On the 30th a shallow low pressure area formed over the north of the Bay, where it remained till the 31st, with only a slight increase of intensity. General light rain fell in all districts during these days, and a light cyclonic circulation prevailed.

Pressure.—Mean pressure for the month has been above the normal in all districts by about ·04 inch in Lower Bengal, Orissa and the west of Bihar, and by rather more than ·02 inch in North Bengal and Assam. The changes from day to day have never been of much importance because of the occurrence of only two depressions which remained very shallow during the short time of their existence. At the beginning of the month there was excess of between ·1 inch and ·15 inch in the north-west of the Bay, Orissa and South-West Bengal, but a steady fall resulted in a general small defect on the 5th. On the 6th a wave of rising pressure was moving across the province from the east, and readings on the 7th were again considerably above the normal, continuing high till the 12th, when the distribution was very nearly normal. From the 13th to the 17th there was either a small defect or a very slight difference from the normal, and till the 24th a small excess. From the 24th to the 30th there was moderate excess, but during the last two days the depression was forming over the north of the Bay and defect prevailed.

Temperature.—Except in Orissa, where temperature has been practically normal, means for the month are below the normal for all districts. In Assam defect is 2·1°, North Bengal 1·6°, North Bihar 1·2°, South Bihar 0·9°, East Bengal 0·7°, South-West Bengal 0·5°, and Chota Nagpur 0·4°. Owing to the cloudy weather which has been more prevalent than usual in East and North Bengal, Assam, and Bihar, the difference is greater in day than in night temperatures. The difference of mean maximum temperature from the normal varies from excess of about half a degree in Orissa to defect of nearly 4° at Rangpur, Mymensingh and Silchar. Night temperatures on an average are almost normal except at a few scattered places, defect being generally less than half a degree. During the previous month lowest temperatures were in the western districts and especially Chota Nagpur, but during July the heavy rainfall has caused cooler weather in the northern and eastern districts.

Rainfall.—The most noticeable circumstance in connection with the rainfall has been the very heavy falls in North Bengal and North Bihar, while in Orissa there is a deficiency of nearly a third of the normal. This has been accounted for above by the pressure arrangement which was very persistent throughout the month. The total average fall in North Bengal is 23·39 inches, giving excess of 9·31 inches, and in North Bihar it is 18·41, with excess of 6·23 inches. In South Bihar and Chota Nagpur excess is between 2·5 and 3 inches, and in South-West and East Bengal the average falls are very nearly normal. In Orissa the fall is 8·41 inches as compared with a normal fall of 12·5 inches. Though not so irregular as during the month of June, there is still greater irregularity shown than is usual during July.

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1893 expressed as a percentage of the normal fall for the period.
Orissa	422	309	238	89	607	99	67	169
South-West Bengal	120	464	160	115	225	183	94	160
North Bengal	104	377	145	213	96	100	166	131
East Bengal	80	291	123	149	207	134	103	139
North Bihar	170	357	134	208	84	100	151	132
South Bihar	115	602	188	255	171	156	122	149
Chota Nagpur	155	585	226	151	212	185	121	167

Except in the extreme east, the total falls for the month are below the normal in Lower Bengal, the coast districts of Orissa, and the southern districts of Chota Nagpur including Lohardaga and Singhbhum. Along the coast of Orissa little more and in many cases less than 5 inches have been received. In the other parts of Orissa and the adjacent districts of Chota Nagpur and South-West Bengal, also in part of East Bengal, including the greater part of Jessore and Faridpur, falls are generally between 8 and 10 inches. Over the rest of the southern part of the province falls vary somewhat irregular, from 10 to 15 inches except in the Sunderbuns, Noakhali and Chittagong, where amounts range up to 30 inches. In the north of East Bengal, North Bengal, and North Bihar the normal is almost everywhere exceeded, but by very irregular amounts. In Mymensingh excess varies from 4 to 18 inches, in Kuch Bihar from 18 to 34 inches, and in Jalpaiguri

from 12 to 20 inches. In North Bihar excess is nearly 10 inches in Purneah, but diminishes steadily towards the west, where it is small except in the districts near the foot of the hills. In Champaran there is excess of 21, in Sitarampur of 11, and in Bettiah of 8 inches. Along the boundary of North Bengal and Assam falls increase with great rapidity towards the north. Ulipur received 17·36, Sundergunj 22·2, Kurigaon 35·9, Dinhatta 39·65, and Matabhanga 56·68 inches. The heaviest fall reported is 67·27 inches at Buxa, an amount about 20 inches in excess of the normal. In these northern districts falls are almost all from 30 inches upwards except in the Darjeeling Hills, where they are between 20 and 25 inches. Except at the most northern stations in North Bihar falls are generally between 15 and 20 inches. Sitamarhi received 21·66, Motihari 31·92, Bettiah 21·22, and Bagaha 25·53 inches.

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past fifteeen years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage, and the fourth column gives the same information in a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall:—

Percentage Table for July 1893.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i. e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 12th of August 1893.

DISTRICT OBSERVATIONS.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th May 1893. Mean for district.	Since 16th May 1893. Normal mean.	Since 16th May 1893. Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 15th August* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 12TH OF AUGUST 1893.

At the beginning of the week rainfall was very partial, except in South Bihar, Chota Nagpur and part of East Bengal. Though rain was general in these districts, only a few stations, chiefly in the west of the province, reported falls of any importance. A low pressure area was beginning to develop, and pressure changes were relatively large, as there was a brisk rise in Bihar, North Bengal and Assam, and a fall generally slow over the Bay. The fall continued with greater rapidity in the north-west angle on Monday, the 7th, and the depression became better defined with its centre between False Point and Saugor Island. The cyclonic circulation was almost complete, and gradients were steep over the Bay. The depression moving to the north-west was over Chota Nagpur on Tuesday, and as on that day a brisk rise of pressure had commenced in Burmah and the south-east of the Bay, while there was a brisk fall in Chota Nagpur, gradients were much steeper both over the Bay and over Bengal. This distribution of pressure led to strong winds, especially near the head of the Bay, and to general rainfall, which was not heavy in Lower Bengal, but became very heavy in the northern districts. The wave of rising pressure, which was advancing from the south-east, caused very large changes in the north of the Bay and Lower Bengal on Wednesday, the 9th; and as there were only very small changes in North Bengal and North Bihar, this had the effect of forcing the steep gradients northwards over Bengal, while in the south-east of the Bay the distribution became very uniform. Velocity in the north-west angle of the Bay was then about 40 miles an hour; and as the rising pressure was in some way checked, the gradients remained steeper than usual for several days, and the high winds moderated very gradually.

The full effect of the strong monsoon which had developed in the Bay then became felt in Bengal. The trough of low pressure had been forced close up to the hills by the rapid rise on the 9th, and westerly winds began in all districts. This arrangement has been very frequent during the past few weeks, and as on previous occasions it led to very heavy rain first in East Bengal, but chiefly in North Bengal and North Bihar. A slow to brisk fall of pressure that followed the above-mentioned rapid rise kept readings low in the northern districts, and though there was a tendency to recover at the end of the week, gradients were still much steeper over Bengal than usual. During the last three days of the week there was little change in the south of the Bay, light to moderate westerly winds prevailed with very little rain, and in the north-west angle the wind was gradually moderating, while rainfall had almost entirely ceased in the adjacent districts.

Pressure.—As stated above pressure changes have been comparatively large, leading at first to the formation of the shallow depression in the north-west of the Bay, and then to the very steep gradients over the Bay in the early part of the week and over Bengal during the latter half. Mean pressure for the week differs very little from the normal.

Temperature.—While the depression was forming and the sky was moderately clear, temperature was above the normal in all districts, but after it moved to the north-west, and strong moisture laden winds became general over the province, there was a rapid fall which led to a uniform defect of about 8°, on Wednesday, the 9th. Cool weather then continued till the end of the week. Temperature, however, was beginning to rise in Lower Bengal, and as heavy rain fell daily in the northern districts, defect increased, in some places to 5° or more. Mean defect for the larger divisions varies from 0·°8 in South-West Bengal to 2·°2 in Assam.

Rainfall.—As stated above general rain has fallen except during the first two days in nearly all districts, and again towards the end of the week in Orissa, Chota Nagpur and part of South-West Bengal. The falls during the last three days were unusually heavy in East and North Bengal and North Bihar. This is shown by the average fall in these districts being double the normal. In North Bengal the fall is 6·9 inches as compared with a normal fall of 3·45, in East Bengal 7·81 as compared with 4·09, and in North Bihar 6·42 as compared with 3·13. In South Bihar there is a smaller excess of 1·53 inches, but in the other districts there is a deficiency, very slight in South-West Bengal and only a third of an inch in Orissa and Chota Nagpur.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 12th of August 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	39·88

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; p, passing temporary showers.

CONTENTS.

RESOLUTION ON THE ANNUAL REPORT OF THE GOVERNMENT CINCHONA CULTIVATION AND CINCHONA FACTORY IN BENGAL FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th August 1893.

RESOLUTION No. 4014Mis.

READ—

The Annual Report on the Government Cinchona Cultivation and Cinchona Factory in Bengal for the year 1892-93.

Read again—

The corresponding report for the year 1891-92.

Unlike the two previous years, there was nothing abnormal in the climatic conditions of the year under review, and though the rainfall was slightly above the average, it was well distributed throughout the rainy season.

2. The policy of replacing the red bark trees which yield the cinchona febrifuge, by the *ledgeriana* and hybrid varieties, which yield quinine, was steadily adhered to. Two hundred thousand trees of the former kind were uprooted and not renewed, and 184,110 seedlings of the latter were put out in the plantation. The number of cinchona plants, including the nursery stock, at the Government plantations on the 1st April 1893 was 4,331,651. The crop of the year amounted to 304,390 lbs. of dry bark, of which 90,170 lbs. were of the kind known as *succirubra*, or red bark, 118,210 lbs. of the *ledgeriana*, 78,310 lbs. of hybrid, 15,900 lbs. of *verde* and *morada*, and 1,800 lbs. of *officinalis*. With the exception of 1,280½ lbs. of bark supplied on indent or sold to the public, the whole of this crop was as usual made over to the factory.

3. The outturn of the factory was 5,242 lbs. of sulphate of quinine and 3,481 lbs. of cinchona febrifuge, against 4,586 lbs. and 4,190 lbs. respectively in 1891-92. The proportion of the outturn of quinine to cinchona febrifuge is steadily on the increase every year, and there seems to be little doubt that in course of time the factory will be called upon to produce the former drug exclusively. The following statement compares the issues of the year with those of the preceding year:—

	1891-92.			1892-93.		
	Sulphate of quinine.	Cinchona febrifuge.	Total.	Sulphate of quinine.	Cinchona febrifuge.	Total.
	lbs. oz.	lbs. oz.	lbs. oz.	lbs. oz.	lbs. oz.	lbs. oz.

Dr. King explains that the quantity shown in the above statement as issued to the Inspector-General of Civil Hospitals, Bengal, during 1892-93 does not take into account 137 lbs. of quinine and 97 lbs. of cinchona febrifuge issued to dispensaries under District and Local Boards. These issues, which are paid for in cash, are, it is stated, included in the gross sales to public officers. Dr. King further explains, with reference to the enquiry made in last year's Resolution, that the medical depôt at Bombay now takes its supply of the drugs from the Nilgiri Factory under the Government of Madras.

4. The revenue derived from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantations, reached the sum of Rs. 1,17,767-15-6 against Rs. 1,09,321-12-9 in the previous year:—

	1892-93.			1891-92.		
	Rs.	A.	P.	Rs.	A.	P.
By sale of febribuge, sulphate of quinine, &c. ...	65,464	5	6	60,713	7	3
By credit from the medical depôts and the Commissariat Department ...	43,305	0	0	44,363	5	6
By credit from the Inspector-General of Civil Hospitals, Bengal ...	2,005	0	0	3,118	8	0
By credit from the Inspector-General of Jails, Bengal ...	6,983	10	0	1,126	8	0
By credit from the Surgeon-General with the Government of India ...	20	0	0	......		
Total ...	1,17,767	15	6	1,09,321	12	9

The net profit on the working of the estates amounts to Rs. 3,170-14-3, against Rs. 7,962-12-8 in 1891-92. This result may be considered quite sufficient, when it is remembered that in starting the cinchona plantations in this country, the Government, so far from aiming at a profit, desired only to secure for the people without loss to itself a cheap remedy for fever.

5. The scheme for the sale of pice-packets of quinine to the public, chiefly through the medium of the Postal Department, to which reference was made in last year's Resolution, was brought into operation during the year under review, and 475 lbs. were issued, to the Inspector-General of Jails, Bengal, to be made up into packets by convict labour. Dr. King remarks with justifiable satisfaction that "after thirty years of effort the end has now been attained which the Government set before itself when the growth of the medical cinchonas was begun in British India."

5. The thanks of Government are again due to Dr. King and Mr. Gammie for their efficient management of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1892-93.

No. 27C, dated Royal Botanic Garden, Sibpur, the 14th July 1893.

From—BRIGADE-SURGEON LIEUTENANT-COLONEL GEORGE KING, M.B., LL.D., C.I.E., F.R.S., Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to forward herewith the annual report of the Cinchona Plantations and Factory for the year 1892-93.

Thirty-first Annual Report of the Government Cinchona Plantation and Factory in British Sikkim, being that for the year 1892-93, *by* BRIGADE-SURGEON LIEUTENANT-COLONEL G. KING, M.B., LL.D., C.I.E., F.R.S., *Superintendent of the Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal.*

1. *Weather and general.*—The weather for the year under review presented no feature very worthy of remark. The rainfall on the plantation was 131·5 inches, being about 5 inches above the average. The fall was well distributed over the rainy season, and it was on no occasion so excessive within the limits of the cinchona reserve as to cause any landslips. But at the head of the valley, beyond the boundary of the plantation, there was a very heavy downpour on one morning in June, which caused numerous landslips; and the fallen trees brought down by these into the Rungjo stream swept away two of the largest bridges. The health of the population of the cinchona valley was fairly good, and no epidemic disease prevailed during the year.

2. *Changes in the Plantation.*—During the year, 466,430 cinchona trees of various sorts were uprooted. This is an unusually large number for a single year. Many of them were, however, small and feeble plants which had been spared during the clearings of previous years with the view of giving them a chance of improving a little prior to up-rootal. The resulting bark crop therefore was small compared to the number of trees removed. The uprooted trees consisted of 200,000 red (or febrifuge-producing) barks, and of 266,430 of yellow (or quinine-producing) barks of various sorts. To compensate for these removals, there were planted out, during the year, 180,710 seedlings of yellow barks (*C. Ledgeriana*) and 3,400 of the sort known as *Hybrid*. The result of these changes is that, on the 1st April, the plantation contained a grand total of all sorts (including nursery stock) of 4,331,651 plants. No red barks whatever were propagated during the year, and the entire number of this sort now left on the plantation is reduced to a little over a million. This steady diminution of the red barks is in accordance with the policy of increasing only the kinds of trees from which quinine, unmixed with the inferior alkaloids, can be most easily extracted.

3. *The year's crop.*—This consisted of 304,390 pounds, of which about 90,000 pounds were red bark, collected almost in equal proportions from the Mungpoo and Sittong divisions. The remainder consisted of yellow bark, of which about 67,000 pounds were taken from the new plantation of Rungjung in Bhotan, and the rest from the plantations of Mungpoo and Sittong. The entire crop was, as usual, made over to the factory, with the exception of 1,280½ pounds supplied to the medical depôts and sold to the public.

4. *Plantation expenditure.*—The total budget allotment for the year was Rs. 67,888. As a matter of convenience the whole of the cost of the European establishment is debited by the Accountant-General to the plantation budget. The result of this is that the cost of production of the bark is unduly increased. As a matter of fact, the time of Messrs. Gammie, senior and junior, is spent as much in the factory as in the plantation, and it would be a fairer distribution

if the expenditure on their salaries were half charged to the plantation and half to the factory. The expenditure debited by the Accountant-General to the plantation (including the Messrs. Gammie's salaries) is as follows:—

	Rs.	A.	P.
Salaries of European establishment (including all salaries except that of Dr. King, Superintendent, Botanic Gardens, Calcutta), coolie labour, and office establishment	60,681	0	8
Keep of animals for plantations	900	0	0
Contingencies, including service postage stamps, &c. ...	5,925	2	11
Travelling allowance	298	12	0
Stores from England	845	3	9
Total ...	68,650	3	4

In return for this expenditure, 304,390 pounds of dry bark were taken as a crop for the year.

5. *Factory.*—The expenditure debited to the factory during the year was Rs. 36,696-12-5. This includes a considerable expenditure on alterations to the factory plant which were undertaken to secure economy of working in future. These are charges which would really be debitable to capital, were there a capital account. But there never has been a capital account for the factory, every charge for machinery and buildings having been hitherto treated as working expenditure and set against the outturn of the factory for the year. There was also an unusually large amount spent on the purchase of a stock of oil which it was necessary to buy in just as the financial year was ending. The bark actually worked up in the factory during the year was 85,580 pounds of red bark, from which 3,481½ pounds of cinchona febrifuge were produced; and 240,666 pounds of yellow bark, from which 5,242¼ pounds of quinine were obtained. A large proportion of the bark thus used was the production of previous years, which was borne on the stock at an average value of annas 3 per pound. The total factory outturn of 8,723 pounds shows a decrease on that of 1891-92 of 53 pounds, and an increase of that of 1890-91 of 682 pounds.

6. *Sales of manufactured product.*—During the year quinine took the lead, no less than 5,518 pounds 3½ ounces having been disposed of; while of cinchona febrifuge, only 3,647 pounds were issued. The total quantity disposed of, viz., 9,165 pounds 3¼ ounces, is the highest of any year since 1882-83; and the notable feature is the increase in the proportion of quinine to cinchona febrifuge. This is of course owing to the recent great diminution in price of quinine. And there appears to be little doubt that the proportion of quinine issued will go on increasing, and that, in a very few years hence, the plantation will be called on to produce that drug exclusively, and in much larger quantity than at present. The quantity issued to the Medical depôt at Calcutta was 1,150 pounds, as against 1,022 pounds supplied during the previous year. The indent for the Meean Meer Depôt was for 1,270 pounds, while during the previous year only 712 pounds were taken. Each of these depôts took 500 pounds of cinchona febrifuge, which, as against the supplies for 1891-92, shows a falling off of no less than 513 pounds for Calcutta and 342 pounds for Meean Meer. The Bombay Depôt indented for no supplies either of quinine or febrifuge. It is understood that Bombay now supplies itself from the cinchona factory of the Madras Government on the Nilgiri Hills. The total issues for the year under review and of those for 1891-92 are as follows:—

Details of the distribution of Cinchona Febrifuge and Sulphate of Quinine during the financial years 1891 *and* 1892-93.

	1891-92. lbs.	oz.	1892-93. lbs.	oz.
To Medical Depôt, Calcutta—				
Cinchona febrifuge	1,013	0	500	0
Sulphate of quinine	1,022	0	1,150	0
To Medical Depôt, Mian Meer—				
Cinchona febrifuge	842	0	500	0
Sulphate of quinine	712	0	1,270	0

	1891-92. lbs.	oz.	1892-93. lbs.	oz.
To Inspector-General of Civil Hospitals, Bengal (for district medical officers, Bengal)—				
Cinchona febrifuge	306	4	200	8
Sulphate of quinine	3	8	......	
To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal)—				
Cinchona febrifuge	80	0	52	4
Sulphate of quinine	20	4	6	12
To Inspector-General of Jails, Bengal (for making into pice packets in Hazaribagh and Alipore Jails)—				
Sulphate of quinine	......		475	0
To Surgeon-General with the Government of India—				
Cinchona febrifuge	......		2	0
To Commissariat Department for Port Blair—				
Sulphate of quinine	......		50	0
Sold to Government officers—				
Sulphate of quinine	1,952	14	2,558	13¼
Sold to Government officers and to the general public—				
Cinchona febrifuge	2,457	12	2,390	14
Given as samples—				
Cinchona febrifuge	26	12	1	6
Sulphate of quinine	3	2½	7	10¼
Total ...	8,439	8½	9,165	3½
Cinchona febrifuge	4,725	12	3,647	0
Sulphate of quinine	3,713	12½	5,518	3½

In the above statement the total amount shown as issued to dispensaries and Government institutions, on indents signed by the Inspector-General of Civil Hospitals for Bengal, is 200½ lbs. of cinchona febrifuge. This, however, does not represent the total issues in the Province of Bengal during the year; for besides these issues on indent, 137⅝ lbs. of quinine and 96¾ lbs. of cinchona febrifuge were also issued to dispensaries under local Boards, and were paid for in cash. These latter issues are included in the gross sales to public officers, which are shown in the above table. As it may be of interest to trace the quantities issued to the various dispensaries throughout India during the year, I have thrown the information into a return which forms Appendix I of this report.

7. *Stock account.*—The amount of dry bark in stock in the factory godowns on the 31st March 1893 was 428,080½ lbs. of all sorts, the bulk of which is quinine-yielding bark, rather less than 40,000 lbs., being red or febrifuge-yielding bark. In addition to these there is a quantity of manufactured product and a supply of chemicals. The stocks at the end of the last year and at the end of 1891-92 are shown in the following table:—

Stock on 31st March 1892.

	Rs.	A.	P.
Chemicals and stores	2,000	0	0
Cinchona febrifuge, 1,217 lbs. 8 oz., at Rs. 8 per lb.	9,740	0	0
Sulphate of quinine, 2,655¼ lbs., at Rs. 13 per lb.	34,521	8	0
Cinchona bark, 451,217 lbs., valued at an average of annas 3 per lb.	84,603	3	0
Total ...	1,30,864	11	0

Stock on 31st March 1893.

	Rs.	A.	P.
Chemicals and stores ...	2,000	0	0
Cinchona febrifuge, 1,052 lbs., at Rs 8 per lb.	8,416	0	0
Sulphate of quinine, 2,379 lbs., 8½ oz., at Rs. 13 per lb.	30,933	8	0
Cinchona bark, 428,080½ lbs., valued at an average of annas 3 per lb.	80,265	1	6
Total ...	1,21,614	9	6

8. Collecting these figures, we obtain the financial results for the year, which are shown in the subjoined balance sheet:—

BALANCE SHEET.

Dr.

	Rs.	A.	P.
To value of stock on 31st March 1892	1,30,864	11	0
To cash received from the Treasury during 1892-93 for expenditure on the plantations, viz., Rungbee, Mungpoo, Sittong, and Rung-jung	67,804	15	7

By credit from the Surgeon-General with the Government of India for cinchona febrifuge supplied to the Extra Assistant Superintendent in charge, No. 2 party, Eastern Bengal, Chittagong	20	0	0
By credit from medical depôts for sulphate of quinine, viz.— Calcutta ... Rs. 15,381 4 0; Mean Mir ... Rs. 16,986 4 0	32,367	8	0
By credit from Commissariat Department for sulphate of quinine supplied to the Commissariat Store and Shipping Officer Calcutta, for Port Blair ...	800	0	0
By credit from Inspector-General of Civil Hospitals, Bengal, for cinchona febrifuge supplied to the medical officers of Bengal ...	2,005	0	0
By credit from Inspector-General of Jails, Bengal, for cinchona febrifuge, sulphate of quinine, supplied to jails and lock-ups in Bengal, viz.— For cinchona febrifuge ... Rs. 522 8 0; For sulphate of quinine ... Rs. 108 0 0	630	8	0
By credit from Inspector-General of Jails, Bengal, for sulphate of quinine supplied to Hazaribagh and Alipore Jails for making into pice packets	6,353	2	0
By credit from medical depôts, Calcutta, for cinchona bark ...	137	8	0
By value of stock on 31st March 1893	1,21,614	9	6
Total ...	2,39,382	9	0

9. The result of the year's working is therefore a surplus of Rs. 3,170-14-3, which, as making money is not the object for which the plantation is maintained, may, I trust, be considered sufficient. As I have explained in previous annual reports, the entire total capital expenditure on the plantation from its beginning has been covered several times over by the profits made during the early years of the manufacture of cinchona febrifuge, and by the savings effected by the

substitution in Government hospitals and dispensaries of that drug for quinine, (see Government Resolution, Financial Department, Miscellaneous, dated 26th March 1888). The factory has never had a capital account, as the total expenditure of each year on machinery, as well as on working expenses, has been calculated in the cost price of each year's outturn. Government are therefore in possession of a plantation and factory, the whole cost of which has years ago been refunded to them. Mr. Gammie, who is in charge of the factory, is continuous in his efforts to improve the method of manufacture and to cheapen its cost; and it is hoped that the good effects in these respects of the alterations in the machinery made during the past year may become apparent during the current year.

10. *Sale of quinine at post-offices.*—The chief event of the year has been the organization of the system by which quinine, made up in doses of five grains, is offered for sale at most of the post-offices within the Province of Bengal. Each dose is made up in a neat closed paper envelope, and is sold for one pice. Each packet carries the royal arms as a guarantee of genuineness, together with brief instructions in the vernacular. To encourage the post-office officials to push the sale of these packets, a small commission is allowed, and considerable facility is offered for replenishing of stocks by post-masters; the parcel-rates for transmission, however, bear rather heavily on the scheme, and I trust some means of lightening them may soon be found. When the scheme was suggested last year, it very soon became obvious that one of the first conditions of success would be to find some means of making up the packets by which adulteration and loss from pilfering and careless weighment might be reduced to a minimum. It was therefore decided by Government to make this matter over to the Jail Department. The quinine is therefore made over from the factory to that department in bulk, and by prison labour it is subdivided into pice packets, 1,400 of which go to each avoirdupois pound. The Jail Department distributes these packets to the post-masters and collects the proceeds of the sales at the various post-offices. A dose of pure quinine is by this means put within the reach of any person within the province who has a pice to buy it with. Thus at last, after thirty years of effort, has the end been attained which the Government set before itself when the growth of the medical cinchonas was begun in British India. That end was thus expressed in an early Government resolution on the subject:—"To put the only medicine that is of any use in the cure of the commonest and most fatal of Indian diseases within the reach of the poorest." Of the provinces usually supplied with quinine from the Mungpoo Factory, Bengal is the only one into which this pice-packet system has as yet been introduced. It is believed that, should the various provinces under the Government of India adopt the system, large demands will be made on the cinchona plantation, and extended planting operations may have to be undertaken. To meet such, Government have, in addition to the land reserved in the neighbourhood of Mungpoo, a reserve on the Bhootan frontier in Engo Valley, in which ground has not yet been broken.

11. *Firewood Plantation.*—About twenty acres were added to the firewood plantation during the year; and from the older parts of it a considerable number of small trees were taken for building purposes.

12. The sum of Rs. 2,174-10 collected during the year from settlers with the cinchona reserve for rents and grazing dues, was paid into the Darjeeling Treasury as land revenue from Government estates. This sum is, however, not taken credit for in the plantation accounts.

13. I was on furlough in England during seven months of the year under review; and during my absence, Mr. J. A. Gammie, Deputy Superintendent, acted for me. On my return he resumed his ordinary duties. Mr. G. A. Gammie was absent for four months on a botanical collecting tour in the interior of Sikkim, the results of which tour have been communicated to Government in a separate report: for three months Mr. G. Gammie also acted for Mr. Kennedy in charge of the Lloyd Botanic Garden, Darjeeling. The other assistants on the plantation and the clerks in the office worked during the whole year, and conducted their duties to the satisfaction both of Mr. J. Gammie and myself.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1893-94.

No. 706B., dated Calcutta, the 17th August 1893.

From—T. INGLIS, ESQ., Secretary to the Board of Revenue, L.P.,

To—The Secretary to the Government of Bengal, Financial Department.

SALT.

HON'BLE D. R. LYALL, C.S.I.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the 1st quarter of 1893-94, comprising the months of April, May, and June 1893.

2. The quantity of salt of every description cleared during the quarter under report amounted to 24,33,242 maunds, against 24,22,398 maunds in the previous quarter, and 25,26,086 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 56,96,847, against Rs. 56,82,664 in the previous quarter, and Rs. 59,46,708 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I:—

TABLE I.

	Puri.	Balasore.
	MDS. S.	MDS. S.
Balance at close of the last quarter ...	19,908 10	250 0
Manufactured or added during the quarter ...	15,422 0	......
Total ...	35,330 0	250 0
Sales during the quarter	2,589 0	7 0
Wastage	......	......
Total ...	2,589 0	7 0
Balance at close of the quarter	32,741 0	243 0

4. The total sale of excise salt during the quarter under review amounted to 2,596 maunds, against 2,408 maunds in the previous quarter, and 17,566 maunds in the corresponding quarter of the previous year. The total amount of excise salt on which duty was paid during the quarter was 2,598 maunds. The large reduction in the sale of this salt since last year is not satisfactory as showing that the salt manufactured on the Chilka Lake is not popular, and further enquiry regarding the cause of the decrease will be made.

5. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years, the ports being grouped in accordance with the classification adopted in last year's annual report:—

TABLE II.

No transactions in sea-imported salt have been reported for the quarter from the ports of Cuttack, Puri, and Balasore.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 19th August 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Aug. 19, '93 Kalna ... Katwa ... Raniganj ...	0·15 1·03 0·62 0·27	Weather—seasonable. A break in the rains. Transplantation of *aman* nearly completed. Prospect of *aus* good. Fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... ... 11 to 14 } Kalna ... ... 9 to 12 } Katwa ... ... 12 3/16 } per rupee. Raniganj ... ... 12½ }
	2	Bankura „ 19, '93 Vishnupur ...	1·46 0·31	Weather—seasonable. Transplantation of *aman* is finished. *Aus* plants thriving well. Common rice selling at— Srs. Bankura ... ... 13½ } Vishnupur ... ... 12 } per rupee.
	3	Birbhum „ 19, '93 Rampur Hát ...	4·29 1·29	Weather—rain every day with occasional sunshine. Rice crop is flourishing and already grown to a good height. Price of common rice 11 to 14½ seers per rupee.
	4	Midnapore „ 19, '93	0·72	Weather—hot and cloudy with a fair amount of rain at the Sadar. It is beginning to look like the end of the rains. Prospects of crops are now getting more definite. Except in a part, but not a large part, of Tamluk, where all hope of the *aman* crop must be abandoned, prospects are good. Prices of common rice:— Srs. Sadar ... ... 11 } Contai ... ... 12½ } Tamluk ... ... 10 } per rupee. Ghatal .. .. 10 to 11 }
	5	Hooghly „ 19, '93 Serampore ... Jahanabad ...	0·75 0·47 2·19	Weather—seasonable. Harvesting of jute and *aus* progressing. *Aman* transplantation all but finished. Fodder and water for cattle ample. Prices of common rice:— Srs. Sadar ... ... 10 to 11 } Serampore ... ... 10 to 11½ } per rupee. Jahanabad ... ... 10 to 12 }
	6	Howrah „ 19, '93 Ulubaria ...	0·64 0·80	Weather—sultry. Transplantation of rice crop continues. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 19, '93	0·72	Weather—seasonable. Transplantation of *aman* going on. *Aus* and jute being cut. Prospects of crops not favourable in the southern part of the district and bad in the Mathurapur and Bankipur thanas. In the north of the district prospects are fair. Rice sells at— Srs. Sadar ... ... 10 } Basirhat ... ... 10 } Barasat ... ... 9½ } per rupee. Diamond Harbour ... ... 11 }
	8	Nadia „ 19, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	2·43 2·40 2·14 1·09 0·46	Weather—cloudy and usually cool. Prospects of crops fair. *Aus* rice harvest nearly over. Jute harvest proceeds. *Aman* rice still being transplanted. Price of common rice has fallen one anna per maund at Krishnagar. Rivers high and rising.
	9	Khulna „ 19, '93 Bagerhat ... Satkhira ...	1·08 2·51 1·43	Weather—showery. *Aman* rice being transplanted. *Aus* has been a failure in Bagerhat. Fodder and water plentiful.
	10	Jessore „ 19, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·46 1·22 2·75 1·91 0·92	Weather—hot and cloudy with showers at intervals. Harvesting of *aus* and extracting of jute in progress. Outturn of jute 7 annas. Transplantation of *aman* nearly completed. Cattle-disease reported from Manirampur. Fodder sufficient except in Mamudpur. Prices steady.
	11	Murshidabad „ 19, '93	3·86	Weather—seasonable. Harvesting of *bhadoi* nearly finished. Jute, mulberry and hemp are doing well. Fodder for cattle sufficient. Coarse rice sells at 11 seers per rupee.

No.	District and date of return.		Rainfall at Sadár Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*				
CHITTAGONG DIVN.				
12	Chittagong	Aug. 19, '93	8·33	Weather—seasonable. Harvesting of *aus* and transplanting of *aman* still going on. Prospects fair. Prices rising. Condition of cattle generally good. Supply of fodder sufficient.
13	Noakhali	„ 19, '93	1·92	Weather—cloudy with rain at intervals. State and prospects of crops not good. Harvesting of *aus* nearly completed. Transplantation of *aman* continues. Cattle-disease reported from Fenny and Companiganj thanas. Fodder is not sufficiently available, consequently many cattle died. Common rice selling at 8 seers per rupee at Noakhali.
14	Tippera	„ 19, '93	4·96	Weather—seasonable. State of crops is bad. A large portion of the paddy field is under water. About half the *aus* crop has been damaged by rain. Prospect of *aman* not good. Water still rising. Rice sells at 8 seers per rupee.
15	Chittagong Hill Tracts.	„ 18, '93	5·29	Weather—showery with occasional fair weather. Condition of *jum*-paddy good. *Aus* ripening in some places. Fodder and water sufficient. No cattle-disease prevailing. Common rice selling at 9 seers per rupee.
DACCA DIVN.				
16	Dacca	„ 19, '93	0·99	Weather—hot and cloudy with occasional rain. *Rowa* and *shail* paddy being sown. Harvesting of *aus* and jute going on. Prospects fair. *Aus* on low lands is under water and partially damaged. *Aman* paddy also has been submerged in some places. Water still rising. Common rice selling at from 8 to 10 seers per rupee. Fodder not sufficiently available. No cattle-disease.
17	Faridpur	„ 19, '93	0·83	Weather—seasonable. Rivers rising, and already the flood is very high. The town of Faridpur is overflooded. *Aus* and jute are being cut; outturn poor. Condition of *aman* on high lands still hopeful. Common rice sells at 9 to 11 seers per rupee. Price of rice gradually increasing. Condition of cattle generally good, but cattle-disease prevails in thana Shibchar in Madaripur.
	Goalundo	...	2·80	
	Madaripur	...	3·47	
18	Backergunge	„ 19, '93	0·96	Weather—seasonable. State and prospects of crops moderate. Common rice is being sold from 8 to 10 seers per rupee. Fodder and water sufficient.
	Pirojpur	...	0·86	
	Patuakhali	...	0·75	
	Bhola	...	2·98	
19	Mymensingh	„ 19, '93	3·13	Weather—first part of the week cloudy; latter part fair and hot. Water has not yet subsided. Jute and *aus* crops are being harvested. Transplantation of *aman* paddy going on. Common rice sells at 9 to 10 seers per rupee. Fodder sufficient except in Kishorganj and in part of Netrakona.
RAJSHAHI DIVN.				
20	Dinajpur	„ 19, '93	1·31	Weather—hot; occasionally cloudy. Prospects of standing crops very good. Transplantation of *haimanti* still going on. Jute being cut and washed. Price of rice at Sadar 12 seers per rupee; that at Thakurgaon stationary. Condition of cattle good. Fodder and drinking water sufficient.
	Thakurgaon	..	6·59	
21	Rajshahi	„ 19, '93	2·25	Weather—seasonable. Prospects of standing crops reported to be good. Reaping and steeping of jute going on. Condition of cattle generally good. No want of fodder and water. Price of rice is the same as reported last week.
	Nator		6·08	
	Naugaon	...	3·09	
22	Rangpur	„ 19, '93	1·26	Weather—hot and cloudy. Transplanting of *aman* still in progress. Prospects continue favourable.
	Gaibanda	..	7·39	
	Kurigaon	...	4·16	
	Nilphamari	...	4·66	
23	Bogra	„ 19, '93	5·72	Heavy rain at beginning of week followed by fine weather. *Aus* and jute are being cut. Prospects unchanged. Common rice sells at 12 seers per rupee. Fodder and water sufficient.
	Sherpur	...	3·24	
	Naukhila	...	5·36	
24	Pabna	„ 19, '93	3·63	Weather—cloudy and sometimes rainy. Raining almost every day. Rivers rising rapidly. *Aus* and jute are being cut. Common rice sells at Rs. 4 and jute at Rs. 4-12 to Rs. 5-4 per maund at Sirajganj. At Pabna common rice sells at 11 seers per rupee. Fodder and water sufficient.
25	Darjeeling	„ 19, '93	3·55	Weather—less rainy. *In the hills:*—*Bhutta* progressing favourably. *Phaphur* and *chota marua* being harvested. *Aghani* paddy and *bara marua* progressing favourably. *In the Terai:*—Harvesting of *bhadoi* going on. Transplanting of *haimanti* continues. Jute doing well. Prices of coarse rice:— Srs. Hills ... . 9 } per rupee. Terai ... ... 10 } per rupee.
	Siliguri	...	8·31	
26	Jalpaiguri	„ 19, '93	4·08	Weather—hot. Harvesting of *bhadoi* and transplantation of *haimanti* paddy continue. Prospects of jute good. Common rice sells at 11 seers per rupee at Sadar and 9 to 10 seers at Alipur. Fodder and water sufficient. No cattle-disease.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Aug. 19, '93 Begusarai ... Jamui ...	Nil 3·39 2·73	Weather—sultry and cloudy. Transplantation of *aghani* is being vigorously pushed on. *Makai* and *marua* ripening. Sugarcane and indigo doing well. A few stray cases of cattle-disease reported from Nawadih, Shaikpura, and Bakhtiarpur. Plenty of fodder and water. Prices of common rice :— Srs. Sadar ... ... 11 to 16 } Begusarai ... ... 13¼ } per rupee. Jamui ... ... 12 }
28	Bhagalpur „ 19, '93 Banka . Madhipura ... Supaul ...	0·16 1·78 5·62 4·96	Transplantation of winter rice approaching completion. Prospects continue favourable. Price of common rice 13 seers 9 chitaks per rupee.
29	Purnea „ 19, '93 Kishanganj ... Araria ...	2·55 5·08 5·22	Weather—hot with occasional showers. *Bhadoi* paddy and jute being harvested. *Aghani* paddy being transplanted. Prospects good. No cattle-disease except in parts of Araria thana. Fodder and water sufficient. Coarse rice sells at— Srs. Sadar ... ... 12 to 14 } Kishanganj ... ... 12 } per rupee. Araria ... ... 16 }
30	Malda „ 19, '93	0·84	Weather—warm and clear during the early part of the week; latterly cloudy. Reaping of *bhadoi* paddy continues. Transplanting of winter rice nearly finished. Jute being cut; outturn expected to be 12 annas. Price of coarse rice varies from 12 to 16 seers per rupee. No want of fodder or drinking water.
31	Sonthal Parganas „ 19, '93 Deoghur ... Godda ... Pakur ... Rajmahal ...	1·27 2·23 3·37 6·43 2·24	Weather—hot with occasional showers and variable winds. Outturn of *makai* crop bad. Rice nearly all transplanted. Prospects favourable. Fodder plentiful. Price of rice about same as last year, rather dearer—12¼ seers against 13 seers per rupee.
PATNA DIVISION.			
32	Patna „ 19, '93 Barh ... Bihar ... Dinapore ...	0·43 1·60 2·77 2·97	Weather—hot and occasionally cloudy. There is no doubt that the *bhadoi* crops have suffered from the heavy rainfall. The level of the river is high, and the surplus water is draining off slowly. Transplantation of rice is far advanced. Prices of common rice :— Srs. Sadar ... ... 15 } Barh ... ... 13 } Bihar ... ... 15 } per rupee. Dinapore ... ... 13 }
33	Gaya „ 19, '93 Jahanabad ... Aurangabad ... Nawada ..	Nil 3·72 0·11 3·4	Weather—hot and occasionally cloudy. Paddy transplantation continues. Harvesting of *marua* begun. Prices of food-grains stationary. Supply of fodder and water for cattle sufficient.
34	Shahabad „ 19, '93 Buxar ... Bhabhua ... Sasaram ...	Nil 1·55 0·94 0·72	There has been a break in the rains with its usual characteristics. The interval of dry weather has benefited the *bhadoi* crops, but in the north of the district the heavy rain last week has stunted their growth. Transplantation of winter rice is proceeding. Rivers are falling rapidly.
35	Darbhanga „ 19, '93 Samastipur ... Madhubani ...	0·70 3·55 6·72	Weather—hot and close. Heavy and unprecedented flood of Bagmati and Kamla damaging *bhadoi* and rice crops, especially in the Sadar subdivision. Cattle suffering in places for want of sufficient fodder. Water going down slowly. Extent of damage done by flood not yet ascertained. Over a thousand houses washed away in Darbhanga town.
36	Muzaffarpur „ 19, '93 Hajipur ... Sitamarhi ...	3·07 2·69 4·11	Weather—cloudy and hot. Very heavy floods from the Bagmati and little Gaduk. The country between these rivers has suffered severely. Pupri thana has also suffered, and the railway embankment has been breached. *Bhadoi* to a great extent lost in this area, and it is feared the paddy will also suffer. Impossible to judge loss at present until floods subside.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
Patna Division—concld.			
37	Saran Aug. 19, '93 Siwan ... Gopalganj ...	2·27 3·70 3·55	Weather—heavy showers at beginning and end of week with hot fine days between. Prospects of crops very good indeed. *Makai* just beginning to be gathered where planted early. Rice transplantation busily going on, but not yet near completion in some parts. Fodder and water plentiful. Prices of common rice :— Srs. Chapra ... ... 13 } per rupee. Siwan ... ... 13 } per rupee. Gopalganj ... ... 14¼ } per rupee.
38	Champaran " 19, '93	0·64	Weather—cloud and sunshine as usual at this time of year. Heavy floods occurred during the week, which have now nearly subsided. Much damage has been done by them to the *bhadoi* and *aghani* crops. Fodder and water sufficient. Prices stationary.
ORISSA.			
Orissa Divn.			
39	Cuttack " 19, '93	0·67	Weather—cloudy with occasional light showers. *Beali* in ear and in some places ripening and being reaped. Prospect good. *Sarad* being transplanted. Fodder-supply sufficient. Prices of common rice :— Srs. c. Srs. c. Sadar ... ... 10 8 to 13 2 } per rupee. Jajpur ... ... 15 12 to 17 6 } per rupee. Kendrapara ... ... 13 10 to 21 0 } per rupee. Banki ... ... 15 12 } per rupee.
40	Puri " 17, '93 Khurda ...	1·04 3·50	Weather—hot. Puddling and transplanting of *sarad* going on. Rainfall deficient in the eastern part of the district. Prices of common rice :— Srs. c. Srs. c. Sadar ... ... 11 13 to 15 0 } per rupee. Khurda ... ... 12 0 to 17 1 } per rupee.
41	Balasore " 19, '93	2·19	Weather—cloudy with occasional showers. Transplanting of paddy nearly finished. Weeding in progress. Rain reported on three or four days during the past week. Sugarcane shows great promise. Prices in the district have risen slightly. Prices at Balasore and Bhurak are stationary.
CHOTA NAGPUR.			
South-West Frontier Agency.			
Chota Nagpur Divn.			
42	Hazaribagh Aug. 19, '93 Giridi ...	0·43 1·98	Weather—bright with occasional clouds and almost rainless. Indian-corn has almost entirely failed all over the district. Transplanting of *marua* and paddy completed. Crops doing well. Fodder and water ample. Price of common rice 9 to 14 seers per rupee at Head-quarters and at Giridi 11¾ seers per rupee.
43	Lohardaga " 19, '93	0·28	Weather—hot and a little cloudy. Transplantation of winter paddy finished. Prospect of *bhadoi* good. Common rice selling at 14 seers per rupee. Fodder and water plentiful.
44	Palamau " 18, '93	0·26	There has been a break in the rains. The *bhadoi* crops have been most seriously damaged, and the outturn will be very small. Transplantation of paddy going on vigorously and should soon be completed. *Marua* also being transplanted. A little cattle-disease reported. Rice selling at 12 seers 6 chitaks to 18 seers per rupee. Fodder and water abundant.
45	Singhbhum " 19, '93	2·20	Weather—seasonable. *Gora* paddy, Indian-corn and *goondli* being harvested ; 10 to 16 annas outturn expected. Winter rice crop is in very good condition. Price of common rice ranges from 10 to 12 seers per rupee. A few cases of cattle-disease reported.
46	Manbhum " 19, '93 Gobindpur ...	0·84 1·04	Weather—warm and bright with occasional showers. The weather is very favourable. Prospects good. Prices stationary. Fodder and water ample.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01 Rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station [illegible] stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 19th of August 1893.

					DISTRICT OBSERVATIONS. Of week.				Rainfall. Since 1st of month.			Since 16th May 1893.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean. Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is, when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 22nd August 1893.*

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 19TH OF AUGUST 1893.

During the past week pressure has been steadily above the normal, but by varying amounts, over the province, and the distribution has been much more uniform over the Bay than is usual at this season of the year. The result has been that rainfall has been generally light and scattered, and that the falls at most stations are much below the average. One unimportant interruption to the otherwise settled conditions occurred about the middle of the week, when a shallow depression which appears to have formed in Burma drifted slowly westwards across the north of the Bay, and about the end of the week crossed the Ganjam coast. The influence of this slight disturbance extended over a wide area so far as concerned the wind circulation, but except that showers were somewhat more frequent and heavy in Orissa, Chota Nagpur and some of the south-western districts of Bengal, there was little other change, while over the north of the Bay light northerly and afterwards easterly winds prevailed.

During the two first days of the week pressure was lowest near the Himalayas, and westerly winds were general over the whole province, but on Tuesday, the 15th, a large rise of pressure occurred in the northern districts and a slow fall over the Bay. This led to easterly winds in the eastern districts, and as similar changes, though not so large, continued on the following day, a light cyclonic circulation existed round the low pressure area which was then over the north of the Bay. During the last three days there was little change in the general weather. The sky was moderately cloudy in places, but as a rule there was sunshine with occasional thunderstorms and local rainfall.

Pressure was above the normal except on Monday, the 14th, when lowest readings were in the northern districts, and there was defect of about ·07 inch. The rise on the 15th was more than ·1 inch in these parts, and from that time excess varied between ·05 inch and ·1 inch; but on Saturday, the last day of the week, it exceeded ·1 inch in all districts except Orissa and Chota Nagpur. The distribution was then very uniform, and as isobars lay almost north and south, light easterly winds prevailed. Means for the week are above the normal at all stations, generally by about ·05 inch.

Temperature.—As there has been more sunshine than usual during the week, day temperatures have been above the normal over the greater part of the province. From the 13th to the 16th mean temperature differed very little from the normal, or was slightly below, the cooler weather being in the northern districts, especially in North Bengal and Assam. During the latter half of the week there was excess, practically everywhere, up to about 4° in some places. The means for the larger divisions for the whole week are above the normal, except in North Bengal, where there is defect of about half a degree, and in Assam where defect is nearly 2° Excess is under 1° in East Bengal, Chota Nagpur and North Bihar, and between 1° and 1·5° in Orissa, South-West Bengal and South Bihar.

Rainfall.—As stated above, rainfall has been scattered and frequently light. In North Bengal almost general rain fell in the early part of the week, but during the latter half scattered showers fell there as over the rest of the province. The days when rainfall was most general were Sunday, the 13th, Wednesday, the 16th, and Saturday, the 19th. On all of these days the rain was due in most cases to local thunderstorms which were fairly numerous, and not to prevalence of ordinary monsoon conditions. The average falls for the large divisions vary from 2·4 inches in Bihar to 3·84 inches in East Bengal. These averages are all relatively low.

Defect in North Bengal is 1 inch; in East Bengal and North Bihar between 1 and 1·5 inches; in Orissa, South-West Bengal, and Chota Nagpur between 1·5 and 2 inches, and in South Bihar rather more than 2 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 19th of August 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

The total fall from 1st January to 19th August 1893...	64·94
The average fall of the corresponding period for 24 years, Surveyor-General's Office	43·62

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; △, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1892.

No. 4149J.

RESOLUTION.

POLICE.

Dated Calcutta, the 19th August 1893.

READ—

The Report on the Administration of the Police Department for the year 1892.

Read also—

The Report for the year 1891, and the orders of Government recorded thereon.

Mr. E. R. Henry was in charge of the office of Inspector-General of Police throughout the year. The report under review was due to Government on the 30th June, and was received in print on the 11th July. In accordance with the orders of Government some supplementary figured statements have been added to the report, and fuller details have been given regarding charges made against the police, the state of the village watch, and other important matters.

2. *Constitution of the Police force.*—At the close of the year the sanctioned strength of the police force, excluding the Railway Police, was 74 superior officers, and 22,713 subordinate officers and men, being a net increase of seven head constables and 24 town chaukidars, and a net decrease of 107 constables. The strength of the Railway Police at the close of the year was

two superior officers and 601 subordinate officers and men, against two superior officers and 621 subordinate officers and men at the close of the preceding year.

3. *Expenditure of the Department.*—The police budget grant for the year was Rs. 43,97,000, and the actual expenditure under each of the different heads, as compared with that of the preceding year, was as follows:—

Serial number.	Heads of Charges.	Actual expenditure for 1891-92.	Actual expenditure for 1892-93.	Increase.	Decrease.
1	2	3	4	5	6
		Rs	Rs	Rs.	Rs.
1	Inspecting agency	1,23,387	1,36,737	13,350	...
2	Pay of District and Assistant Superintendents ...	4,60,133	4,17,145	.....	12,988
3	Pay of executive police and establishment, with good conduct pay and batta allowance	28,33,148	28,67,294	34,146	......
4	Travelling allowance	92,038	93,303	1,265	...
5	Fixed boat establishment	56,983	55,946	......	1,037
6	Special, regular and contract contingencies	5,14,882	5,65,368	50,486	.....
7	Government contribution to the Municipal and Railway Police	1,45,622	1,37,922	......	7,700
	Total ...	42,26,193	43,03,715	99,247	21,725
			Net increase ...	77,522	

There was thus a saving of Rs. 93,285 on the estimate for the year, but an increase of Rs. 77,522 in the actual expenditure over the figures for 1891. This is accounted for mainly by the increased provision for clothing on account of maintenance and free kits, the issue of new breech-loading carbines, and the increase in the pay of constables from Rs. 6 to Rs. 7 per mensem in the districts of Bengal Proper.

4. *Working of the Town Police.*—The Inspector-General of Police again brings to notice the exceptional difficulties under which the Town Police have to work, and the general unpopularity of town duty. Among other measures that have been taken to increase the efficiency of the force beats have been enlarged, so that two men may do duty on each beat instead of one, the number of rounds officers has been increased, truncheons and bulls-eye lanterns have been supplied to the men, and maps have been prepared showing the limits of beats as well as the streets and lanes included in them. In some towns in the Patna Division a self-checking system of patrols has been introduced, which enables the officer in charge to ascertain whether the rounds visited any particular lane or street during the preceding night. The experiment is reported to have worked well on the whole, especially in Patna City, where 39 burglars or thieves were arrested *flagrante delicto* by the police on going their rounds Since the close of the year a proposal to place the police-stations in the Patna City in telephonic communication with each other has been sanctioned by Government. These are all useful reforms. In accordance with the policy recommended by the Lieutenant-Governor in the Resolution on last year's Report, steps are being taken to substitute chaukidars on an adequate salary for constables in towns where the population is peaceful, and where lawlessness arising from religious animosities or other causes is not apprehended. In the municipalities of the Burdwan and Backergunge districts, and in Puri and Jessore, the town police, consisting of a mixed force of constables and chaukidars, are reported to have worked well; on the other hand the working of the force in Khulna was unsatisfactory, and the pay of the chaukidars is said to be insufficient to attract good men. The same complaint of insufficiency of pay is made in Rangpur, Sirajganj, Faridpur, Mymensingh, and Bhagalpur. In Dacca and Narainganj, and in the towns of the Chittagong Division, as well as in Darjeeling and Kurseong, chaukidars are not employed, and the town police are said to have worked well. With the exception of Gaya and Darbhanga, the work of the police in the towns of the Patna Division was satisfactory, but the Inspector-General notices that the town police force in Champaran is numerically insufficient, and that its members are underpaid, and he promises to give the matter his personal attention. On the whole, although much still remains to be done, the Lieutenant-Governor sees no reason to be dissatisfied with the progress made during the year in improving the working of the town police.

5. *Street-lighting.*—Some progress has been made this year in this respect, and 505 new lamps have been added in the whole province. There are still no lights in the towns of Khulna and Malda, and in four of the municipalities of the Midnapore district. The Inspector-General reports that, in accordance with the suggestion contained in last year's Resolution, a considerable number of small municipalities which are unable to afford street lamps, have either provided or agreed to provide oil for the lanterns of the watch and ward police.

6. *Rural Police.*—From Statement E appended to the Report, it appears that there are the following chaukidars in the province:—

Under Act VI (B.C.) of 1870	96,787
Under Regulation XX of 1817	47,959
Number of chakran chaukidars, including ghât police ...	24,335
Chaukidars entertained under Sonthal rules in Sonthal Parganas	2,709
Chaukidars in Burdwan paid by villagers	282
Total	172,072

The number of chaukidars in Bengal in 1891 was 171,547, of whom 92,100 were under Act VI. By the amending Act I (B.C.) of 1892, which came into force at the close of the year, the definition of village permits the extension of the Act to villages with less than 60 houses, while the minimum rate of the chaukidar's pay has been reduced to Rs. 2. Magistrates are now therefore in a position to take measures for the more complete extension of the provisions of Act VI, and to reduce the number of regulation and chakran chaukidars. The Lieutenant-Governor notices that some progress has been made in this direction, and that efforts have been made to weed out men of disreputable castes or antecedents, and to substitute for them men of better social status. In all districts the arrangements for holding chaukidari parades and eliciting information from chaukidars have been systematised, and District and Assistant Superintendents are reported to have given more attention to this important branch of their work than in former years.

7. In paragraph 9 of last year's Resolution, the Lieutenant-Governor expressed a hope that local officers would be more liberal to chaukidars in the matter of rewards and less indiscriminate in punishments. In the latter respect there has been practically no change, and the Inspector-General draws attention to the want of discretion sometimes shown in prosecuting chaukidars under the Indian Penal Code for such slight offences as absence from parade, &c., for which departmental notice would have sufficed. This is very unsatisfactory, and the Lieutenant-Governor desires that the Inspector-General will admonish officers who are found to offend in this way. There has been a slight increase in the number of chaukidars rewarded, but the figures show that there is still room for improvement. During the year 1,444 chaukidars, or less than 1 per cent. of the force, were rewarded with Rs. 7,644, against 957 rewarded with Rs. 5,505 in 1891. In this respect Bengal compares unfavourably with the North-Western Provinces, in which, in 1891, out of 97,455 chaukidars 10,180 were rewarded with Rs. 22,183. Under the amended law a District Chaukidari Reward Fund has been created, which will enable district officers to adequately reward good work done by the village police.

8. The Inspector-General notices the great disproportion in the number of chaukidars in the Burdwan Division, as compared with other divisions of the Province. Thus, although the population in the Burdwan, Rajshahi, and Presidency Divisions is practically the same, the former maintains 41,703 chaukidars against less than 17,000 in each of the others. There is but little doubt that the village watch in the Burdwan Division urgently needs reorganizing, and that the numbers are unmanageably large and out of all proportion to its requirements. In Jessore, Tippera, Mymensingh, Faridpur, Chittagong and other districts, and especially those of the Patna Division, the rate of pay is reported to be too small to attract good men, and the chaukidars have in consequence to be recruited from the lower classes of society. No doubt we should get better men for higher pay, but even without an increase of pay a good deal may be done to improve the condition of the chaukidar, by assuring to him the punctual

payment of his salary and by taking care that Police constables and higher officers do not abuse their powers by employing him on menial work and other duties not contemplated by law. The Officiating Lieutenant-Governor notices that in the district of Backergunge not only is the village watch said to be the best organized, the most efficient, and the most regularly paid in the Province, but it includes a considerable number of men of good social status. In fact, so popular has the post become, and so keen is the competition for it, that only literate men are now appointed. Such a result reflects credit on Mr. Savage, the District Magistrate, and there is no reason why a similar success should not be attained in many other districts of the Province. The Officiating Lieutenant-Governor is glad to receive the Inspector-General's assurance that the police are beginning to realise that they must not employ chaukidars in their private concerns, or exact from them tasks of a degrading character. The instructions of Government on the subject have been widely circulated, and if the facts as reported from Jessore are correct and common to other districts, it will apparently be necessary to enforce against members of panchayets and influential villagers also the prohibition against employing the chaukidars in their private concerns.

9. *Additional Police.*—In the Madhubani sub-division of the Darbhanga district, a force of one Sub-Inspector, two head-constables and 20 constables was appointed for one year to maintain peace in certain villages which were in a disturbed state. Additional police have also been appointed in the Dacca and Khulna districts, while the force previously deputed to Backergunge was maintained throughout the year. The additional force of 2 head-constables and 20 constables deputed to mahal Ultagina in the Monghyr district was withdrawn on the 1st September, but had again to be replaced by 1 head-constable and 10 constables, as the place was still in an unsettled and dangerous state. The number of special police rose from 298 in 1891 to 594 in 1892, and of these 248 were employed in the Darbhanga district, and 113 in Backergunge. The number retained for 12 months in these two districts was 71 and 18 respectively.

10. *Military Police.*—The three bodies of Military Police have rendered useful service to Government during the year. In November a force consisting of 1 subadar, 1 jamadar, 7 havildars, and 75 sepoys from the Dumka Special Reserve was sent to Keonjhur, and a party of the Bhagalpur Military Police, consisting of 1 jamadar, 2 havildars and 30 sepoys, was detailed for similar duty towards the close of the year. In April 1892 a detachment of the Dacca Military Police, consisting of 1 subadar, 8 havildars, and 65 sepoys, was sent to Demagri for a short time on garrison duty. Since the close of the year a scheme for the reconstitution of the Military Police has been sanctioned by Government, and three companies, each consisting of 100 officers and men, will eventually be substituted for the present force.

11. *Casualties.*—There was a further satisfactory decrease in the number of casualties, and in the percentage of such casualties to the total strength. The following table gives an analysis of the figures for the last three years:—

	1890.				1891.				1892.			
1. or gratuity ...	464	or	1·9	per cent.	452	or	1·9	per cent.	420	or	1·8	per cent
2. Resignation	972	,,	4·1	,,	760	,,	3·2	,,	722	,,	3·1	,,
3. Dismissal	624	,,	2·6	,,	588	,,	2·5	,,	586	,,	2·5	,,
4. Discharge	180	,,	·7	,,	225	,,	·9	,,	125	,,	·5	,,
5. Desertion	70	,,	·3	,,	40	,,	·2	,,	51	,,	·2	,,
6. Death	488	,,	2·1	,,	517	,,	2·2	,,	551	,,	2·4	,,
Total ...	2,798	or	11·7	,,	2,582	or	10·9	,,	2,455	or	10·5	,,

12. *Torture by the Police.*—The charges of torture by the police were fortunately of no great importance and are few in number Out of 32 charges only 8 were held to be true, 14 were shown to be false, 7 were dismissed under section 203, Criminal Procedure Code, and 1 under section 253, while 2 were pending at the close of the year. Of the 8 true cases, 6 were against Sub-Inspectors and head constables, but not one of these resulted in the conviction of the accused. In the first of the other two cases, 2 constables were sentenced to six months' imprisonment each for illegal confinement, and in the remaining case from Saran, 2 constables were sentenced to one year's imprisonment each for causing hurt to a villager who had been placed in their charge, and who eventually

died from rupture of his spleen. In three out of the 14 cases reported as false, prosecutions under section 211 were instituted, and in one a conviction was obtained.

13. *Extortion.*—Out of the 92 cases of extortion brought against the police, 22 were entered as true, 21 were declared false, 4 were compounded, and 2 were pending at the close of the year. The remainder were dismissed under section 203, or under sections 253 and 258, Criminal Procedure Code. In 1891 there were only 44 cases enquired into, of which 11 were declared true, 11 false, and 14 were dismissed as not proved. In accordance with the orders of Government, the Inspector-General has given details of all these charges, whether true or false. Dinajpur again heads the list with 42 cases, of which 35 were dismissed under section 203, or sections 253 and 258, Criminal Procedure Code, 4 were compounded and 2 were declared false. Not a single case ended in conviction. The Inspector-General thinks that many of these charges were brought simply with the object of paralysing and retarding police work: whether this is true or not, it is very necessary that every case should be thoroughly enquired into and sifted to the bottom.

14. The number of punishments inflicted on officers and men of the police force during the past three years is shown in the following table:—

Year.	Judicial conviction under Penal Code.			Act V.			Departmental.		
	Number.	Percentage of officers.	Percentage of men.	Number.	Percentage of officers.	Percentage of men.	Number.	Percentage of officers.	Percentage of men.
1890	336	1 1	1·5	160	·2	·7	4,828	46·0	16·2
1891	260	·3	1·2	112	·3	·5	4,234	39·2	14·3
1892 . ..	245	·7	1·0	120	·1	·5	4,223	41·0	14·0

The Officiating Lieutenant-Governor, while glad to observe this decrease in the number of punishments, which seems to point to an improvement in the general conduct of the force, still thinks that there is room for further improvement. The percentage of departmental punishment is still high, and he trusts that the character of the men recruited into the force will in time lead to its decrease. Out of six prosecutions for embezzlement of Government money or misappropriation of property, in two the accused were judicially punished, and four ended in acquittal, but in three of these, departmental punishments were inflicted. In another case a writer-constable was punished departmentally for misappropriating a process-fee of Re. 1, there not being sufficient evidence for a prosecution. The number of men wearing one or more good-conduct stripes at the close of the year was 8,305 against 8,059 at the close of 1891. Good-conduct allowances amounting to Rs. 18,609-3-6 were disbursed as against Rs. 21,072 in 1891. Special money rewards were paid to 1,034 officers and men for good work done in police cases.

15. *Escapes.*—The number of escapes of prisoners from police custody fell from 198 in 1891 to 159, and of these 103 were recaptured. There was a remarkable decrease in the number of escapes from the custody of chaukidars, there having been only 4 such cases against 28 in 1891. The explanation given by the Inspector-General is that the repeated failures in prosecutions instituted against chaukidars for permitting escapes has made officers cautious in utilizing them for the custody of prisoners.

16. *Inspections.*—The head-quarters of every district of Bengal and of thirty sub-divisions were inspected during the year either by the Inspector-General himself, or by one of the Deputy Inspectors-General. Mr. Henry was on tour for four months and 17 days, exclusive of 18 days spent under orders of Government in the North-Western Provinces. Mr. Giles was Deputy Inspector-General throughout the year, and spent 223 days on tour. Mr. Daly was on leave during the greater part of the year, and was only 46 days on tour. Mr. Pratt officiated for him for about seven months, and Mr. Wilcox for three months. These officers were 43 and 38 days on tour respectively. In five districts only, viz., in Cuttack, Patna, Lohardaga, Rajshahi and the 24-Parganas, the amount of inspection work done by District Superintendents

of Police was below the required standard. In Lohardaga the District Superintendent of Police suffered from ill-health, and in Cuttack the police-boat, which affords the only means of reaching certain stations, was for some months under repairs. No explanations are forthcoming from the other districts named.

17. *Crime.*—In reviewing the figures for the year under this head,

Chittagong Hill Tracts, the proportion of police to population in [illegible] was one policeman to 3,013 persons, as against one to 1,663 in Madras, one to 1,414 in the North-Western Provinces, one to 1,219 in the Central Provinces, and one to 982 in Bombay. These comparisons, however, are less instructive than the comparison of the strength of the police force with the number of cognizable crimes which Mr. Henry makes. The strength of the police force is adjusted not only with reference to the total population, but also to the numbers of the criminal classes. From this point of view the Bengal Police is stronger than the North-Western Provinces and Madras Police, though weaker than the police of the Central Provinces.

The incidence of crime in Bengal, arranged by divisions, is given in the following table:—

Divisions.	Police.	Population.	Cases of cognizable crime, *vide* columns 4 and 6 of Statement A, Part I. *Minus* cases refused under 157, C. P. C., and cases under serial No. 57 in that statement.		Proportion of police to population.	Proportion of police to cases of cognizable crime investigated.		Proportion of cases of cognizable crime investigated to population.

As desired in the Resolution on last year's report, the Inspector-General has excluded from the above statement offences against sanitary laws, as well as cases in which police enquiry was refused under section 157, Criminal Procedure Code.

18. *Police tests.*—In accordance with the instructions contained in last year's Resolution, the Inspector-General has employed the following three tests only in comparing the working of the police in the different provinces:—

(*a*1) Percentage of cases investigated by the police to cases reported.

(*a*4) Percentage of police cases ending in conviction to cases decided.

(*b*3) Percentage of persons convicted in police cases to persons sent up for trial.

In the table furnished, the figures of crime under classes I—V, and classes I—VI of Statement A, taken together, are shown separately in each case. According to test (*a*4), which is the most important, the percentage in Bengal for 1892 in classes I to V taken together was only 70 against 83 in Madras in 1891, 82 in the Central Provinces, 81 in the North-Western Provinces, and 80 in

Bombay. In his report for 1891 the Inspector-General expressed his opinion that the unsatisfactory results in Bengal, as compared with other provinces, were due to the general inefficiency of the village police, the large area of the police stations, the insufficiency of the investigating staff, and especially to the want of a prosecuting agency. These complaints are admitted to be just, and measures have been taken to afford a remedy. A special Committee was appointed in 1892 to enquire into the whole subject, and the elaborate proposals they submitted for the reorganization of the Police force having been accepted by this Government, are now under the consideration of the Government of India. The experiment of employing Court Sub-Inspectors as prosecutors in Magistrates' Courts has been extended to all districts during the year, and it is confidently expected that the result will prove to be very beneficial. The steps taken by the Legislative and by the Executive Government to improve the status of the village police have already been referred to in this Resolution.

19. *Reported crime of the Province.*—The following table shows the total number of cognizable and non-cognizable cases reported during the last two years:—

	1891.	1892.	Increase.
Cognizable	128,472	146,185	17,713
Non-cognizable ...	119,072	121,624	2,552
Total ...	247,544	267,809	20,265

The increase in cognizable crime is distributed over all the divisions, but it is noticeably large in the Patna Division, where the number of cognizable cases reported rose from 32,946 in 1891 to 40,035. Prosecutions for public and local nuisances rose from 34,158 in 1891 to 41,288 in 1892, and there was an increase of 9,866 in the number of cognizable cases against property, the chief cause of which was doubtless the prevalence of agricultural distress and the high prices of food. The increase may also be accounted for by the freer use made by the police of the discretion allowed to them to refrain from holding enquiries, which has probably led to fuller reporting, now that the public realise that information given in cases of petty theft or burglary does not necessarily involve a police investigation. It may also be due to some extent, as the Inspector-General suggests, to the better reporting which it is hoped has been secured by the measures adopted to elicit information from chaukidars on parade days. The net increase for the province under cognizable crime, as compared with 1891, is over 13 per cent., and under non-cognizable crime a little over 2 per cent. The variation under the latter head is small and calls for no remark.

20. *False cases.*—The number of cases declared to be false was 6,253 against 6,631 in 1891, and the percentage to cases reported was 4·2 as compared with 5·8, 5·4 and 5·1 respectively in the three preceding years. The large increase in the number of prosecutions for public and local nuisances, referred to in the preceding paragraph, and the fact that the number of cases in which enquiry was refused, and which are entered as true, has increased by 11,000, vitiates, however, the comparison by percentages. The percentage of prosecutions under section 211, Indian Penal Code, to cases declared false was only 11·9 against 15·4 in 1891, and the percentage of convictions fell from 37·1 to 33·1. The number of cases in which compensation was awarded to the accused person under section 560, Criminal Procedure Code, has fallen from 916 to 805.

21. *Reported cases not enquired into.*—The number of cases in which enquiry was refused by the police under section 157, Criminal Procedure Code, rose from 7,008 in 1891 to 18,536, and of these over 95 per cent. come under the heads of House-breaking and Theft. The percentage of refusals in cases of house-breaking has risen from 13·4 to 38·2, and of theft from 10·3 to 17·5. In a few instances the increase is attributed to a misunderstanding of the orders of Government, but these orders were fully explained in last year's Resolution, and there can be no excuse for a similar misunderstanding in the future. The fact that in only 478 cases enquiry was ordered by the Magistrate after investigation had been declined by the police would seem to indicate that the discretion exercised by the police in refusing enquiry was generally justified by the facts of

the case. The Officiating Lieutenant-Governor fears, however, that in many cases the discretion of the police has been abused. In the Patna Division less than 50 per cent. of burglary cases were investigated, and this percentage fell below 30 in Darbhanga, although 40 per cent. of the cases in this district were accompanied by loss of property. In the Champaran district 50 per cent. of the true cases of burglary are reported to have been accompanied by loss of property, but in the neighbouring district of Saran out of 1,239 true cases property is said to have been taken in 258 only, or about 20 per cent. In Monghyr only 476 out of the 1,824 cases of burglary were enquired into. In Dinajpur out of 1,372 cases of theft, only 593 were investigated. These figures are very surprising and giving rise as they do to the impression that reports of occurrences are frequently manipulated at police-stations in order that enquiries may be refused, establish the necessity of more careful supervision and constant inspection by District Superintendents in order to prevent abuse of this section by subordinate police officers.

22. *Results of sessions cases.*—The number of cases tried before the Court of Sessions rose from 1,253 in 1891 to 1,326, and of these 900 ended in conviction and 426 in acquittal. The number of persons tried rose from 2,685 to 3,016, of whom 1,668 were convicted and 1,348 were acquitted. There was a falling off in the percentage of convictions in cases from 68·3 to 67·8, but the percentage of persons convicted rose from 54·4 to 55·3. Dinajpur for a second time shows the lowest convictions of any district in the province, the percentage of convictions being only 31·0. In Gaya only 20 persons were convicted against 93 acquitted. Such results are not to be attributed to fortuitous circumstances, or to the personal characteristics of Judge or jury, and can only be explained by the faulty investigation of cases by the police and by the want of care on the part of Magistrates in not thoroughly sifting the evidence before committing the cases for trial—causes which it should be in the power of the local officers to remove.

23. *Offences against the State and public tranquillity, Class I.*—There was an increase in the number of offences in this class from 2,765 to 2,817. Cases of counterfeit coining rose from 113 to 162, but with the exception of those which occurred in the Dacca Division, they were for the most part unimportant. In Rajshahi one man was sentenced to three years' imprisonment for forging Government currency notes, and in a case in Jessore an accused, in whose possession instruments for the manufacture of counterfeit coin were found, was sentenced to 10 years' transportation. In the only important case that occurred in the Patna Division, the accused was awarded seven years' imprisonment. In the Dacca Division the police are reported to have done excellent work in several cases of importance, notably in a case in Faridpur, where two defendants were sentenced to seven years' imprisonment each, and again in Backergunge, where Sub-Inspector Lolit Kumar Nundi succeeded in breaking up a dangerous confederacy of coiners, and secured the conviction of three, although one was subsequently acquitted by the High Court on the ground of an irregularity in the trial. There was a falling off of five in the number of true cases of rioting as compared with last year. The Dacca Division again heads the list with 466 cases, and it is followed by the Presidency with 335, but it is satisfactory to notice that there has been a decrease of 52 in the former division as compared with 1891. That the great majority of the cases sent up for trial were trivial in their nature is, however, shown by the fact that out of 11,018 persons actually tried for rioting, only 305 appeared before the Court of Sessions. In the Burdwan Division every district shows an increase over last year's figures, but none of the cases were of special importance. There is little fluctuation in the figures under this heading in the Presidency and Rajshahi Divisions, and the cases were for the most part unimportant. In the Dacca Division Backergunge returns the smallest number of rioting cases for any year since 1888, the decrease of 40 cases as compared with last year's figures being probably due to the preventive measures taken, 3,254 persons having been bound down under section 106 or section 107, Criminal Procedure Code. In Faridpur the number of persons bound down to keep the peace was 2,114, and the number of true cases of rioting fell from 134 to 116. Dacca is the only district in the Division which shows an increase over last year's figures, the number of cases having risen from 81 to 111, while the number

of persons bound down to keep the peace was 1,102. In the Tippera district, in the Chittagong Division, there was a satisfactory decrease of 45 in the number of riot cases, due, in the Commissioner's opinion, to the greater energy shown in prosecuting persons under sections 106 and 107, Criminal Procedure Code. In the Patna Division fluctuations have been slight. As directed in last year's Resolution, the Inspector-General has given details of cases in which Europeans were concerned, and of these the most important is a case in which the Assistant Manager of the Cheylaha outwork of the Motihari Factory was set upon by a number of villagers and severely beaten. Eight persons were convicted in this case and sentenced to terms of imprisonment, and additional police were quartered on the village. The Inspector-General notices a bad case that occurred in the Bhagalpur district, in which the police had applied in good time to have the parties bound down to keep the peace, but owing to some delay in putting the report before the Magistrate, and in communicating the latter's orders thereon, the riot was committed before any preventive measures could be taken, and one man lost his life. The cases from the Orissa and Chota Nagpur Divisions call for no remark.

24. *Class II.—Serious offences against the person.*—Cases of this class fell from 4,824 in 1891 to 4,666, the chief fluctuations being a decrease of 94 under "Criminal force to public servants," and of 76 under "Hurt by dangerous weapons." The number of persons sent up for trial was 7,154, of whom 1,259 were tried before the Sessions Court, and the percentage of convictions to persons tried was 45·6 against 46·2 in 1891. There were 351 murders reported against 319 in 1890 and 360 in 1891. The percentage of convictions in murder cases fell from 28·6 to 25·3, but in persons it was 20·7, or practically the same as last year. There were 8 cases of murder by dacoits, and 15 by robbers, against 8 and 16 respectively in 1891. Murders by poison increased by 6 cases, the number being 21, of which 15 were sent up for trial, and in 3 of these only were convictions obtained. Under "Other murders" the Dacca Division heads the list with 86 cases, or over 25 per cent. of the provincial total, and of these no less than 39 occurred in the Backergunge district. The action of the Magistrate in withholding gun licenses is reported to have had a beneficial effect in the Patuakhali sub-division, the number of murders having fallen from 13, most of which were caused by guns, to 2. There was a decrease of 1 in "drugging" cases, the number for the year being 31, of which only 8 ended in conviction.

25. *Class III.—Serious offences against property.*—The number of cases of this class has risen from 28,288 in 1891 to 33,325. The chief increase occurred under the head "Lurking house trespass or house-breaking," the number of cases of which rose from 26,373 to 31,166, the reason given being the agricultural depression and the consequent rise in the price of food. There was a further remarkable increase of 107 cases of dacoity, the total number of true cases for the year being the largest on record for the last 20 years. The number of true cases in each division in the last six years is shown in the following table:—

	1887.	1888.	1889.	1890.	1891.	1892.
Burdwan ...	23	18	34	29	22	42
Presidency ...	7	17	17	12	22	36
Rajshahi ...	23	16	17	27	48	51
Dacca ...	9	15	19	12	23	18
Chittagong ...	8	2	4	...	...	5
Patna ..	12	20	36	20	43	76
Bhagalpur ...	24	16	20	18	30	57
Orissa ...	4	14	14	8	7	16
Chota Nagpur ...	4	14	11	4	15	16
Total ...	109	132	172	130	210	317

The increase is most marked in the Patna and Bhagalpur Divisions, and is due in the former to the 42 cases reported from the Gaya district, and in the latter to the 24 cases from Purnea. The Inspector-General has discussed in his report the probable causes of the recrudescence of this serious offence, and he is of opinion that the great majority of cases are the work of local bad characters, who are more than usually active in seasons of scarcity. He enumerates the remedial measures which have been adopted by him during the year, which include the improvement of the beat system in various thanas, the organization of chaukidari patrols, the encouragement of villagers

to assist chaukidars, the issue of a hue and cry circular, the more effective supervision of notorious criminals, the deputing of skilled officers (as in Jessore) to assist in investigating cases, the more liberal grant of rewards to private persons, police officers, and chaukidars, and the remodelling of the Criminal Department of the Inspector-General's office. These measures, the Inspector-General believes, will prove effectual in checking the commission of this serious crime, and the Lieutenant-Governor hopes that this belief may be fulfilled. It is at any rate some satisfaction to know that the police have met with more than ordinary success in prosecuting cases before the courts, the number of persons convicted during the year being 345 against 195 in 1891, and the percentage of persons convicted to those tried having risen from 21·0 in 1890 and 31·8 in 1891 to 35·1 in 1892. In one important case from the 24-Parganas a formidable gang of dacoits was broken up, a result largely due to Sub-Inspector Mir Jahan Ali, who was commended by the Judge, and received a special reward. In Gaya the outbreak of dacoity was more serious than in any other district in the Province, the number of cases having risen from 14 to 42, and it is to be feared that the outbreak was partly due to preventible causes. Although in the opinion of the District Magistrate these cases were the work of local bad characters, with which the district is said to swarm, yet only 39 persons were successfully prosecuted under the bad livelihood sections in 1891 and 55 in 1890. The want of success on the part of the police in dealing with the outbreak is very marked, and out of 76 persons sent up in 12 out of the 42 cases reported, only 9 were convicted. With such chances in their favour, and looking to the way they have been neglected, it is not surprising that local criminals should feel emboldened to commit crime. The Officiating Lieutenant-Governor notices with satisfaction that orders have recently been issued requiring Inspectors to themselves supervise the investigation of dacoity and other grave cases on the spot, and he hopes that by this means more prompt and thorough investigation of such cases will be secured, and that better results will be obtained as regards detection and successful prosecution in court. His Honour believes that an Inspector who does his share of investigation work will pick up information concerning the subordinate police and the criminal classes, which no amount of scrutiny of registers will give to him. Such local investigation on the part of superior officers is, moreover, the surest means of preventing extortion or other malpractices on the part of inferior police officers. In Sir Antony MacDonnell's opinion it is also very important that District Superintendents and their Assistants should occasionally proceed to the spot without an hour's avoidable delay, and themselves personally conduct the local enquiry. All the advantages to be derived from an Inspector's local investigation are likely to result in an even greater degree when the head of the district police himself takes action, and the Officiating Lieutenant-Governor desires that it may be more distinctly understood by all District Superintendents than it is at present that their duties are not confined to inspection and office work and general supervision only, but that they are expected to take a certain share in the actual investigation and detection of important crime.

26. The number of cases of robbery rose from 172 in 1891 to 197. There were 31 cases of drugging under section 328, Indian Penal Code, but only one of robbery by poison under section 394. In this connection the Inspector-General draws attention to the Resolution of the Government of India of the 20th February 1880, in which the opinion is expressed that such cases should be dealt with under the more serious section, whenever possible. The solitary case under section 394, Indian Penal Code, occurred in the Burdwan Division, and is of some importance, a party of travellers to Juggernath having been drugged and robbed of Rs. 377 by one Govind Brahman, who, however, managed to escape detection. Cases of mischief by fire rose from 423 to 502, and in these 146 persons were sent up for trial, of whom only 26 were convicted.

27. *Class IV.—Minor offences against the person.*—The number of cases under this class rose from 2,220 to 2,268, and of these 2,202 were cases of wrongful restraint. Judicial results show a slight improvement, the percentage of persons convicted to persons tried being 30·1 against 26·1 in 1891.

28. *Class V.—Minor offences against property.*—The number of true cases under this class rose from 39,841 in 1891 to 44,870, and if burglaries, which are

generally discussed under this head, are included, there was a total increase of 9,763 over last year's figures. Thefts increased by 4,386 and burglaries by 4,793, and although this may be primarily attributed to the pressure following on the high prices of food prevalent throughout the province, it is doubtless to some extent due to the change of practice in not enquiring into petty thefts and attempts at burglary, all of which are now shown as true. For this reason a comparison of judicial results by cases is no test, but as the proportion of persons convicted of offences under this class (including burglary) has risen from 53·1 to 55·8, it may be assumed that greater discrimination was shown by the police in sending up persons for trial. In the Gaya district there was a remarkable increase of 1,228 cases under class V and of 946 cases of lurking house-trespass and house-breaking. None of the cases call for special remark.

29. *Class VI.—All other cases.*—Under this class there was a net increase of 8,083 cases, which is chiefly accounted for by an increase of 7,129 in prosecutions for nuisances. Cases under the Salt and Customs Laws and under the Arms Act increased by 529 and 55 respectively, and there was also an increase of 755 under "special laws." Prosecutions under the Excise laws fell from 2,866 to 2,747, and of these 2,497 ended in conviction. Although the outbreak of crime was the heaviest that has occurred for many years, there was a decrease of 268 prosecutions for bad livelihood, but on the other hand the number of persons convicted rose from 1,739 to 1,779. The number of cases tried locally fell from 919 to 843. The Inspector-General thinks that more of these prosecutions might with advantage be taken up by Magistrates on the spot, especially in districts in which communication is good. Owing to the necessity of prompt disposal or to pressure of work, or to other causes, this is not always possible, and the Officiating Lieutenant-Governor leaves the question to the discretion of Magistrates, merely drawing attention to the advantages to be derived in such cases from an efficient local enquiry. In Faridpur and Backergunge a large number of bad livelihood cases were tried in the villages of the accused and with marked success. The Officiating Lieutenant-Governor regrets to notice that, although the importance of disposing of these cases promptly has frequently been insisted upon in former years, the returns show that in many districts great delay has been allowed to occur. Thus in Tippera one case lasted 582 days from the date of issue of process, one in Jessore lasted 479 days, one in Dacca 366 days, one in Shahabad 362 days, and one in Khulna 309 days, while several are shown as having lasted over 100 days. No explanation of the delay in these cases has been given, but the Officiating Lieutenant-Governor wishes to impress upon all Magistrates the necessity of seeing that these prosecutions are promptly disposed of, as delay only leads to failure of justice, to the intimidation of witnesses, and to making them reluctant to give evidence. The number of persons shown in the registers as under surveillance at the close of the year was 45,154, but as 11,459 of these were either in jail or untraced, the actual number with which the police had to deal was 33,695.

30. *Railway Police work.*—The number of cognizable and non-cognizable cases reported during the year was 3,813 against 3,493 in 1891. There was an increase of 355 in cognizable and a small decrease in non-cognizable cases. Out of 3,470 persons sent up for trial, 2,970, or 85·5 per cent., were convicted. None of the cases call for special notice. Including 15 suicides, there were 273 accidents, resulting in the death of 173 persons.

31. *Non-cognizable crime.*—Non-cognizable offences increased by 2,553, as will be seen from the subjoined table:—

	Number of cases.		Increase.	Decrease.
	1891.	1892.		
Class I ...	8,929	8,994	65	
" II ...	23	20		3
" III ...	922	823		99
" IV ...	59,088	57,264		1,819
" V ...	9,609	10,015	406	
" VI ...	11,779	13,585	1,806	
Special laws ...	28,726	30,923	2,197	
Total	119,071	121,624	4,474	1,921
		Net increase	2,553	

The increase in class VI is due to the increase of 1,527 in cases of security for keeping the peace on conviction under section 106, Criminal Procedure Code, the number having risen from 1,738 to 3,265. Process was issued in 74·3 per cent. of all non-cognizable cases, and of the persons summoned 81·1 per cent. appeared before the Court.

32. *Remands.*—The percentage of remands in police cases sent up for trial is shown in the following table:—

	Percentage of A forms disposed of at first hearing.	Percentage of A forms remanded once.	Percentage of A forms remanded twice.	Percentage of A forms remanded thrice.	Percentage of A forms remanded four times.	Percentage of A forms remanded five times.	Percentage of A forms remanded six times.	Percentage of A forms remanded more than six times.	Pending.
1890 (a)	34·9	19·8	18·8	9·7	6·0	4·3	2·7	5·5	2·4
1891 (a)	30·9	22·3	15·2	10·2	6·9	4·5	2·5	4·9	2·6

(a) Including Chittagong Hill Tracts.
(b) Excluding ditto ditto.

The Officiating Lieutenant-Governor is glad to observe that the improvement noticed in last year's report, which is the result of Sir Charles Elliott's stringent and most salutary orders on the subject, has been maintained during the year under review and is common to all divisions. Nothing can tend more to the efficient administration of justice, than the prompt disposal of cases, and nothing can be more injurious and oppressive to witnesses and all concerned than unnecessary remands. There was a satisfactory increase from 17,956 to 22,111 in the number of cases decided at the first two hearings, while the number of cases remanded six times or more has fallen from 2,528 to 1,147.

33. *Reconvictions.*—The number of persons against whom previous convictions were proved rose from 3,580 to 4,562, being an increase of 27 per cent. Special attention has been paid to this subject, as statistics show that the past history of many old offenders escapes notice. The register of convictions is now kept in English, and the Inspector-General is devising an improved system of indexing names, which, it is hoped, will facilitate search.

34. *Anthropometry.*—Further progress has been made during the year in perfecting the anthropometric system which has now been placed on a sound working basis. By improvements effected in the instruments used for measuring, which have been rendered automatic, greater accuracy has been secured; the rules of working have also been revised, a number of officers have been instructed, the system of search for cards has been perfected, and over 6,000 cards containing the measurements and all details of the previous history of the most dangerous criminals in the Province have been classified. Mr. Henry has devoted himself to perfecting the anthropometric scheme with marked zeal and ability. It is true that so far it has not been possible to put the system to any practical test, as it is still only in its infancy, but it promises to be of the greatest value in the future.

35. *Criminal Tribes.*—The most important criminal tribe in Bengal is that of the Maghya Domes in Bihar, who are now settled in various places in the Saran and Champaran districts under the supervision of Government officers. The settlements are said to be in an unsatisfactory state, attributable, according to the Inspector-General, to the system on which they are worked. Nevertheless, there can be no doubt that a very considerable degree of police supervision is now exercised over the Domes, and that their depredations are restrained to an extent which would be impossible if these settlements did not exist. In deference to the opinion of the local officers, a project to concentrate the Domes in one settlement in the Champaran district was abandoned, but Sir William Hudson's proposal to send a few of these men as pioneers to Burma, with a view to the eventual formation of a Dome colony there, has been sanctioned by Government as an experimental measure.

36. *Character of Officers.*—Mr. Henry has brought to the special notice of Government the names of the following officers for their good work during the year:—

District Superintendents.

Mr. Wilcox.	Mr. Orr.
„ Goad.	„ Judge.

Mr. James and Mr. Showers, Assistant Inspectors-General, Railway Police.

Assistant Superintendents.

Mr. Ryland.	Mr. Thomas.	Mr. Moore.

Inspectors.

Samuels.	Ajaib Lal.
Navakrishna Rai.	Harihar Charan Lal.
Girendra Chunder Mukerjea.	Deverinne.
Motilal Ghose.	Janki Parshad Tiwari.
Digamber Adhikari.	Mazhar-ul-Haq.
T. C. Das.	Monmohun Chakravarti.

The names of the other officers mentioned by the Inspector-General in his Report will be communicated to the Appointment Department.

Mr. Henry also acknowledges the valuable assistance he received from the Deputy Inspectors-General, and especially from Mr. Giles, as well as from Mr. Knyvett, who acted as his Personal Assistant for the last eight months of the year. To Mr. Henry himself the thanks of the Lieutenant-Governor are due for his able and efficient administration of the Department and for the complete and thorough report now submitted.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 26th August, 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Aug. 26, '93 Kalna ... Katwa ... Raniganj ...	0·20 1·38 1·63 1·72	Weather—seasonable. More rain wanted. Prospects of *aus, aman* and sugar-cane fair. Fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... ... 10 to 12 per rupee. Kalna ... ... 9 to 12 per rupee. Katwa ... ... 12 7/16 per rupee. Raniganj ... ... 12½ per rupee.
	2	Bankura „ 26, '93 Vishnupur ...	2·56 4·21	Weather—seasonable. *Aus* paddy is coming to maturity. *Aman* plants are thriving. Prospects good. Common rice selling at 13¾ seers per rupee at Sadar and 12 seers at Vishnupur.
	3	Birbhum „ 26, '93 Rampur Hát ...	0·38 0·76	Weather—seasonable. The break in the rains has done good to the crops, which are excellent. Price of common rice 11 to 14½ seers per rupee.
	4	Midnapore „ 26, '93	1·26	Weather—hot and cloudy with occasional showers. *Aus* crop nearly ready for reaping. Prospects of *haimanti* crop generally good. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 11 per rupee. Contai ... ... 12½ per rupee. Tamluk ... ... 11 per rupee. Ghatal ... ... 10 to 11½ per rupee.
	5	Hooghly „ 26, '93 Serampore .. Jahanabad ...	1·78 0·64 0·72	Weather—seasonable. Transplantation of *aus* finished on high lands, progressing on low lands. Jute being steeped. Fodder and water plentiful. Cattle-disease reported in Palba thana. Prices of common rice:— Srs. Sadar ... ... 10 to 11 per rupee. Serampore ... ... 10 to 11½ per rupee. Jahanabad ... ... 11 to 12 per rupee.
	6	Howrah „ 26, '93 Uluberia ...	0·64 0·50	Weather—seasonable. Harvesting of *bhadoi* paddy has commenced. Transplantation of *aman* paddy continues. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 to 10½ seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 26, '93	1·18	Weather—seasonable. Transplantation of *aman* going on. *Aus* being cut. Prospects of crops in the southern part of the district are not favourable, and bad in the thanas of Baukipur and Mathurapur. In the north of the district prospects are fair.
	8	Nadia „ 26, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	0·24 0·96 1·44 1·40 1·28	Weather—hot with occasional showers. The *aus* paddy harvest is nearly over. Prospects of *aman* rice fair on the whole. Jute harvest proceeding. Price of rice falling.
		Khulna „ 26, '93 Bagerhat ... Satkhira ...	0·82 0·44 1·10	Weather—fine with occasional showers. *Aus* being reaped: mostly damaged by excessive rain. *Aman* being transplanted.
	10	Jessore „ 26, '93 Jhenida ... Magura ... Narail ... Bangaon ...	1·71 2·57 0·42 2·99 0·84	Weather—sultry. Harvesting of *aus* and extracting of jute in progress. Cattle-disease reported from Salkhia. Fodder sufficient except in Mahomedpur. Prices steady.
	11	Murshidabad „ 26, '93	0·17	Weather—hot and cloudy at intervals. Transplantation of *aman* finished. Harvesting of *bhadoi* nearly completed. Jute, mulberry and hemp doing well. Fodder for cattle sufficient. Common rice sells at 11½ seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Aug. 26, '93	1·04	Weather—seasonable. *Aus* crop being still harvested and *aman* transplanted Prospects fair. Prices steady. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	„ 26, '93	2·68	Weather—seasonable. Harvesting of *aus* almost over. Transplanting of *aman* vigorously pushed on, the water having considerably gone down in the fields. Prospects fair. Cattle-disease reported from two thanas. Fodder not sufficient. Price of rice varies from 8½ to 10 seers per rupee.
	14	Tippera	„ 26, '93	3·7	Weather—seasonable. The rains appeared to have ceased for the time being. The whole of the district to the north and west being under water, fodder and fuel are not obtainable. Jute crop is good. The floods are falling, and much transplanting of *aman* will be done if no further rise takes places. On the whole, *aman* prospects have improved, but in large tracts much loss has been experienced. People and cattle are put to great inconvenience by the collapse of houses undermined by the floods. Rice is being sold at 8 seers per rupee in all but the more favoured tracts.
	15	Chittagong Hill Tracts.	„ 25, '93	3·23	Weather—seasonable. *Jum* paddy (early sown) is ripening. *Aus* paddy also ripening in some places. Condition of cattle generally good. Common rice selling at 9½ seers per rupee.
DACCA DIVN.	16	Dacca	„ 26, '93	0·37	Weather—hot. *Rowa* and *shail* paddy being sown. Harvesting of *aus* and jute nearly finished. Some damage has been done to the *aus* crop owing to high floods. Water still rising. Common rice selling at from 7 to 9 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	.. 26, '93	0·91 1·09 2·09	Weather—seasonable. Highest flood yet recorded, but water now receding. There is still a little *aus* left uncut on high lands, but in no part of the district does the outturn exceed 8 annas, while in many places it does not exceed 4 annas and 2 annas. In Kotalipara there is none. Average outturn of jute at best 8 annas, in many places not more than 5 annas. On high lands a 10—12-anna *aman* crop is hoped for, but in most of the low lands the outturn will be far lower, while in Kotalipara the crop may be said to be entirely lost. Coarse rice sells at 9-10 seers per rupee. Cattle are in many places in want of good fodder, and of course no grazing is possible. There are still cases of cattle-disease.
	18	Backergunge Pirojpur Patuakhali Bhola	„ 26, '93	0·79 Nil 1·81 0·74	Weather—seasonable. State and prospects of crops moderate. Common rice is being sold at from 8 to 10½ seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 26, '93	2·58	Weather—hot. Floods subsiding. Transplantation of *aman* going on. Prospects of crops improved. Price of common rice increasing, selling at 8 seers per rupee. Fodder insufficient.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 26, '93 ...	0·70 2·52	Weather—hot and cloudy at times. Prospects of standing crops continue to be very good. Transplantation not yet finished. Jute and *bhadoi* are being reaped. Prices of rice at Sadar and Thakurgaon unchanged. Condition of cattle good. Fodder and drinking water plentiful.
	21	Rajshahi Nator Naugaon	„ 26, '93	0·96 0·44 4·70	Weather—hot and cloudy, with showers at intervals. Prospects fairly good. Sowing of *ropa* paddy nearly finished. Harvesting of *aus* going on. Condition of cattle good. Fodder and water-supply sufficient. Price of common rice 10 to 13 seers per rupee.
	22	Rangpur Gaibanda Kurigaon Nilphamari	„ 26, '93	1·41 0·41 0·11 0·62	Weather—very hot. *Aman* still being transplanted. Jute is being cut. Prospects continue favourable. Common rice 10 to 13 seers per rupee.
	23	Bogra Sherpur	„ 26, '93 ...	3·62 3·21	Weather—unsettled. Some damage is reported to have been caused to standing crops by floods in the west of the district, but the general prospects are fair. Common rice sells at 11 seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 26, '93	0·52	Weather—seasonable; partially cloudy. Rivers now falling, but floods have been very high in Sirajganj subdivision. *Aus* and jute are still being reaped. Common rice sells at 11 seers per rupee at Pabna and Rs. 4 to Rs. 4-4 per maund at Sirajganj. Fodder and water-supply sufficient.
	25	Darjeeling Siliguri	„ 26, '93 ...	3·75 4·63	Weather—damp and cloudy. *In the hills*:—Indian-corn, *chota marua*, *bhadoi* paddy, *phaphar*, *shama* and *kangni* are being harvested. *Bara marua* and *aghani* paddy doing well. *In the Terai*:—Prospects of crops favourable. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 10 }
	26	Jalpaiguri	„ 26, '93	2·47	Weather—seasonable. Transplanting of *haimanti* paddy, harvesting of *bhadoi*, and steeping of jute continue. Common rice (*aus*) sells at 12 seers per rupee at Sadar and 9 to 10 seers at subdivision. Fodder sufficient. No cattle-disease.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Aug. 26, '93	6·20	Weather—hot with copious rainfall at the middle of the week. Transplantation of winter rice almost finished. Prospects of indigo, *makai*, *marua* and *sathi* paddy favourable. Cattle-disease reported from Bakhtiarpur, Kharakpur, Nawadih, and Shaikpura. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 11 to 14 } per rupee. Begusarai ... ... 12 to 13 } Jamui ... ... 12 }
	Begusarai ...	3·99	
	Jamui ...	1·93	
28	Bhagalpur „ 26, '93	0·66	Weather—hot. Transplanting of winter rice is nearly over. *Bhadoi* harvest in progress. Prospects good.
	Banka	0·36	
	Madhipura ...	0·88	
	Supaul ...	0·56	
29	Purnea „ 26 '93	3·22	Weather—variable; hot generally and storms at times. *Bhadoi* harvest and jute steeping in progress with good results. *Aghani* transplantation in a forward stage. Recent weather beneficial to all crops. *Bhadoi* rice coming into market is having the effect of lowering prices slightly.
	Kishanganj ...	0·28	
	Araria ...	2·00	
30	Malda „ 26, '93	0·49	Weather—hot and occasionally cloudy. Harvesting of *bhadoi* rice not yet completed owing to prolonged rainy whether. Transplanting of winter paddy still continues. Sugarcane coming into maturity. Ordinary rice sells at from 12 to 17 seers per rupee. Fodder and drinking water sufficient.
31	Sonthal Parganas „ 26, 93	1·06	Weather—showery with hot intervals between. Rice promises well. The Indian-corn crop cannot come to over 6 annas, and will probably be less. Rice selling a little higher than last year. Fodder sufficient.
	Godda ...	1·04	
	Pakur ...	0·88	
	Rajmahal ...	0·56	
PATNA DIVISION.			
32	Patna „ 26, '93	1·55	Weather—hot; sunny and sometimes cloudy and rainy. Condition of rice crop satisfactory, but *bhadoi* has largely suffered from excessive rain. Enquiries are being made as to the amount of injury done. Prices of common rice:— Srs. Sadar ... ... 15 } per rupee. Barh ... ... 13 } Bihar ... ... 15 } Dinapore ... ... 13 }
	Barh ...	2·40	
	Bihar ...	2·64	
	Dinapore ...	0·98	
33	Gaya „ 26, '93	1·80	Weather—cloudy in the beginning and clear and hot at the end of the week. Harvesting of *marua* and *makai* in progress. Transplantation of paddy still going on. Prospects good. Prices stationary. Common rice sells at from 12 to 15 seers per rupee. Fodder and water-supply ample.
	Jahanabad ...	1·14	
	Aurangabad ...	4·22	
	Nawada ...	2·22	
34	Shahabad „ 26, '93	1·26	Weather—unsettled; bright sunshine alternates with cloudy skies and occasional showers. Excessive rainfall of July has done vast damage to *bhadoi* in the south of the district. Everywhere this important crop is much below the average. Paddy looks very well indeed.
	Bhabhua ...	2·16	
35	Darbhanga „ 26, '93	1·77	Weather—hot and occasionally cloudy. Flood-water not yet entirely subsided. Extent of damage done to crops being ascertained. Crops not affected by floods are doing well. Retransplanting of rice being resorted to where seedlings are available. Cattle suffering in places for want of sufficient fodder. Prices rising.
	Samastipur ...	1·71	
	Madhubani ...	0·24	
36	Muzaffarpur „ 26, '93	1·52	Weather—cloudy and hot. Floods subsiding. The crops in the flooded area are very severely damaged. Extent of damage being ascertained. In Sitamarhi the paddy is being retransplanted where water has subsided. No disease among cattle. Fodder and water sufficient.
	Hajipur ...	0·74	
	Sitamarhi ...	0·27	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
PATNA DIVISION—*concld.*			
37	Saran Aug. 26, '93 Siwan ... Gopalganj ...	0·66 1·80 2·00	Weather—hot with only rare showers. Condition of crops very good. The first indigo mehai has concluded with a very short outturn. Present weather is favourable for the khunti crop, but it is not expected to yield much. Prices of common rice :— Srs. Chapra ... ... 13 per rupee. Siwan ... . 13 per rupee. Gopalganj ... ... 14½ per rupee.
38	Champaran „ 26, '93	0·62	Weather—cloud and sunshine as usual at this time of year. The flood has gone down. In many places where the *aghani* has been injured, fresh seedlings are being planted out. Fodder and water sufficient. Prices stationary.
ORISSA.			
ORISSA DIVN.			
39	Cuttack „ 26, '93	4·12	Weather—cloudy with occasional heavy showers. Early or *satika beali* maturing and in some places being reaped. *Sarad* being transplanted. Supply of fodder sufficient. Price of rice stationary.
40	Puri „ 24, '93 Khurda .. Banpur ...	3·44 3·81 4·70	Weather—hot with occasional showers. Rainfall sufficient for the time being. Transplanting and weeding of *sarad* going on. *Beali* being reaped in places. Miscellaneous crops doing well. Prices of common rice :— Srs. c. Srs. c. Sadar ... ... 11 13 to 15 12 per rupee. Khurda ... ... 11 0 to 17 1 per rupee.
41	Balasore „ 26, '93	1·86	Weather—showery. Light rain. Transplantation of paddy still in progress. More rain wanted everywhere. All crops doing well except in a small area in the north of the district where rain is badly wanted. Prices of rice are stationary at Bhadrak and have fallen from 13 to 14 seers at Balasore.
CHOTA NAGPUR.			
South-West Frontier Agency.			
CHOTA NAGPUR DIVN.			
42	Hazaribagh Aug. 26, '93 Giridi ...	1·53 4·82	Weather—moderately fine with occasional showers. Paddy, sugarcane and other crops doing well. *Gundli* and what remains of Indian-corn being harvested. Fodder and water ample. Prices more or less stationary.
43	Lohardaga „ 26, '93	1·40	Weather—hot and cloudy. Reaping of *gora* paddy commenced. Prospect of winter rice good. Common rice selling at 14 seers per rupee. Fodder and water plentiful.
44	Palamau „ 25, '93	4·87	Ordinary monsoon weather. Prospects of paddy good. Transplantation nearly finished. *Bhadoi* prospects generally poor except in Haroharganj and Mahuadand. *Makai* and *gora* paddy being cut. Rice selling at from 12 seers 6 chitaks to 17 seers per rupee. Some cattle-disease reported.
45	Singhbhum „ 26, '93	0·87	Weather—seasonable. Crops are doing well ; 12 to 16 annas outturn expected. Price of rice from 10 to 12 seers per rupee. Cattle-disease reported from one part of the district.
46	Manbhum „ 26, '93 Gobindpur ...	1·83 3·94	Weather—seasonable with occasional showers. Prospects of crops good, but too much rain is likely to do harm. Prices stationary. Fodder and water sufficient.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 26th of August 1893.

					DISTRICT OBSERVATIONS.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 29th August* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 26TH OF AUGUST 1893.

THE weather during the week just past has been influenced chiefly by a small depression, which appeared in the early part of the week to be crossing Burma from the east. It caused considerable changes of pressure at the stations on the Burma coast, and gave some indication of becoming an important disturbance. But after crossing the east coast of the Bay there was no increase of intensity, and it slowly drifted westward towards Ganjam, which it crossed between the 22nd and 23rd. It led to a fairly complete cyclonic circulation, but there was nothing approaching to rough weather, even on the west coast after it had passed inland. One peculiarity in connection with it was the trough of low pressure which remained along its track across the north of the Bay, a low-pressure area which appeared to have a centre not far from the Orissa coast for some days. The depth was very small, but it served to keep up the cyclonic circulation in the north of the Bay, and over the province for days after the larger depression was shown over the central parts of the country.

The conditions attending the depression during the present week are in many respects similar to those reported as being caused by a slight depression in the previous week. The most important is the comparative absence of rainfall, or speaking more generally, the failure of the depression to lead to disturbed conditions which would have been accompanied by increased precipitation. Under ordinary circumstances a depression such as that which recently crossed the Bay would have developed considerably while over the sea and, have been accompanied by squally weather and heavy rainfall, especially near its centre, but in this case the rainfall was not even general, and on an average, for the districts most under its influence (Orissa, South-West Bengal and Chota Nagpur), it was much under the average. The inference to be drawn from the experience of the past two weeks is that present circumstances are very unfavourable for rainfall, or in other words that the monsoon from the Bay is much weaker than usual. As these conditions when once established, to whatever causes they may be due, are found to remain very persistent, it appears likely that an absence of rainfall will remain a prominent feature in the near future, perhaps for some weeks.

Before the approach of the depression, that is, during the first two days of the week, light southerly winds were blowing in all districts, and settled weather prevailed, the light showers which occurred in places being of little account. After the depression was in the north of the Bay, northerly and afterwards easterly winds became general, and rainfall increased both in amount and extent. The falls were almost general on Wednesday and Thursday, when the centre of lowest pressure was crossing Ganjam and the south of Orissa, but during the latter half of the week there was again only partial rainfall. The light easterly winds continued, temperature was steadily above the normal, and pressure at inland stations underwent only small oscillations, such as are characteristic of settled weather.

Pressure.—The pressure arrangement, which has prevailed with very little modification throughout the week, is as follows:—readings have been above the normal in the northern districts and at times over the whole province, while over the Bay there has been a defect, which increased to rather more than a tenth of an inch while the depression was passing. There was a general brisk or moderate fall during the first two days of the week, followed generally by a slow rise or irregular changes during the remaining days. The mean difference from the normal varies from excess of ·03 inch in the northern districts to defect of ·04 inch in Orissa.

Temperature has been steadily above the normal both by day and night except at a few places where the air was temporarily cooled by local storms. The means for the week are therefore above the normal in all the larger divisions, excess varying from half a degree in Assam to nearly 2° in South-West Bengal.

Rainfall.—As stated above, only local showers, generally light, fell except for two days in the middle of the week, when rainfall was fairly general. The average falls are below the normal in all districts. In South Bihar and Orissa defect is about ·06 inch; in North Bengal 1 inch; in Chota Nagpur and North Bihar between 1 and 1·5 inches; and in Lower Bengal between 1·5 and 2 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 26th of August 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The total fall from 1st January to 26th August 1893...	66·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	46·79

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⌓, dew.

IRRIGATION OPERATIONS OF CANALS IN BENGAL DURING THE RABI SEASON 1892-93.

No. 997*I*.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 4th September 1893.

RESOLUTION.

READ—

Statements Nos. I, II, and III, showing irrigation operations of canals in Bengal during the *rabi* season 1892-93.

OBSERVATIONS.—The area irrigated during the *rabi* season of 1892-93 was 1,18,408 acres against 2,04,142 acres in 1891-92, showing a decrease of 41·9 per cent.

2. This falling-off was due to the exceptionally large area of *rabi* irrigated in 1891-92, which cannot be retained in years of ordinary rainfall. The area was, however, larger in 1892-93 than in any previous year, excepting 1891-92 and 1877-78.

3. The rainfall in eight districts averaged 2·02 inches more than that of 1891-92. In the three districts watered by the Sone Canals the fall averaged 33·36 inches against 17·31 inches in 1891-92.

4. There was no irrigation of *rabi* crop in 1892-93 from the Midnapore Canal, while from the Eden Canal the areas irrigated in Burdwan and Hooghly districts exceeded those of 1891-92 by 1,489 and 561 acres respectively. In the Sone Circle, owing to the increase of rainfall, there was a general decrease in the areas irrigated.

5. The details of the increase or decrease in the irrigation of the *rabi* crops from each canal during the year 1892-93, compared with those of the previous year, are given in the following statement:—

Canal.		Areas irrigated in rabi season.		More.	Less.
		1891-92.	1892-93.		
		Acres.	Acres.	Acres.	Acres.
Orissa ...	Taldanda Canal	336	264	......	72

	Net decrease ...	......	......	......	85,734

ORDER.—Ordered that a copy of this Resolution and of the statements Nos. I, II and III be published in the *Calcutta Gazette* and submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of this Resolution and of the statements be forwarded to the Commissioners of the Orissa, Burdwan and Patna Divisions; the Collectors of the Cuttack, Midnapore, Burdwan, Hooghly, Patna, Shahabad, Gaya, and Saran Districts; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

Calcutta,
The 4th September 1893.

O. C. LEES,
Offg. Under-Secy. to the Govt. of Bengal.

NOTIFICATION—No. 3065Mis.

The 3rd September 1893.—The following is published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

ANTWERP INTERNATIONAL EXHIBITION OF 1894 UNDER THE HIGH PATRONAGE OF HIS MAJESTY THE KING OF THE BELGIANS.

HONORARY PRESIDENT HIS ROYAL HIGHNESS THE COUNT OF FLANDERS.

FOREIGN SECTIONS.

GENERAL NOTICE.

(*Taken from the general Rules.*)

The Antwerp International Exhibition will include all Industrial, Scientific and Artistic Productions, as well as all Commercial Produce. It will comprise Maritime, Colonial and African Sections; also an Exhibition of Military Art.

Simultaneously with the General Exhibition, the Antwerp Royal Society of Fine Arts will hold a special exhibition of Painting, Sculpture, Engraving and Architecture, to which Artists of all countries are invited to contribute.

It is also intended to hold a series of shows and exhibits of Live Stock, Agricultural Products, Flowers, Fruit, etc.

The Exhibition will be inaugurated May 5th, 1894, and will remain open for six full months, closing at latest on November 12th, 1894.

It will be located in the new quarter of the city, in close vicinity of the Scheldt and the new maritime installations, and will be connected with the principal Railways.

It will cover in one enclosure an area of about 200 acres, including (1) a Palace of Fine Arts; (2) Several Halls covering about 120,000 square yards of ground, and intended for exhibiting Industrial and Commercial products, Machinery, Electric appliances, etc. These halls will be built of iron and steel and will be roofed with zinc.

A Board of Directors conduct the business of the Antwerp International Exhibition Company and decide all matters of Administration and Finance.

An Executive Committee under the honorary Presidency of Baron Osy van Zegwaart, Governor of the Province of Antwerp, and M. Jan Van Ryswyck, Burgomaster of the city, and under the effective Presidency of Count de Pret Roose de Calesberg, Member of the Senate, has charge of the organization and management of all Exhibits in the different departments.

By Decrees, dated 11th March 1893, Royal Commissions of the Belgian and Foreign Sections have been instituted, under the honorary Presidency of His Royal Highness the Count of Flanders. Also a Commissariat General of the Government, and General Commissions of the Belgian and Foreign Sections.

The Belgian Commission is presided over by M. Leon De Bruyn, Minister of Agriculture, Industry and Public Works.

The Foreign Commission under the Presidency of M. Valere Mabille has for its object to encourage and facilitate the co-operation of Foreign Exhibitors.

The Commissariat General of the Government, whose head-quarters are at the *Palais des Académies* in Brussels, is conducted by Count Hyppolyte d'Ursel, who represents the Government at the Antwerp International Exhibition, and is the official Referee between the Executive Committee of the Company and the Commissaries of the Belgian and Foreign Sections; also between the latter and the Foreign Commissaries delegated with the Exhibition in all matters where the interests of Foreign Exhibitors are concerned.

The Commissary General of Foreign Sections, M. Vercruysen-Brack, Member of the Senate, co-operates with the Commissary General of the Government in all negotiations with Foreign Countries, especially as regards the appointment of the Commissaries of the Foreign Sections.

The Foreign Governments have been officially advised of the formation of this International Exhibition; they have been invited to appoint their official Commissaries to represent them.

Committees for furthering the objects of the Exhibition may be formed in the principal cities or towns of the world under approval of the Belgian Government, and with the co-operation of its Diplomatic and Consular Agents abroad.

Where no official Commissary has been appointed, foreign Exhibitors may be represented by a private Committee or its delegate.

All products will be divided into classes, as per summary hereafter given, and will be exhibited in accordance with this classification in all the separate sections.

In the halls for Machinery and Electricity the products of each country will be exhibited together as far as the distribution of motive power will allow.

The charge for space in the different compartments, including general decoration of the halls, and the reception of goods, has been established according to position as follows :—

I.—Halls of Industry.

Collective space.

Ground space.	(*a*) Depth not exceeding 1 metre— *Per lineal metre frontage*	fr. 60
	(*b*) Depth exceeding 1 metre— *Per square metre, ground surface*	„ 60
Wall space.	(*c*) *Per lineal metre frontage*	„ 60

The charge for collective space allotted will in no case be less than ... ... „ 60

Detached spaces.

(*a*) Measured at the greatest dimension, the smallest being below 1 metre.
Per lineal metre frontage ... ... „ 90

(*b*) Both dimensions exceeding 1 metre.
Per square metre ground surface ... ... „ 90

The charge for detached space allotted will in no case be less than ... ... „ 90

CENTRAL GALLERIES.

In the Central Galleries the charge will be	Collective space— *Per square metre* ...	„ 90
	Detached spaces— *Per square metre* ...	„ 130

Charge for rooms having at least 5 metres frontage and 5 metres depth.	Single frontage— *Per square metre* ...	„ 70
	Corner frontage— *Per square metre* ...	„ 90

The allotted space will be measured at the greatest length and width above the floor.

II.—Halls of Machinery and Electricity.

For all non-working Machinery and exhibits of any height.

(*a*) The depth not exceeding 1 metre—
Per lineal metre frontage ... . fr. 60

(*b*) The depth exceeding 1 metre—
Per square metre ground surface ... ... „ 60

The charge for space in this department will in no case be less than ... ... „ 60

For all working Machinery, receiving its motive power from steam, water, gas, electricity, or general transmission, and working at least five hours daily and four days weekly, *the above charges will be reduced one-half.*

The allotted spaces will be measured at the greatest length and width above the floor.

III.—Maritime Installations, Gardens, Sheds and Tents.

Of whatever height.

(*a*) The depth not exceeding 1 metre—
Per lineal metre frontage ... ... fr. 25

(*b*) The depth exceeding 1 metre—
Per square metre ground surface ... ... „ 25

The charge for space in this department will in no case be less than ... ... „ 25

For space allotted under sheds or tents, the above charges will be increased by fr. 5 per metre.

For large spaces taken in the halls of gardens by the different countries, special terms will be arranged through the intervention of the Commissary General of the Belgian Government.

Foreign Goods, arriving by the Belgian State Railways, will be returned carriage free over the same lines. Negotiations have been opened with the private Companies and the Foreign Lines in connexion with the Belgian State Railways, to obtain the same terms from them.

Most of the regular Lines of Steamers will take goods for the Antwerp Exhibition at reduced rates of freight.

The Antwerp International Exhibition Company undertakes the handling of Goods within the Exhibition, free of charge, on all packages received not later than April 15th, 1894, and not exceeding 1,500 kilos in weight. This includes the delivery of the packages on the space allotted, and the eventual re-loading on the Railway trucks within the limits of the exhibition.

Empty packages will be stored at a low rate, and brought back for repacking at the close of the Exhibition.

The Executive Committee will arrange special terms for handling Goods and storing Empties with all Countries officially represented.

The general decoration of the Exhibition halls will be carried out at the expense of the Company; all private and special decorations will be at the expense of Exhibitors singly or collectively.

Strict watch and guard will be established to prevent goods being stolen, strayed or damaged, without, however, any responsibility being incurred by the Company in this respect.

All Exhibitors will be free to appoint at their own expense and under their own responsibility any number of private Inspectors from a List approved by the Company.

The Exhibitors, whether singly or collectively, are responsible for the whole charge for rent; for the supply, fixing, and decoration of all and any special appliances they may require, such as partitions, screens, extra ceilings, stands, raised flooring, extra foundations for heavy exhibits; also for the packing, laying out and repacking of their goods, rent for storage of Empties, etc.

Exhibitors requiring steam, water, gas or electricity must declare in their application for space the hourly quantity they require. It will be supplied as per tariff.

When motive power is required, the intended rate of speed must also be indicated.

In the Halls of Machinery, motive power will be obtainable per special tariff, and will be supplied from the main shaft for general transmission.

Intermediate transmission will be at the expense of Exhibitors; the foundations and all special appliances will also be at their cost.

A copy of the particular rules and regulations further relating to this department will be sent on application.

Articles of every day sale, also those manufactured on the spot, may be sold and delivered to visitors on payment of a percentage to be fixed by agreement; but such sales may not take place in the Halls without a special and written consent of the Executive Committee. A special convention will regulate the sale of refreshments on the gardens and grounds of the Exhibition.

An International Jury of Awards will be formed, the members of which will be appointed by their respective Governments; this Jury will be organised and presided over by the Commissary General of the Belgian Government, who will also propose for appointment by the Belgian Government members of the Jury from among the delegates of countries not officially represented.

The Jury will officiate as soon as possible. The Awards will consist of Medals or Diplomas of First class; Diplomas of Gold, Silver and Bronze Medals, and of honourable Mention.

All foreign goods will be admitted to the Exhibition in bond, paying no duty of any kind if re-exported.

All inventions, patents, drawings, models, trade marks, etc., exhibited will be placed under the immediate protection of the Belgian Government, and all rights of property in them will be effectually secured.

The Executive Committee will issue an official and complete catalogue methodically arranged and containing the name and address of each exhibitor, with particulars as to trade, place of production, etc. Foreign sections will have the right of issuing at their own expense their special catalogues and of selling them within their respective limits.

The issue of tickets for the lottery authorised by the Belgian Government may extend over several series of one million tickets each; the prizes to be purchased exclusively from Exhibitors. The issue of the first series of tickets will be authorised before the opening of the Exhibition.

Printed forms of application for space are supplied by the Executive Committee ***or by the Commissariats of Countries officially represented.*** **These forms must be signed, and addressed prepaid to the official Commissariat of the Country to which the intending Exhibitor belongs, or to the Executive Committee of the Exhibition, No. 9** ***rue Gérard, Antwerp,*** **not later than October 1st, 1893, for all countries not officially represented.**

All goods exhibited at the World's Fair, Chicago, which may be destined for the Antwerp Exhibition, will on arrival be stored **free of charge** ***in the halls, and as near as possible to their definite places.***

Arrêté, en séance du Conseil d'Administration, à Anvers, le 25 Mai 1893.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 2nd September, 1893.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
BURDWAN DIVN.	1	Burdwan	Sept. 2, '93	0·32	Weather—hot. Rain wanted for the *aman* crop. *Aus* being harvested; about a 12-anna crop. Prices of common rice:— Srs. Burdwan ... ... 10 to 13 ⎫ Kalna ... ... 9 to 12 ⎬ per rupee. Katwa ... ... 12[illegible] ⎪ Raniganj ... ... 12 ⎭
		Kalna	...	0·32	
		Katwa	...	0·60	
		Raniganj	...	0·23	
	2	Bankura	,, 2, '93	1·25	Weather—seasonable. *Aman* plants thriving. Harvesting of *aus* commenced in places Prospects fair. Condition of cattle good. Common rice sells at 12 seers 6 chitaks per rupee at Sadar and 12 seers at Vishnupur.
		Vishnupur	.	0·41	
	3	Birbhum	,, 2, '93	1·50	Weather—seasonable. The crops continue good. Price of common rice stationary.
		Rampur Hát	..	0·63	
	4	Midnapore	,, 2, '93	0·38	There has been a little rain almost every day but the weather has been hot and less cloudy. The reports are all hopeful this week. In the *Sadar* prospects of *aus* and *haimanti* paddy good. In *Ghatal* the outturn is expected to be nearly 14 annas. In *Contai* prospect of *aman* paddy seems to be hopeful so far. In *Tamluk*, except in the flooded tract, prospects are also good. On the other hand, in some very small localities in Contai the crop has failed for three or four years in succession, and there is some distress which is being met by local subscriptions. Prices of common rice:— Srs. Sadar ... ... 11 ⎫ Contai ... ... 13 ⎬ per rupee. Tamluk ... . 11 ⎪ Ghatal ... ... 10 to 11 ⎭
	5	Hooghly	,, 2, '93	0·14	Weather—seasonable. *Aman* transplantation still continues in Jahanabad, but is finished elsewhere. *Aus* harvest and steeping of jute in progress. Subdivisional reports generally prosperous. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 10 to 11 ⎫ Serampore ... ... 10 to 11½ ⎬ per rupee. Jahanabad ... ... 11 to 12 ⎭
		Serampore	..	0·37	
		Jahanabad	...	0·91	
	6	Howrah	,, 2, '93	0·50	Weather—cloudy; occasional rain. Transplantation of *aman* rice still continues. *Aus* paddy is being harvested in Ulubaria. Common rice selling at 10 seers per rupee. Fodder and water sufficient.
		Ulubaria	...	1·26	
PRESIDENCY DIVN.	7	24-Parganas	,, 2, '93	3·11	Weather—seasonable. Transplantation of *aman* going on. *Aus* being cut. Prospects of crops fair in the north of the district, but poor in the southern part, especially in the thana of Bankipore. Prices of common rice:— Srs. Sadar ... ... 10 to 10¾ ⎫ Basirhat ... ... 10 ⎬ per rupee. Barasat .. .. 10 ⎪ Diamond Harbour ... ... 11 ⎭
	8	Nadia	,, 2, '93	0·42	Weather—hot with occasional showers. Harvesting of *aus* rice nearly over; outturn varies from 8 to 16 annas. Prospects of *aman* rice very fair. Land being prepared for winter crops. Prices stationary.
		Kushtia	..	0·79	
		Meherpur	...	0·72	
		Chuadanga	...	0·40	
		Ranaghat	...	0·31	
	9	Khulna	,, 2, '93	2·30	Weather—showery. *Aus* crop being harvested. *Aman* transplanted. Jute being cut. *Aus* has been much damaged in places.
		Bagerhat	...	0·14	
		Satkhira	...	0·42	
	10	Jessore	,, 2, '93	0·88	Weather—hot with occasional showers. Harvesting of *aus* and extracting of jute in progress. Transplantation of *aman* completed. Cattle-disease reported from Salkhia. Fodder sufficient save in Mahmudpur. Prices steady.
		Jhenida	...	0·32	
		Magura	...	0·82	
		Narail	...	0·93	
		Bangaon	...	0·54	
	11	Murshidabad	,, 2, '93	1·50	Weather—very hot. Harvesting of *bhadoi* paddy finished. Winter rice doing well. Jute and mulberry being cut in some places. Fodder sufficient for cattle. Common rice sells at 11½ seers per rupee.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Sept. 2, '93	3·26	Weather—seasonable. Harvesting of *aus* nearly over. Transplantation of *aman* still continues. Prospects fair. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali *	„ 2, '93	4·88	Weather—seasonable. Harvesting of *aus* and transplanting of *aman* continue. Prospects fair. Fodder insufficient. Cattle-disease reported from some thanas. Common rice sells from 8 to 9 seers per rupee.
	14	Tippera	„ 2, '93	2·17	Weather—seasonable. From 6 to 8 annas of *aus* crop destroyed by the floods. The prospects of *aman* are looking up, and a good outturn may be expected if the water subsides fast. Jute crop was good, but water being high, it could not be cut in all places.
	15	Chittagong Hill Tracts.	Aug. 31, '93	3·94	Weather—sunny with occasional showers of rain. Harvesting of *aus* paddy commenced. No vegetables available in the bazar. No cattle-disease reported. Common rice selling at 7 seers and 14 chitaks per rupee.
DACCA DIVN.	16	Dacca	Sept. 2, '93	Not reported.	Weather—hot. *Rowa* and *shail* paddy being sown. Prospects of *aman* paddy fair. Harvesting of *aus* paddy and jute nearly finished. High floods have damaged these crops to some extent. Water subsiding. Common rice selling from 7 to 9 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	„ 2, '93	1·02 0·18 1·22	Weather—very hot, but strong south-east breeze has sprung up to-day (2nd). Water steadily falling. *Aman* doing fairly well on high lands. Sugarcane said to be doing well in Goalundo, but flood has damaged it in other places. Common rice sells from 9 to 10 seers per rupee. In many places cattle are short of fodder, especially in Goalundo and the Sadar, but no want of it in Madaripur. Some cattle-disease still.
	18	Backergunge Pirojpur Patuakhali Bhola	„ 2, '93	0·63 0·74 1·84 1·31	Weather—seasonable. State and prospects of crops fair. Sowing or transplantation of *aman* paddy nearly over, but the crop has been damaged in places by the flood. *Aus* is expected to yield about 5 annas of an average crop. Common rice sells at from 8 to 10 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 2, '93	1·17	Weather—fair and hot. The flood is subsiding and the transplantation of *aman* is rapidly going on. Prospects of crops are improving. Common rice is selling at 8 seers per rupee. Condition of cattle good. Fodder is not sufficient at Kishoreganj and Tangail.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 2, '93 ...	0·93 0·30	Weather—hot. Prospects of standing crops continue to be good. Transplantation of *haimanti* is nearly over. *Bhadoi* is being reaped, and jute is being washed. Price of rice at Sadar 12 seers per rupee and that at Thakurgaon stationary. Condition of cattle good. Fodder and drinking water sufficient.
	21	Rajshahi Nator Naugaon	„ 2, '93	1·56 0·54 3·56	Weather—seasonable. Sometimes intolerably hot, with occasional heavy showers. Prospects of standing crops on the whole good. No cattle-disease. Fodder and water-supply ample. Price of rice varies from 10 to 12 seers per rupee.
	22	Rangpur Gaibanda Kurigaon Nilphamari	„ 2, '93	1·20 0·25 Nil 0·32	Weather—hot and cloudy. Transplantation of *aman* in progress. Some rain would be beneficial. Price of rice unchanged.
	23	Bogra Sherpur Nattkhila	„ 2, '93	2·52 2·55 0·99	Weather—unsettled. Transplantation of *aman* nearly finished. Prospects unchanged. Common rice sells at 10 seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 2, '93	0·32	Weather—hot. Rivers falling steadily. In the Sirajganj subdivision and elsewhere about 6 to 8 annas of the *aus* and 6 annas of the jute crop have been damaged. *Aman* is doing well except on very low lands which were inundated very early in July. Common rice selling at Rs. 4-12 to Rs. 5 per maund at Sirajganj and 9 seers per rupee at Pabna.
	25	Darjeeling Siliguri	„ 2, '93 ...	2·57 10·76	Weather—seasonable. *In the hills*:—Indian-corn, *bhadoi* paddy, *shama* and *kangni* ripening and being harvested. Potatoes promise a fair crop. *In the Terai*:—*Bhadoi* being harvested. Jute being cut and steeped. Transplanting of *haimanti* paddy almost finished. Prices of coarse rice:— Srs. Hills ... ... 10 } per rupee. Terai ... ... 11 }
	26	Jalpaiguri	„ 2, '93	3·86	Weather—hot. Harvesting of *bhadoi* and transplantation of *haimanti* paddy not yet completed. Steeping of jute continues. *Bhadoi* rice sells at 13 to 14 seers per rupee at Sadar. Fodder and water-supply sufficient. No cattle-disease.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.	27	Monghyr Sept. 2, '93 Begusarai ... Jamui ...	Nil Nil 0·24	Weather—very sultry and cloudy at times. Transplantation of paddy completed. Prospects of *marua* favourable. The recent flood of Gandak has much damaged the standing crops in the northern part of the district. Indigo and sugarcane doing well. Cattle-disease is reported from Balia, Nawadih, Shaikpura, Kharakpur, and Bakhtiarpur. Fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 12 to 15½ } Begusarai ... ... 12 to 13 } per rupee. Jamui ... ... 12 }
	28	Bhagalpur „ 2, '93 Banka Madhipura ... Supaul ...	Nil 0·50 0·12 0·24	The estimated outturn of *makai* is from 6 to 8 annas and of *marua* 12 annas. Transplantation of rice almost finished. Prospects good. Price of common rice 13¼ seers per rupee.
	29	Purnea „ 2, '93 Kishanganj ... Araria ...	0·78 1·25 0·30	Weather—sultry; east winds at Kishanganj. *Bhadoi* harvest going on with good results. Jute being steeped. Transplantation of *aghani* finished in Araria subdivision, but still going on at Sadar and Kishanganj. It is slightly retarded at the latter place for want of copious rain. Fodder and water sufficient. No cattle-disease. Prices of new *bhadoi* rice :— Srs. Sadar ... ... 14 to 20 } Kishanganj ... ... 16 } per rupee. Araria ... ... 19 }
	30	Malda „ 2, '93	1·37	Weather—hot, clear and cloudy at intervals. *Bhadoi* paddy still being reaped. Transplanting of winter rice nearly over. Washing of jute continues. Price of rice again rising owing to large exportation to the eastern districts. No want of fodder or drinking water.
	31	Sonthal Parganas „ 2, 93 Deoghur ... Jamtara .. Pakur ... Rajmahal ...	0 65 Nil 0·12 Nil 0·84	Weather—very hot and cloudy. Slight rain in Rajmahal, Dumka and Jamtara. Paddy crops doing well, though a little rain is required for *aghani dhan* on high lands. Fodder and water sufficient. Rice selling at the same rate as last week.
PATNA DIVISION.	32	Patna „ 2, '93 Barh ... Bihar ... Dinapore ...	0·63 Nil Nil 0·06	Weather—hot and sunny. The need of rain is reported from the south of the district, whereas in Gaya the fall has been up to now not excessive. Prospects of rice good. *Bhadoi* crops are being harvested. Prices of common rice :— Srs. Sadar ... ... 15 } Barh ... ... 12½ } per rupee. Bihar ... ... 15 } Dinapore ... ... 13 }
	33	Gaya „ 2, 93 Jahanabad ... Aurangabad ... Nawada ..	0·02 0·07 0·25 0·10	Weather—very hot. Harvesting of *bhadoi* crops progressing with poor outturn. Transplantation of paddy approaching completion: prospects favourable; but rain much wanted. Common rice sells from 11 to 15 seers per rupee. Fodder and water-supply sufficient.
	34	Shahabad „ 2, '93 Buxar ... Bhabhua ... Sasaram ...	Nil 0·30 Nil Nil	Weather—close. Paddy thriving well. Sugarcane promising. *Bhadoi* crops being harvested. More rain wanted on high lands for paddy. Fodder sufficient. Prices stationary.
	35	Darbhanga „ 2, '93 Madhubani ...	1·61 0·36	Weather—very hot and sometimes cloudy. Rain wanted in parts of district. Flood water has almost subsided. The loss of crops in the flooded parts has been most severe. Extent of damage still being ascertained. Retransplantation of paddy in progress where seedlings are available. Fodder difficulty daily diminishing. Price of common rice stationary. There has been a rise in the prices of *makai* and *marua*.
	36	Muzaffarpur „ 2, '93 Hajipur Sitamarhi ...	2·92 0·10 0·86	Weather—hot, fair and sometimes cloudy. Crops very materially damaged in Sadar and Sitamarhi subdivisions by the late floods. The *bhadoi* has been lost over an extensive area, and is also not good in Hajipur subdivision. Prospects of rice fair except where it was washed away by the floods. No disease among cattle. Fodder and water sufficient.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Sept. 2, '93 Siwan ... Gopalganj ...	Nil Nil 1·02	Weather—hot and unusually bright. A heavy local thunderstorm at Bansopali, 3 miles from Siwan, on the 31st August, with 6 inches of rain. Prospects good on the whole at present, but rice beginning to suffer from want of moisture. Indigo second crop giving better produce than the first. Water and fodder plentiful. Prices of common rice:— Srs. Chapra ... ... 13 per rupee. Siwan ... ... 13 per rupee. Gopalganj ... ... 14¼ per rupee.
	38	Champaran „ 2, '93	0·25	Weather—bright and very hot with occasional light showers. In many places in the area affected by the recent flood fresh *aghani* seedlings are being planted out. Prospect of *aghani* in places not affected by the flood is good. Fodder and water sufficient. Prices stationary.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 2, '93	3·83	Weather—cloudy with fine rain and heavy showers occasionally. No change in the state and prospects of crops since last report. Price of common rice stationary.
	40	Puri Aug. 31, '93 Khurda ... Banpur ...	4·01 4·40 1·40	Weather—seasonable. Rainfall sufficient except in portions of the Gope and Banpur thanas where it is somewhat deficient. *Beali* being reaped. Transplantation of *sarad* still going on in places. Miscellaneous crops doing well. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 11 13 to 15 12 per rupee. Khurda ... ... 11 0 to 17 1 per rupee.
	41	Balasore Sept. 2, '93	3·67	Weather—seasonable; cloudy with heavy showers. Transplantation almost finished except in lands liable to flood. Fair prospect of a 12-anna rice crop. In Balasore price of rice has fallen to 16 seers per rupee.
CHOTA NAGPUR.				
South-West Frontier Agency.				
CHOTA NAGPUR DIVN.	42	Hazaribagh Sept. 2, '93 Giridi ...	0·13 0·25	Weather—bright with passing clouds and very warm. Indian-corn has yielded very poorly. Rice crops very promising. Sowings of oil-seeds in progress. Fodder and water ample. Prices more or less stationary.
	43	Lohardaga „ 2, '93	1·03	Weather—hot and cloudy. Reaping of *gora* paddy continues. Prospect of winter rice good. Common rice selling at 16 seers per rupee. Fodder and water sufficient.
	44	Palamau „ 1, '93	0·37	Light monsoon weather. *Bhadoi* crops estimated at about 2 annas. Paddy promises well at present, but more rain will soon be required in some parts. Rice selling at 11 seers 7 chitaks to 16 seers 4 chitaks per rupee. A little cattle-disease reported.
	45	Singhbhum „ 2, '93	1·77	Weather—seasonable; sunny alternating with showers of rain. Crops doing well. *Gora dhan* being harvested with 12 annas outturn. Crops on ground expected to yield 12 to 16 annas. Price of rice 12 to 14 seers per rupee.
	46	Manbhum „ 2, '93 Gobindpu ...	0·96 0·40	Weather—bright and occasionally showery. Weather generally very favourable. *Gora dhan* is being harvested. Prospects so far good. Prices stationary.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 2nd of September 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th May 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, he corresponding space is left blank. If any of the returns a[re] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at lea[st] 0·1 inches of rain has fallen.

CALCUTTA, *the 5th September* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M. SATURDAY, THE 2ND OF SEPTEMBER 1893.

AT the end of the previous week a slight residual depression remained off the Orissa coast for some days, and at the beginning of the present one was in the same position, but was somewhat better defined. It was not of sufficient depth to cause disturbed weather in that region of the Bay, and even in Orissa the only result was seen in light winds of abnormal direction and fairly general rainfall. On the second day of the week it had almost disappeared, the area of lowest pressure being transferred northwards to South-West Bengal and Chota Nagpur, where rainfall became more general and moderately heavy for a day or two. Thus soon after the week began, fairly normal conditions prevailed over the greater part of the province, except as to the rainfall, which was scanty in the northern districts.

On Tuesday, the 29th, signs of the formation of a new depression began to appear in Burma. Pressure fell briskly not only in Burma but also in Bengal, and from that time till the end of the week there was a steady downward tendency, which gradually resulted in a depression of considerable depth. The influence in Bengal was very slight till the 31st, as the wind circulation continued easterly, and comparatively fine weather with light local showers generally prevailed, but while the depression was forming, very heavy rain fell in Burma, especially at Moulmein and Tavoy. On the 31st a shallow depression extended across the north of the Bay from Arakan to Orissa, and winds on the north-west coast became northerly, though everywhere very light. In the central and northern districts of Bengal rainfall was becoming more scattered, but otherwise there was no change. On the following day, the 1st of September, a further brisk fall of pressure set in from the east, the depression became better defined, and the area of lowest pressure was then in the north-west of the Bay; gradients were steeper in the south of the Bay, and south-westerly winds were blowing in Madras, the Circars, Burma and probably the part of the Bay between. On the last day of the week pressure fell rapidly in South-West Bengal and briskly over the whole province, and the depression appeared to be moving northwards. Heavy rain was then falling in Orissa, and showers were more numerous in all districts except Bihar and North Bengal, where, owing to the indraught, rainfall had almost entirely ceased.

Over the province, therefore, the most important feature of the weather during the week has been the scanty rainfall and consequent high temperature except in Orissa, where general rain fell in the early part and heavy rain on the last day of the week, resulting in the average fall being rather over the normal.

Pressure.—At the beginning of the week pressure was above the normal by nearly a tenth of an inch in the northern districts, about a twentieth in Lower Bengal and Chota Nagpur, while in the Circars and the south of Orissa there was a small defect. On the second day of the week it began to fall slowly and continued to fall, at times slowly and others briskly almost without interruption during the remaining days. On the last day of the week, when the depression was over the north-west of the Bay, defect was more than a quarter of an inch in the area of lowest pressure, and more than ·15 inch over a great part of the province.

Temperature continued high in all districts throughout the week except in Orissa, where the average for the whole week is slightly below the normal. In Bihar mean excess is between 2° and 3°, and in the other districts between 1° and 2°.

Rainfall.—Fairly general rain fell in Orissa in the early part of the week and also in parts of South-West Bengal and North Bengal, but amounts were generally very small, and the average falls are much below the normal except in Orissa. The falls have been very light in Bihar and Chota Nagpur, the former receiving little more than a sixth part, and the latter only a quarter of the normal. South-West Bengal has received less than one inch instead of between two and three inches. The fall in East Bengal is 1·07 inches and in North Bengal 0·97 inch below the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 2nd of September 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·14
The total fall from 1st January to 2nd September 1893	69·53
The average fall of the corresponding period for 24 years, Surveyor-General's Office	48·93

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; d, drizzling rain; ⌓, dew.

RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING OFFICES AT THE OUTPORTS FOR THE YEAR 1892-93.

No. 2090Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 6th September 1893.

RESOLUTION.

READ—

The Annual Report on the working of the Calcutta Shipping Office and of the shipping offices at the outports for the year 1892-93.

The post of Shipping Master at Calcutta was filled by Lieutenant E. W. Petley, R.N., throughout the year. Mr. L. Namey, the Chief Clerk of the office, was the Deputy Shipping Master.

2. Owing to the extension of the Home trade area under Act VI of 1891, the receipts of the Shipping Office show a further falling off, as the several steamers trading to the Straits Settlements now included in the Home trade limits engage and discharge their crew on board instead of through the Shipping Office. The falling off from this cause has, however, been all but counterbalanced by gains in other directions. This result is due to an increase in the number of German steamers trading to Hamburg, whose engine-room crews are composed of natives, and to an increase in the number of steamers belonging to Messrs. Apcar and Company, trading to China, as well as to more numerous arrivals of tramps or vessels that do not trade regularly to this port, but seek for cargo wherever available. The actual receipts amounted to

Rs. 31,450 against Rs. 31,993, while the disbursements were Rs. 21,376 against Rs. 20,318, during the previous year.

3. It is considered that the full effect of Act VI of 1891 has now been realized, and that the financial position of the Shipping Office has attained a condition which, considering the present commercial outlook, will continue.

4. There was a large increase in the transactions of the funds held in trust by the Shipping Office. These trust funds come under three heads, viz., "Ticket money," "Deposit money" and "Estates of deceased seamen."

The funds under "Ticket money" show a slight decrease of Rs. 288, due to a smaller number of seamen having allotted a portion of their wages for the benefit of their families. The cause of this falling off in the number of allotments cannot be readily ascertained, but it is believed to be the result of fewer Asiatics having shipped on sailing vessels during the year.

Under "Deposit money of British seamen" there is an increase of Rs. 27,715, mainly due to the Deputy Shipping Master, during a considerable portion of the year, having made it a condition in sanctioning the discharge of European seamen that they should deposit at the Shipping Office a portion of their wages as security against their falling into distress. This has caused additional work on the Shipping Office, as the money thus deposited is drawn out in small sums. It is doubtful whether any real good is done by this arrangement, and the question is receiving the attention of the Board of Revenue. The total amount deposited was Rs. 61,368, of which Rs. 60,061 represents the voluntary deposits of 419 seamen, the balance, Rs. 1,307, being the wages of 7 seamen, was deposited by masters of vessels on account of seamen who were either too ill in hospital to understand their accounts, or who, being about to be left behind in hospital or jail, refused to sign off the articles of the ships they belonged to.

Under "Deposit money of native seamen" there was a decrease of Rs. 1,840, due to a smaller number of native seamen having been left behind in hospital or jail. These deposits were involuntary and were made on account of 49 seamen.

The funds under "Estates of British seamen" showed an increase of Rs. 5,750, chiefly due to the receipt of some large estates of officers belonging to the British India Steam Navigation Company, who, in addition to wages due to them, had considerable sums deposited in the Bank. These amounts were realized by the Shipping Office and credited to the Board of Trade.

Under "Estates of native seamen" there was an increase of Rs. 2,071, due to a few estates of deceased native seamen of considerable value, which had been accounted for by masters of ships in the United Kingdom and elsewhere having been collected by the Board of Trade and transmitted to the Shipping Office through the Government of India. The increase is also partly attributable to the receipt of the wages of the whole of the native crew of the ship *Danube*, which is reported to have been lost, the amount being entered in the books of the office under the head "Estates of deceased native seamen."

5. The number of seamen of all nationalities shipped and discharged through the Shipping Office was 16,955 and 16,428 respectively, against 17,194 and 16,435 during 1891-92. Particulars as to the nationality of the seamen are given below:—

	1892-93.		1891-92.	
	Shipped.	Discharged.	Shipped.	Discharged.
British	1,451	1,528	1,474	1,398
Europeans, Continental	548	380	441	456
Americans and West Indians ...	210	198	275	188
Australians...	13	16	14	17
Asiatics other than Indians ...	351	326	458	341
Indians proper	14,031	13,655	14,234	13,697
Eurasians and Goanese... ...	351	325	298	338
TOTAL ...	16,955	16,428	17,194	16,435

The difference between the total number shipped and discharged during the year is not so great as that in the preceding year, the figures being 527 against 759 in the previous year.

6. In addition to the above, the number of seamen of all nationalities shipped on and discharged from foreign vessels through their Consulates were—

Shipped	...	...	...	...	144
Discharged	...	...	...	...	112

7. There has been an increase in the value of money-orders issued by the Shipping Office during the year, compared with the figures of the previous year. The sums remitted during the current year amounted to Rs. 20,305 against Rs. 11,009 during 1891-92. This increase is due to a few exceptionally large orders having been issued during the year, and to the increase in the number of British seamen discharged through the Shipping Office.

8. The health of European crews in British ships continues to be good: 13,580 European seamen visited the port in British ships, of whom 16 died while on the river and 21 in hospital. Of the deaths while on the river, 9 were from drowning, 1 from heat apoplexy, and 6 from cholera. There was one case of scurvy on board the ship *John Davie* brought to the notice of the Shipping Master, but no action was taken, as the seaman admitted that he had contracted the disease previously on board a steamer: the attack was of a mild form. On inspection it was found that the provisions and water on board were good, and that lime-juice was served out regularly.

9. The health of native crews is also believed to have been good, but no true statistics can be furnished owing to a very small percentage of the sick entering hospital.

10. The Health Officer of the Port visited 813 in-coming and 684 out-going vessels. Seven cases of scurvy were brought to the notice of the Health Officer, one on board the *Carrizal* and six on board the *Lyndhurst*. They were taken to hospital and discharged cured in from 1 to 36 days. The provisions on board the *Lyndhurst* were examined and found to be good, and the lime-juice up to standard requirements.

11. Two cases of imposition on seamen were reported, and steps were immediately taken by the authorities to inquire into the matter. In both cases sums improperly withheld from seamen were recovered and paid to them.

12. Two complaints were made as to the quality of the food supplied on board ship. In one case three of the crew of the *Leyland Brothers* produced samples of the bread issued to them. As these samples appeared unfit for human consumption, they were sent to the Health Officer of the Port, who held a formal survey on board and condemned the bread. The master was thereupon directed to issue no more of the condemned bread, and to ship immediately a fresh supply. In February last four of the crew of the *Ancyra* complained of the quality and short issue of the provisions on board that vessel, but on enquiry the complaint proved groundless. A seacunny on board the S.S. *Dictator* complained of having been assaulted at Colombo by the second mate. As the complainant admitted that the assault was slight, the mate was simply admonished.

13. The receipts of the Chittagong Shipping Office amounted to Rs. 209, against Rs. 99 in the previous year. The increase is due to a larger number of seamen having been exchanged or transferred to and from ships in port, and to two ships which discharged their whole crews having engaged native crews in place of the Europeans discharged. There were no disbursements.

14. The receipts of the trust funds amounted to Rs. 13,902. Of this sum Rs. 12,986 were on account of deposit money of British seamen, made up as follows:—Rs. 4,727 deposited by masters as representing the wages of 23 seamen left behind in hospital or jail, and Rs. 8,259 deposited voluntarily by 60 British seamen. The deposits from native seamen were all voluntary, and amounted to Rs. 641 from 18 men.

15. The number of seamen shipped and discharged were 86 and 111, against 17 and 50 during the previous year. In 23 cases the seamen were discharged owing to their being in jail, and on this point the Shipping Master at Chittagong writes:—

"The increase of 22 men under the head 'in jail' may be attributed chiefly to the action of the Calcutta Shipping Office in prohibiting seamen discharged at Chittagong being sent on to Calcutta in search of employment. Consequently the men under reference, in failing to effect exchange of ships at this port, and persistently refusing to go to sea in their own vessels, had

therefore, under section 83, clause 2 or 5 of Act I of 1859, to be sentenced to terms of imprisonment which necessitated their discharge from their ships at Chittagong ; and as under the jail rules offenders sentenced to more than a month's imprisonment are forwarded to the Presidency Jail to complete their terms of imprisonment, it follows that by violation of the law the men in question actually succeeded in gaining their object of getting clear of their ships, and of being sent to Calcutta at the state expense and not at their own, as they otherwise would have gone. I would also mention, regarding this subject, the rule is that no seaman goes to Calcutta in search of employment without at least Rs. 50 to take on arrival, the money being remitted by me to the Shipping Master, Calcutta, and in place of any seaman so sent to Calcutta, another man, who probably was penniless in Calcutta, is sent to Chittagong to replace him; the action of the Calcutta Shipping Office is *a priori* difficult to comprehend. Nor is this all; for, under the jail rules, seamen forwarded to Calcutta to complete sentences of imprisonment go in charge of a European policeman, and the state has as well to bear the cost of his passage to and from Calcutta."

The Board of Revenue are in communication with the Shipping Master, Calcutta, and the Inspector-General of Jails, Bengal, and a further report has been promised.

16. During the year 100 ships were visited by the Shipping Master to enquire into the health of the crews, to inspect provisions, drinking-water, medical stores, and forecastle accomodations, and to enquire into accidents and casualties on board. The results are said to have been generally satisfactory. The health of the shipping was bad in the early, and good in the latter, part of the year, and there were no cases of scurvy or disease arising from bad or insufficient food.

17. The admissions into hospital amounted to 37 against 41 in the previous year. There were actually 7 cases of cholera in the port, 4 of which terminated fatally, against 5 out of 10 during the previous year.

18. Hospital port dues were re-imposed on the shipping from 1st May 1893, and a provisional hospital for seamen of all races was started preparatory to the erection of a new combined hospital at this port.

19. The duties of Shipping Master at Chittagong were performed by Mr. E. Good from 9th June 1891 to 4th November 1892, during the absence on furlough of Mr. Warden, the permanent incumbent, who resumed charge of the office on the 5th November 1892.

20. At the Orissa ports, including Balasore and Puri, the number of seamen shipped and discharged amounted to 3 and 17 against 2 and 1 during the previous year. Of those discharged, 16 proceeded to Calcutta. The attention of the Commissioner of the Orissa Division has been drawn to the large number of discharges in the ports under his jurisdiction, and he has been directed to instruct the officers exercising the powers of a Shipping Master not to grant discharges unless on good grounds, as the result is to swell the number of unemployed seamen in Calcutta.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE INCOME-TAX IN BENGAL FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 9th September 1892.

RESOLUTION—No. 4343S.R.

READ—

The Report of the Board of Revenue on the financial results of the administration of the Income-tax for the year 1892-93.

1. The principal administrative change that took place in the working of the Income-tax Act, II of 1886, during the year, was the amalgamation, for the purposes of income-tax administration only, of the district of Hooghly with that of Howrah, of the district of Bankura with that of Birbhum, and of the district of Manbhum with that of Singhbhum. This reform, introduced in accordance with the suggestion made in paragraph 10 of the Resolution on the Income-tax report for 1891-92, was carried out shortly before the end of the year under review. The result will be an annual saving of Rs. 3,948. Regulations were laid down by the Board with the approval of Government for the appointment and promotion of Assessors, which will, it is hoped, yield good results. In December 1892 the Calcutta Income-tax Office was removed to the new building in Dalhousie Square, and the separate Income-tax sub-treasury was abolished in consequence.

2. The following statement compares the financial results of the income-tax during the last two years:—

	1891-92.	1892-93.
	Persons.	Persons.
Number of persons finally assessed, including Government servants, who pay through the Accountant-General	111,160	111,858
Number of persons originally assessed, excluding Government servants	105,967	106,142
Number of persons finally assessed, excluding Government servants	103,176	103,894
Number of assessees, including Government servants, who paid the tax within the year	107,878	108,818
	Rs.	Rs.
Final demand of tax for the year, excluding that paid by Government servants and interest on securities...	36,82,269	36,97,623
Final demand of tax for the year, including that paid by Government servants and interest on securities	41,54,738	41,73,554
Final demand of tax for the year, including penalties, fines, and arrears of previous years	45,30,877	44,50,299
Collections of tax within the year, excluding Accountant-General's collections ...	35,58,330	35,84,774
Collections of tax within the year, including Accountant-General's collections ...	40,20,843	40,60,705
Actual receipts, including advance and excess payments and after adjustments ...	43,06,720	42,25,366
Charges	1,86,959	1,80,171
Percentage of charges	4·3	4·3
Net revenue	41,19,761	40,45,195

The net revenue shows a decrease of Rs. 74,566 or 1·8 per cent., as against an increase of 1·5 per cent. in the preceding year. Including advance payments and excess collections, and making allowance for various adjustments, the actual receipts at the close of the year amounted to Rs. 42,25,366 in the year under report, and to Rs. 43,06,720 in the previous year: the decrease is in the collection of the arrear demand. The receipts on account of the current

9. The Board have reproduced the statement, which shows for the year under report and for previous years the distribution of the tax as between Calcutta and the rest of the province:—

YEARS.		Act imposing tax.	NUMBER OF PERSONS ASSESSED IN—			AMOUNT OF TAX REALIZED IN—		
			Calcutta.	Rest of province.	Total of columns 3 and 4.	Calcutta.	Rest of province.	Total of columns 6 and 7.

* Figures not available.
† Exclusive of the tax on salaries, &c., recovered by the Accountant-General and the tax on the interest of Government securities.

From these figures it will be seen that during the year 1892-93 as much as Rs. 17,21,695, or 48 per cent. of the whole collections, were contributed by Calcutta, and Rs. 18,63,079, or 52 per cent., by the rest of the province.

Coercive measures.

10. The following statement exhibits the main facts in connection with the coercive measures which had to be taken for the realization of the tax:—

YEAR.		Number of persons finally assessed.	DISTRESS WARRANTS.		CASES OF DISTRAINT.		CASES OF SALE.	
			Number.	Percentage to column 2.	Number.	Percentage to column 2.	Number.	Percentage to column 2.
1		2	3	4	5		7	8
1891-92	...	103,176	6,450	6·2	2,329	2·2	333	·3
1892-93	..	103,894	5,559	5·4	2,460	2·4	362	·3

In Khulna, Singhbhum, Muzaffarpur, Darbhanga, 24-Parganas, Jessore, Purnea, and Hooghly, the proportion of warrants issued exceeded 10 per cent. of the number of persons assessed. It is noticeable that in six of these districts (namely in 24-Parganas, Darbhanga, Khulna, Singhbhum, Purnea, and Muzaffarpur) the collections were below 95 per cent., which fact tends to show either that the low percentage of collections was due rather to the unwillingness of the assessees to pay than to neglect on the part of the collecting officers, or else that the work of collection was not commenced sufficiently early, and that therefore coercive measures had to be undertaken to a large extent at the end of the year.

11. Under section 9(2) of the Income-tax Act, a small commission is allowed to managers of companies or other employers of labour who will collect the tax from their employés on behalf of Government. The total amount of tax collected in this manner was Rs. 2,47,918, as against Rs. 2,52,448 in the previous year, and the number of companies, &c., who undertook to collect the tax fell from 340 to 324 in the year under report. The largest decrease was 29 in Darjeeling, which is said to have been due to the fact that previously in

several cases managers had been allowed to pay in their tax under this section and claim commission, although they were the only assessees in the concern. The continued decrease in the number of persons making use of this section seems to corroborate the suggestion that employers, especially natives, do not consider the remuneration offered sufficient reward for the trouble of collecting the tax.

Expenditure.

12. The total expenditure for the year, including the cost of contingencies and the remissions under Rule 13 of the Bengal Government rules, amounted to Rs. 1,80,171, against Rs. 1,86,959 in the previous year. In view of the remarks in paragraph 10 of last year's Resolution on the subject of travelling allowance, the further increase of expenditure in that direction in 1892-93, cannot be regarded with unmixed satisfaction. The Lieutenant-Governor is still of opinion that supervision should be exercised to prevent these charges increasing beyond the point when they cease to give sufficient return for the expenditure to be remunerative to Government. The percentage of cost, excluding contingencies on the total collections, is 4·3, the same for the whole province as in the previous year. In eight districts the cost exceeded 10 per cent., amounting in Singhbhum to the very high percentage of 24·3, and in Palamau to 15·7.

13. The system of payment of income-tax by money-order continued to work satisfactorily. In Saran, in five cases, amounts were remitted by telegraphic money-order. No serious cases of embezzlement were discovered during the year. In one case the prosecution of an assessor for the production of false accounts was ordered, but as the evidence appeared insufficient, the case was allowed to drop. Three persons were convicted for personating assessors and illegally collecting the tax.

14. The names of the Deputy Collectors specially reported by the Board as having done good service will be communicated to the Appointment Department.

The thanks of Government are due to the Board for their supervision of the collection of this tax, which is reported to be no more popular now than it was when first introduced: the people have, however, now become familiarised with it, and the Lieutenant-Governor trusts that even greater attention will be paid by District Officers during the current year to realise the tax with punctuality and system.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 9th September, 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Sept. 9, '93 Kalna ... Katwa ... Raniganj ...	0·83 0·57 0·11 1·50	Weather—hot and sultry. Rain wanted for the *aman* crop. Harvest depends upon good rain within next week. Prices of common rice :— Srs. Burdwan ... ... 10 to 13 per rupee. Kalna ... ... 9 to 12 per rupee. Katwa ... ... 12 4/16 per rupee. Raniganj ... ... 12 per rupee.
	2	Bankura „ 9, '93	1·46	Weather—seasonable. State and prospects of both early and late rice good. Prices have slightly risen, the supply from the interior to the market having fallen short. Common rice is selling to-day (9th) at 12 seers 8 chitaks per rupee at Bankura and 12 seers at Vishnupur.
	3	Birbhum „ 9, '93 Rampur Hát ...	2·02 2·26	Weather—seasonable. Standing crops doing well and the prospects continue favourable. Common rice sells at from 12 to 14 seers per rupee.
	4	Midnapore „ 9, '93	2·75	Weather—hot and oppressive and certainly seasonable. Prospects continue hopeful, and the rainfall is sufficient. If we can only get rain in October we shall have a 14-anna crop. Prices of common rice :— Srs. Sadar ... ... 11½ per rupee. Contai ... ... 13 per rupee. Tamluk ... ... 11 per rupee. Ghatal ... ... 10 to 12 per rupee.
	5	Hooghly „ 9, '93 Serampore ... Jahanabad ...	0·81 1·40 0·40	Weather—cool and showery except in Serampore, where it was hot and dry. *Aus* harvest and steeping of jute progressing. *Aman* and sugarcane doing well except on high lands, where a little more rain is wanted. Fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 10 per rupee. Serampore ... ... 10 to 11¼ per rupee. Jahanabad ... ... 10 to 12 per rupee.
	6	Howrah „ 9, '93 Ulubaria ...	0·80 1·40	Weather—hot. State of standing crops fair. Reaping of *bhadoi* crops still continues in parts. Fodder and water sufficient. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 9, '93	0·63	Weather—seasonable. Transplantation of *aman* almost finished. *Aus* being cut. Prospects of crops fair except in the thana of Bankipur. Prices of common rice :— Srs. Sadar ... ... 10 to 10½ per rupee. Diamond Harbour ... ... 11 per rupee. Barasat ... ... 10 per rupee. Basirhat ... ... 10 per rupee.
	8	Nadia „ 9, '93 Kushtia .. Meherpur ... Chuadanga ... Ranaghat ...	0·85 0·59 1·22 0·53 0·58	Weather—hot. Prospects of crops continue fair. Price of rice has slightly risen in spite of fair *aus* harvest. Lands being prepared for winter crops.
	9	Khulna „ 9, '93 Bagerhat ... Satkhira ...	1·36 2·65 0·90	Weather—hot with occasional showers. *Aus* harvest approaching completion. *Aman* doing well.
	10	Jessore „ 9, '93 Jhenida ... Magura .. Narail .. Bangaon ...	0·68 1·13 0·84 4·45 0·97	Weather—sultry. Harvesting of *aus* and steeping and extracting of jute nearly over. Prospects of *aman* fair. Cattle-disease reported from Salikha in Magura and Mahespur in Bangaon subdivision. Fodder and water for cattle sufficient. Prices steady.
	11	Murshidabad „ 9, '93	2·30	Weather— hot and sultry. Harvesting of *bhadoi* pulses commenced. Winter rice doing well. Fodder sufficient for cattle. Common rice sells at 11 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Sept. 9, '93	2·77	Weather—seasonable. Harvesting of *aus* nearly over. Transplantation of *aman* still continues. Prospects fair. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	„ 9, '93	0·56	Weather—seasonable. Harvesting of *aus* nearly finished. Transplantation of *aman* continues. Prospects fair. Fodder not sufficient. Cattle-disease reported from five thanas. Common rice sells at 8 seers 6 chitaks per rupee.
	14	Tippera	„ 9, '93	0·44	Weather—very close; gathering of clouds in the afternoon and more or less foggy mornings. Water subsiding very gradually. More rapid subsidence required for transplantation. Prospects of *aman* improving, but not altogether satisfactory. Want of fodder still felt. Death of cattle almost stopped. Rice selling at Rs. 4-8 per maund at Comilla, Rs. 4-14 at Chandpur, and Rs. 5 at Brahmanbaria.
	15	Chittagong Hill Tracts.	„ 8, '93	0·86	Weather—hot and cloudy. Harvesting of both *jum* and early plough-paddy (*aus*) continues. No vegetables in the bazar. Condition of cattle generally good. Common rice selling at 7 seers per rupee.
DACCA DIVN.	16	Dacca	„ 9, '93	1·51	Weather—hot and cloudy with occasional rain. *Rowa* and *shail* paddy being sown. Harvesting of jute going on and that of *aus* nearly finished. Prospects of *aman* paddy fair, but it has been submerged in some places. Water subsiding. Common rice selling at from 7 to 10 seers per rupee. Fodder not sufficiently available. No cattle-disease, but they are growing weak for want of fodder and accommodation owing to high floods.
	17	Faridpur	„ 9, '93	2·56	Weather—hot. River water has begun to rise again slowly. *Aman* and sugarcane said to be improving, but otherwise conditions unchanged. Common rice sells at 9 seers per rupee. In the Goalundo and Sadar subdivisions there is sufficiency of fodder. Some cattle-disease in thana Palong of the Madaripur subdivision.
		Goalundo	...	1·74	
		Madaripur	...	0 72	
	18	Backergunge	„ 9, '93	3·92	Weather—seasonable. State and prospects of crops fair. Common rice sells at from 8 to 10 seers per rupee. Fodder and water sufficient.
		Pirojpur	...	2·03	
		Patuakhali	...	2·79	
		Bhola	...	5·64	
	19	Mymensingh	„ 9, '93	2·59	Weather—fair and hot. The flood is subsiding. Transplantation of *aman* paddy is pushed on vigorously. Prospects of standing *rowa* paddy appear to be fair. Common rice selling at 8 to 9 seers per rupee. Fodder reported not sufficiently available in Netrakona, Kishorganj, and Tangail. Condition of cattle good.
RAJSHAHI DIVN.	20	Dinajpur	„ 9, '93	2·03	Weather—fine with occasional showers. *Aus* crop is being still harvested. Transplantation of *aman* is nearly finished. Prospects fair. Price of rice both at Sadar and Thakurgaon stationary. Condition of cattle good. Fodder and drinking water sufficient.
		Thakurgaon	...	2·82	
	21	*Rajshahi	„ 9, '93	0·15	Weather—hot and seasonable. Condition of the standing crops good; we are now getting just the weather suitable for the crops. Water and fodder-supply ample. Condition of cattle good. Price of rice varies from 10 to 13 seers per rupee.
		Nator	...	2·92	
		Naugaon	...	0·52	
	22	Rangpur	„ 9, '93	3·33	Weather—seasonable. The recent rain has been very beneficial. Transplanting of winter paddy almost completed. Prospects favourable. Jute cutting and steeping going on. Price of common rice 10 to 12 seers per rupee.
		Gaibanda	...	1·53	
		Kurigaon	...	1·15	
		Nilphamari	...	3·22	
	23	Bogra	„ 9, '93	0·73	Weather—hot and fine. Transplantation of *aman* is about finished. Jute is nearly all cut. Prospects of *aman* fair. Common rice sells at 10 seers per rupee. Fodder and water sufficient.
		Sherpur	...	0·34	
		Naukhila	...	0·52	
	24	Pabna	„ 9, '93	1·85	Weather—seasonable; partially cloudy. Harvesting of *aus* and jute nearly finished. Prospects of *aman* fair. Common rice sells at Rs. 5 per maund at Sirajganj and 10 seers per rupee at Pabna. Fodder and water-supply sufficient.
	25	Darjeeling	„ 9, '93	6 58	Weather—seasonable. *In the hills:—Bhadoi* paddy and *chota marua* ripening. Indian corn and potatoes being harvested. *Bara marua* and *aghani* paddy progressing favourably. *In the Terai:—*Jute being cut and steeped. *Bhadoi* being harvested. *Haimanti* transplanting completed. Prices of coarse rice:— Srs. Hills ... ... 9 } Terai ... ... 10 } per rupee.
		Siliguri	...	3·09	
	26	Jalpaiguri	„ 9, '93	7·75	Weather—hot and cloudy. Harvesting of *bhadoi* paddy almost finished. Transplantation of *haimanti* paddy still continues. Washing of jute continues. Condition of cattle good. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 11 } Alipur ... ... 9 to 10 } per rupee.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Sept. 9, '93 Begusarai ... Jamui ...	2·97 0·81 1·28	Weather—hot and cloudy. Outturn of *bhadoi* not good. About 50,000 bighas of *makai* crops are said to have been damaged by the recent flood of the Gandak. Paddy thriving well. Sugarcane good. Cattle-disease towards Nawadih and Shaikpura. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 10¾ to 15½ } per rupee. Begusarai ... ... 12 Jamui 12
28	Bhagalpur „ 9, '93 Banka ... Madhipura ... Supaul ...	4·88 2·71 7·34 3·83	Weather—hot. General rain towards the end of the week. *Bhadoi* being harvested and *rabi* lands ploughed. The rainfall of the week has been beneficial to the winter rice. Price of common rice 13 seers 14 chitaks per rupee.
29	Purnea „ 9, '93 Kishanganj ... Araria ...	2·59 5·75 3·00	Weather—very sultry succeeded by windy and rainy weather. It has again become hot. *Bhadoi* being cut everywhere; result good. Jute being steeped. Transplantation of *aghani* finished in Araria, where the recent rain has been very beneficial. In Sadar subdivision it is nearly finished. In Kishanganj, where it had come to a standstill in some parts for want of rain, it is now going on vigorously owing to the recent rainfall. No want of fodder and water for cattle. No cattle-disease. Prices of new *bhadoi* rice:— Srs. Sadar ... ... 14 to 18 } per rupee. Kishanganj ... ... 16 Araria 20
30	Malda „ 9, '93	1·15	Weather—seasonable. Reaping of *bhadoi* paddy finished. Winter rice thriving. *Kalai* being sown broadcast on low lands. Common rice sells at from 11 to 16 seers per rupee. Fodder and water sufficient for cattle.
31	Sonthal Parganas „ 9, 93 Deoghur ... Godda ... Jamtara .. Pakur ... Rajmahal ...	1·55 1·35 1·85 1·13 0·81 0·30	Weather—occasional showers of rain with hot intervals between. Prospects of *aghani* paddy very favourable, though a little more rain is required in the high lands. Cultivation of *kurthi*, *urid* and *surgujá* going on briskly. Price of rice stationary. Fodder and water sufficient.
PATNA DIVISION.			
32	Patna „ 9, '93 Barh ... Bihar ... Dinapore ...	3·03 2·60 0·90 1·38	Weather—hot with occasional showers. The recent rain has done much good to the rice, which is now all transplanted, but more rain is needed in the Bihar subdivision. The *bhadoi* crops are practically all reaped with a poor outturn. Prices of common rice:— Srs. Sadar ... ... 15 } per rupee. Barh ... ... 12½ Bihar ... ... 15 Dinapore 13
33	Gaya „ 9, '93 Aurangabad ... Jahanabad ... Nawada ...	3·33 1·26 2·49 1·67	Weather—very warm with occasional rain. Harvesting of *bhadoi* and transplantation of paddy nearly over. Prospects of latter crop favourable. Common rice sells at from 11 to 15 seers per rupee. Fodder and water-supply ample.
34	Shahabad „ 9, '93 Buxar ... Bhabhua ... Sasaram ...	4·70 0·93 4·31 2·64	Heavy rain with spells of sunshine. The weather has been all that could be desired, and crop prospects are very good.
35	Darbhanga „ 9, '93 Samastipur ... Madhubani ...	1·63 2·26 0·39	Weather—very hot and showers occasionally. Floods gradually disappearing. Retransplanting of rice being pushed on where seedlings are available. The rainfall of the week has greatly benefited the crop. More rain, however, is still wanted in Madhubani subdivision. *Aghani* rice in places not affected by the flood is doing well. Fodder sufficient.
36	Muzaffarpur „ 9, '93 Hajipur ... Sitamarhi ...	3·11 2·47 0·16	Weather—hot and cloudy. In Sitamarhi paddy is being retransplanted in places washed away by the flood, where this course is possible. *Bhadoi* outturn may be expected in Sadar 5 annas, in Hajipur 6¾ annas, and in Sitamarhi 6¼ annas. Fodder plentiful except in Kutra thana. No disease among cattle.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Sept. 9, '93	2·72	Wind changeable; weather bright; occasionally cloudy with passing showers. Appreciable rain fell at Sadar only yesterday (8th) morning. Prospects fairly good on the whole, except that in a small area in thana Manjhi paddy has suffered for want of rain and some area not transplanted for the same want. Prospects go on improving in Gopalganj, and recent rain has done much good to all crops in Siwan subdivision. Water and fodder plentiful. Prices of common rice :— Chapra ... ... Srs. 13 c. 0; Siwan ... ... 13 10; Gopalganj ... ... 14 6 } per rupee.
		Siwan ..	1·42	
		Gopalganj ...	1·15	
	38	Champaran " 9, '93	2·15	Weather—much cooler since the rain of the 7th and 8th instant. *Saro* paddy is being reaped. Prospect of *aghani* paddy good. Prices stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack ...	...	Report not received.
	40	Puri " 7, '93	4·54	Weather—hot with frequent showers. Rainfall quite sufficient for the time being. *Beali* being reaped. *Sarad* being weeded. Transplantation nearly finished, Miscellaneous crops doing well. General prospects good. Prices fo common rice :— Sadar ... ... Srs. 13 to Srs. 15 c. 12; Khurda ... ... 11 to 17 1 } per rupee.
		Khurda ...	5·08	
	41	Balasore " 9, '93	6·67	Weather—cloudy with showers. Transplantation nearly finished. No complaint of want of rain. Prospect of a 12-anna crop. Prices have fallen at Balasore.
CHOTA NAGPUR.				
South-West Frontier Agency.				
CHOTA NAGPUR DIVN.	42	Hazaribagh Sept. 9, '93	5·75	Weather—seasonable. Estimated average yield of *bhadoi* crops 4 annas. Winter rice doing well, and the recent rainfall has improved prospects. Fodder and water abundant. Prices stationary.
		Giridi ...	2·11	
	43	Lohardaga " 9, '93	4·51	Weather—hot and cloudy. Reaping of *gora* paddy continues. Prospect of winter rice good. Common rice selling at 16 seers per rupee. Fodder and water plentiful.
	44	Palamau " 8, '93	2·89	Weather—very oppressive. There has been good rain throughout the district during the week. Prospects of the paddy crop are so far excellent. *Gora* paddy and *gundli* being cut. Ploughing has commenced for *rabi* sowings. *Kurthi* and *til* are being sown. Fodder and water plentiful. Rice selling at from 12 seers 6 chitaks to 16 seers 14 chitaks per rupee.
	45	Singhbhum " 9, '93	1·93	Weather—seasonable. Crops in excellent condition. *Bhadoi* crops being harvested; about 14 annas outturn expected. Price of common rice at Chaibassa 16 seers per rupee and 12 seers elsewhere. Cattle-disease reported from Monoharpur thana.
	46	Manbhum " 9, '93	3·11	Weather—seasonable and generally very favourable. *Gora* paddy is being harvested; probable outturn about nine annas. Prospects of winter rice so far good. Prices stationary.

STATISTICAL DEPARTMENT,
The 11th September, 1893.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1893.

	Inches.	Date.	Hour.
The mean pressure of the month	29·602		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·769	19th	10
The lowest pressure in the month	29·406	7th	16
The range of pressure	0·363		
	Hours.		
The total number of hours of bright sunshine during the month	114·9		
The maximum possible number of hours of sunshine ...	398·4		
	⊖		
The mean temperature of the month	83·1		
The average temperature of August from 24 years' registers ...	83·1		
The highest temperature in the month	91·6	14th.	
The lowest temperature in the month	76·4	9th.	
The range of temperature during the month	15·2		
The mean daily range of temperature	9·1		
The greatest range of temperature in one day	13·2	16th.	
	Per cent.		
The mean humidity of the month	87		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	0·988		
The average vapour tension of August from 9 years' registers ...	1·002		
The mean cloud proportion of the month	8·07		
The average cloud proportion of August from 16 years' registers	8·04		
The total rainfall of the month	8·37		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 62 feet above the ground)	8·19		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	1·79	31st.	
	Days.		
The number of rainy days in the month	22		
The average number of rainy days in August from 24 years' registers	25		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	143·3		
The mean difference of sun and air temperatures	55·6		
The greatest sun temperature	154·8	22nd and 27th.	
The greatest excess of sun over air temperature	67·2	27th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	77·0		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·1	12th, 18th & 21st.	
	Miles.		
The mean movement of the wind per day	107·1		
The greatest movement of the wind in one day	291·0	10th.	
The greatest movement of the wind in one hour	19·0	9th, noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 11, N.E. 5, E. 139, S.E. 219, S. 81, S.W. 175, W. 51, N.W. 5, Calm 58.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1893.

ONE of the most important features of the weather during July was the unequal distribution of rainfall, the falls in the northern districts being much heavier than those in the southern and especially the south-western districts, and the irregularity was accounted for by the frequent displacement of the trough of low pressure from its usual position (extending from Orissa in a west-north-westerly direction) to one much further north and close to the Himalayas. This arrangement was invariably accompanied by heavy rainfall in North Bengal, the adjacent parts of East Bengal and Assam, and at times in North Bihar. A second noteworthy feature was the absence of cyclonic storms, which, forming as they generally do near the head of the Bay at that time of the year, move across Orissa and keep the trough of low pressure in its normal position.

During the month of August, the weather of which is now being reviewed, divergence from that of July occurred in several important particulars—

(1) The trough of low pressure instead of being forced northwards has more frequently occupied a position to the south of what it usually occupies; that is, commencing from the Circars and south of Orissa, its direction has been to the north-west.

(2) Though, as in July, no cyclonic storms occurred, still on several occasions shallow depressions affected the weather in the Bay. These depressions were peculiar in one respect. Instead of forming near the head of the Bay, they either commenced in Burma or advanced from further east. Their subsequent motion was in an almost due west direction, and they therefore crossed the west coast near Ganjam.

(3) In consequence of the feeble character of the depressions and the southerly displacement of the trough of low pressure, rainfall has been very light and scattered over nearly the whole province. Only one district, viz., East Bengal, has received its normal average fall. Of the other districts the largest deficiency is in South-West Bengal and Chota Nagpur.

(4) As the sky was generally less cloudy than usual in the interior of the province, temperature has run high, and there is on an average excess of about 1° at nearly all stations.

In the early part of the month the general conditions were not unlike those of July. A slight disturbance which developed during the last few days of July was still being felt in the south-western districts at the beginning of August, but beyond the light rainfall, which became general over the province, its effects were very slight. In the Bay, however, the steep gradients which had arisen to the south of the depression were accompanied by strongish winds, and the sea continued rough for some days. On the 2nd pressure began to recover very slowly. It continued briskly on the following day, when the pressure distribution as well as the general weather conditions were fairly normal. A brisk fall of pressure setting in over the northern districts simultaneously with a brisk rise in Orissa and the Circars, the trough of low pressure moved northwards, and fairly dry westerly winds became general, but only for a short time, as another low pressure area began to develop over the Bay, while pressure rose in the northern districts. The shallow depression was never well defined, but it led to very unsettled weather in the north-west angle of the Bay, and over the greater part of the province. Pressure gradients were very steep, and remained so for some days during the second week—an arrangement which led to stronger winds than were experienced at any other time during the month. The recovery of pressure after beginning in the north of the Bay was, for some unknown reason, suddenly checked, and gradients, though not steep over the Bay, remained much steeper than usual over the province. Strong moisture-laden winds therefore continued, and rainfall became very heavy at first in East Bengal, and afterwards in North Bengal and Bihar. It may be noted that during those days the trough of low pressure was again close to the hills. Pressure recovered very slowly, and the strong westerly or south-westerly winds continued almost till the middle of the month.

On the 14th rainfall to a large extent stopped, and from this date onwards till the end of the month comparatively fine weather obtained, though light and generally scattered rainfall continued. The southward displacement of the trough of low pressure became the prominent feature of the pressure distribution, and the formation of the shallow low pressure areas in Burma and their subsequent westerly motion the only fact worthy of special mention.

During the third week of the month pressure was steadily above the normal over the province, and readings were much more uniform round the coast of the Bay than is usual at that season of the year. The only interruption to the fine weather which then prevailed was the shallow depression which first began to appear in Burma on the 19th. It was in the centre of the northern half of the Bay on the 22nd, being accompanied by a cyclonic circulation of very light winds, and on the 23rd the centre had crossed the Ganjam coast. The depression moved away to the north-west, but a very shallow residual low pressure area remained for several days afterwards off the South Orissa and Ganjam coast, causing in these parts light northerly or easterly winds. This residual depression almost entirely filled up on the 28th, but it at the same time moved northwards into the south-western districts of Bengal, where rainfall became for a short time more heavy and

general. From the 28th to the 30th the trough of low pressure was in its normal position, and light general rain was falling over the greater part of the province. but on the last day of the month a slight depression had again formed over the south of Orissa, and rainfall was very scattered in Bengal.

Pressure.—Changes have been large only on one or two occasions, the depressions which formed having been more shallow than usual. In the early part of the month differences from the normal were very small, and the average pressure was very nearly normal. During the following week the largest oscillations were recorded, and about the 8th gradients were unusually steep. The rise on the 9th was ·16 inch in Orissa and the Circars, and more than ·1 inch over the whole of Lower Bengal. This rapid rise, however, did not extend northwards, and the result was that unusually steep gradients prevailed in Bengal for some days. These passed away slowly, and the distribution that followed was very uniform. During the latter half of the month readings were generally slightly above at inland stations and below the normal round the coast, and the shallow depressions which formed in the Bay were due quite as much to the excess in Bengal as to the defect where pressure was lowest. Towards the end of the month there was a steady fall at inland stations, and readings were again below the normal, though not to any great extent. Mean pressure for the whole month is uniformly above the normal by about ·01 inch.

Temperature.—Owing to the cloudy weather in the early part of the month, the air was comparatively cool, especially between the 5th and 12th, but after the 15th, when the pressure distribution became uniform, and calm weather prevailed both over the province and the Bay, there was considerably more sunshine, and temperature steadily increased. During the first week mean defect was about half a degree, but during the second it increased to nearly 1·5°. The rise then began, and by the end of the third week there was excess in all districts except North Bengal and Assam. During the last ten days excess averaged about 2°. The mean difference between day temperature and the normal varies from defect of 2·5° at Sibsagar to excess of 3° in the west of Bihar. Minimum temperature, on the other hand, is more uniform and generally high by about half a degree.

Rainfall.—The average rainfall for the larger divisions is below the normal in all except East Bengal, where it is exactly normal. The greatest difference is in South-West Bengal, where defect is 4·6 inches, or 36 per cent., and in Chota Nagpur, where it is 3·8 inches, or 28 per cent.; South Bihar also has received much less than usual, nearly 3 inches, while in Orissa and North Bihar defect is about 2 inches. It is only in the eastern half of the province, where normal amounts have been recorded, but the distribution was very unequal, as a large part fell during the disturbed weather in the second week. The large defficiency in the western districts is probably due to the weak character of the disturbances which occurred during the latter half of the month. The depressions which form in the north of the Bay generally pass through these districts, and cause heavy rainfall at the time of their passage. At other times westerly winds prevail, and the rainfall is under these circumstances of comparatively small amount. The number of rainy days, that is, days on which at least a tenth of an inch fell, was everywhere below the average by about 10 per cent. in the eastern and 20 per cent. in the western half of the province.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight divisions giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1893 expressed as a percentage of the normal fall for the period.
Orissa	422	309	238	89	607	99	67	84	145
South-West Bengal	120	464	160	115	225	183	94	64	133
North Bengal	104	377	145	213	96	100	166	90	121
East Bengal	80	291	123	149	207	134	103	100	130
North Bihar	170	357	134	208	84	100	151	85	118
South Bihar	115	602	188	255	171	156	122	74	124
Chota Nagpur	155	585	226	151	212	185	121	72	135

From the above table it will be seen that during the past three months there has been a steady decrease of rainfall by between twenty and fifty per cent. of the normal in all districts except North Bengal and North Bihar; that in these two districts there was a steady increase during June and July, but that during August it had again begun to fall off.

Excess falls were received in the south of Orissa and over a strip of country in the extreme east of the province, including Chittagong, Tippera, and parts of Noakhali, Mymensingh, Rajshahi, Bogra, Dinajpur, and Rangpur; also in Jalpaiguri and the Darjeeling districts. The only places where excess was more than 5 inches were—Buxar 20, Siliguri 6,

Jamalpur 6·7, Netrakona 7, Fenny 12, and Cuttack 5 inches. Elsewhere falls were below the normal by fairly uniform amounts. Defect of more than 5 inches occurred in parts of the following districts:—Midnapore, 24-Parganas, Howrah, Hooghly, Nadia, Burdwan, Bankura, Birbhum, Malda, Kuch Bihar, Shahabad, Gaya, and Hazaribagh. In the other districts defect was between 2 and 5 inches.

Falls of more than 10 inches occurred in the south of Orissa, East Bengal, North Bengal, and part of North Bihar. Along a narrow strip running east and west across the province, and containing parts of Rajshahi, Malda, Murshidabad, the Sonthal Parganas, Manbhum and Lohardaga, falls varied between 10 and 15 inches, while immediately to the north of it, especially in the central districts, amounts were less than anywhere else in the province, and in places less than 5 inches. In the south of Orissa amounts varied from 10 to 16 inches, and in the other part from 4 to 12 inches. Over the western districts, except in North Bihar and part of Chota Nagpur, falls were very uniform, and generally between 8 and 10 inches. In South-West Bengal, where the greatest deficiency occurred, the lowest fall was 4 inches in part of the Bankura district, and the highest 16 inches at Saugor Island.

The following table gives full data for the comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; the fourth column states as a percentage how much the district rainfall of the month varied from the normal:—

Percentage Table for August 1893.

Division.	District.	Normal district rainfall for August.	Actual district rainfall for August 1893.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (—).

* Mean of 6 days.

* Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations, i.e., sum total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 9th of September 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, he corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 12th September* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 9TH SEPTEMBER 1893.

THE weather for the past week has been unusually unsettled, especially over the north of the Bay, as during the first two days a depression of considerable depth passed from the north-west angle of the Bay across the south-western districts, causing heavy rainfall in its passage over that part of the province; and almost immediately after it ceased to affect the weather in the province, a fresh disturbance began in Burma. This second depression moved into the northern part of the Bay, and by the end of the week was advancing into the north-west angle following the track of the previous one and developing in a similar way.

The first depression was partly described in the report of the previous week. Up till Saturday, the 2nd, it was moving in an almost northerly direction towards the Bengal coast, and, but for a rapid rise of pressure, which set in from the north-east, and seemed to be independent of the causes, which led to the formation of the depression, it would probably have passed over the central districts, but when the centre of lowest pressure was near Saugor Island, the direction of motion took a sudden change, and the depression passing near Balasore moved at the rate of about 20 miles an hour in an almost westerly direction. The rise of pressure which thus began from the north-east at first caused very steep gradients over Bengal, and strong squally easterly winds over the whole province, but as the wave advanced very quickly, the distribution of pressure underwent a material change in the course of a few hours, and the disturbed weather as quickly moderated. From being nearly half an inch in defect at Balasore on Sunday morning at 8 A.M., and more than ·2 inch in South-West Bengal, Orissa, Chota Nagpur, and the north-west angle of the Bay, readings on Monday at the same hour were less than a tenth below the normal, except at a few of the extreme western stations. Rain was general and heavy in the south-western districts during these two days, but amounts quickly diminished after this very rapid recovery of pressure and during the two following days, but specially on Wednesday, the 6th, very little rain fell anywhere in the province, while the sky had become almost cloudless in places.
